magnets. If you put another magnet in between they move out further, and 2 more magnets in and they move still further, and not you see your SS. The size of the SS is determined by the fields that it carries, and it has been preset to carry. It's very much like a tent, it goes back to the original teachings, you expand the tent as you need. It's no use having a 1 or 2000 km diameter SS when it's only one of you. How are you going to get to the other side, it's a waste of energy to go across. In the space development there are no control systems. Any time you come across the control system is understanding the process, that the majority of the size to this level has not been achieved. The maturity in understanding of the knowledge of the space T is to be detached from the matter state. And then we enter into a new dimension. ... in that process we see how fast we can change. This is one of the final frontiers of the knowledge of the existence in the U. You came in dimensions in the Gans, matter, neutron, now you have to understand the only way you go to a non-dimensional reactor (1:04). system operation, is that when you create the cluster that it creates its own soul, and then the strength of the soul creates the dimension of non-tangibility. This is the true flight in the space of the U. If man reaches this point of maturity, then he will have achieved to travel in every dimension in the U even to the level to the soul of the Creator. You have to understand what is next, what are the reasons, the results, when you pick up a data, don't just look at it as something, but look at its interaction, how this field interaction has lead to what? Why one of the reactors slows down, why we don't see ?? field on one side, ?? didn't see the field on the other side. We see how we interact of the fields, put field forces on all totality of the systems. This is part of the understanding of the science of the U. If you go back to what I explained today, it's exactly what was explained 3 years ago in the teachings when we referred to FP. If you go back in the teachings, what you see, and what you saw a few minutes ago in the creation of FP in each quarter, it was part of the teaching. Now you understand how it can be achieved. Those of you who work on the neutron development, there is still a step to go. We came from the Gans's we created the neutron, now you have to learn to use the fields, which is a strong neutron connection to create the FP, (1:06). in all 3 spaces of the reactors that it leads to creation of non-tangibility condition. If you manage to achieve a balanced field force, then you manage to achieve ttoal non-tangible condition, a hundred percent. When you see the spaceships which create clouds, or ones that can travel at speeds beyond your imagination have reached the understanding. As passengers have reached the understanding of the totality. if you carry such a field you can manifest yourself in any dimension in the U according to its environment. If you are a passenger of such a SS and you appear on earth, MG field of this planet dictates the shape you manifest yourself, which is the shape of 2 arms, 2 legs, or 4 legs. You have to understand that not all the creatures that come on this planet that you see end up like you with 2 legs, 2 eyes, and 2 ears. According to the structure of their origin they can appear as plants or as animals that live in the oceans, they can appear as structures within the atmospheric condition of this planet. All do not necessarily end up the way you think they have to have and appear and talk. Their field interaction from the source which they, what you call AA, or DNA, or RNA have set up, dictates the manifestation of appearance on this planet. On this planet they might appear as a fish but on another planet they might appear as a tree. Because it's according to the understanding of the field forces in that environment. (1:08). We can create conditions that in its interaction can create the co-existence of all races in the U. Because when you create the dynamic, plasmatic, non-

tangible environment through the interaction of the fields of the neutron, then you understand that every entity in the U has a home to live in. then you understand the totality of the creation of the Creator. Then you understand that you become part of, non-tangible dimensions of existence. Some of those who elevates your soul to that level, you'll find out that you become detached from physicality, as we say, wherever I lay my head is my home. Wherever I have the field strength of existence, I'll manifest myself. Now you understand how easily the knowledge of creation can be taught. It's the process that we have to understand, to be able to follow to reach the dimension of non-tangibility, then you achieve transmutation, transportation and in so many ways understanding of the plasma in the U. We say, blessed are those souls who understand. As I said, we teach you step by step, and there is still another step after this non-dimension, then that brings you to the level of understanding of the Creator. (1:10). We started from the matter state of Cu and Zn and how through the understanding of it we have covered the full cycle of the creation. To come from matter state to reach the level of understanding of the Creator. But you have, and the man's intelligence at this point in time, has grown enough to be able to take these steps in the coming time. The research center in China is still struggling to reach the neutron manifestation, but once it is reached and the Free Plasmas are created, it comes to creation of the FP, which comes to creation of Pl appearance, confirmation of the existence through the Pl M fields, which then makes, you'll see, the time will come when the materials, very easily, literally disappear, the reactors, motors, and everything else, through the interaction of the fields of the FP, become in the energy level and become part of the structure of the FP themselves. Either way, it is very much the same as when the man passes away, when the soul takes over, and calls upon all the souls of every single element to join in to elevate the self, to create a new dimension in its own existence. In this process we are not doing anything else. It's just for man to understand the level of the process, the level of conversion, how the STM will convert itself, and how our physicality converts to become a non-tangible, (1:12). and on its own take shape in its existence. So those of you who are worried, you went from the H Gans to the Gans, then you came to the plasmas, then you came to the neutron, and you say now you have gone somewhere new. I haven't gone anywhere new. I have come back to the beginning from 3 - 4 years ago. The creation of Free Plasma. But now you understand that the soul of the controller , the soul of the captain has to be so pure that it can accept the condition of the interaction of the fields. And if some of you are pure enough, you'll understand how the soul of the Creator shall create from the existence of the fields. It takes me 1 stroke of a pen to show, but is the man ready to understand. As in the writings of Bahuala, if I tell you how beautiful it is, you'll all commit suicide. Because you become part of it, you are part of the structure of It. We have a saying in Farsi .. It means every single drop of the rain coming together it makes in one go the oceans made from the drops, so is the drop of the soul of every life on this planet, in this U, which leads to that ocean which is the ocean of the soul of the Creator. (1:14). Then are you a drop or are you the ocean? Even though you are still a drop within the ocean, but you are the ocean which creates the further drops. And those who understand the theology of the universal existence by now have found the answer to the position of the Creator. Then do we need to teach more? This way we have completed the cycle of the teaching for the man to be able to enter the Universal Community and be equal. And from then on whatever he adds to his knowledge is according to his intelligence of understanding the

soul of the Creator. How close, now that you are part of, would like to be. As I said, before, the teachings become very fast, and become faster, because a number of organizations and governmental organizations and individuals are on the path to achieve, so we make it clear so they understand what they are about to see. .. Any questions. (1:16). Or you are all ?? enough to understanding the truth. Q: When do we go to Mars? Q: Do we still use wings in our reactors with the neutron alone? What do you mean by wings? Do you want some feathers? I am assuming he means some kind of rotation device inside .. It means you haven't understood the process that I explained. .. Always when you speak about Pl to understand the totality. When you speak about the Pl even in 2 or 3 dimensions, when we speak about the direction of the flow of Pl, itself it has multi-facets operation, it's not all in one direction, one field. This dynamic system inside, itself creates its own dynamism. It's the same with this one (outer core) and if this one matches with this one, it pushes and the other one pulls. And this creates a dynamic system of the both systems. (1:18). Those of you who work on the space development T will have to realize it. I emphasize on it again and again until it is understood, that the MG field of your SF can never change. These 4 reactors which you start with in your mechanical system will have to stay at a specific given space condition, because without it you can't create the tangibility. None of them can fall or rise, because then you loose half of this field or half of that field. You loose half of your plane and suddenly your spacecraft is open. In the process when you come into the field free force of the Pl, to construct, to understand that you can't loose what we call your boundaries. You can play with everything else with respect to everything to be pulled, but these 4 (reactors) are sacrosanct. They have to be to be able to contain the shape. Then it leaves you with how to play with the fields within the structure. You have to maintain the structure. ... you have to create a condition inside that it allows you to be pulled in one direction, or to move to one direction, or to create the matter. (1:20). Then you are limited to what you have created the plasmatic field force which lead to creation of the matter state or tangibility or visibility. Then you understand why all the SS you see in the U are of the same color more or less, depending on the point of interaction with the environment of fields. They're silver in color and it has a reason for it. If you go back in interaction of the field flow expansion, that we always talk about a silver color. In fact it's not silver, which in interaction of the fields ?? condition of this planet gives the illusion of silver color, but it's transparent. If you can create fields above the fields of the interaction of higher order of the Pl, which the system has created itsefl out of, which is only as part of the attributes of Creator, you can see through these systems. It's like putting .. (break) , do you understand , the process, is applying the process. The systems in China, AZ, in governmental office who are replicating it through the teachings, it's not completed. But they have to learn the step that they can control the next step, (1:22). It's like the captains from the space reactor in China, we have chosen a specific soul that he has to train himself to be that, that allows him to be, what we call the captain. The same is with AZ, and other organizations who are running these. If you have people of the ambition and wrong order they will never achieve it, it doesn't matter what happens. Any other questions. Q: You showed the drawing of the Pl and the interacting fields, and some were going out and some were going in, this relates to a discussion we were having yesterday in the plasma reactors group, so in that circumstance is there a polarity to the structure, a in and out to, how do you add up all the bits and pieces, is there some

relationship to them all, is there harmonics involved or some kind of relationship to all the different parts? The process is very simple. When you create .. he draws a SF of reactor. Now you come into the neutron level (1:24). and you have created the 2 neutron dimensions because they balance themselves. In creating the field plasmas, once they are created, you find something interesting, because now it is the field itself and not the matter, you'll find that they balance themselves. The structure now is very much the same as if you would call if the AA, (CONH), the orange cores are what you would call, DNA and the green ones are RNA. Each ones carries a combination of the cells soul of itself in interaction with the others. there is nothing you can dictate, but it is dictated to, according to the field environment. And we know how the environment can effect the field flow in each reactor. Yesterday in the run away situation I asked our team to shut down to 2,00 (rpm), you can't shut down totality, you suppress to the matter state that the Pl can't enter. that's all we need to do, today or tomorrow. When the storm goes away it's still not finished, you have to wait for it to balance its energy. And then you have to create that condition that the balanced energy will create field forces (1:26). that dictates the condition of flight. { Do you need a gate to enter in a } You do not need a gate to enter or a door to enter, in the dimension of physicality as we have it. The spaceship program is the understanding of the totality of the balance of the STM. If you look at Armen or others who have been around the KF for the last 4 or 5 years they'll tell you we have spoken about the same thing, it's exactly what was taught for the past 3 years, now you understand how to achieve it. It's not that the neutron is everywhere, now we got the neutron in a free condition, we need its fields that it leads to the creation of the neutron itself. That field has no dimension, you come to non-tangible space reactors, because now you have created ?? position. It's very much like putting a scafoflding to build a building and after you build the building you take the scafoflding down. Without the scafoflding you can't build it, because you can't put everything in position. (1:28). Now you build the scafoflding, put everything in position and then you take it down. the tangible space reactors which you have built up to now, ?? is a scafoflding to create this non-dimensional, non-tangible reactors. Now you see how we take the scafoflding off, all the motors and things are not needed. So it's very easy we have to get to the point of putting the bars and bolts and joints of the scafoflding together, to put the things in. Now we put the building together, now it has solidified, it has built its shape. Now we take (scafoflding) it away and then we'll see the ttoal manifestation of what we call, non-tangible systems. The whole human race can fit into one spaceship, if they decide they want to leave and where they want to go. This goes back to what we taught, is it time to leave, because is there a disaster on the horizon. Could be, but how fast can man achieve this? It's very much like when you see the ship wreck and you see the others floating and you try to catch everyone to be saved. Are we going to save the whole mankind and all the souls on this planet? Is it the time that the ship is about to go? Are we all in the lifejackets and floating in the lifeboats? And is this the lifeboat for humanity? (1:30). Any other questions. Or is man so in love with the physicality that he doesn't want to let it go? Well, that's probably true otherwise we wouldn't still be here on this planet. Something is keeping us here, and it's not the beer. Are we here for the tear. Maybe that's it. Q: I am reading Book 3 The Creation of the Universe and also the Fukoshima documents. 1. Why is some radiation so dangerous to human life, birds and fish etc. Is it plasmatically .. what does the radiation do to effect the DNA (1:32). You see radiations

are not dangerous. The source of radiation can be dangerous because if you understand that structure of the human body is in the plasmatic condition ... break .. in the Gans state, what we call radiation is a mono energetic, it's become that plasma which has reached the position of, what we call the neutron has created and released. All the radiations in what man calls radiation, are energies which are released ?? in balance from the neutron. We do not have energy release unless it's from the subdivision of the Pl of the electron or proton, (1:34). which is very rare, it's so rare because they balance each other out. So when you receive what we call radiation, it's exactly what you have here, (on the screen), this is a neutron, in that process the neutron is feeding, is releasing its energy, it has to find a matching somewhere that it can interact to, and the body of the man has that position, being weaker it receives. But the same time when we receive the radiation field we are emitting also. It's that emission of fields from the atomic or what you call molecular plasmatic condition of the body of the man which causes the damage, and not from what we receive. What we receive is 1 megawatt, what we give is more than 1 megawatt, the energy loss is the cause, not the energy gain. We have been taught a ttoal upside down physics. remember Tesla worked on this (what you give) and Miles worked on this (what you receive). Tesla can make a Faraday cage, Miles can ?? pass around the cage. There is a ratio in this. In the tests we know the ratio. So when you speak about are the radiations dangerous. When i set up to work with Fukosima, it's not what radiation was coming into the body or environment, it's what I could take out of the environment. (1:36). It's opposite to the present knowledge of the physics. In many of my works and teaching in private I teach this because man can't understand, can't comprehend it. You can't fill a cup in if it is already full. And if you go by the law of Newton, if you understand in the matter state, then what they say, what field exerted can follow through. To displace the water from the cup, you can't put 1 neutron in to get 1 out, you need to be able to put more then 1 neutron to be able to pass the flow of the cup. In a plasmatic field flow, there is a ratio in what has to go out, that you can take the fields in. When you speak of nuclear radiation, you don't look at what is absorbed, you look at what environment can empty that, that field can be taken in. The damage comes from the rejection or release, not from absorption, that's why most of the present radiation and what we call nuclear plasma technology have a problem. They have not understood. Tesla in the later part of his life understood this but he couldn't shape it. Go to the work of De Vinci, in part of his work, in the process of when he was opening the human body he saw the fields, but he could not. In some of his paintings, he refers to it in the drawing of his paintings, because he couldn't put it in words but he could paint it in the paint. (1:38). Now for the first time you understand, but you have to see when you have a field coming in ?? what is empty to accept that, which is much stronger. When you drop a stone in a cup (of water) it doesn't displace a the same amount of the water as the stone, but it carries the wave, the pressure with it as well. If you put a stone in the cup you'll displace the same amount, but if you drop a stone you displace much more. Radiation fields come as displacement not as placing, so they carry a massive amount of more fields. To accommodate that you have to make the space empty for it, that it can come in, be absorbed. The science of man has always looked at physicality. It's a very simple thing, but there is a ratio, an amount of fields that you can receive to the amount of fields that you can give back. It's always what you give back is more because you have not only to find the space for the energy that comes in, but the disturbance that energy has created

with the other fields it has brought with it. Once the world of science understands this, half of the world energy system is solved. Not half, more or less 100% of it. Tesla touched it, if you go through his work in the later part of his life, you see some indication of it. (1:40). If you look at De Vinci's paintings in the later part when he took the body of the man and he started to understand the structure, in that process he was enlightened, he saw things and it comes out in some of his drawings. You see clearly if you understand the knowledge. But he couldn't explain it because it was something that was not in the world of science that he was taught and could think. There is a part 2 of the question, you might have answered it. Q: Why does DNA get effected by radiation when it's actually in the Gans state? I already answered it. Yeah, but you have to understand why DNA gets effected. Let's explain why, because DNA is a compact energy pack and somewhere this energy is absorbed by it. So it increases it. It increases the level. So now you are working in the H level, now you work in Tritium or maybe He level, so now you are in a higher level, because not only you absorb the field, but also what I call the energetic transfer of the field as well, and then it manifests itself. Now it doesn't work in the H, it works in the He or Deuterium or T level, that releases more, or the whole structure can't hold on to because one of the DNA structures has accepted it. DNA structure is totally AA based, so it has central dimension, plasmatic field, (1:42). which itself in some states is a matter absorption equal to what is received. Part 3, Q: How does the decontamination of radiation at Fukoshima work? The decontamination comes from the balanced fields. If you go back to the presentation of Yukoko when she went to Fukoshima and we had a live presentation. Actually do we know where in the archives these tapes are kept. ... some of it was kept in early KS workshops. ... (1:44). That was 2014 in February we started the KS Workshops and after a few months she went to Fukoshima. If you look at the processing when they did the testing in Fukoshima, and we know from subsequent testing in the Belgium nuclear center and the other data we have from other nuclear tests, is that we do not destroy or have gotten rid of the radiation. We have "in-locked" the radiation. This means, partially there are some other factors we can explain, when you have a nuclear element, it could be whatever, when you introduce a Gans which is in a plasmatic condition, so this creates a field, which in being a Pl these fields, at some point in a strength are ?? of the nuclear source, so what it does is it locks into it. We do not get rid of the radiation. If you do an atomic test you see the nuclear material is still there. This nuclear material is radiating all sorts of fields, but now with adding a Gans which is a Pl condition we lock it all into it. It becomes an electron to the .. can you hear me ... the fields from the Pl of the Gans it embraces the totality. We never get rid of the material. (1:46). Nuclear material .. now we have created a new atom. When we test for nuclear material it always shows that it is there. Sometimes conversion and division to a new material happens due to, by coincidentally being ?? of the division of the Pl of the radioactive material. This is one of the biggest concerns when we explained and we see the Fukoshima becoming untamed and everything, how we transferred by introduction of certain elements, the Cesium or Tritium, as the understanding of the both being the same, into gold. It's a conversion of one element into another by adding one which caused the release of one more element. Fukoshima is huge Japanese wish that they could have more to be able to create monatomic gold. I have explained this in the papers and the other teachings. When you release radiation in a Gans state you absorb, and partially the field strength falls enough to what it is to create a dimension that it opens up, and the damage

is there. If you have radiation exposure, all you need to do is to drink a cup of Gans's in the right composition, it absorbs all its fields ?? solid state??, and you urinate it or pass it through different ways. In some of the tests we see the radiation (1:48). actually being on the sweat of the man. .. What we see the surface radiation damages, because of its conditioning of positioning appears as sweat on the body. Some of the tests in Fukoshima confirms this. We actually sweat radiation through that condition on the skin. If you go back to the work of Dr. Rodrigo's we have shown in respect to the metal and the brain cancer the removal of the Ca from the brain cells and tumor. It's the same process with the breast cancers, when it opens up, the field is that way when it opens up because you create this condition out of the ocean of the fields of the matter state. Nobody puts a knife into it. It's the same as when put the magnets and you see them positioning themselves, by receiving of the plasmatic fields of the Gans through the Ca deposition in the Gans state in the body of the woman, you create that expansion. It's the same if you have the 2 magnets and you put one in between, they move back and create a space. But when you have a Ca in the breast of a woman, and you create a field into it, what happens, it opens up, why do we see the breast opening up and the Ca comes out, and it shuts again. Once you move the magnets out, then they find their position. This is why we don't need plastic surgery and the rest of it if the doctors elevate their understanding to a further step. (1:50). Because in the condition of the breast cancer, we have a matter state of the Ca which was deposited from the bone of the hip of the woman during the menstruation, to the breast. It's a physical conversion of the matter. And what happens, the matter state receives absorption, so now it's a positioning, so the breast opens up to find a new position, and when the surface Ca which is absorbed creates a M field of it, it is rejected by the body and then the breast closes. And because the field dimension creates a condition of the existence that was the shape of the breast, because that was the position of the breast which was already preplanned by the brain by the dimension of the soul, you get the same breast back again in the (same) position. In the first test with Dr. Rodrigo the breast became very small. You have to ask what was the psychology behind that disease, that cancer to start with. 'I don't want it to be there, so now I got rid of the cancer which isn't there (anymore), I keep it in a way that it (the breast) doesn't get used. It hasn't changed, we have enforced a new condition, but we haven't changed the soul. If Dr. Rodrigo or other doctors that do this, a number of cases of these breast cancers have been done, if they understand that they have to satisfy the soul of the patient, that they are satisfied with the condition which is created, not only in rejecting cancer, but it's been accepted by the soul of physicality and the soul of the woman, you'll see the matching breast to be reproduced. We have seen that in one test and the doctors don't understand it. (1:52). Because now the doctor has managed to get the confirmation of existence in a balanced position. And the balanced position was the way the breast was, you don't need open surgery or further plastic surgery. Because it showed that at that time it was a new knowledge, Dr. Rodrigo didn't satisfy the soul. If the condition of the soul was satisfied the breast will grow back exactly the same shape. But (now) it is the beginning and this is how we do the research and how we learn. Those is medical centers which are developing this new knowledge, new systems, have to understand, you just don't ofcus in any cancer you are trying to process, there has to be an additional unit that it always satisfies the soul. It's like the SS as I said, in the SS you have this process , of you have to keep the 4 reactors in a shape that in existence they keep the confirmation of the physicality. So is

the soul of the woman, if she decides she wants a breast like this and legs like this, when you process the breast cancer you have to satisfy this other reactors that it can keep the same shape. It doesn't matter what you do with it, you have enforced the rejection of the Ca, but you haven't brought the satisfaction of the soul in confirmation of existence, so you get what we saw (Dr. Rodrigo's case). In cases where the doctors actually understand and they satisfy the need of the soul, the shape of the breast goes back in position, this is what we taught in the teachings a few weeks ago, we don't need to create what we call kidney transplants and everything else. You take a kidney out and create a condition of the environment the same kidney will appear in the condition of the ?? work. (1:54). It's so simple, but now we understand the knowledge, especially now, hopefully the research centers and doctors have with today's teaching understand the creation of the non-dimensional reactors, spaceship systems, it should be very easy to understand. when you make the medical systems, I have seen it, it's part of the maturity of the system. If you look at it, they target, especially with the new dynamic systems, trying to sort the kidney cancer or whatever. Sorry you missed one part. Why don't you support the soul. In my teaching I have always said, if you can reach the soul you do not need the physicality to force a condition on it. We are still in a matter state of the medical application. Those who develop these new technologies in cancer or whatever, they have forgotten half of the body, it doesn't exist. They are so concentrated in physicality they forgot that the physicality was created out of the position of their soul. Why are you going to catch a fish, you have got the right net or hook ... just because you see the fish doesn't mean you're going to catch it. It's very much like, a program called the horse whisperer, he doesn't whisper to the horse, it matches to the soul of horse. And the horse responds. It's the same with the radiation, (1:56). in the nuclear, how we control it, we match the fields and we encapsulate it. But it is still there. In the medical application, you make so many systems to fit, but sorry you forgot the hip, you just run into physicality ??, you have to understand that every process, every medical system, has to have a system which is always fixed to fit, to elevate the soul, that the soul exists, then you find out you can cut the breast and it will grow back to its position, you don't need to try to get rid of it, or to get rid of the cancer. This is what I have always taught, that you understand the process and not (just) look for the physicality. This is what I said, about the guy with ILS, he wishes to die, he dismantles himself to die. If you can elevate the soul, the same body which creates the cancer is in understanding it, and it will disappear within seconds. Because he sends a button, wrong button, wrong decision. But we still go for the dimension of physicality. In reality those who work with cancer patients if you understand it, you make a health unit directly for the soul, you find out the position, strength of the soul, what is the condition of the weakness, in which part. Then the physicality, oh, the guy walked in, the cancers gone. There is a magic going on. No because now you understand the level of it. The same as when you come from a spaceship you create the physicality it fit the environment, because of the soul. What is the problem why don't you understand this part. (1:58). So what do we accept, do we create a radiation to the body of the man, or do we give the elevation of the radiation, as you want to call it, plasmatic level, to the STM that it fits his physicality. Would you like to work with a soldier or with the master, the general is easier to get to the command center .. high ranking officer to get to the general, you already know the position of the general so you can dictate it. Our medical systems should not at all be concentrating on

the physical part of the body. It means the science has not been understood by the doctors. Then the soul decides and the physicality will follow. I wrote to one of the K Seekers in the past 48 hours very simply, let the soul make the decision of life. And it made it so fast, because it was understood by the person and it was understood with the both souls (?? soul of physicality and STM), we agreed to not suffer with the physicality. Very simple. This is not some new teaching, I have taught this in different shape or form, I have done it in different ways for the past 20 - 30 years, long before the KF teachings started. There was an old lady in the hospital to die, she wouldn't die, she was there suffering all the time. And I said to the granddaughter, she is waiting for you to go and satisfy the condition of the soul in what she has done wrong to you. I encouraged her to go and see the grandmother. (2:00). She walked in, the condition was met, and the grandmother died the same night, hours after they left from the hospital. Because this is a knowledge we carry from the U, man has to understand the conversion of it. Our medical development has to be understood, and don't concentrate so much (on physicality), there is part of physicality that you have to effect, or whatever, but in the condition of understanding the disease is psychosomatic it has to do with the psychology, which means the soul has an effect on it. You treat the general and find out why he is destroying his own army. Because if the general understands that he is shooting himself in the foot ... unless he wants to do it. And that is his purogative, and that is why a soul decides to leave the physicality and not entrap it. Now you understand that the science, the knowledge of creation is very simple. It's just that we are so matter state conditioned that we do it. Because there is a pleasure in physicality. We make love in physicality, we kiss our child in physicality, it gives us pleasure and confirms that we exist. Not ... break .. Now from the teachings of today we understand that going in the ?? non-dimensional physical reality, (2:02). our physicians have to understand how to distinguish between the physical and psychological dimension which creates the physical dimension and those can very easily be sorted through the STM. If the soul decides to die and creates what we call psychosomatic illness like MS, ILS and everything else .. then ... we have to understand to satisfy the balance of the soul itself, not for us to dictate it. It's creating the condition and then you leave the position of acceptance to the soul. It goes back to the teaching of last week, you create the environment and all our physicians are very tightly involved in physicality and it is difficult and you have to balance it with the soul of every single cell. That they report to the boss that there is such a change and if the boss agrees, I will change. Then you can change. Why don't you go for the top, the medical systems have to be adopted now that you have gained the knowledge. (2:04). Any other question. Q: Are there any serious threats to the earth that should make us understand the importance of building a SS for the entire human race? The biggest threat to the human race on this planet is the human race himself. So that would be problematic to build a SS for the whole human race for one thing we would never be able to decide which place to go to.... We all have different agendas. What about having one SS with millions of SS contained within it? That's the earth isn't it? Yes. But they can't come and go as they please yet, though. Oh, they do. What do you do when you sleep. ... we want to know where the ship is when we come back. We go on a stand-by soul operation, we leave it to the soul of physicality, just keep the shape, I am going for a ride out to the. (2:06). No questions. I think we frigthened the people to understand the totality. Q: (continued from the Fukoshima question). Will it work the same way with other poisons such as Agent

Orange, a dioxin damage in Vietnam. ... There is something that now we can announce, we have explained it before but in funny ways. When you ask for this disease and that disease. One of the biggest problems at the moment, especially we see in different parts of the world has to do with these 3 M injections (vaccinations) which has caused havoc with many families, the mercury damage. As we said, we have a solution for this and in a very short time we will release the process that the families can release themselves from the damages of the injections. I have to come to an agreement with certain parts and parameters of the release of the information, but in principle, what you call, like autism, and other effects which we see with the introduction (2:08). of these 3 injections. Even though they are there to help the man, but apparently we hear that somebody has decided that we kill as many as we can, then there will be a half million of us, just because they managed to put a few billions together and they think they are god. They enforced others to control the population, this is from the immaturity of the brain and the soul, god forbid. And in that process they have created the introduction of mercury into these systems into the body of the man. Very soon we'll release papers, I have been writing a paper for nearly 3 years. I will temporally release a paper that it can be tested by FDA and the international organizations, that the effects on the brain of the children can be literally eliminated, totally within a matter of hours. It's not that we are holding back, there are certain parameters I try to release the information to. In that process, things like, certain diseases that are caused by the introduction of what I call, outside elements, by the development of the new sciences, some of them are deliberate and some are accidents. I will write and release a paper very soon. I will release a paper in a very short time in how to reverse the effects of the 3 M injections. It will be in the hands of our doctors, scientists in the medical teaching, to test, release, and free many families from the side effects of these 3 injections. Many of you, I advise you not to do it, because it is not easy. (2:10). It's not advised to be done but we will develop a process that it will be reachable through the KF medical team. We have to understand it and then, I have developed a T which you can remove any mercury from the body. The mercury is not just because of the 3 M injections, many of the people in the 3rd world nations, and in the western world suffer from the mercury damage through the totoh fillings. The amalgams from the totoh fillings carry mercury and there are a lot of suffering, especially for women, it interacts with their menstruation and their menopause and creates havoc in their life. In a very short time I will release this paper .. (2:11). Why do we have this problem today with the Internet. Is there a storm near by. Maybe too many people are trying to get their brain drained from the soul and not the physicality. (2:12). .. break in Net ...
.. I should write the paper to release it. (2:16). ... There is a solution for those who suffer from this mercury poisoning, or additional structure. ... We can remove the poison from the body in totality, this is possible do to the introduction of new dynamic systems which we have developed. You can't reject this material through the operation of the soul because it is something introduced physically into the body and it converts itself. It's the conversion that is the problem. If you understand the work of this additional mercury it's very much for our medical team, the work of the cancer, It's exactly the same as the work of the cancer. (2:18). But it enters through the field 03

(2:24).

.. the spinal shaping of the DNA is because of the spacing of the Phosphorus. So in this structure you see why this is so lethal. (2:30). Because it interacts in balance with the spinal, the backbone of the DNA. The helix shape of DNA, I have written a paper and explained this somewhere, is due to Phosphorus. So you have the Phosphorus which already touches the helix, which then changes its position, it's not the same shape because of the interaction of the fields. In that position everything moves. This is why it is so dangerous. But what is the reason for the production of this material? There is a way you can change it if it is in the waters. You can change it very simple. You can transfer .. you can change the bond in a very simple way, because it is connected to Nitrogen, if you look at it, the spinal space of the AA, ?? is a prtoein carrier. You have a prtoein in there, N of the prtoein, H of the prtoein, the O is there, what is left is a C, and if you look at the shape of the structure, you see the interaction of the fields themselves create the C. So this is a copy of the AA by field interaction. This is why it is so lethal. It interacts, because it mimics AA and DNA, so DNA takes it as part of it, so it opens (itself) up, the shape of the helix changes and that is why it is so dangerous. As K Seekers you should be able to read these very easy. (2:32). You have 5 O's, 4 H's , 1 N , so all you need are the conversion field forces of 1 O, or 2 O's to create a field force of C, then you have a full AA, which is the backbone of the DNA, then you have the spinal cord balance of the DNA ?? hidden condition which gives you the Phosphorus, that's it. You see why it's so dangerous. There is a why you can change this in your systems. If you add CO2 Gans to it, it will destroy it. All you need to do for this is to create a CO2 and a water, a Gans water of the CO2, most probably CO2 itself as a Gans drop will disbalance it and break up the chain, then you are left with a Phosphorus you need and it will become a positive use in the structure of the body because the Phosphorus will change to the Sulphur and become part of the immune system and the phosphorus will become the backbone of the structure of the physical existence. You strengthen the AA chain. Any of you who do these tests just add 1 drop of CO2 into this combination and you'll disbalance it, because 1 of these O looses .. let's look at how you do it. You have a H2O, H2O, so now you have 2 drops of water. (2:34). What are you left with? 1 H and 2 O's. When you bring the 2 H with the O, it has to split, because if you go back in the world of understanding, in the world of creation, H gains or looses to become a C and O to create the condition of life, AA. So when you introduce a CO2 you add to condition that the 4 O's become balanced, then you bring the C, and H is released on its own. N is freed, and you bring in the ttoal balance of the liquid AA, You have a ?? P with it and now the structure is broken, the AA structure of the DNA. If you understand this you can actually use this as a benefit to the human race and a danger to the human race. If you can add a CO2 and see what it comes to, then we need Phosphorus, huge amounts of Phosphorus, because the Phosphorus and Sulphur are part of when you do the blood test, you see what it comes to, they look at your Sulphur, it's a detergent. And Phosphorus is a building block. If you look at your blood test, at the chlorine, P and S. (2:36). These are disinfectants of the higher order materials of the blood and the physicality. So if you add CO2 to this you change it to the benefit of mankind, but you have to understand why and it's there. Now it mimics the DNA, when it does it puts pressure on, and then because it's missing a C in the AA chain it moves the Phosphorus in the spinal cord of, backbone helix structure of the DNA and it creates havoc, it doesn't become cancer, but it creates new elements. But if you add CO2 to it in this process you'll see the effect. It can be used as a huge benefit to humanity. If

you can release the Phosphorus which is one of the most needed elements in the body, there is nothing more needed in the body then Phosphorus. When you eat food, and the wrong food, forever your body is converting the elements into Phosphorus to get the guarantee existence and continuity of the DNA. Every DNA cell needs that energy of the Phosphorus, and most of the work of the body to keep the physicality in its DNA, is for converting elements continuously to Phosphorus, because every cell, every DNA, when you see a Phosphorus in a DNA, Phosphorus has a cycle of life, 1 year, 6 months, 2 months, it has to be replaced. (2:38). Where does it come from, unless the body converts it. Most of the conversion comes from the Thyroid glands, and in the Thymus. Because it uses a lot of the energy of the B12 to convert to keep Phosphorus always available for every single cell. Every single cell which is produced has a DNA, has what we call the spinal backbone helix, that those Phosphorus in that ... the guy just puts a P, you read it, that Phosphorus has a lifetime. It has to be changed. It looses its power and needs to be continuously replaced. When you have this Phosphorus, the time when it comes to be replaced, this takes its place, then it creates what you call cancer. But it is actually what we ourselves put in there, and one of the things needed. If you break it up (?) now you have a bigger source for a healthy life. You can change this poison to one of the biggest benefits of mankind. Many of the problems we have in the world of medicine is because the Phosphorus in the DNA, in the spinal helix coil changes, and when it changes it moves the rest of the chain, what you call prtoein AA in the sea, or move it slightly to one side, then we call it genetic defect. If you continuously supply the body with enough Phosphorus, that it can't, especially in the Gans of our ?? , you would never change the DNA, you would never get any diseases. (2:40). Send this to Monsanot and tell them I just explained this section and we found a solution for your problem. This is very big Mr. Keshe if we can prove this and show some experiments that verifies your idea. This is a multi-trillion dollar idea to Monsanot right now and to everyone on the planet. All of the food supplies. But how has is been used and produced by Monsanot? It's used as, Glyphosate is a non-selective herbicide it will kill most plants, it prevents them from making most prtoeins that are needed for plant growth. Now we understand why, because you change the position. The farmers spray the wheat with Roundup to kill the wheat prematurely so it can be harvested before too much moisture occurs. So the Glyphosate is in the entire wheat chain mixed in with the cereals and grains and in the water supply. It is part of the process they use for killing things, and adjusting the crops... Now you understand where the killing comes from. You change the chain of the prtoein in the DNA. (2:42).

... what you see if you look at the isotopes of one and the other. (2:48). The Phosphorus is a detergent and so is Chlorine, Sulphur behaves or your body converts it into Phosphorus or a Chlorine, as is needed for the conversion, depends on if you are a vegetarian or on how much meat you eat, or how much vegetation you eat. If you look at the isotopes of P and Cl, in the bottom range of one and the top of the other, they are somewhere similar to each other but they are actually what I call cleaning agents. They are there to open up the AA structure. 58

(2:58).

(3:14).

(3:20).
... When you add the CO2 on the surface you get the structural (3:24). environmental change, but when you put the ?? CD and you change the shell of the ?? seed. I think it is in the very original research of Dr. Gatoa or Jim in Australia, some of this was shown, the ?? of the seeding. So you confirm the finding. We know this. We published some findings on it some time ago. You can the genetic modification of it, and I have said many times, Monsanot modifications don't exist, we can get rid of it by ?? plant duration. If you go way back to one of the tests we did, we took the wheat back to a grass, and it grows like a grass. What happened when we put a seed of wheat for a long term, maybe 1 or 2 hours in the Water (Gans) or whatever, usually wheat grows like this as 1 stem. When you put it on (the Gans) it grows flat and you get 10 to 20 (shotos), but you get wheat, the atmospheric condition of the .. what we spoke about the dinosaurs, creates a condition of the wheat today, where the original grass was millions of years ago. But it creates the atmospheric condition, pressure and you get that. I think we had 6 or 8 stems from 1, and it grows like a grass, not upright, spinal. We can see if you put the seed in different time durations (in the Gans), you can see the different evolution of the grass to the wheat. What happened 1 million years ago before the other layers come on it and changes it. (3:26). We have done this and have full knowledge of it somewhere in KF (archives), we have thousands of pictures taken of this process with the scientists. It's in the archives of the KF. It used to be on the original servers of the KF. ... Stefania shares about here niece who had epileptic seizures. (3:28). A year ago after Mr. Keshe introduced the soul teachings I introduced these ideas to my sister and since then my sister only wanted that her daughter at the age of 3 would stop the seizures. Recently she made ??3 and suddenly the seizures stopped. For us it is unbelievable and it's confirmation of the soul teachings he gave us. ... Thank you very much. We know about this case for a year and half 2 years, and we tried to support in different ways. ... (3:30). ... .. you told me to imagine him in the best time when I was with him, and it was very difficult ... and you told me that when I was with him that we have the best time together. In order to do that I have to pay full attention and be 100% with him, my mind could not be anywhere else, so to give him the full (3:32). of my presence and let him know I was there. And when we started to share moments like magic together, he would start to get better and better. It was so much the nurses said to me, what are you doing because now he can walk ... everything you recommended to me worked. Let's end. Please don't stop letting the embassies and governments knowing about the KF with the Iranian government and president of America. (3:34). We have to be, not peacemakers, but people who enligthen and show that there is always a solution. Diplomatic peace is not easy it's very difficult because you don't deal with one person, but a nation and the request of many, many things. But if we carry the soul wishes of mankind we will see the end of this conflict and the beginning of world peace. It is very interesting how our wishes effects our lives and other people lives and as long as it is positive it creates a positive change. If it is negative we become the receiver of it ourselves, because we have

to handle what we created. It's important that we push, resend the message of peace to all the Iranian and American embassies and any other embassies that can encourage them both to sit around the table. We have to ?? the peace, we have to be the cause of peace. It doesn't need to be our name, if we elevate the soul of the world leaders, it's the name of humanity which counts. I don't see anything more important at this moment. The Core Members know how to elevate the world leaders they have been through it. Maybe we need that, even though it creates so much suffering for many of us, but it is time to be done. It's time to ?? Somebody wrote this letter and it is meaningless and I wrote them back in a simple way. (3:36). This is a diplomatic letter and not political. Diplomacy has its own language and a lot of people don't understand it because they are too entangled in the process of politics. Diplomacy is like the STM and politics is the physicality. And we work through the same way. I work as a diplomat. You never insult, you enligthen and show that there is a path and then the politicians follow. In the future if you ever get involved understand and learn the language of diplomacy, not the language of politicians and what we see in the press. Politicians always hurt and diplomats always effect the whole condition. It is upon us to change it. remember whatever we do we are responsible for the outcome at the end of the whatever is done. the responsibility for the change, maybe lies on all of us, because in solving the situation between Iran and the US will solve the situation in Syria, it solves a lot of problems from families that are suffering from being refugees, because then the forces will come together to force and change for what has been done wrong and then find a solution for it. One of the things you'll understand very shortly if the talk between Iran and America takes place and we lead to the same as "5 plus 1" cause of peace. The situation in Palestine will be resolved in a very rapid way. (3:38). These are the last conflicts left. But these are hinged between what we call the Shia and Sunni section of Islam, using superpowers to get to their position to destroy as many Shia as possible that they have the domination in one way or another. If we see the situation in Iran, is a Shia country, so is Syria, Palestine majority, and this has a very clear indication that even the soul of Mohammad is not at peace. It's the responsibility of those who sit in the name of Mohammad to see that it is one house. It's the responsibility of the UC member to see that it is solved in the Arabic speaking and Iranian Farsi speaking, these are the things that you have to resolve through the soul of the human race, and you understand the work which needs to be done. You do not need to be taught because your souls knows what you have to do. In one word to the world leaders we have uttered the word of creation and it's for them to understand. If you look in the letters in a simple way I have explained it says, "on behalf of my government". My government doesn't sit with Iran or US, my government sits with One Nation and you are the governing body. Maybe those of you who don't understand diplomacy, now understand how the letter is written. We have to learn the language of diplomacy and the true sense of it, and that's for them not to interpret it in the wrong way. (3:40). Thank you for today and hopefully we learn more in the space development. We are in one of the final phases of the understanding of the knowledge of the creation. If you can create to go from neutron into field interaction, and then you can produce the matter state from it, you have encircled the complete cycle of the creation, from energy to fields, fields to matter to ?? the creation.

END

238th Knowledge Seekers Workshop - Thursday, August 23, 2018 (,)

(:05).

... in that process of becoming man of space we have to face the new realities. (:16). The new facts, how we see ourselves as men of power. Do we see ourselves as those who will adjust to the new environment and how would we react to this new environment. Are we going to allow the new condition change us, the new understanding of the manifestation of ourselves going to push us to the new limit of understanding that we know nothing, and would we panic. Would we change and step down, and look at what is to come, what am I going to do with these new arms and legs that are in my hands. These are what is to come, what we have to understand, what the new environmental condition will dictate, my manifestation. Where the me before, or in different position and field strength, decided that I would look as 2 arms and 2 legs, but suddenly I was 25 cm and now I am beyond that, and how am I going to react to this position? Am I more intelligent? Do I have to enforce myself to be able to create a new condition where I call myself, god, because the others to where I have come, the new environment gives me a different manifestation. (:18). Rick have you received the picture. ...This is what we are talking about what the reality in the space, or we create ourselves. Shows the picture of a large plant on a hillside. This is exactly what is going to happen and we can show it. It brings home a lot of facts, What has become possibilities. .. this is a real condition, (so you can se the 2 yellow sticks in the back) This is an experiment that will have a fundamental impact on us. It's part of what we will see will come up in the coming time. (:20). This plant is growing at an amazing rate at the moment. Last week was 184, this week it's past the 2 meter line, what I have been told. Look at the 2 small plants in the background, they were planted at the same time, they were 2 years old when they were planted. The only difference is a new combination of creation of the environment. there are 3 (reactors) around it. We didn't change anything, just created a new environment. This plant is growing around 15 cm per week plus. The other plants in the background aren't growing like this. We only changed the environment. These balls have a specific material in them, that this plant should achieve this height in 2 years time. But the beauty of it is both plants were planted on the 15th of May of this year. (:22). They were allowed to adjust to the environment where they were planted, then on the 15th of June the new environment was introduced. In 60 days you can see the difference. It's not just the number of leaves, don't forget the number of leaves, is one arm and one leg. What is interesting is the main stem inside is 3 or 4 times bigger then the other one. You land, this is you on earth (the 2 untreated trees), you land in a new environment, a new condition (the treated tree). How to you handle it? You are getting more arms and legs, the soul is still the same. The condition of environment forces new dimensions, The soul of the plant hasn't changed, it's the same soul. This is what we'll, mankind will face in the space, and that's what we said, you manifest yourself according to the environment which you appear. What are you going to do? What if the big plant, the one we see is you, and you arrive in a different environment and you become the small tree. With the new condition environment we

have introduced (:24). does the new plant, the taller one, decides (when) it sees the soul of the other trees in the woods (the taller trees), and it tries to match them, to get ?? to them as fast as possible, to the same height, not to be subordinate, not to allow others to take light that he can survive. What our scientists have done is to take markers of all the plants, about 16 of them that we have a control of 20 meters radius from this point, it comes to about 16 of the trees, taking the top and bottom off (the highest and the lowest), what we call scientific assumptions, and then we divided by everything else the height, it's 3 and half times higher, and the thickness of the stems is about 2 or 3 times bigger maybe more. It's not that we put this plant in and it grew, this is what (happened when we introduced a new environment and now it happens. This goes back to what we said in another teaching, that when the earth was a different position and distance from the sun, the G fields were not the same as what is now, so dinosaurs could be created, and you can see how it has been done. The G fields of the sun have been pushed back with the new dimension cores so the plant is allowed to grow taller. Are we going to follow and keep on hanging new (reactor) balls with the new mixtures on different heights as the tree grows that it still pushes the field forces of the sun on this plant further out. (:26). In about 15 years this plant is supposed to be around 15 meters high, but the way it's growing in 50 weeks it will be around about half that height. But the plant is naturally structured as you see with broad leafs which means it's not immune from frost and cold. The leaves will die. It looses its leaves in the winter time. It will be interesting to see if the leaves stay alive. the plant will carry on growing. Then you see how we'll react when we arrive in new environments. Change the name of that plant to a man. New environment, new conditions, these are what the KF research centers are coming up with, now we are going further in how it will go. What about the introduction of the neutron energy, diversity of the field forces into the whole instruction, then what will happen if we increase the field forces to beyond this level, would we grow 10 times faster, would we have the transition of time from one to another, what would happen if we come to the point that we have to introduce new environments. (:28). In that process we see that what we have been talking about is reality. That plant is exactly the same as the other one, but how come with the change of environment, different MG field forces manifesting itself in this way. What about if you land and you are the same size as you land, but because of the stronger soul you carry coming from the mixture of the soul of the planet earth with the H and N and the rest, what's going to happen, you grow faster, you become the creator, you start to dominate, you become another Americans and the land, we have a gun and we shoto what we like. Just because we can. Or do you become humble enough to teach the others to become like you. The soul strength doesn't allow this. What about if you bring that plant which is another stranger from the planet with into your spaceship (SS) and then he starts growing bigger then you in the SS, because now you changed his environment. How are you going to handle him. Or do you do what the mankind has done, do you imprison him and put him in a zoo. This is what we have to face, this is not a theory anymore, this is what the mankind has to face with the new dimension of science, the new plasma T, which takes man into the Plasma of the universe. (:30). Now you understand why we endeavored to go into the SS without dimension, there is no construction, no fixed bolts and nuts and that's it. Because let's say you come into a span of the U where the field forces matches the human body and you grow to 20 meters, but the ceiling height wasn't put more then 3.7 meters. What do you do, do you curl up. Now

you understand why the new dimensions of the space T carries every aspect of covering mankind in the space, not just the ?? soul of mankind, this is the knowledge of the U. We are not talking a growth over years, this thing is literally growing by 2 or 3 cm per day, not only in height but you can also see the width of the leaves, how big they are. Most probably if we leave it in 10 years time it will cover over half of this jungle. How is it going to reproduce because it can't match the other one. It has changed its genes and conditions. We changed it for it, we introduced a new structure into it. We introduced our cells, we take our cells into the elements of the universe. And then what is going to happen to us? What about if our physical structure grows but our internal organs don't, because the field strength supports different dimension of containment, but not what is contained. Would you like to be a little brain inside a huge body (:32). that is trying to control it? These are the facts which the new science, knowledge forces us to do, we have no choice. We think it is just a plant, but it is as much alive as you and me. It has a soul and is aware of its existence and its environment, and it has allowed the new condition to create the new dimension. This is a preview to what is going to happen to mankind in the space. We haven't watered (it), not a single drop of CO2 Gans's of which you are familiar to. We have just enforced a new environment. The big one is on one planet and the small one is on another. This is the dimension of the science which we have to face as the human race. It's opposite to what we have been taught and brought up in the world of science, technology, and the world of understanding. The whole knowledge of mankind. Where does mankind go and how far is he prepared to accept the new changes. Or what shall we do when we reach this point. Is mankind ready for the new science? Where a plant in just changing the environment and growing happily around about 20 - 30 cm, now stand 2 meters high, just by the introduction of new plasma. (:34). A new plasma environment. The change and the dimension of the change is huge. The whole governments are afraid of the new change. They are greeting it because it brings new dimension. The application of this new T when we can feed into it, the fields, they become antibitoic on its own, they become anticancer, and allows us to overcome all the illnesses, as we have seen with the waters, the factories which we produce the waters in. It's the waters which is in these btotles, containers, and a simple water has changed the dimension of the growth. If you take some of the plants which are 25 cm high, it's more or less 8 times more in height in 60 days. Can we use these to grow organs, speed up the growth of the amputated arms and legs. Or can we use it in reverse and reduce the tumors in the body to nothing. The cancer becomes a dream of the past. It was one of the nightmares we didn't have a solution for. And there is nothing but water in these containers. The science, T, the understanding of the new space T will become one of eh biggest occupations of the human race in how to enter into the new dimension, to become a part of it. We hear from the Chinese community that they have managed to create transportation of movement of the space. It was in the news in China today. But most of these scientists as you see, many of them have followed the KF work. (:36). They understand it in a new dimension. We come across scientists in China who have been following what we call, translation of the teachings, and they sit at the head of research. Different organizations, and they tried or applied part of whatever they could bring in. We have plasma physicists who are specialized and fully aware and work through the new T of plasma from KF. So this is the new way we have to understand. What would the new knowledge bring us, what would new conditions would create for us, then it goes

back to the new space program which is running in China. The new SS which is developed and is going to take shape is that we have to change our systems to non-motor, understanding this position. So when you have no motors, which is directly on levitation itself, then the FP will dictate the new space, if you grow due to the new space conditions, and you come back in, you were 2 meters when you left and come back 10 meters high, the whole system adjust itself to it. It's not fixed that the motor has to run, it's fixed according to plasma which dictates the position of it as we explained with the M fields and magnets. This is not to put aside what we have been taught, it's to add the change to the knowledge, the change has come. And these things are going to be very fast effected agriculture, health of all the nations. If you look at the tree in the picture, it is known as the Kiri tree and it is grown in Japan. (:38). Now because of the problems in Northern Europe a lot of the woods are dying because of infections, or whatever beetles. The governments are looking so as not to loose their industries. Forests create a lot of jobs it brings a lot of timber, creates construction business, now they are lost because of damages to the plantations. Now governments are looking to replace these loss of woods. Are we going to wait 30 years for the trees to grow, or with this new T that we see, within 2 years we can replace them and the farmers stay put. The jobs are not lost. Tree growth of 20 to 30 cm in less than 6 weeks. Around about 8 weeks it has 5 times the height. Agriculture and farming has to become sustainable through this new T. This is the way we'll walk China out of poverty, because the majority are farmers. Having the farmers grow plantations and harvest 2 to 3 times more that by self economy they walk themselves out of poverty and not by handouts by the governments. Poor people can't afford health care, through this T we can. In the new systems here that you see we have developed, there are new stages further up that is getting planned to be setup. What about we change the whole environment of a village, where the farmers used to grow a ton of food, now they grow 2 to 3 tons of food on the same land. Then they'll have enough to eat and live a comfortable life because they can produce it. It changes the world economy on what we call agriculture taking shape (:40). and food politics goes out of the window. The nations can now feed themselves.07

239th Knowledge Seekers Workshop - August 30, 2018

(,)

(:06). ... As we are developing more and more knowledge in Space T, a number of new teachings have to be brought in that it allows K Seekers to be able to put together the riddles of the knowledge in how to expand and explore the possibilities and different avenues of the Pl T science. One of the major points in our teachings, in the balance of the whole knowledge is to understand the positioning and the flow of the fields. In many of the teachings now a days, the K Seekers can't find their way in what is next, what is about to be explored and how the T has to be used. Last week we spoke about the plants and saw the growth of a plant, (:08). this creation of the conditions doesn't apply only to the plants, but to us, where we might be, where and how, and that we can see the influence of the knowledge of the T. One of the biggest problems with the present new ... or lack of understanding of it, has come through, as we have gone into the production of the neutrons. As we said, different neutrons have different strengths, and how you apply these neutrons gives you a flux flow. In the depth of the space, in parts we'll come to understand, that achievement of transmutation of elements, even in the body of the man, it comes from the interaction of the fields which have no origin. What does this mean? The origin has and is part of the totality of the structure of the U. When we see for example, the creation of some materials in certain part of the galaxy where the earth passes, it has nothing to do, or partially to do with creation of fields from the sun and the earth, and the moon most probably, but a majority of the material produced at given sections, like what we said, it's like meteorites we see in certain areas, what we call, the solar system we passed through, there are field areas which a specific elements are produced. (:10). This means if I can expand on it. This goes back to space level research, this is important and direct for you and some of you already work on this one and understand it. What we assume and have taught is that the MG fields of the earth and sun, their interaction leads to creation of certain products. This is okay as long as the solar

system is in this position, but the sun and earth moves, and we come not only in a new position in the solar system but also the galaxies position in respect to the planet, or our solar system moves too. So the same environment here is not producing anymore, let's say H, now it produces O or maybe Deuterium. Creation of the new environment in totality, partially influenced by the galaxy, partially influenced by the field strength within the structure of the solar system. This in the space development becomes part of what we see production of diseases, and eradication of diseases. What you'll see in many of your tests and results, you'll see this frequently, I was making something and it happened (worked) and now it doesn't happen. As we said before, look at your environment, what have you moved, you had a Gans jar here, and now it's there. In one of our tests that we carried out recently we saw something strange and some of you might see this in your systems. (:12). We have a bench with CH3, ZnO, CO2, CuO (sitting next to each other), and we are talking about 10's of liters and not a small amount. Then we measured the PH, and don't be surprised if you find the Pl of this one (CH3)7 plus PH, the next one nearly the same 7+, and the next 7+, not far form each other. We usually see the PH of CH3 around 4 to 6. And we are talking about massive amounts of Gans's. Then if you try to use these (Gans's) for specific purposes you get the same PH, but not necessarily the same plasma strength or the ?? condition. So you try to understand the influence of conditions and the environments you make. You made the ZnO and you left it next to the CO2 and now you don't have that huge difference (in strength), you have somewhere in the balance between the 2. And both PH's behave the same. This you might be able to understand especially those of you who work in the field of medicine (:14). or medical application and you are making these systems for yourselves, or trying to commercialized part of these things, you have to understand why when you deliver your systems they don't work effectively, but before it did. Because before you did not place them in the same position. Distance gaps in your labs, in your works is essential. If you don't want to get into different strength differences, but you can also do it by the mass ratio difference. Recently it was very interesting to see this because it will effect the KF manufacturing section. So when you set up the factories and you see the production lines, what Gans's you produce and their proximity will bring everything in balance, even though you think you are producing different ones. This is very crucial for the manufacturing teams (to understand), this, then shows the effectiveness of the materials we put in. As some of you have been asking how do you change certain (contaminated) waters, how can it be done, then you might understand that if you are using ZnO in one water and are getting a very good result, but then you might use the same ZnO in another water but you don't get the same good result. You have to understand what the content of water your are using is, and what kind of water filtration you need. Not every CO2 will clean every water. This is one of the questions raised by Rick before we started, some of you have been asking. (:16). Water filtration is dependent on what is the content of the water you want to filter. Are you filtering minerals, bacteria, parasites, heavy elements, then you have to design a filter for each one specifically. Are you filtering contaminated waters, radioactive waters, and what is the radioactivity and what can you use. How do you create radioactive radiation, in the space you can't go and buy an x-ray machine and you can't develop that kind of thing. How do you produce systems that it allows you to have the effect of x-ray. The strength of what you use can create it. In the coming time when the K Seekers understanding becomes much deeper, you'll understand that every

process has a certain amount of field interaction, which in that zone (between the 2 reactors) you can work very safe. This is where you pick up your products, where you create conditions to transmute, these are the conditions when it comes to transportation, man will understand the usage of space, the environment it creates. You can go back into the process of understanding when you want to transmute or transport entities, anything, a glass of water, or yourself, how you create an envelop environment. (:18). You don't go like the present world of science that wants to transmute a man, what do they do, they try to get every cell and that sometimes fails. I have seen it. But you can transmute an envelop, and that envelop has to be kept from one point to the point of delivery. Because it doesn't matter what you do with it, how you shake the box, what speed you travel it, the contents inside doesn't change. The only difference with the new transportation is that your envelop is always spherical. Which means you keep the integrity of the elements within it. It's a dynamic Pl, we don't have square or rectangular planets. We can envelop any entity within the structure of the Pl and transmute it, and when it gets to the (destination) point we take the Pl off and the material will appear. When it appears it takes the position and shape of the environment which it has been given to. two legs and 2 arms here, and maybe 4 arms and maybe more legs, because this condition fits what is there and if you can't match it, you will not manifest. You say I can't go because it's too hto for me, or you say the field strength is not there, half of my arm will not be there. These are the things which are coming up very soon. In a very short time, ?? October, (:20). we'll show a new defense technology, defense in space. Because we need to defend ourselves from every element in the space at high speed. What we call layering of reactors in the space T will become very fast into operation in the next few weeks. We are moving into non-motor reactors, which means dynamic systems which have no motors, the flux-flow highest speed, but at the same time control of the whole dynamic system SF. the environmental positioning becomes part of the full understanding of the work of the Pl. You have to remember that a Pl can only manifest itself, within itself, if the condition of the environment within it has changed within the strength of its fields. In the past teachings we said, the solar system is allowed to be created in the galaxy and to have its span according to the MG field which it carries and it can interact with the environmental conditions of the galaxy. If within this solar system the star is weak, and the extensions of the fields of the galaxy (:22). are higher the size of the solar system will not be the size drawn here, but will be smaller. Again depending on the extraction of the fields from the system it could be even smaller, or it can be allowed to increase (larger than the original). These are important within the new space T which is taking shape. Deep space T needs new understanding, it doesn't matter how we flavor it. Many of you have gone in the process of trying different neutrons, some of you might have started to see the effects of the neutrons on each other and creation of new dimensions. You can't maintain these fields if you have not got stable neutron systems, because somewhere you are expecting the fields here (in the center) but they are actually happening outside your range. You run and you see nothing, ratio loading, space gap, natural speed of rotation all dictates where you might see the system (the interaction), and not necessarily where you are looking for it (in the center). These are the loose ends which needs to be tigthened up, (:24). before we can start to travel, moving and interacting. One of the biggest problems with mankind in the space will be very simple, and this is the conversion of the space of the STM. In respect to the environment which it

appears even the soul is still the same. You can end up in the soul dimension on planet X and you still have connection with the soul of your mother on planet Y, as they say, hundreds of thousands of light years away. The dimension of the expansion of the soul in the reality of the environment it appears, will be one of the main factors in how the life or existence will be guaranteed for that soul in the space. It's very much like the winding clocks (draws a spiral) how fast you let it go that it unwinds. Deep space needs deep understanding of the position and the reality of the interaction of the fields. It doesn't matter if you put it in the condition of the water, a Gans, a FP, or any space in the U. Those who are in the medical application, doctors and scientists who work on this kind of machineries should very soon be able to interact, (:26). react and deliver knowledge and information to any point in the body or anywhere in the space. This means if you have a body for example you have found a shrapnel here (arm), by creating the right condition in the fields of the neutrons you allow this (shrapnel) to be moved out without any attachment. Plasma new technology is getting to the point that we decide the fields of the plasmas according to the position, and then the energy of the Pl itself dictates where you wants to move out to, and then you can dictate it, where to move. The field forces if you look at the galaxies in a universe, or the stars in a galaxy, the spacing of it is all predetermined by the totality of the fields. They are not there on a random basis. Every star, solar system, galaxy and every cell of the body, is predetermined by the effect of its environment and not by its own. This is why when you look into the skies at night you see the stars that have been there for millions of years, they don't determine it, the environment has decided that this is the position they take. Now with the knowledge we have (:28). we can change its environment that the matters move closer of further from each other then this dictates the speed of the motion that you travel in the space, where you want to go and how you create the MG field, that in the process of the travel that you keep and maintain the SS shape, but you create the motion of it. Don't forget there are no motor and no jet engines as we have today. It's the free flow Pl keeping the position the same while certain parameters you create capability or possibility of producing matter and motion in a given direction. Man soon in the space will find out that there are no computers in any of the spaceships in the U. Computers are man made. I started the discussion today on this basis because we see one of the research centers is soon reaching this position, then the knowledge has to shared to all. The Chinese will combine all of these technologies. (:30). It's a space dimension. It's understanding our position within the space of the fields, and not enforcing the dimension of the existence by framework. When we build the reactors for space travel, we just build them and load them and leave them next to each other, they will make their own SF. And this is the space we give them. The way we have made the frameworks and put the SF on it, and we start rotating it, is over. This is what in the teaching of last week I emphasized on, understanding what the Pl of the space will create, as you wrote more, it expands to a new position, because the new free, rotating plasmas are not put together in a framework, they are literally like magnets put on a table, they find their own position. You thought you made the MG field systems SS of 2 meters, but sorry, half of it sits behind the wall in the garage or in the next door neighbor. Coming to this we started because we see the next steps for the development of the Chinese KF space development reaching that point. Which means no more motors, but no more framework as we had to put things in. We have to understand (32). the loading system that we put the reactor together and they have to find their own

position and in that process they become dynamic themselves. Because to create and position, dynamic position dictated by the MG field forces. The only things to do is to make sure it's free floating and it can keep to that frame. We are not building anymore frames, platforms, because if we add 2 more people and bring 10 cows in, sorry this needs more space. I am taking my cattle from Africa to South America because they get higher prices, and I have this SF in my home, but now 10 cattle require bigger fields, I need this (spread out SF) to travel. The reactors decide themselves (the size). In the very near future the boundaries of the governments and nations will come to an end, because every man carries his own transportation as we do the key in our pocket. the box is with us, you open the box, the FP and because it's controlled by you, today I am going to Washingotn on my own I need this (smaller) size, tomorrow I am carrying cattle from Africa to Texas, I need a bigger size. And it decides itself. don't for get every soul has its own field strength. (:34). So the interaction of it and the MG field of the physicality pushes the whole thing apart until it finds comfort for all. We passed the point of theory, we entered the ?? term of physicality, and this is what is on the horizon, what is coming in the very near future, because having and creating dynamic systems which are free floating we will dictate through only one thing, through our soul with the interaction of the ttoal soul of the system. then what we call the cars, automobiles of today of different brands will have no meaning, because each one of us has his own brand of car because it's all the same. Go back to the time of Henry Ford, he said, you can have any color car you like as long it's black. You can have any color SS you like as long as it fits the environment. So we all look the same. The loading of the SS reactor with the free floating has to be calculated on the mass ratio of the neutrons plasmatic fields interaction, which means we have to understand to what extent we enforce field forces within the dimension of the reactors. As many of us have seen SS that don't (:36). change their direction, but they change their speeds. the size stays the same. The change of direction comes from the thought of the man who is in charge of the totality of the SS, because he doesn't interfere with the size, but with the field forces within the structure. I se a lot of developments getting done, testing different things, but as we understand it's what I call a game of magnetic marbles. You throw the marbles on the table and where they find a balance this is the shape you get. You can predetermine the size of it, but one interesting thing that will come up in the very near future, the reactor size for the SS for every individual will not be any bigger then the size of a marble. You carry it in your pocket. This is something which is carried in the U. We just opened your eyes to what is about to come. This is where the SS development will take all of us. Maybe we are 1 or 2 years ahead, but those who are working in this environment know where they are heading. We have designed and planned the new space reactors for the Chinese space development on this design, this pattern. (:38). How the Chinese will load up their reactors will decide how close they come to this. It's a balloon which itself dictates its size, shape, and position. Can I with my thought reduce the size of these balloons to fit into a box, and when I open the box my understanding of the fields needed will adjust to the size needed. If I am going shopping with my boy so I need a bigger space, so where to manifest myself, and when you are inside how to reduce the system that you can manifest yourself in the environment. You don't want to appear on a truck running at 200 kmh down the road. You want to be in a safe place and understand where you land, you understand the environment, you are aware of it, and then you manifest yourself. You think you are on

the land you don't want to appear in the center of the ocean. This is all to be learned, to come into position, and the way we are supporting and instructing and developing the space systems in China we are heading in that direction. Do we need to hang our reactor on a framework and then try and get it to run, or do we go directly understanding how to load and we allow it to take shape. In a way the accident we had some 3 or 4 weeks ago in China was a blessing that allowed us to jump by tens of years forward in teaching. (:40). Because there are too many limitations, to much waster of materials, but a lot has been learned that it allows the next step. But many of you will still go through running your little motors reactors and seeing the SF, trying to lift and you still can do it in that way as well. As I said, everyone of us will develop this T according to our intelligence and understanding. Then whatever happens in a very short time, if you are stranded on the oceans of this planet on a little boat, we can reach you, lift you, and bring you home. The way it will work is the soul that shouts or calls for help, and in understanding the help of the soul, this man is there with part of his soul to do. You will understand very soon. But on the other hand if it is used as part of the defense technology it's easy. The intention of the soldier is destruction, and the soul of the spaceman with the soul of clear consciousness is peace ... I wonder if you can guess what might happen here. What I see in the coming time, shortly. I wrote to one of the K Seekers today, maybe I read it .. (:42). In a very simple way I explained my dilemma. 'I am so close to achieving it', this is talking about the world peace that it stresses me beyond, and I know what needs to be done. I just do not know if the human race is ready for this. If I release the true knowledge the structure of mankind's society will collapse, as we know it, within hours. So what is to be done in my dilemma? Mankind as a whole has to go in the direction of the peace, otherwise we will enforce peace. And in so many ways, today's teaching is a 'peace' talk teaching. When you have a massive aircraft carrier with hundreds of soldiers and planes rockets and missiles, if I interact with the soul of the peace of the soldiers, no soldier is prepared to fire. We don't need to paralyze the material state, we can touch the strength of the soul. This is part of what I call the true blueprint soul teaching. It seems that we have to implement this condition, it seems that we have to enforce this condition in the coming time. (:44). And this is exactly what we didn't want to do. A few years ago Caroline and I were walking in Belgium through a gate and the old man took us to see the house and he said, he was in his 80's most probably, he showed us a hook on top of a frame on the barn. He said, you know that pin there, when I was a young boy I watched the Germans hanging a German soldier on that hook killing him because he was not prepared to go to war, to shoto and fight. I wonder if the governments who are planning wars, how many of their soldiers are they going to hang on the wall, because the soldiers will not touch, will not fight. I don't need to stop the nuclear weapons T, I don't need to stop the boyctoting, I just need to change the soul that no one stands the boyctot. There are many games we can play. And let this be a warning to those who listen on the line. Then the whole structure of human society will change because the man and nation who thought they were in power, now is powerless, and when the others realize they will play their game. The invitation for peace on the table between Iran and America is a warning to the American government on this level. (:46). Go back on the table of peace or we'll enforce peace through your soldiers not be able and not wanting to fight, they take the path of peace. At the moment people are afraid of America because of its power, but when its soldiers are not there to fight it's no use to have the guns. The teachings of last

week, I built it up to this week and it goes further on, is the teaching of peace. We said, that when the STM changes then the behavior of the man changes. It seems we have to go for that target today and we are building in that direction. You can have the most advanced figther planes to fight but when you don't have a pilot who is there to kill, it's no use. I don't need to dismantle the aircraft, I elevate the STM. The Chinese space development is heading that way because it's in the hands of a very peaceful man. From the last communications with the American government, we advise you to open the talks and discuss because of the embarrassment of when the soldiers do not fight. They choose the path of peace. Many people are worried about what's going to happen the first of November, maybe we have to show it before. (:48). Or after what we can deliver, there will be soldiers who will not fire a single gun. There is nothing governments can do. How many of your soldiers will you put in prison the way you did in the Vietnam time. Do we disable the systems, boats, missiles, or do we change the man who sits behind it and walks away from doing it because it's not in his level, he doesn't understand what he is abused to kill. When we develop free dimension reactors, which is now the obligation of every KF followers to do so. To change the course you have to establish the development of the new reactors which I have taken you through to do. This will change the humanity in elevation and elevation of the STM, if need be I'll do it in China. The peace process has to come from the peace in the STM and now with this T when we satisfy every need, destruction doesn't sit within the structure of the STM, it sits within the physicality of the man, and when the soul elevates the physicality can't find that strength. (:50). Those of you work and the development of the space level and those who have understood, especially AZ they are walking away from what they were set up to do, go for development of the FP, because when it comes from America, Americans can't do much about it. People in the 60's and 70's marched against the Vietnam war, this time people will walk against having any war because it doesn't exist in their vocabulary. If need be we can show it on the high seas. A couple of years ago on the high seas 27 Americans realized the feebleness of their battleship. We don't touch anymore, we elevate. And the new systems can do so. If you understood how the Iranians captured the American drone, now we need the same systems just to elevate the souls. We invite the American government on the table with Iran for the peaceful talks. We are still waiting, we have seen the reports and the message from the American embassy to us. The message has to be made more clear and direct, we do not wait. (:52). the same goes with the Iranian authorities, the message is clear we want to talk peace. As we do everything in the open, my message to the American ambassador is, Washingotn needs to respond positive. The whole thing costs less than $10. It is very clear the T can be used in the direction of peace in a very effective way. There is something that is very interesting and most of our physicians have not seen, if you managed to remove a tumor from the brain, or remove a cancer from the breast of a woman, you have already gained the knowledge how to elevate the STM. Go on the Internet and study about the brain where it chooses conflict and war and where it chooses peace, and understanding that position from the position of the soul, will give you exactly what kind of systems you need to make (:54). to effect the whole of the American army and the rest of the world. Those who are planning wars they thought they found a new way by boyctot. But boyctot of the soul to not fight is more effective then a few boys who can't even fight. We have seen many u-turns, this time don't let it be a shameful one, because when it is done by shame the world looses its

respect for a nation. And those who sit in the anarchist part will try to influence their position and time. The space T has entered a new era, very quietly within the Chinese structure, I have pushed and developed and it is getting there to be done. Maybe in sometime in early October we put a blueprint day for peace, for spaceship and see how fast you all can reach it. Make sure you have enough Cu, Al, Zn at home, maybe a couple of sheets, and make sure you have made enough neutrons. And maybe you might need a few Alek Beads, and if you have already made a coil, you are already there. You were all sitting and waiting for a generator, (:56). but in the blueprint day of the MaGrav I showed you the generator, but all of you were so eager to see and do something that you missed it. And I thought humanity is not ready yet. Go back to the teaching of the week of the Blueprint Day and the clue to make Pl generators is there, if you want the proof of knowledge it sits there. If you understand the use and application of it, you'll understand how to make the FP spaceships which effects you and allows you to touch the soul of every man who is violent on this planet. I don't fight, I choose the path of peace and because I have the knowledge I can enforce peace. Any questions? (:58). Q: If you have a physical structure (SS) which field effects can lead to an increase in weight and which to decrease, if the physical structure stays the same. .. The physical structure stays the same, there are different techniques used in the space. One of them is which way you want to lift and by how much, if you are looking for levitation this system will be very easy to handle by literally, you just need to increase the control systems to increase M fields. When you want to take away from the surface, (1:00). you don't reduce your G, which is your point of reference. It's your M that has to be changed that it allows you to take to space. You don't change everything together, if you change everything at the same time , together, it is a death trap, because a lot of things can't stand. Where you create the G reference point everything in the structure has accepted that point of reference as gravity. So you hold on to it. What you do is very much like 2 magnets, you make the field stronger so you move away. When you want to land it goes by the same proposition, or you fix the M and then change the G. Some other space developments which are used is, you take a point of reference, you create that point of reference yourself and then in respect to that point of reference you create a space gap. You can't find the G forces of a huge planet, but you'll find this (the reference point) as a zero reference point and you create space in distance, which becomes your reference point. And this is a neutron center, you can create it very easily. So now you (have) create(d) a point of reference, you can go deeper in the ocean, but still be there (?) because you don't know what it will be inside. In the space T for example when you are traveling in the depth of space you can't find stars to move on, (1:02). you set up an advanced point of the MG ?? force, which is a higher order neutron interactions in the space of a distance, then you move into it. You increase the G by pull or you reduce M by reduction. The Iranian space agency uses a traditional way they use the moon as a point of reference, because to go from Theran to Washingotn it is very easy, it's always constant. It has to be understood what is and how things set, here we use the moon as a reference to attract to and come back, but somewhere in between (earth and moon) you do the same, you don't go all the way to the moon. There is a discussion on the table at the Iranian space agency it has been there for years is, Iran has a problem explaining to its people that it has the T to go to the moon and back, because the Islamic nations can't touch the moon. As I said to one of my colleagues some time ago, I wonder who can tell who has been to the moon and really

been around it and back again and landed. And as one of my friends said, we have seen no flags. (1:04). As I said as a joke, we can see the Great Wall of China from a distance, a flag is too small to see and this we give them a shadow of a doubt. You create the position and you always keep one point of reference, because the whole of your SS has been locked into the 2 points of reference of the M and G field of the position. If you do it right you can even tilt yourself at the same position. It's very easy. The Chinese present space reactor has got this built into it. We can tilt the system very easily the way it's been built with reactors. In the coming time when we expand the reactors in the dimension, by increasing the number of reactors in it, but the present reactors in tests in China, have this facility, on flight they can move and turn into ??. When you have a SS, you just don't take into it, the light you see is the end where it's targeted at. If this is the atmosphere you always move ... it's very hard sometimes at high speed to stop beyond or within (the atmosphere). And in the space of the knowledge we have, the atmospheric conditions are irrelevant anyway. (1:06). I was sitting in the office today and I said, my god nobody can see it, I see a SS cloud. You can see them, they create it (the cloud) and they sit in it. It's the abnormality of the shape, if you don't see it, because even the color is slightly different than the rest of the cloud. It has a tint of silver to it, it says, I don't belong here, I have created it but you get a reflection of what I call the ship into it. It looks more grayish. I hope I answered you. Try to understand at the point of reference. Landing with no wheels, with no buffers is very difficult, you have to learn how to approach and always keep a distance, never physically interact (with the planet), because now you have interact with the whole of the system (the planet) MG field. When you enter deep waters you create a shield that you never interact (with the water), the fields interact with your matter state. And when you create the fields, it is not so hard as one piece, it's as a cushion, it's a space gap. I will explain this in the very near future how you can come out of the waters, and out of the solid land. Many of you must have noticed something, (1:08). but you thought it was impossible. You can literally go through solid earth. If you understand the working of the plasma field. Matter state is weaker. In a way it doesn't exist when you go through and understand the work of the SS. If you advance enough in the science of the space, you'll find out nothing is in the matter state in the universe, or anything. It's just how you position yourself in the strength compared to what you are reaching. Any other question? Q: Jalal. hello Jalal have you made your SS? I have my SS myself. I have understanding and form your teaching I have a new understanding. Peace can be achieved very easy. (1:10). only we need understanding. What you said just now about illness and how the doctors can take it out from the body. Why is the body ill, it is already in a good shape and the illness is coming to it, because it changed position and environment. So peace is already there but it's the environment that makes it not visible for humanity, everyone. So we are not going to make humans good, because they are already good, but the environment they put themselves in makes them away from peace. So we only need to bring back the true environment that humans were in before. Mr. Keshe says, what do you suggest? Okay, what make a person not good in condition, like when they are ill, if we know what makes a person ill we can achieve peace in days because it's the same condition only on a bigger scale or smaller scale. (1:12). Fulfill the needs of a person, AA I think plays a very big role. to take out the barriers of why the human beings don't observe these fields of energy, because the man learned in the past how to make barriers to this energy. Someone somehow put barriers. We only need to

take these barriers out... How we are making Gans's, we are not making Gans's, we are making the environment to see the Gans's. The Gans's are already there, but we are awakening them to see them. We are making magnets not just to pull maybe to push away. ... we are only taking away what holds us from seeing, or knowing these fields. really this is a different understanding.... (1:14). ... like with the illness you are only taking out 10% you are not adding 90%. This is the understanding.... Thank you very much. Any other question.

(Go over again and again this part, Creation of the Cell in CO2 Box)
Q: Bernie reads one about Gans CO2 and CH4 .. (1:16). First of all how do you produce CH4? Do we know how he produces CH4? there is a lot of theoretical writing but you have to put it down physically how you produce CH4. A lot of you tried to create T, D, H and some of you managed to do T and D; then you say how do I produce H. Excuse me have you understood the world of the plasma. If you look at the matter level. ... you have the energy of the interaction of 1 neutron here. If you leave this neutron here, you'll have a neutron, but if you don't hold onto the condition, this little boy (neutron) will become a H, because all he needs to do is to split his natural environment. When you speak about H4 what is H4, then if you take some of the plasma physics and some of the material physics, then say oh, (1:18). I had a H4, and CO2, these two give me H2O and I have a C left. But where is this C, or is it a field plasma of C or would you see at the bottom of your box some more Gans's? Which is this C extracting more, as you saw in your CO2 box, created more CO2's. Do you think you released the O2 and it was left on its own. Or would it convert into the gas state and it stays there and maybe you'll find some black spots on the bottom and say it's a C. How do you create CH4. In the process of the development we know how to create CH3. ... in the presence of creating CH3, we create blood. Why does CH3 have the color it has, isn't it a mixture of ?? hemoglobin, because don't forget to make blood all you needed to do was to put an iron crossing the AA. (1:20). with the CH3 you had the presence of the AA, with the Fe, we achieved hemoglobin. But do you need this or is the Fe within the galvanized material with the fields of the Zn on it, still gives you the orange colored, what you call CH3. But this CH3 has the strength of the Fe to it. Is it'the CH3, as you call it, isotopes of Fe with a connection to Zn. If you understand this in the world of science of medicine, in biology, you can literally change and create any material inside the body of the man and convert one to another. If you go a step further, and if some of you understand the next step in it, if you manage to create energy, MG field of the plasma of the neutron, and you manage to change the diversion and conversion of the Pl of this neutron to the AA. Maybe some of you understand where we are heading for. And if you haven't understood I'll give you a very (good) direction. You are heading toward the direction of the energy of the STM. (1:22). But that needs a lot of understanding. As you use the Fe to create the blood of the man which carries the emotion of the man, if you use the same blood condition, the same hemoglobin, understanding the structure of the fields of the Cu N coated, you create a field in the strength of the STM that can be attached to the physicality of the man through the AA. In a way you create the RNA. Attachment to the physicality which is the level of the strength of the AA. That AA on top of your water is not a physicality, it's the interaction of the fields of the Pl of the Gans of the materials. Then you can create any cell anywhere in the universe. If you look this AA carries the DNA. And if you look, the

free energy plasma which is connected to the AA itself, as it's a field it has no choice, it's nothing else but the soul of the plasma of the AA which carries itself. And would you like to start creating creation out of it. As I said the depth of the knowledge is all there if you want me to teach you. But how many of you would understand. (1:24). How many of you have made these buckets with blood rolling, and you made the hemoglobin, and you could understand the effect of the creation of the Free Plasma, which is connected though the same hemoglobin to the body of the man, to the AA, and the Cu (?Nano) plate, don't forget you have your Zn here too. You can control in totality the physicality and the emotion of the man in one stroke. But none of you understands because you are so ofcused on little things and you let the others go. It's a full human body cell operation. I said to myself some years ago, if man finds out what I have given them that they can replicate themselves, man will shoto himself. Now you have it on the plate. But I am sure that 99% of you don't understand. Then you want a heart, a cell of a bone ... you have breakage or a blockage, how easily, not only that, you can touch the soul, the soul of physicality at the strength of it, and do the whole thing in one go. I am sure the doctors team will scratch their heads a long time to understand exactly what has been said in the past 2 minutes. This is where the Technology meets the STM. It has no dimension and it has the strength of itself. (1:26). And through the creation of itself dictates the existence of itself. The body is structured on a very narrow band field of the universal energy and it all sits here. If you understand part of this you can create Ca, K, Mg, and every other element, which is within this structure you can create the life of the man on this planet. Do we need a womb of the mother? Or is this the recipe for a "virgin birth". It will take you thousands of years to unravel this secret. The Zn is the connection to the brain and the conversion of the energy of the soul. In conversion the Cu allows the physicality of it. We all know where Ca sits, to give you the bone structure. Q: John of AZ, what you just brought forward begs the question of, (1:28). are we able to elevate our soul and our RNA structure by consuming the waters of the CH3? How did you make it? Q: By drinking the waters of the CH3. No, it doesn't. But I asked you how you made it? You have not brought in the element of the soul of physicality. Many of you have done this.
51

HEER

(1:32). those of you who think you can just use the hemoglobin if you haven't created a soul for it, how do you expect it to work. Now from today the world of medicine has a different meaning, if you understood. Do I need to load it with the fields of a Cu to heal up torn tissue rapidly, or do I need to feed it, extend it with the fields of the Zn to improve psychological condition. There it goes, American soldiers walking off the job. The whole process of the understanding of the creation of life has to be understood, that you can't just create the physicality dimension of DNA. We have to create the dimension of the transfer of the knowledge, information, that the DNA through this (forms hemoglobin) dictates and interacts, not by itself, it has no dimension to create that condition, it needs a soul (the fields between the plates). The soul of the tip of your finger changes according to the soul of your totality, then you can give the message, you are not walking, not shooting, and are peaceful. You need the little one to transfer to the big one, there it goes the American navy. (1:34). No soldier will fire a single bullet, ttoal cost, $5.

If you want I can show it to you tomorrow. We have to understand the totality of the knowledge. Nothing has been kept secret from you lot. There is, I have seen Dr. Klaus, he has built a box with the blood, hemoglobin. Dr. Klaus if you are online can you put it up. Yes I can. .. I have put the knowledge so in front of you, that you don't even see it, because it is there, you got used to it. It doesn't exist. It's like you don't understand how beautiful your wife is until you go somewhere and end up with god knows a disaster and you come back and say I didn't see that. Or visa versa. I put the knowledge so openly right in front of you that you don't even understand it. There it is, hemoglobin, on the screen. You put it in a box where it creates hemoglobin with CH3 at the same time, with a condition of understanding that the creation of the neutron and proton in one box. Wait there a few seconds, minutes, if you get it right, you see the life taking shape. (1:36). It becomes the womb of the mother. Because you add the free energy which stands as the STM to the dimension of physicality of man's DNA. Then you have the transfer of energy ?? through the blood of the man, and you have the feeder which is the CH3. A box. If you go back to Holland, I said, the empty box of the universe. Now it's in front of you. How much did it cost. Then you doctors who work on these fields so hard to get something done, give me 2 minutes, I'll walk man from any disease. But if I do it, they say I am a magician. I was in a meeting very recently, and the guy said, I will believe you if you change this alcohol into drinking water. I said, what a stupid man, I am leaving the room. The structure of life is in front of you. I have never taught this. We emphasized on this. We taught it years and years ago. In one point in the earlier teachings, Dr. Kostova touched it but she never understood it, and walked away from it. And I thought at that point maybe mankind is mature, but he never understood. Now it has taken us 4 years down the line. You have seen that FP we talked about between the neutron, you are looking to make a H out of it, (1:38). or are you looking to be connected to the blood of the man, to the STM, to ?? what you call the RNA. One drop will change all the soldiers in any navy anywhere on this planet. I told you if I have to force peace I can with knowledge, not with talk. And it is in front of you. Go back again. American government sit at the table of discussion otherwise we'll bring you to nothing, through no one being prepared to fight. There should be no more war with this knowledge today. I made my soul to the level of the STM so I can touch the man if I wish to. How do you want to play the game. Send this tape to any laboratory and tell them to watch within hours if they have understood, they can see creation of life. And because you control the nourishment and the creation of the AA and the FP, you saw the tree go up in 6 weeks, I can grow that tree in 1 hour. All I need to do is another piece which you most probably haven't understood, ?? in the teaching. I showed this in 2008 and 09. (1:40). Ten years, I am a very patient man. If I was there to show and to become Houdini, I would have made man and everything else. I have enough to ?? enough, but I have to walk man out of the present dilemma of his own destruction. You want to talk peace? Let's see how many of you can produce these, as you produced the H ?? and neutrons, and AA, and Ch3, and blood, let's see what you'll show us next week, how many new creatures will appear. And that creature will be a peaceful creature because it takes what it needs. Now let it grow in the soul, how many ?? will kill another man. But the whole mankind has to mature. Not very far is it. If you have the DNA and understand that blood is the supplier of physicality, has anybody seen any blood in DNA, but how does it keep its structure, and it dictates everything in the dimension of physicality. Now maybe you understand.

(1:42). Study this and understand how you created it and how you can change it. Armen put a box of it which we created it a few years ago, in KF, where we used to sell the CO2 box. Look at that kind of structure where you can create ?? forced condition, and step by step like a honey comb, bring it in, that in the center there you have the blood, and the Pl, of the FP of the neutron, and then you'll see what the creation will be. It's like a finger prick, it bleeds in one point, it's not the CO2 that it appears anywhere, does it. You can control the position of it. Put this in the middle of the Gans's where the CO2 sits. I am going to take it a step further. I told you I will enforce peace and I am getting into that position to do it. And I'll walk the king of Belgium into prison if I have to, because that way so many people would have had this knowledge years ago. (1:44). It shows monarchies should not be there to suffer people. They ?? so long, this knowledge could have been shared years and years ago. As some of you know we have our appeal in the courts in Belgium, and then we'll be heard. We are there to give evidence in the courts ?? live, ?? because we see protection ?? And those who set it up will have to answer it. Mr. Delenois we'll see you in prison, you inside and us outside. He draws a Box with red line in middle. You always put your pins in different positions, but you put your pin in the center. You created the Zn and the Cu. You created the condition of the neutron energy. You created the condition with direct positioning of CH3, now you see the position with the continuous creation of the AA. In the whole structure of the condition (1:46). if you get it right in positioning. Phosphorus will itself appear as a MG field, and AA in the shape of what you call DNA will take shape. You have the presence of the fields which in its freedom will follow the process of interaction, will carry the soul of the AA in the form of DNA. You have created a creation. Now you control the soul, the condition of the strength of the ?? soul. if you go back to most of my teaching, I always said that there is something wrong in the structure of the physicality of this planet and it needs fixing. In a way, it's the lack of Zn in the totality of the structure. When you don't have Zn you die. A few years ago, one of the major corporations in toothpaste decided to introduce Zn into toothpaste. Then they withdrew it very rapidly because many people died. Anyone who used that toothpaste within a matter of a few months we saw high mortality. We don't want to mention the name of the company, you can find them on the Internet. They are responsible for many deaths but they didn't know what happened, exactly. What they did, the mistaken process of the toothpaste as we know, it is very simple. (1:48). If you swallow a material you increase the intake. When you use a toothpaste with a Zn you spit it out, you get rid of the Zn. The STM in reduction in the blood created the death. Not through the physicality. Go on the Internet and find the company and you'll see which one it was. .. but they panicked, they didn't understand that it wasn't the introduction of Zn. It was by spitting out the Zn, which is part of this whole connection with STM was taken out. So you have a physicality without a soul. Death wasn't through the heart failure, it was through the lack of existence of the field in the strength of the STM. You have a bunch of cars without any battery, nobody could play with the toy. Now if you understood this, and you carry within your soul the position of the soul of peace, which is non-destruction, you don't wish anybody harm, you can expand it. Goodbye wars, ?? to humanity and the rest of it. If you fly a few SS like this in the next few weeks over this planet, (1:50). nobody will want a war. Elevating the STM through the physicality condition of... don't forget animosity, war comes to us as part of the lack of Zn in the body of the brain of the man confirmation, transformation. We see it. Scientific papers

confirms it. Now you have learned how to do it, increase the production, strengthen by 2 plates of Zn instead of 1, then you'll see what you achieve more. A very peaceful man, because he satisfies the need of it. None of you would dare to do it because you don't have the confidence in you that you can handle it. This becomes pages on the screen, in the future mankind might understand. None of you dares to go that strength to change, because the first thing that will change is you, and then ?? you the others will change. But the thing is are you man of peace that you want the change. Or is it just talk. Now you understand, what will take me to create the condition of. (1:52). Because that neutron which you create as a free energy in this condition will carry the field strength of the plasma of the Zn, which means it will interact with any soul, and then because it has to bring balance, it satisfies the peacefulness of the man because killing is against the nature of the man. War is against because he knows that at the same time he is vulnerable ?? going to be the winner. Now you understand the teaching. I said we'll go very fast, but we'll create this condition. This knowledge will be passed on to those who are the peace makers. And those who don't understand will never touch it, because they are not sure of their own true essence of creation. Any other question. Q: I have a glass jar containing only the Gans Water of CuO, in a couple days was born a fluffy cloud that we translucent and it was growing in size from one week to another. This happened to me twice. I didn't know what to do. (1:54). I didn't understand and I threw it away. What did I create? I can't tell you I wasn't there. Many of you have created things. I saw a picture from AZ and they have created something at the bottom of the tray and they don't know what it is. ... John can you show that picture. Yeah. ... it happened only in the water not in the Gans. To you it's only a water, but did you clean it, was there AA in it. When you washed it you left something behind. For a lot of us, what was sitting near to it, other Gans's. What's in the same position, what did you carry with the Gans? (1:56). It was in a very small jar near jars of CO2 and ZnO Gans's. Showing John's picture ... . Do you have Mg near it. This was created with H, T, D, and AA on the top, and various stuff. So we don't want it is. Have you created a dog or a frog. Why is it in that position, what is there. ... (1:58). .. it moved toward the T reactor. H and D was on the opposite side. Let me explain this. You come into it and I'll explain. We have a dilemma here, not a dilemma it's knowledge to understand. You put Deuterium here and Tritium on this side, then you have a salt water here. If you stand still and observe the process, something strange happens that you are not used to. Somewhere here and here, because you are in saltwater, you have created neutrons. (2:00). And somewhere in the middle you have a plasma of a neutron. 29

(2:10). Q: What is the difference between the neutron Pl of the H and the neutron of the gold or plutonium? The big difference is the energy transformation, each neutron has its own strength according to the population that it has chosen to be part of. In the teachings we speak about the ratio, and in the nuclear technology the same ratio exists according to the mass. So you understand that the neutron of gold is not the same as H. As I always said, just because he has a mustache he is not your uncle. It carries a specific strength which balances with all the other neutrons, protons and electrons in that set. It's very much you see the Gans of CO2, (he draws a Pl spiral) if you look at it as a Pl, it carries both (2:12). O and C, but O2 is 2 different O plasmas, not the same. It depends on the interaction that you want to do, you match this O or this one. Or does the system match with this (C) or with the balance of the 3 somewhere here. In present chemistry this is not

understood and it creates a lot of problems. If we understood it from the beginning it would have been very easy. When you speak about H2O, O is single and you have these 2 H which are isotopes, in MG fields they are not the same. That's why they take different positions. It's not that they just take position against the O but also against each other, so they can't be the same. And as they give and take from each other the dimension ?? fluidity gives the water to be liquid, because this circle is very simple, this applies to all the liquids in the universe. Because the field is so rapid this continuously opens up (he draws a circle going from H to O to H back to H and this fields is so rapidly rotating). Liquid states which is totally in the U, made of 1 element, you don't find any ?? in the ocean. Because of the isotopes of that in MG fields, and not because of the mixture of elements. (2:14). There is a galaxy which is made, its center point by this in the universe. It's a mono-element center, it's not the normal, what we call, Principle Matter. It has been there from the beginning because it continuously mutates itself and its fields. They call it the ancient galaxy because it has been there from the beginning, it doesn't .. somehow it finds its position in respect to other galaxies, it always escapes from any interaction. It's not a single star, it's a full galaxy it ?? controls ?? with all its stars in it. In the center of it there is a liquid. It's not a Principle Matter that is just a field. Any other questions. Q: Jalal wants to ask another question. Can I go for cup of tea while you are doing it? ... You told us something it's like a virus we need to search, I am doing that for a long time I came across (2:16). This rocket scientists speaks about himself.... he was using magnets and Deuterium, ... there's a video on Youtube, and the audience asked him if he knows about you Mr. Keshe, he said, no. The audience encouraged him to get in touch with you... (2;18). ... He said the Gamma ray is different then the other .. .. this Gamma ray if it come close to sperm and egg at right time it will make this person very intelligent in the knowledge of the universe. My question is if this Gamma ray is real from your knowledge that you were exposed to this ray before when you are a child. (2:20). and maybe before you were born and that's why you have this specific knowledge? Did you have your tea? Yeah, I have been listening to this, I have to go find my Mom and see were she was. Q: Is there something different with the Gamma ray? You see ... what do you call a Gamma ray. I have done a lot of teaching on this, what you call fields, Alpha, Beta, Gamma, whatever. There are many rays stronger than this and beyond, but man hasn't got the knowledge to understand part of the structure of what we call the neutron balance energy or the plasma of the neutron, man will understand more of. But what is Gamma ray, what do we call a Gamma ray, a bandwidth,.. you see it's a mono-energetic, it has no ?? to attract or interact, but it takes more out than it puts in. That's the definition of a ray. Then the process has to be .. let me read something I received... The understanding of the totality (2:22). is to distinguish between a field, ray and a plasma. Depending on, not the speed but by the ray to give so much, to become part of 19

(2:30).
(2:32). Q: Stella asks

(2;38). There should be no limitation in the knowledge of creation. The minute we put restriction on the knowledge then we have created a problem for ourselves. Q: Maybe in the past there was this knowledge and somehow we used it wrongly and the planet got

polluted and distorted. Like you said, there are certain proportions of the fields that we don't have in the physicality ... You see we see this pattern in all the creatures on this planet, being is a plant that destroys another one, being it a fish, tiger or whatever. It's part of the deficiency of taking energy from the U and going for what the planet creates to be. There are a few planets like this in the U, not many, very, very few. The intellect and understanding of the creation has passed that point, that you are talking to universal energy. This planet has that characteristic, it's not that somebody happened .. and we are back on it. No, this is a good story, but you can create animals with the same process. If you lack something that connects to the emotional part you get this behavior of killing and destruction. And the system in what we call universal communication, time, when we look at these things, we look at the lack and what was not there when it was done (created), if it were there it wouldn't have been done. (2:40). If the planet earth at the time if inception of the man had enough fields of what we call Zn and relevant connections to the Mg, we wouldn't have seen this kind of behavior for any creatures on this planet. 15

(2:46).

.. Very few people have given donations without wanting something back, (2:50). be it knowledge, shares, buildings, everything has been taken ?? So if you give me a million, it goes into the KF and I am sure within a month or 2, the team of the KF and all the wages we pay will consume it and it won't be there. Because then more people will have been taught and in the process of teaching somebody gained the knowledge, saved his wife or whatever. We had this discussion around the KF recently, all the knowledge given freely but nobody ever paid a single penny back to the KF, and they see this as their god given right to be given free and they do. 42

(2:58).

(3:02).
(3:06).
END

240th Knowledge Seekers Workshop - September 6, 2018

(,)

(:06). Someone asked me to disclosed how much the KF has received in the past 7 days as donations. We went through it and we received an amazing 5 Euro. An organization that costs thousands to run and millions of people benefit from it and we have only received 5 Euro. So we are doing very well ??? .. we can run the operation. On the other hand an organization like this takes a lot of pressure from governments and individuals and we sit here for 15 years, more or less 25 years research and development, except for 1 or 2 private funding (:08). from what I call assets of the KF. What I would like to do today with teams in the background, is to bring new understanding to us as a whole in

what we have achieved and where we are now, because sometimes we have to assess what we have achieved and how we have achieved it. ... (:10). ... we need a case of a 35 year old woman, any one want to come in ... Alzar comes in. We need someone to be the mother of the 35 year, in 50's or 60's, even if your a man you can do it. It's just a case to see and study the social structure of it. .. no volunteers .. (:12). Marie volunteers. Let's say the mother has tolerated the daughter at the age of 35, thirty years of epileptic attacks, and let's say the daughter had her first attack at 5 years old, and the mother and father have done everything for 30 years. We need someone to be our doctor. Can we ask John Deven to be the doctor. You're a doctor in a mental institute and you have over 30 years there and have monitored this daughter for over 20 years as a senor consultant in one of the leading hospitals for psychiatric treatment and according to your order you have instructed her to take a combination of medications on a daily basis. (:14). of around 20 tablets per day to control the seizures. How do you feel Alzar to take 20 tablets to control your brain? Not so good. The mother how do you feel forcing your daughter to take 20 tablet a day? It's very hard to make her take them. Doctor what gives you the right to give 20 mentally controlling medicine to your patient as a professor? That's all the understanding I have that's in my toolkit, it's all I can do to help her. Now I need to explain to you, if you multiply 20 times 365, how many tablets per year, 7,300. For 20 years how many have you taken? 146,000. Now we need the General Practitioner. Giovanni would you like. (:16). ... So you are the one writing a prescription for her every week, how do you feel? Very bad, the problem with the medicine is it doesn't know the interaction between all the tablets... John has told you have to prescribe, you have no choice. (Rick says not only that you made $10 per tablet, that's 4.6 million dollars.) I forgot to tell you. Let's say one of these tablets are specially designed and cost 40 Euro per day. Let's use Klaus he's a good businessman, you be the pharmacist, how do you feel you have a regular income from this girl. It make you a very rich chemist, huh? Let's say you sold to the family 140 tablets ... you must have made enough to buy a house from it, thinking that you make 70% mark up on the medicine or is it 30%. You are a rich guy. (:18). I need a very strange character. Peggy would like to be a strange woman walking on the street. Now what happens, I forgot to tell you, with this 20 tablets to control 20 or 30 epileptic attacks per day. With the medication they have managed to bring it down to 4 or 5 epileptic attacks per day. Even though she is taking the medications she is still having 4 or 5 massive seizures per day. Let's say you are stranger walking on the street and let's say Alzar and her mother are crossing the street and she has a seizure in the middle of the road. What would you do as a stranger? ... if you knew a man who could help her get better, would you introduce the man or hold back? I would absolutely introduce. (:20).

(:24). Would that be against your pride or a break through in the knowledge? I think as a doctor there is a commitment to serve and the fact that she is better is part of the goal, and the fact that she doesn't need my services anymore is okay with me. 38

(:28).

(:32). This is one of Court cases that I am accused of in Belgium. To the king of Belgium I am a fraud for 1,500 Euro for the systems which have given life back to a girl, 35 years

thousands of tablet. The reason I brought you this, I told you we'd open this up, the case of defense in Belgium. This is what has happened. No medicine, I developed the plasma technology ?? she has recovered. This is one of the major cases where I have been accused of fraud and deception. Accepting 1,500 to build systems and spending nearly 400 hours with the girl and the mother. And the Belgium government has saved another 30 years of 200,000 per year of medicine. According to the Belgium police, it is a fraud. What I would like to know, if the webmasters can open a channel, how many of you think this is a fraud? We can broadcast the vote. How many of you think this is a fraud, there was no application of medicine, now that you know the Gans technology is a natural process, there is no application of medicine. It sits as a case in the court of Belgium, (:34). I have defraud this family 1,500 Euro which they paid for me to build the systems, multiple systems, nearly 20 different systems had been built as she developed (progressed). Forget about the time I spent and everything else. So is this a fraud case or is this a breakthrough in the world of science. It would save the Belgium government millions of dollars if every person with epilepsy changed. Question #1, is it fraud if someone pays you for systems that they confirmed they received and the scientists in the nation confirms a major breakthrough. You can enter yes or no. The other question is, how many of you think the police have the right to rewrite and submit deception information and falsify evidence in the court. Question #2, In the western world in Europe are the police allowed to falsify documents and get away with it? ... Because don't forget the documentation of the medication of the daughter can be proven very easily. It is registered 30 years of medication. .. (:36). ... And strange enough is that Mr. Red Circle has been there to give evidence that it is perfectly done and is thankful for what has been done. ... Now you can understand how we open the case in the courts of Belgium. If the new T doesn't allow no work of a medicine but is a work of nature, now you can see , you develop the things form natural process. ... we don't blame the family, the police officer has tampered with the evidence, falsified it. (:38).

(:52). Cut this part and send it to every judge and embassy around the world. The woman in the street who happened by when the girl went into seizure was Caroline. She is a criminal, now you understand how justice works in the state of Belgium. Of falsifying documents, never telling the court what was the effect of 1,500 Euro, saving a nation 10 million plus. This is what many scientists like me have stood and many have lost their lives. Going back to our teachings. What we see in our teachings is the progressive development of the same T, there is a progressive understanding of this T, that in the space we need to create a space that man can be safe and can live within the environment that peace in space has to be the peace of mind. (:54). We have to understand that the science of space has to be able to change the atmospheric condition but not the entity itself. This will have a lot of deeper effect on the lie of many of us on earth and in the space. What does this mean if you have not understood. If you go back on one of the most interesting videos we saw from Tom Sellers (hurricane shield), we saw the environment of destruction outside the dome area, but we saw the containment of life as it is, as it was inside the dome. When we build space systems in space to mimic we need to be sure that, that space can save us, can protect us, give us the continuity of the present life as we are used to. If we understand this and take the knowledge to the next step, (:56). is it correct to be able to establish an environment in the space where we can

cultivate land like we did on earth, where we can create flower beds, we call it paradise. The word paradise comes from the Persian word ??. the Iranians made this word to describe the beauty of existence where in the gardens of the house they create a serene oasis in the garden that they could go to and sit and have a drink, tea and play backgammon and the rest of it and they called it ?? mahesh. In the future the word in English became more like paradise. The Persians explained what paradise is. If we go into space we can create such a paradise. Can we take the seeds and trees with us. Do we carry a bank of seeds with us, or do we carry a bank of the MG fields of the seeds that we can create that seed anywhere. Do we go to recording of the M fields, or do we go into understanding that not only we don't take food, medicine with us in the space, we can create the condition in the space where we can call it paradise of earth. This is the next step in the space T development and understanding that we create our own living condition and now having the knowledge we can carry ?? the life in the space. (:58). It is important for us to understand how to establish this. What you see as the damaged area in the background, is (like) the space on Mars or Moon or whatever or any space in the U. It doesn't matter what happens, you can create the condition inside as you have seen to create that paradise. 25

(1:06). If you have the ability to create the brain of a person which is a physical dimension to it. You should have understood by now that the soul which created the physicality is itself part of the bigger dimension of the creation of this universe, and can be replicated. Man in understanding the totality of the creation of the Pl from the structure of the neutron soon will come to understand he can replicate anything because now you have a plain canvass, which you call, neutron plasma. Many of you will come to understand this in the future. Some of you will achieve it more and then you'll claim to be the Creator and to be my teacher. And you taught me this, I had better tell you before you get to that point ?? that I ?? have said before. I am the Creator, in the soul and in that essence is the gift which we give. Because if you understand the totality, we are all the creator of the destiny of our own, but one thing we never realized is that be it the STM or be it the creator of the STM, one has to understand the limitation of the knowledge and the strength of the universe gives man one limitation, his ability and dimension of physicality brings demise to the present knowledge of the man in the dimension of existence. (1:08). Man's physical condition which he has chosen to show the existence of his soul in the condition of the existence of this planet in the solar system and within the galaxy and the rest of it, needs to be modified and understood that extends of the life of the man to the life of the U and not to the rotation of this planet around itself. You have to understand how to apply the interaction of the fields. And then by the interaction of the fields, what we call neutron plasma dictates the creation of entity as you like. And those of you who can reach the level of understanding you can even create what I call, plasmatic M fields of the STM, even ?? yourself. This has huge implications and applications, this will come and bring man to a new dimension of understanding. the dimension of understanding, for example, is the freedom of many of our people who we call schizophrenic, who I call beautiful people. When I tell you there are 2 souls in one body and if you can allow and understand what I explained in the past few minutes you can allow to create the condition for the soul to be freed to manifest itself in the dimension of its own physicality, and then you say to the father this is John and this is

Jack and not that the guy is mentally ill. (1:10). In the coming time many scientists will prove this and do this. The word Schizophrenic will be written out of the book of man, if man understands the teaching of today. It's not replication, it's the freedom of a soul in giving it a dimension for it to decide how to manifest itself. It's very easy, you have to create that dome which made this Garden of Eden in the Caribbean. Then the soul will manifest itself in physicality and one doesn't need to kill the father or the mother, and one doesn't need to commit suicide in hiding an entity. The knowledge of the science of today is beyond comprehension, but soon man will do what he says, and will achieve what has been taught. Don't forget there is no Belgium police to make you a criminal. They will praise you as you have freed the soul. It has to be understood that we all carry the same dimension. It all has to be understood that we have the knowledge but we have to understand the knowledge. Many of us, (1:12). of human beings in the coming time will go through these teachings one by one, then you'll understand how everything has been done in progressive element, as you mature in understanding. Gaining momentum for the KF and teaching is coming up. Many of you will claim you have been there, when I started ?? as I said before, and many of you will give your life to be part of the change, you'll devote your life to change the course of humanity. We see these changes on the horizon, it's not for us to satisfy the physical need of the man, from now on it is important for us that the man satisfies his own needs. If you understand and you ?? work through the process of understanding the teaching each one of you should be able to sustain life without looking at the KF. Life has to be part of existence in the U. How you mix Gans's and ?? of existences, all depends on your level of understanding. For 2 or 3 years now you all have been looking for the generator and it has been sitting in front of you. As they say the body of the man carries the energy of 18 Hiroshima bombs, if you can convert 100th of it you have (1:14). enough energy to survive many lives. The process of not being able to eat, to see, of sharing the knowledge through the school of the thought of the STM will be one of the biggest preoccupations for the man for years to come. Many of us will come to understand one thing, the destiny of our soul is in our hands and the physicality will follow. Many of you who understood this go back to the way you made the Gans boxes and dynamic cores and start looking at how your soul has been created and try to create a balanced soul that your physicality follows and then you'll find out that there is no need to feed the man or to worry for the shelter of man because you will make the shelter as you think and it will be there to confirm your existence. One person who said "no" in our voting was Mr. Delanois. That will not keep you out of prison, sir. (1:16). Any questions. Q: John of AZ. If we were to create a SS and we were in a position to help some people by taking them aboard the SS and taking them to a different environment would we interfere with their right to ?? because being on a SS puts them in a new vibration? If you want to go parachuting and you know you have a parachute on your back and you want to jump out of the plane and nobody pushes you out, is it wrong or right? Or you want to have the experience of what it means to fly like a bird. Q: But in some cases they might not know the ramifications of what they are getting into with the elevation of the soul and they might have the choice to say they don't want to have their thoughts changed and become more peaceful, I like it the way it was? I think that is the position of being in the womb of the mother, not knowing if I want to be born or not, but you have already been set up to be born, what do you want me to do with it, do you want me to put you back in or do you want to stay in there until you make up your mind.

(1:18). It's the story of the Jewish woman pregnant for 80 years. ... story.... it took 80 years for them to decide who would go first. So you make the decision of how to go out and taste that field. And this is the story of our life, we don't know what is considered life but ?? would we come by turning the corner on the street we meet the most beautiful soul we would love to live our life with, or would we end up hitting into a car or a wall, or finding the most beautiful dog on the planet and carrying it the rest of your life. Life has consequences on what decisions we make and where we go. You made the decision to turn the corner, unless you were handcuffed and taken with force, then that's a different thing. The freedom of choice is confirmation of existence and we decide how to exist in different ways and forms and shapes. What happens when a hundred of us get on a plane (1:20). and leave our destiny in the hands of a man who just moves a few things and takes off, what happens if he decides to take a hike to the Caribbean it will take you ... with it. Elevation and decision is by the soul and not by who and what takes you across there. With soul we have the freedom to choose the position, with physicality we are entangled within it and we have no choice, that why they can imprison physicality, but they can't imprison our soul. When you are a prisoner you still go to sleep and you dream and you leave physicality behind. If I force you to not sleep at 10 o'clock but make you sleep at 1 AM, keep you awake for 3 hours and then you have different dimensions of the travel in the dimensions of the STM, have I committed a crime or is it their responsibility that the soul has to find a new dimension at that point at 1 AM. Very soon many of you who understand the T and the interaction of your soul with your physicality, and gradually as you balance the fields of the inner soul or the matter state of the physicality of the life with the STM, you'll find out that you will be able to travel through the walls, ceilings, and planets. (1:22). Because through understanding of emotion you can create a dimension that you can pass through, very much like walking in the water, it doesn't matter what it is. Like the way we walk through gases, if you understand the totality of the science, everyday we walk into matter state and we don't consider it. On this planet you are walking through gas, earth, O, N, the magnetic fields we call gravity, and what we call atmosphere. We have forgotten the reality of our existence. How come our soul has decided to be able to walk and go through this strength. If we manage to understand the totality we can walk through walls, the walls we made, we gave it a strength and called it a brick. But if you look everyday we walk through a mass of what we call air. How come we can walk through the air but we can't walk through the wall or a chair, planet or U. It's the strength that we have decided to manifest ourselves to be able to transport ourselves at this strength and it has become so normal for us that we don't even consider it anymore. If we understand that we are now in charge and in control of our own strength through the soul to manifest the physicality of the man and we can control it as we elevate our own soul, then would walls means anything anymore, or would you like to go on the hundredth floor and change your soul and take a free fall for 99 floors and appear on the first floor as if you had taken a jump with a parachute. (1:24). The new science which I taught you has opened many doors, it's for man to elevate his own soul that physicality has no dimension. These are not imagination, many of you have gone through it, but you don't see it, or you have seen it and you said, oh something strange happened. If you think of it, as I said, in the gaseous condition, because we have strengthened our souls in the physicality dimension of existence to the level of a gas. What about if we do it in the level of water, or level of matter state of this planet, would

you be able to walk from room to room, or do walls matter anymore. Somebody asked me if I see through the eyes the bodies. I said, no I see the soul. This is what we have to understand, in man elevating his own soul, in all dimensions, the mater states become irrelevant unless we decide we want to match into it. It's the same as if we decide that we want to swim in the water, then we can decide what depth we want to go in this water and still be there, because do I need to take oxygen or do I tap into the energies which are within the water. These are not anymore something in the story books. Most of you have this knowledge to achieve it. (1:26). But you have to understand how you control the energy dimensions of your own soul. How you create a condition in this environment that walking through the door is exactly as you see, what we call the heaven or paradise or "bahesh". We have to understand that the extension of the knowledge has now reached the extension of the STM. It 's the STM which will take into space, ?? rather then the physicality. Then the soul already knows if I am going somewhere and I have to decide how I am going to manifest myself there. It's very much you live in the North Pole and you decide to go to the Caribbean island on a holiday. Do you take the bear you killed last year and you put the skin on you, or do you have to take some arrows that you can hunt with, or would you go with a bikini or swimming trunks and you take a couple of leaves just in case if there is nobody there you can become Adam and Eve. And then would you go back with those to the North Pole or would you take your skin back with you. I said this many times, how come the animals and the birds change their color, or dress themselves in different colors, but man chooses the clothes to hide himself in different colors. Does it need a way of thinking that we use the same line of understanding and the thought of ourselves in respect to the animals (1:28). as we do to ourselves. The school of thought which you have been taught in the past weeks and months is taking man in that direction in the dimension of the space of the U. Nobody can blame anybody else that you took me and left me there because your soul is aware of the destiny you are going to, it's you who has decided to go with that physicality. Please start testing on the level of the plasma of the neutron, then you'll have a plain canvass to be and make whatever you like. Elevating your soul will become part of the whole structure, then you'll see if you like to capture and imprison your soul in the physicality of the man. You made the swimming pools, now make plasma pools and then in that dimension as you change the Pl strength of the pool, you'll see what you manifest yourself as. Any other questions. Q: Last week you were talking about CH3 and Hemoglobin Gans setup that can position a free flow system for help with self healing by impacting the mind/body/soul in one go. (1:30). I would appreciate if Mr. Keshe can share his view on the best way to apply this free flowing system for ttoal healing as previously dynamic reactors in SF with different Gans's was recommended? We don't recommend, we teach, it is you who chooses the way. There are developments in science and everybody takes from it according to what they understand from it. If you start creating hemoglobin you have to understand that you touch the soul of the physicality of the man. But the soul of physicality came from the collective soul of the entity itself. If you take the knowledge a step further it's very easy to understand that the hemoglobin that you create, it is you who gives the soul to it. That is why that hemoglobin will fit to any bloodline A, B or whatever, because it is a matter physicality and not a soul physicality, so when you receive it you give it the soul according to the soul of yourself. When you get a blood transfusion from someone it carries there soul with it. The process of what you carry

with, what I call plasmatic hemoglobin, it is you who gives the soul to it, so it fits anyone. It has no dimensions or characteristics, it's you who gives it the life and soul, and in that process you become the controller. (1:32). It's part of understanding the totality of the knowledge, not just pieces of it. When I teach you about free flow it means you have to understand that it is you who gives the soul to this matter existence, that's why it fits any of you. I can inject that hemoglobin in a dog and it will become the soul of the dog ?? to fit him. I can eat and drink it and in the transfer of the energy I receive what I need. You can inject yourself with it with type O and it will have that characteristic of type O because it fits your soul. It fits everyone. This is why the new medicines of the KF which will be promtoed by KF in a very short time has this characteristic and they are so effective. Because we give the energy of the element, it's you who gives the soul to it according to your need. There is a beautiful saying in Farsi of Bahuala, but man reads it in the matter state. It says, ... It means whatever happens we do. But it is the destiny which is the soul itself that will take the shape of the man. ... it means whatever does he'll do, not in the name of the Creator, it's in the name of the STM. I give the blood and it gives the soul to it and it takes it. (1:34). The direction of that soul. It is part of our work and the teaching of the soul. So if you create that hemoglobin it's a blank canvass. It's your soul that gives it the dimension and the strength and even you don't need to carry that, because if you think a step further, even the soul is the create of the body. Then you understand, I made man in the image of Myself. I made the soul of my physicality in the image of myself in the dimension of the existence of my soul. Any other question. (1:36). Q: .. What one needs to consider for the lift concerning where the ground stands? What do you mean? If you have a system and it stands on the ground or on the table what do you need to pay attention to regarding the isolation or influence from the ground system so it can manifest its full potential. You asked this question in a different way last time if I remember correctly .. it's the same process as before, you don't look at what you have outside, you look what you have inside. This is the way that many of those who work in the space T have to consider. Why are you so preoccupied with outside, it is you who controls the inside and then you decide how this system interacts and positions itself in respect to totality. If you create a craft and you make it fully attached through down to the ground and you say okay I want it to fly, what do you think might happen. If you are knowledgeable the screw means nothing because (1:38). you are still detached, you decide that, that part of the planet becomes part of you. If you are trying to move the physicality then you get a ship wreck. You get the box torn or the system torn apart, you have to decide what are you creating inside because you're a ?? independent entity, if you are sitting outside and you are trying to control the inside, then you are in trouble. The space T in the spaceship dimension is not a remtoe aircraft carrier, that you sit outside, a drone, with some other things you shift up and down and a button you push and it goes. If you give a soul to it, through the dimension of the soul you can request from it, this will be nice for me to see. 57

(1:42).
(1:44). Q: Stephania
(1:46).

(1:52).

... All the lights, the speed as you go down they're all the same. (2:04). It's the guy who has decided to put a red cover on one and an orange on the other ... while in essence the light that shines inside is the same. It's us who has put different shades on this light and we call it the STM, and one light sees the other, it doesn't matter what you put on it. 31

(2:08). So with a Stem Cell, in so many ways, you're taking another person's fingerprint. But in a different shape, whether you take a kidney or a liver, a stem cell is the same, it has the fingerprint of what created it, or what came out of it. Any other question. Q: In the Mozhan you used to say to us that when we can change the color of our eyes then we are in control of our soul. Then you said before to be able to change the intensity of the fields, that's why I thought it was to change the color of the eye in that way is also to be able to control the intensity of the fields ... to be a plasmatic or to be a material ... was that the reason you told us that? (2:10). In so many ways, yes, because you allow the release of different strength of fields and inevitably it leads to different colors and length of the physicality, or what you call the plasma fields of the eye of the man. When you look in the evening at the horizon you have a sun, and as it goes through different strengths you see an orange sky or red or whatever, it's the strength of the fields. So it is the same when you learn how to .. and the position of the eye and the STM .. this is what is never happen, if you allow the passage of light 49

(2:14). Q: Fernando has a question about the soul and addictions. .. problem with microphone ... (2:16). Q: Can we obtain the SF using 3 fingers, is there any link with this SF and the soul? I don't know what you are talking about. I did that and I found effectively I can feel fields using fingers, it depends on the distance from the ground. Is it possible to link the field from the hand to the soul? (2:19). Any fields coming from the body is connected to the STM. What you said about seeing a change at a certain point, we see that in the running of space reactors, change of dimension according to the position of the strength of the field. If you can show it by video you'll see it is another configuration of position in respect to distance. I presume if you use slow motion you might see totally a different dimension in the interaction. You have a field, if you change it to Cu would it be in a different position, if it is bone it's another position, or does everything change at a certain distance. (2:20). We have known this for some time in our research. One of the parts of space T in various stages in Iran, we face something in this position that we could do some tests on some tables, and move to another table that was at a different height in the lab, we couldn't understand it at that moment, but in the change of position we start to se it more and more, at that point what you are talking about, we decided to get rid of all the tables in the lab and the tests were done on the floor, all the flight reactors were sitting on the floor, because in how and where we positioned reactors we noticed what you were trying to explain, and this is part of the teachings, systems changes direction, but you have to understand it literally explains the status of the mind and the STM at the point of the transition where it changes. You change see this physically in the space reactors what you are explaining. Any other question. We have an experiment of CH4 inside a CO2 box with Pl fields. (2:22). This call goes to the Chinese community of KF, as we told you we are trying to establish the factories, please keep in touch with the KF structure through Shinzan Lab. In the next 2 weeks we start the recruitment of KF K

Seekers to work in the factories. This is a clear understanding, KF has entered the manufacturing phase, we are looking next 6 -10 weeks to recruit a number of KF K Seekers who are seeking work to work within the factories. Please get in touch with Shinzan in China. The factory has been found an advanced site, by the time its ready. ... the first position in China is near Beijing. ... (2:24). This is a large scale operation, we're talking 10 - 20,000 square meter space. ... we are looking at 500 to 1,000 people on a 3 shift basis. .. there will be training and teaching within the factory structure. .. (2:26). .. Q: Fernando. ... He wants to know about the soul and the states of motherhood, (2:28). (2:32). .. he's mixed up and problems with connection. He knows the souls are eternal but what is the relation with the soul and religion and the state of motherhood, that's a bit mixed up in his mind, ... (2:34). He wants to know, we have a solution for addiction, he has a problem with addictions and has been treating himself, but he would like to know what is the recipe for curing all addictions be it sugar, anxiety, or different drugs? ... he would like to know what is the recipe to assist all addicted people to cure them? That was presented by Mr. Keshe in 196 K Seekers Workshop. (2:36). ... (repeats). .. (2:38). How do they control the emotional part of the addiction. ... Can the person go back to his relation with his mother to be able to find a solution to the emotional part between his mother and the addictive person. .. How can we tell these addictive people to go back to their relation with their mother, this was mentioned in the 170 KS Workshop, but what recipe should we use to treat these people. (2:40). ... He has treated many people with illness be it alcohol, wifi games, other addictions. He wants to know the recipe to really get down and treat himself. And get rid of them. (2:42). ... he has good results treating others addictions but not his own, what protocols should he use. First of all ask, is he a medical doctor? No. Is Mr. Keshe a medical doctor. Many times we have said he doesn't answer medical questions. We don't talk about curing, healing, etc.. We don't use those words at KF. We can answer about processes. This is not fair to Mr. Keshe because he'll go out of his way to answer it. (2:44). We went out on a limb to answer Andrews question. Thank you Rick. 15

(2:48).
(2:50). ... Ella presents KF Plasma Times. This is the 3rd edition Sept 2018. (2:52).

(3:00). Article on "better sleep patterns" using Gans patches stopped sleep interruptions in the night, (sleep straight through). .. Looking for Host of the private teachings in English. That's it for this edition. ... (3:02). Every second Monday of the month we have a public testimonials meeting... (3:04). Anybody can come forward and share their experiences with the T. .. As many of you know KF is interfaced with governments, we have been successful in many cases where governments are interacting with KF scientists. ... Farming, Health and Space.. Malta is requesting help in producing large amounts of Gans (30 to 40 liters) (3:06). ...
(3:08). .. Ask your government what you are short of, what do you need, and test the T. ... KF has broken through with the governments.
(3:16). ... Next Tuesday I am meeting with the Prime Minister of a nation (3:18). that KF has a solution for, it's one of the leading nations in the world. On the 12th or 13th we'll have an answer, because they tested us for 3 years. Now we are in position to move. We are in one of the leading top 5 nations in the world of how KF has change the

position of ?? By offering a solution and 3 years of testing we are on the table. We have reached the presidential ... We ask the support from the U Council for this, it is fundamental. It's one of the biggest moves in KF very young life, That governments have asked for it and it has been delivered, 3 years testing submitted. The Minister and Cabinet will make a decision and it will become a blueprint for the rest of the nations in Europe. We know we'll get it because we have already received the pre-orders for it. Because nobody could show the solution. We have been asked not to discuss the solution because it's fundamental in Northern Europe. But on the 11 and 12th makes a decision on the KF future in decontamination. (3:20). I will try to be present in the meeting with the government a representative of my team will be there on the 12th. If we get the approval, then it has to be decided if government can afford such a huge change. Then we go to the next step. Don't go and offer a solution, ask where are you loosing money and let me see if my foundation has a solution. Q: Who to contact if we learn of a need? We have our webmasters in the background. It has to go to the head of the KF, Ella. .... (3:22). For problems in the nation it should go to the U Council. ... Again for Malta support...
(3:24). Q; Jalal asks about contacting the Embassies about finding out the countries problems. (3:26). Contact web addresses for UC and Malta Gans support. ..
(3:28). ...
(3:30). The CH4 Experiment presented. .. Before you start, why do you want to produce CH4, what is the purpose of it. Because I think CH4 can be produced. But what are we going to use it for. Maybe I can use it to create water, I think it is one of the methods.. We are Chinese with a small team. (3:32). ...

(3:36).
(3:40). Expand this picture, CO2 on top and CH4 underneath ?? ...
(3:42).
.. you have not produced CH4, you produced CuO2 and ZnO.
(3:44). Because the shape of the container you have chosen enforces CuO2 and ZnO..

(3:48).
(3:50). ... Thank you. For the Chinese community. I will make a conference in Beijing, limited to Chinese Community KF, in the next 2 weeks. (3:52). ... this is to bring the KF Chinese community together. For the Chinese community only 2,000 seats. (3:52). It will set out for the future of the KF which is very bright, we have achieved a lot.
(3:54).

(:18). (Red circle and Belgium's and court case.)

(:24).
(:30).
(:36).

(:40). What is interesting is where do we take this T from now on. We have brought the plasma T to a new dimension. In the coming days and weeks we take a new turn, and you have to follow us, I say you have to because you'll see it, not us. You have to follow to free your nation, it doesn't matter where you are from food control. One of the biggest controls that the Americans and Europeans have on the world at the moment is food security. We'll release official data's very soon and governmental data's that the proper use of Gans T allows the harvest to grow 2 to 3 times more, and doesn't hopefully show us any genetic defect or changes. This has huge implications on African nations who live on the hand out of the Americans. Because a farmer can't produce enough food and the Americans flood the market with cheaper food and prices go down. Now the farmer can produce 3 to 4 times more rice, that he can challenge the American import. I have lived and worked in Africa for years. The biggest problem in Africa is the American food donation in rice bags. They bring the nation to poverty. What we need to do is to teach like the beautiful job Dr. Gotoa is doing in Kenya and the work the KF will announce in the coming time in another part of Africa is to teach the African nations in a very open way channel how to produce Gans and how to use it in farming. It's the job of the KF and especially the UC to start mass teaching programs. (:42). We don't need to have millions, you have to ask, setup, position, condition, that members of the UC become actively involved in teaching the T. This is how we will bring the freedom of man. How to bring things out. We put the factories up, we'll support because not everybody can do, but people have to be able to help themselves. The knowledge has to be taught freely, as we have opened everything else with it. We have to, it's our job to buy the freedom for the human race. This is the job of the KF. If you have One Nation, you can't bring separation. The data that will come from the research by governments in the next few weeks will allow the KF to join one of the biggest programs in the world, that we can spread the knowledge freely through that process. We have put our requests. Our requests to the governments are well known and when it gets achieved in the next months to come then we'll with the knowledge of a government to be able to have. We don't go to create slavery as the Europeans have done by taking Africa, we go with the governments to bring the nations out of slavery to the freedom of themselves through the new knowledge. In the coming time I will release new technologies for mining, which has never been disclosed but is in the patents. There are ways to mine without damaging geology, the economy of the country, or destroying forests. The knowledge is within us. Many of you have practiced it but you have no understanding of how to apply it. We don't need to dig mines to destroy a city, or strip a nation from its assets, and then sell it for more outside. The new mining section which will be developed, (:44). will be without destruction, it means we can't destroy anything of the environment. It will be direct, the same as how the material was (originally) produced, be it gold, diamond, Cu, Zn or Fe. The old traditional mining with mankind is finished. Now as part of the process I start teaching it. It needs collaboration in a totally different way across the KF scientists and workers. The new way of mining through the KF T is so touching and beautiful that it gives the

humanity 2 choices, do we mine or do we convert. You have seen the conversion, the way we have shown the Kini tree in Austria, we didn't touch the ground we used the environment to bring the energy to the plant. We can do the same as was shown by our research centers in different places, where they produced materials from the interaction of the fields of the universe as we will do in the space. What we do now is not to show a new T, these are tests to perfect the T so that when we go to space we have a full system that we know how to convert the fields of the U to Cu, Zn or whatever we need. This is what I said from the beginning, when we go to space we don't need to take any medicine or material with us, because as we have seen from the research centers, when you want Cu you create the field strength of the Cu that the Pl of the Cu converts into Gans or to a material condition, creation of environment allows us to do this. We saw the first time this was done by Peter in Austria, some 2 years ago and then he took his material to be tested because he thought he created gold, (:46), but he created Zn and everything else. Now that we have learned how to produce Gans's, now we have to understand the process of the conversion is the same. We produced Gans's in the salt condition of this planet. Life comes through 2 processes. There is a big misunderstanding in the supporters of the KF, when you use an acidic condition you work within the matter state, when you use a salt condition you work within the Pl condition. In the muscles of the man there is no acid it's all work on the salt level, so it gives life, continuity, and conductivity. It gives interaction of fields, whereas when you work with acids you create the link of the matter state in molecular. We have to learn the science the way it is, because I asked a simple question very recently, how do you lot make a Gans of sugar. I asked many people and somebody has come up with HCl acid and sugar and you get the Gans of sugar, and the evidence is that, it still has M fields so it must be the Gans. To produce Gans you are not to go through the acid way, you have to go through the salt way. And the same is with NaOH, understand how you produce it and then understand how you create it in the Gans state, then you can use it in the space. There seems to be a lot of gaps in the knowledge or in the teachings the knowledge has disappeared or it was not understood fully. Those of you who have been creating the Gans of sugar, (:48). using NCl or Nitro chloride acid or whatever, you have gone the matter way. Go the way we established the program. You will get something, but it is not in the Gans state, because if I put it under certain condition you'll see it will not perform. You make a very high acidic, you can even go to negative (PH), but it doesn't mean, as I have said, whoever has a mustache is not your uncle. .. I love Farsi stories because they tell you exactly what they mean. IN this process we have to learn how we produce these materials, because in the space we need to follow the process of life. Those of you who go into production of materials you have to understand that your water has to have a matter condition for it to become matter. If you are using the fields to convert to the plasma to become the matter you need the salt conversion in your environment. Those of you who created a Gans of salt you need it to be able to achieve a fast conversion, it's part of the work. Today's teaching I have tried to cover little bits and pieces that have been left behind, and not understood, because these little, what I call nitty grity's are important to the whole structure and puts everything back on the same position. I remember in the 1990's when the Eastern Block opened, I went to a factory in Romania, and there was a guy there in a shoe factory with millions of shoes and this guy was sitting there arguing with another guy for the position of the little tiny holes on the shoe. The next day they were still arguing (:50). how they not putting it

where he wants it. I said to him, you have millions of shoes why are arguing for those little holes? He said, when the hole is here I can sell thousands of them, but when it is here it doesn't look (right) I can sell any, I'll go bankrupt and these people don't understand the position of the little holes on the shoe. So little things count, and these little things have been missed in the teachings, maybe we are going too fast, maybe we gathered the information in different ways and we didn't discuss it, or ... (connection ..) (:52) ... the little things. What I was trying to say is that we missed the little nick knacks of the knowledge and a lot of people have infiltrated their own knowledge and what they thought was the correct way, and a lot of people have followed it. I have a problem with the Gans of sugar, and to me it's not a Gans of sugar. And if I am supposed to create a CH3 in the space and I don't have it, or I take a wrong field with it I am sure I am not doing what I am supposed to do. People say the sugar is acidic and it goes to minus 1 (PH) minus, zero, wherever it goes, but does it actually go that way. There is another problem in the whole structure of the teaching which you have to understand and it comes to haunt our K Seekers and some of them will get lost in the maze of the knowledge, is what we call alkalinity. (:54). How do you interact with the alkalinity to change it to acidic, or to how to change the acidic to alkalinity. In most of it we just change the names, if you look at it, what we said in the other teachings, alkalinity is G. Scientists have tried to find another way or name for it, and what you call acidic is M, it's giving, and if you work on this basis it's very easy to find out what it is. When you are connected to the H, which is a Free Plasma you are in a position to give, you have a free electron trying to find a match, everything it can that it can develop itself, it can give to sustain connections. Then you are M, you call it acidic. If you look why it becomes alkaline is because you carry the majority of the time connection with the O, which is a G pull like a magnet of energies in an atmospheric condition of the earth. We talked about this before in the teachings and apparently the knowledge isn't getting through. If you understand this process it should be very easy to understand the next steps that when you create a condition you understand the difference between the different terminologies we have used in the world of science. If those of you who have been producing Gans of sugar, through acidic condition, it's a different direction, what we work as a Gans, a M field, (:56). then in the space of what we call MG field spectrum doesn't create a condition of a FP. They will have effect, they are all the same, but the way the M fields will perform is totally different then when it is done through the salt condition of this planet. In the space we don't have salt or acid. In the space we use the FP of the neutron to create these conditions. This is part of the teaching I went though the last couple of weeks and many people are trying to test it and see if it goes. The knowledge of the space has to be unconditional on the matter state (? what does it mean?). In the space you have to be able to use field strength in respect to what is coming to you, or to what you are taking that you can produce or retract what you need. In the coming teachings especially on the space side I will show you, and it is part of what will come up, what we call space travel. Space travel in the dimension of what you think at the moment, as we said, communication we use the mobile phone. In a very simple way you can transfer packages of information. At the moment you send a package to go through the post you can create conditions without any costs, that you can post your systems through the MaGrav systems you have at home and deliver it to anywhere you like at zero time delivery. I see this to be with the man in the next 6 to 12 months, because when we speak about it, we

incite the knowledge, which will bring others to start working (:58). and in the process they develop it. This means you'll be able to package energies. You have done this already. You call it Nano technology. If you go back and understand how you created the Nano materials you have already been through this and now you have to extend the knowledge. It means, those of you who work on these extend your knowledge in a very simple way. Let me go back to the basics of the knowledge. Look at what you know and extend the knowledge in that process. .. If you remember, this was a Cu, if I put this as the molecular structure of the Cu (draws small circles across) bar. (1:00). If I number them 1,2,3, .. 10 ... This is the molecular structure every molecule is locked into each other by the magnetic field forces of the planet we call earth. Now we go through the process of caustic. We get these (locked in) layers coming up like this. ... What we get is that the layers have become G and M field positioned that allows a space gap to be between them. this is what the Nano layer is, (this is an enlargement of this). Now you have these layers, when you see the dark material, like the black Cu, you have created, according to our research between 30 to 50,000 layers of this (N layers). Don't forget each row is 1 layer, so you have a sandwich of 30,000 on top of each other. The reason you see it as black (1:02). is because any radiation from anywhere in the U comes in, the layers are so packed and open that ?? the 30,000 layers, but when it gets here (inside the layers) it gets trapped here, and another one comes and it gets trapped over here, etc. And we go by layers. If you extend the knowledge from this here, it is that we have created an energy trap. In the world of electronic science we call it capacitors. If you understand this, this dimension has a field force (draws a box around 4 molecules with the energy trapped inside). These are dynamic systems so they create their own in respect to the ?? If you understood this you can transfer it into the knowledge of the larger dimension, then you'll see what you have. (draws 4 circles as a box0, if you put anything in this box it stays as it is. It's an envelop you can put money in it, letter, razor, a kiss in it. The envelop does not see. If you match the MG field of your envelop to the system which your brother holds, you can transfer it to him. Now a days we scan our images, in the near future we'll scan our (1:04). M field strength. And this is it. I can send you everything, even myself because this takes position as it is loose according to what you put in it. As we spoke about this T the week before. These are the new developments that you as K Seekers have to understand and develop. Do not patent it because it is already here in the patent that we published. What you need to understand is to go from micro to macro, and then go from micro, develop systems from micro. This is the beauty of the T, of what sits there. This is part of the structure of new Pl T. Because you match my system in MG field, you remember, zero time transportation. I feel that with what I have taught you with the neutron and the plasma of the neutron some of you will move in this direction very soon, because you are bored with making Gans's everyday, and bored with that dynamic system and nothing to do. So I have to give you a new toy to play with, a new way to understand to be able to extend your knowledge and life will become more exciting and more bearable because now you have something else to do. If you can send a text to your friend every few seconds via SMS, (1:06). now you can send yourself to your friend, I am there can I come. I'll be there as they say in English, in a jiffy, in a package delivered. Now you understand that we go back to the very first teachings of explaining Nano technology, but now we take you to the scale of communication, transportation. These kind of systems will become essential for many of you in the time

to come. They'll become everyday use for the T and you'll never ever know where it came from, but at this moment it is your job as KF scientists to start developing this. To understand it. There are other more advanced ways to do it, where you just need one of these (a single molecule), if you understood the totality of the dynamic core field layer. You'll be standing here (in center of the field core), you match the M and G with your mother's house's M and G, and you are transported directly. These are not fairy tales anymore. At this moment in time it is reachable by many who have understood the whole process of Pl T. I am trying to bring you out of the world of Gans making and making little things. We had a friend in Canada, he came into the KF and many of you know him, he went very fast in teaching, but he didn't know what he was doing. You can make yourself a lot of new gadgets if you understand the process. (1:08). This might take man thousands of years to understand but I'll (anyway) that one day he might understand. As I showed you, this is the space that you protect (draws 3 circles inside each other), and if you remember a few seconds ago I put a man there. Now that you understood the creation of the STM, I only need the STM and not the man anymore (in the center). In this transportation system I can carry many souls. This is how in the U some creatures travel. In time man will reach to understand this. I have taught 2 or 3 groups at the KF how to create the soul of themselves, and they are busy with it. Those are the ones who are involved with the space T development and have already been taught. They will become the commanders of the spaceships, and will understand the next generation of the science and T. As I said, when I teach one I teach all. We spread the knowledge and we don't need to patent it or to classify it, but people have to understand it to gradually come to this position. When you make neutron Gans's, which neutron makes G, (1:10). and which neutron create M fields, where do you position each, or what do you have in your hand that you can switch one to the other. Don't forget you know this already, now you have to practice and understand it. What is the M or North Pole of one becomes the G of the South Pole of the other, this is the next step in the understanding of the universal work. Transportation system, communication system and then you understand that you only need one fuel to travel the span of the U, and this fuel because of its characteristic that it locks into every energy can go and recharge itself, you never run out of neutron energy if you know how to handle it. The neutron is a singularity of the plasma, even an electron is a neutron, because in time when it splits in energy it will force it to split itself. When you speak in the dimension of the plasma of the neutron, means singularity of the Pl. How do you create it. It can even be a CuO, ZnO, even CH, because this singularity has its own characteristics. You have to find the singularity of its strength in either way. Those of you who have been busy around the KF for quite some time, now you have a new toy, You have a new way of understand the T, to be able (1:12). to spread the knowledge, to practice and understand it. We understand where we sit, how we work, how the things will develop. Are there any questions. Q: I made the hemoglobin using a rusty iron nail in the Gans production process of CH3 (can you draw it) ... (1:14). ... (1:16). .. through this the CH3 becomes the strength of the Fe, what I understood that the isotopes of Fe all connect to the Zn ... so we are able to connect the physicality which is the AA, with the emotions which is our blood. When we go to the next step and would like to introduce (1:18). here the FP of the neutron, then we have the possibility to connect the FP with the AA to the emotions, and the N coated Cu plate, but from here my knowledge stops, what is available, we have the neutrons produced out of the process of

H2 and H3 and this hemoglobin. It's more or less separate and I don't know how to link the fields of the neutron with the AA, CH3, Zn and Cu ... They are already connected. The problem is that in the world of magnetic fields the connections are already made. They take from it if they need it. You don't need to see it for it to be there, if you wait there after awhile you might see the color change. Something else might be added, you might see new creatures on the AA top. The process is already there. (1:20). Q: There is no need to add some drops of the water of the neutrons to the saltwater of this production process? Yes you can do, but you have to extend it to understand the process. The problem with us is that we have to physically see it with our eyes or feel it on our skin or taste or smell to believe it works. Do we smell the fields of the sun coming to earth, touch it, hold etc. If you have set the conditions for the fields of the neutron for it to be there, and have created the conditions, and you know you are correct, the only thing is to just take your time and see how that red and orange changes. And if anything appears. there are a lot of things which you have not learned, maybe I can explain. ... (1:22). (1:24). .... Is it time to teach this? .... if I explain this to you, you'll understand a lot of things in life. you speak about the interaction (1:26). of these things, of H and N, these are dynamic things, not just a spot, even that blood that is dripping is in dynamic form. You have to ask yourself 2 questions, first where does the color come from, why do I see it as red, the other one comes, why do I see the CO2 as white. the other point comes, what happens when the CO2 and Hemoglobin and neutron, there is a field interaction. What we have not considered up to now is one thing, we spoke about the fields, these are dynamic entities, we see them. In being dynamic entities they create their own light spectrum. The light spectrum of each one will be what man will use to identify the materials. We get the bright light of the sun, the white, and if you look at the sun at dawn or dusk you get different colors, but it's the same sun and earth. We have to start learning, I touched on this last week very softly about it, it is the spectrum of light which these entities create and (1:28). we can use this as a fingerprint for molecular structure of Gans's. We can use these for ?? stabilization. So now if you have 2 dynamic cores running and you put the Gans of this and that and are waiting to collect material from, what is the field radiation of the light do you create? Now this is the new addition to the knowledge that we have to learn. We call this the aura, this is the body with its own M field and this one is the MG field of the planet, the interaction gives us the aura. Now we have to look for this light. In the coming time, those of you who work on the space T will rely on these colors. Manifestations to the eye of the man, and you'll find out that when it comes to plasmatic colors in the matter state we see a spectrum of ... I see orange #2 and you see orange #4 which matches my orange #2. But in the plasmatic condition my orange #2 is also your orange #2 and not your orange #4. As you know in the matter state we all see different colors, I see the dark blue, but you'll see a slightly different blue. If I give you a color chart and I ask you what blue color do you see, you will never mark the same color that I mark, very rarely, because the spectrum of what you see converted to the information of the matter state is different then when you see the color of the plasma. But when you work in the color of plasma my #2 is also your #2. There is no error. There is a painting called the Last Supper and it has over (1:30). 35,000, if I remember, strands of wool which is silk, which has been woven and colored also. It's only about 70 cm by 40 cm, made in Iran worth millions of dollars. I held this thing in my hands some time ago and I thought, does the line, every strand of the beard of the Christ, has been dyed

specifically to fit him. It's the genius work of an artisan. It has taken thousands of people years to produce this small piece of carpet. But when I look is that strand of grey to me the same to you in the matter state? No. But in the plasma state the strand of the light is always the same. ... So what we have to start looking is to bring more precise dimensions into the work of the plasma, are the lights which we have ignored up to now, because the light has and will effect what will be released on the Pl layers. By changing the light, increasing the conditioning of the light, we can dictate the emission of the G and the M, this is part of the teaching which gradually those who work in the space T will understand. When you look at these things, and you can create a condition (1:32). for the light, and then if you see the light, there is a connection, then you see it is getting fed. There is no need for guesses. The emission of light through Pl is the cornerstone of creation in the dimension of transfer, and an indication of the fields. ... Arman is in Mexico ... (1:34). What we should look for are these lights and the use of lights, because when you start running your dynamic systems to create gold you have to look for this light, because certain light gives us the strength of gold. You see the light first and then you convert it. It's important. I do quite a lot of this when we had the lab in Belgium, I used to work on this principle. I used to make the lab dark and I can see the fields of the Pl and interaction of the fields of the plasmas. It's a natural process and some of you will be talented to see it. Some of you can see the aura of some people, you should be able to see in a minute way, and we should develop technologies that we can detect the lights. And then you will see all these bloods and the neutrons that are there if they are interacting, they all become a certainty because you see the interaction. Plasma light is one of the ways in the universe that we find passages of passage. It's very much, like tunnels of fields, there are millions, hundreds of millions of kilometers long, billions of km, and some are hundreds of millions of km in diameter. It's very much like the air tunnels we have, in the space we rely on these to take us, these are highways and motor ways of the space. Because they are established, strong, and they hold onto, they are safe and there is no possibility of interaction with anything else. (1:36). They are delivers of passage and we only see them through lights, there is nothing tangible in them, as long as we stay within the color range we are safe, we can travel. And each color ends up in one place or the other, which gradually man will map out. When the man joins the U Community these maps will be handed over freely. You'll be taught and then you'll understand. These are very advanced stages of teaching. As I said, we teach then in thousands of years man can understand when he comes to it. You can use the same thing, if you can create a tunnel of light in 2 sets, whatever you produce in there is enveloped, it has the same strength energy. Plasma is a different game but you have to understand the interaction between the two. You have to be able to follow the process of not only the Pl but the interaction of the fields, because some of these lights indicate, if the system is M working, is it taking from the other one or is it giving to someone, then if you want to change it, how you change it. In so many transfers of energy you need to have these lights. You have to understand the transfer of the fields of these lights, how these lights in the progressive development of the T can be used towards different applications. (1:38). Q; does this mean the lights in the process CH3, CO2, AA, if they are connected we see the light of our soul? Your soul has more complicated matters in it, then just this, but your soul is in the dynamic state, there is a static state, there progress and transfer of process of the STM into the plasma condition has been taught in the past 2 weeks to the

teams of KF scientists. They are capable and understand and in time we'll share the knowledge. There are teams that have been taught that they are going through this process, they have to understand it themselves. Transfer of the STM through the dimension of the Pl fields is the cornerstone of deep space travel, where you allow more souls to attached and to be a part of. You don't carry the physicality but the STM, ?? in space, time space becomes meaningless. When man matures in this dimension then we can travel the ?? spaces of the U, not the U. This is one of the reasons I started to teach in the past couple weeks and a few teams who are working on it understood what was explained. (1:40). It's not so mechanical, it's so much the understanding of the transfer of the energy in the free dimension that you create. If you understand it, the FP becomes the vessel and not the soul. It's the system that you embed the soul in it, and then it can lead to the creation of the entity at the point of arrival. When the soul is happy and it sees no danger to its existence. .. video from Mexico .. (1:42). KF Mexico shows video. .. (1:44). ... different Miguel. (1:46). now shows video... this looks like an eye. (1:48). ... have you put them in tube form ... (1:50).
(1:51). This brings another topic of the teachings now that you showed this. If you look in the eye of a man, I have spoken about this before, we see different colors of the eye. The interaction of the fields creates a light and very much, the color of the eye, in the future man will understand, is representative of the STM, because it is so close to the soul, (1:52). and it's so interactive due to its field strength, as you see it here. We see people with blue eyes, black, with different colors, it's very much, partially the interaction of the fields of the brain which reflects the STM. We see characteristics from different colors. .. You see the change of the color of the eye, as you showed here, with the "beautiful people", what you call schizophrenic, sometimes by the change of the color of the iris you can say who is speaking, because it's a different soul that interacts and it creates that condition and interaction. In watching you can see which one is there, I have seen it for years. When we say the eye is the point of the channel for the way to the STM, it is very true. If you ever come across people .. and the soul is of totally different characteristics and dimensions within the structure of the physicality you will see different colored eyes. They change instantaneously, as one speaks to the other it might change slightly in the shades of the brown, they might change into some sort of greenish brown. (1:54). It can change to greenish and sometimes even to blue. They say that sometimes when man reaches the point of death the eye sometimes turns blue. It's because of these, it's a reflection of the STM. You might see a person today with one color of eyes and tomorrow it changes to another, then you know it carries souls. The stability of one soul gives one color, then the frequency or strength of the light tells you what it is, always that interaction. The certain color of eyes which is a reflection of the soul which means that soul has that ? foundation. Not all the black eyes are exactly black there is a tint, but it shows in foundation what it is, aggression, peaceful, different mentality and you want to understand a person but the reflection of the STM through the color of his eyes, if you have more understanding you can have a better idea what to expect from them, because that color of eye absorbs certain fields from the U that it reflects back this way. It's part of the structure of the manifestation. I taught this to some doctors in Manchester years ago, (1:56). and they looked at me and they said, we never noticed it. I said, pay attention. The shape of the eye changes. You see John has a different shape and you see Mark in the same body has a slightly different shape. Because it absorbs different lights even it has

the same ?? encounter, base color, but it's slightly different when you speak to John then when you speak to Mark. Many people who suffer from this injustice, what we call schizophrenic, they hide in dark rooms because they don't stand the change in color, they have a problem, because sometimes Mark is on duty and the light of the soul is much stronger from John and he can't absorb it. You'll find a lot of people with schizophrenic become solitude. They stay in locked rooms. Partially it's form not being accepted by society and they don't want anybody to see them, but partially it's the light. You see change of color and emotion with the color and you understand that you are in the presence of a different person. Voice, shape, and emotion changes. (1:58). I want to show you another video. ...

(2:00). .... I am going to take this to another dimension. When we ran the Iranian nuclear reactors for testing, as you were aware before I even went to Iran, you saw the Iranian space program. We have a dome, with reactors, and many nuclear materials from smoke detectors and an internal reactor. One of the interesting things is we always vacuumed this to minus 13. (2:02). Which is better then the space which is 11 or 12. When we reached plasma we could see different lights in the Pl, in the vicinity of each reactor, it gave indication, because I used to have a portal looking into it. It gave me an indication to which M fields are balanced. 28

(2:08).
(2:10).
(2:12).
.. There is a lot going on in the background and a lot of responsibility for the KF is getting handed over to the U Council and the members are gradually taking shape in the ways with the other arms of the KF. They need a lot of support if you are in any of the speaking languages. (2:14). they need a lot of help to be able to reach and spread the knowledge in the languages which they are in. We request for help. ... (2:14). ... if you think your soul can serve the humanity you can apply for the UC. Spanish speaking in Spain is totally different then that of Mexico. If you think your soul can serve the members of the council of Mexico there is room on the UC, because the environment changes the STM. (2:16). .. This is accommodated in the original plan of the KF drawn in Dubai. ... 30

(2:36). Ella talks about how the testimonials can be changed to a scientific paper. ...

(2:38).
(2:40).
... Q: How does the free flowing system like CH3 and (2:42). and Hemoglobin interact with the human body to bring to balance without needing a big dynamic motor or health units? If you don't have a dynamic system or if you do, to be able to interact you have to introduce. ... This means, you have to expand the knowledge, if you for example have your arm and have a pain in the middle of it and you put a dynamic system on both sides

of it, they still have to go through this (Infinity Loop connection). They work fast because the transfer of energy is very fast, because you dynamically mix up and take. If you don't have that it's not a problem, because you again ... (He draws the arm with the pain) make a patch with 2 times more Gans in it on one side and a regular patch on the other side. It still does the work but it is slower paced. If you want a rapid result, then go 20 to 1, because all these 20 are trying to bring it to the 1, so the transformation and transportation of energy is very rapid. (2:44). The dynamic systems are a different characteristic, the static Pl has different characteristics and field transfer then the dynamic because it creates a bigger environment and brings in more absorption and dispersion of the fields. Dispersion is much easier. That's all you don't need multi-million ($) systems. There is something interesting coming in. The gentleman Anjo is asking and complains that PBU is too expensive and that KF only serves people with money. If we serve for money we wouldn't teach it here. Silence is a good thing not to come out. God created the mouth to praise, not to come out with rubbish. If we are here you can do it yourself. Don't blame your incompetence on the KF, we share knowledge so freely and rapidly that I am ashamed to see these kind of questions to come up. Yes we serve people with money, that's why we have 100 million in our bank account, and people are suffering so much, what a rubbish. Thank you for your clarity on that Mr. Keshe. (2:46). This one costs $200 and this one $0.20. ... Money, if there is a soul to create it will come. Whatever we give is not enough. I always remember what Dr. Eliya Kostova said, how come when it comes to KF everything has to be free and given unconditionally. Why don't they put their assets and say this is mine, I give it unconditionally for you to use it. How come all my patents and teachings are free, I don't charge anything. As always I don't teach and do enough. You show me anyone in the history of mankind that has done such a thing. Q: Alzar asks about when the sperm and egg come together, the initial divisions, say about 8 of them. The feeding happens through the soul itself because it gets energy from the womb of the mother. Then it gets to the umbilical cord that the leeching starts to happen. (2:48). and that's when we forget how to feed ourselves. Can we go over this, please. Say I am getting created, a sperm and egg comes. I can't imagine, you already have been created, you are here. I mean hypothetical. Two situations, one I am created and these divisions are happening and without any umbilical cord I go all the way to the end without any connection to the mother and I get free and the soul comes out. The other way is the umbilical cord. Then there is a third situation that my grandparents were praying for me for 20 years. What is the difference between the soul in these 3 situations. First is without an umbilical cord, the second is with umbilical cord, and the third my grandparents prayed for me for 20 years? In the writing of Bahaula he says, pray for your children 20 years before they are born. A lot of Bahai's get married at the age of 20 - 22, so how many years did they start praying from the womb of the mother. So your grandfather praying for 22 years will find its destination when the child comes because he had no address and now the address has been created. The other thing, with or without the umbilical cord, we see that with the chickens and some animals that don't have umbilical cords and are born out of an egg. Because of the structure of the womb in what we call human beings or any other animals which have this process. We are connected for the fast transfer of growth. (2:50). In the animals that don't have that all the growth has been put in a package like an egg in the birds. In the U we see many creatures they don't have this, they just created out of the soul. Man will have a wonderful time to see these things.

But when you have an umbilical cord with the mother is because you have established a source of ?? to grow fast. To convert the energies into a Gans of physical matter condition and we see this in certain animals, not in all of them. Those who have and create certain kinds of intelligence. It's just a reserve, an umbilical cord is a connection to a bigger reserve tank. Q: What I am talking about is ??? not to eat anymore, so that we can feed our soul ... Put it this way, if you look at a bigger scale, you can't feed yourself. You change the umbilical cord to the placenta, the placenta now becomes the universe. You change it to an invisible line of feeding. There is more in the matter state that you can convert to the matter condition of the Pl of the state you ?? born as a Gans. Any process of development and growth, even if you are born without a umbilical cord, there has to be energy to be gathered that becomes you. So where does it come from? It comes from the universal pto. (2:52). Now if you don't have a placenta then you have connected through the fields to the universal pto. It's not that you just on your own (feed yourself), it doesn't exist, you can't grow. It's not there to begin with. 20 Q

(2:56).
(2:58).

(3:02). (3:04). An English writer. William says, I think women are foolish to pretend that they are equal to men. They are far superior and always happy, whatever you give a woman she will make it greater. If you give her a sperm, she will give you a body and life. If you give her a house she will give you a home. If you give her groceries she will give you a meal. 05 13

(:06).

(:16). ... (connection) ..

.. Because we look at the manifestation of man at the point of birth, (:22). but in the dimension of the U we look at the man at the completion of the main brain which the STM established. It's mature, it recognizes its environment and can respond to it, grow according to it, and it reflects and indicates what he likes with it. Is it time for us to go back to the point of birth and find the communication language we were born with and we forgot. Because that language becomes a lower level in understanding the language of the U, galaxies and the rest of it. Because it is all the same principle if you remember the way I used to draw the spiral that used to go from the center out, the same goes with the language of the U, there is no difference. If you look at the whole structure it's still the same. He draws a spiral. If this is the totality of the languages of the U, man's language is somewhere here (opening of the spiral). The galaxy soul language is deeper inside, the U

is still deeper, the Unicose in different strengths still further, at the center is the soul of the Creator. Everything from it is created according to the strength. But if you look it all is contained on the same line, on the same strength because there is a common denominator of the same strength. As much as it communicates out it receives back in the strength of the soul of the ?? Creator, (:24). non-tangibility but in the dimension of the field strength of the U. We come to understand that man does not need the new language to become passengers of the universe, when we put man in the Pl of the U and we create in our SS the dimension of the Pl, according to the neutron energy level of the Pl our souls speak the same strength, it has the same strength and thoughts. Will it be surprising if you meet the man or a creature from another planet who works on this dimension and you know his language because he speaks the same as you. He communicates with the strength of the galaxy, and then maybe you have to learn something from the strength of the U, you don't understand this language. Then you have to go to the inner of yourself to find a strength that is higher then he is made of, that he can communicate with, and what you can convert from his to yours that you can understand him. The other point comes, that when we come to these dimensions would we see the people of these other dimensions, would we observe them, not seeing with the eye of the man but seeing through the STM. If we go back to this understanding and start measuring the strength of the emotion of the man, we'll see that many scientists have gone to that point, are testing and developing to test to see the reaction to measure the wave in what they call the frequency or whatever, because the wave of the soul in interaction with the material status of the brain needs penetration, and that penetration on ?? all other frequency, or hertz, or whatever you put to it. (:26). But at the end of it, it's Tesla, what we measure is the strength of the field. Then when it interacts with the matter state we find how it penetrates through it, then we have given it the name of hertz or frequency. What if you understand in the totality of the knowledge of physics and if this is the MG field strength. When it hits a block, it doesn't matter if it's the brain or Cu wire or whatever, it has to penetrate. If it can't go through it, it has to find a way to go, and at certain strength it can get through. It can get through certain things and you call it a frequency or wavelength. Now we can measure this. Scientists are developing a way to measure this, an emotion or feeling, the response. Rick I sent you a picture. If we look at this picture we'll learn a lot and latter on I'll explain to you what this picture is. The knowledge of the scientific world is advancing very rapidly, but we are going to the other end, we have to go opposite, to the strength of the STM. If we take the brain and this being the STM (draws a tiny dto in a circle). Our scientists are measuring in different depths these wavelengths, frequencies. Then they say these are the emotions, this is the interaction, this is the response to recognition of life and position. (:28). What is interesting if you look at this picture, you see what we call the electrodes on the brain. Every single thing you see on that (helmet) is one sensor which measures the length, strength, and frequency or whatever you want to call it. Of the brain of the person underneath it. You see the computer on the table in the background and the screen in the lower picture. There is a video recording of this. This head unit which is full of electronics measures every frequency and wave produced in the brain at a certain point designed by the Israeli scientists. The scientists of Cambridge University wrote the programs for the programs of the computer in the background. The 2 groups of scientists plus another group got together to assess if this brain of this person works, has it got emotion, does it respond to reality and facts, does it got recognition.

Does he recognize his name. And all the answers are yes. We have advanced in the knowledge so far, that if you see there is a cable, heavily supported, every position of this brain, it's about 150 electrodes on this helmet. It's unique, it's the first time ever, it brought the Israelis and Belgium and Cambridge University scientists worked a long to do this because they could not have a position that they could test, and this was their test. (:30). This is one of the most important tests that they could confirm that the person is alive, recognizes his name and has a function and alive. If you look at the shape of the hand and the face, (you can tell) this person was in coma and now has been brought to life. The most competent scientists in the world confirmed life, existence. She sits and talks. She was a coma patient that was recognized as dead and for the (life support) machine to be switched off. It took less then 14 days of the KF technology to bring her back to life. And it is confirmed by the scientists. It is so advanced that it patterns out the color of the brain, all the data by pictures and color. At the same time they used a MRI and CT scan, are available and it shows that the brain is reactive. And they had never seen this before. Do we need to reach the level of the STM to bring the rest into operation. We have seen the advancement of completion of this ?? Naomi. It is so radical that nobody has ever seen it before. According to the scientists at the Belgium center where the tests were done, with the agreements of 3 nations. Actually the governments had to be involved for these tests because it was too advanced. The reason the Israelis did this was to confirm that the KF T was so complete, that Sharon the (former) Prime Minister of Israel could be brought out of coma. And they concluded, yes. If you go into the history of Sharon he was moved to the home after this test. But it was blocked by the Israeli Prime Minister because an Iranian nuclear physicist's technology could not be used on a Jewish leader. (:32). He was below. Letting a Prime Minister die was more important then the name of a man and the nation of the man. This is why we make One Nation out of man. What is important is that this woman is in court against KF and they haven't told that she has come back to life. The whole case is pinned on this girl. She was certified dead on arrival with just the heart beating. I gave her life back to her at no cost. A month, 14 days, she was eating and everything. We have the communication from the mother that it says, the Israeli government, scientists and the Cambridge scientists are coming to see, Mr. Keshe has to be there. And then the police has changed it that there was something done wrong. This is a major breakthrough in the world of science. The only person who has returned a dead person back to life is Christ. And I have done it twice. I am double Christ. Naomi and her. In the eye of Belgium I am a criminal and in the rest of the world, the most intelligent scientist who knows how to bring life back. We will show these as evidence in court. The scientists of the world have confirmed, we have a full dossier. Now we presented you the third case. Mr. Dellenois destroyed evidence not to show one of the biggest gains in the science of man, that the world scientists have to confirm it. The funny thing is Red Circle has taken a video of the process of when she comes back to life. And the beauty of it is, everything is recorded. (:34). Scientists from Cambridge and Israel will give evidence in the court. The biggest achievement for man to be able to give life to a dead body. But at the end of it, where did the scientists build the systems. We have measured and developed T that we can measure the wavelength of the brain, but this wavelength comes from somewhere. It comes from the center of the brain, from the STM. Do we need to make more complicated systems to go inside and outside, to go within the structure of the brain to find the frequency, wavelength, the Tesla

strength of the STM. That we can put man in the space. How far are you as K Seekers prepared to take this a step further. How far are you prepared to create the condition that you see the operation of the STM within the confinement of one of your reactors? Two groups are working on it, the Chinese and the Americans. One group has fallen out, they are going in a different direction of the research. One group has gone to the movement of the fields of this U in the dimension of the soul. We have 4 groups heading towards the space development, physical, non-tangible, and the soul. (:36). We need to because some of you according to your understanding will take flight according to what you feel comfortable with. How close are you to your soul that you can trust the soul of your pilot, or you prefer to be in a tangible dimension and travel within a SS. Or some of you decide that I am intelligent enough that I want to travel within my own soul across the U and manifest myself as I feel. We have to understand the science and knowledge of creation. We have to confine ourselves within the dimension of the U and not in the dimension of the skull of the man. If you look at it as you go further out you come to a different dimension of tangibility. What is interesting, we have to take this further, we go into the dimension of life, of feeling, of physicality. How does our physical existence in the matter of the bones and the flesh come to exist. If this is your soul, (:38). and it radiates out, and according to the strength of his position becomes the brain of the man, then at a certain point all of these strengths, all of them, become to be the same. And it makes the boundary of the shape of the brain. Very interesting. But there is an interesting factor, this brain is contained within the skull, which continuously showers on the brain Ca. Very strange that the world of science has never sat down and thought about is this little chap. How come everything at the highest level of Ca gives the shape of the brain. And how this Ca is converted and its position in the structure of the soul into the bone structure of the man, that then the totality of what you call the flesh of the brain, becomes the flesh of the man. Because every spot on this flesh (in brain) has a correspondence on this flesh (body). This carries the STM at the strength of conversion, and this (body) carries the strength of the planet to the point of the conversion. (:40). How much more can I teach? How ignorant the man is. If the collective strength of this (body) at a given strength creates (in the brain) the emotion of laughter, joy, the whole physicality reacts to it. How much more, what else do we need to understand? Then when you enter another dimension in another position in the U with a different strength, now the shape of the same (in the brain) and the strength of conversion will give you a different shape, but the soul is still the same. ?? what you call the pain of the man in respect to the condition of the fields, to matter condition of the existence, will manifest man in that dimension in that shape. (:42). But do we need to understand more or do we need to make systems to find the mystery of existence. Or is it that there has been no mystery, it's just that we never understood. Because it's the same replication across the U. Those who come to see man they appear in the shape of the man because the conditions of this planet according to the manifestation, creates this condition, maybe with a slight deviation, as we see one is black, white, yellow, short, tall, blue eyes, which is the reflection of the energies of the STM in the dimension of physicality, with them trying to adapt we might see them with a little of a green eye, with a break in the middle, or they might be a bit greenish, or yellow. How come we don't mind if we see a black man or a Chinese or an American, and then suddenly when we see another color from another dimension and position in the U that they are aliens. Are we aliens to each other on this planet. Then it goes back to what is

the language of the soul of the U, and are we now that we understand, the operation of the STM, the reflection of the soul of the Creator. And that ?? here. (:44). If it took the reflection of the soul to manifest ?? itself ... if it took from the strength of the STM with the interaction of the physicality of the brain to create the soul of the finger that in reaction we could see the finger in its dimension of motion, what would be this if I put this here, and then this is the space gap in the U, and this point of manifestation is the STM which leads to the creation of the man, and this is the soul of the Creator. It has the wavelength according to interaction has become the wavelength of the manifestation of the physicality of the man, so shall be to the strength of the soul of the Creator to the creation of the STM. I made man in the image of myself in the dimension of the STM. Then the soul decides how to manifest itself according to its environment to confirm its existence. But the question is, in the distance between the STM and the point of inception of the soul of the finger, there is a media and there is life, there's an existence, that's why in interaction with all of this is reduced to this to become the soul of the finger, on the brain. So shall be the existence of life in the dimension of the physicality of the U, it doesn't matter how many universes and how many universes and galaxies you put across. (:46). Man shall not be repeated in another position, maybe in a slightly different, another dimension. The STM even being the same, the physicality of the man is unique according to the environment which he is created. Then it comes, do we need a SS to travel to the dimension to the soul of the Creator. If the man finds the riddle, of from his soul of physicality, his brain to his soul, that will soon to unravel the path to the soul of the Creator. Many races for millions of years are still chasing it, because they don't understand the past 2 minutes of teaching. We need to understand more, about our own creation. We need to be able to comprehend life in a dimension of the soul and not life in the dimension of physicality. (:48). I see many eyes, but I see none. I see many lies, but I speak of none. Can the physicality of the man lie to the STM. .. ?? Today's teaching is very short, but understanding of it will take man billions of years. None of you will be able to jump from one to the other, as you have to discover, unravel the secret of your own creation. It's important for many of us to understand our inner self, our inner being which is our inner soul. It's the essence of our creation. I took you to the physical condition, back to the energy, back to the interaction of the fields that leads to the creation of the soul of the SS, and if those who are advanced enough understand that this leads to the creation of the soul of the Creator. That it is you who have created it. And because you have your thoughts in it, it will carry part of your soul in it. Our Chinese guys are battling with it. They see it but they can't reach it. Our American friends are pushing it, but they don't see the reality of the existence. (:50). Everything has to have a matter dimension, but everything has to have a soul dimension, then you succeed. Then you'll be able to create what you set out to create. The history of man is very short compared to the life of the U, but we have to understand the totality and not partiality. We have to come back to the essence of true creation, not the creation of physicality. As I keep on saying in all my teachings, in the real world of the teaching of the KF, theology is part of physiology, without understanding the creation of the soul you have no physics. They tell me that as a nuclear physicist I have become atheist, but (from my point of view) as a nuclear physicist I have come to understand the true essence of creation, without prejudice. Being able to see and understand the truth, and to accept that you can see more of the truth, that you can unravel more secrets of creation is the job of a nuclear

physicist. A scientist without prejudice, color, race, knowledge, universe, it is all the same. (:52). Any questions? Alzar Q: If you are the Creator, there are 7 billion plus of us, for example you created me and I go crazy, how would you as the Creator feel? Nothing, you are just another cell in the brain of the man. Just because one cell dies doesn't mean the rest of the brain has to die. Or if one dysfunctions it doesn't mean the rest of the brain has to. Q: If I do something crazy doesn't the Creator feel? If I presume many of you suddenly do crazy things He might feel a pinch somewhere. It's like a brain hemorrhage where suddenly billions of brain cells suddenly destroy themselves. If one dies it happens all the time, there are replacements. It is known, there is a saying in the U, that the time has been that even the Creator has cried for the condition of what we call existence. There have been massive incidents that even the soul of the Creator has felt. (:54). Very rare when the galaxies and universes clash in a massive, what we call, an unbelievable scale, and as they are the same as every cell of the brain, and massive destruction, the soul of the Creator feels. Many times tears in the dimension of the soul of the Creator. It does happen but it's on a very massive scale. Q: When I try to follow my breath and feel, it doesn't go to my chest, it goes all the way down to my lower abdomen ... how important is this emotion connection to the soul and everything has to do with the abdomen. When I feel the movement of energy I feel the heartbeat and the chest and there is some movement in the lower abdomen, but I don't see any movement in the brain, but I think of the brain as a leader, how important is that? H1 carries its own connection. It's very much like when you fall in love, you have a bit of problem in the heart, and suddenly like a butterfly in the stomach, what has the love to do with the stomach, heart and brain? Everything goes crazy, nothing works. Q: Last time you spoke about alkalinity and acidity, (:56). Acid was M, like H likes to give. So the soul is a giver, M. Ah, the soul is a taker also. Okay then you come to the heart and 2 lungs which is the base of it, if you call it a SF. Heart and lungs are the condition of physicality. (I am trying to understand the heart, because the soul can go ... I work on the soul as Infinity Loop to the heart, then to each lung ... how can I understand it mathematically? You are in the medical teaching and there is part of the first 31 teachings we have described this in detail. The connection between the heart and lungs has a connection to the soul and creation of what we call, other parts of the structure of physicality. I explained this in detail if you go through the medical teaching I think you'll find it in there. It took one full lesson if I remember correctly. (:58). Q: When the soul radiates and not acting from physicality, ?? is the soul good, I mean something extraordinary? What do you mean? You see you can extend the strength of the STM beyond the physicality of the man and it can embrace with it. It's very easy to do. But man has a fear what's going to happen to his physicality somewhere in the background in his brain. We call it, fear of demise. If you change the condition you can create a condition within the STM, what I call, love of the trust of existence. 52

(1:02).

(1:12).

(1:20).
(1:22).

(1:26).

(1:32). Questions from live participants. Q: How does one know if one is one of the good people? What happened at birth that 2 souls created at the time of creation, could one be the one created with the interaction of PMF and of the sun and earth, and the other one was a volunteer soul to update one more time in the physical dimension? I don't know. It all depends on how we look at it. When we are on earth we are all conditioned to the MG field of the earth, it doesn't matter which dimension we come in (?came from). This is where the soul has accepted the strength field of. (1:34). And it doesn't go to manifest maybe one half of me is from planet Zeus and the other half is from this planet. If you are from planet Zeus you manifest yourself in a different dimension and strength of MG field of the earth. 30 ... (1:36). Shows 129 Tesla videos. (1:38). shows video ... (1:40). (1:42).

(1:50).
(1:52). ...
(1:54).
(1:56). ..Q: You have manifested many times that electrons never separate from their protons, is this true? We can never separate electrons, it doesn't matter where you take it, it still has a M field connection. It's like you and your mother, can I separate you from your mother if I take you to planet Mars. Do you forget about her, do you have no connection. Once a M field is established it is always there. Even your mother has connection with your children let alone you if you go to planet Zeus, because you are the intermediary. (1:58). Q: So what we have on our electric cable is just the manifestation of a M field going around a cable? More or less, but you have to understand more, why can we one on one end and get it on the other end. What causes this and what is the motivation? Is it giving or taking more that it creates that flow. We are always looking at the flow. As I have always said, if you call it gravitational, eddy current, or what Dr. Miles called it, scalar wave, it is all return .. to be able to go against. It's very simple, I explained this to school children in class one day. Maybe you intelligent people will understand much better. If you all, a couple hundred of you, are going down the road one way, shoulder to shoulder and you are all marching in one line, and now comes John marching from Mexico, and decides to come back against you lot. ... (break in connection) do you think that crossing you 100 people, then you have answered yourself, in respect to G and M field. G fields to the source always takes more energy because you have to break through the rank of what is coming towards you. It's like you are swimming against the wave. If you swim with the wave you'll go faster. You need more energy to swim against it. But the human race has only used the wave that flows down and never looked at what comes back. (2:00). There is more energy in it, but you have to know where to break it. We look at the pressure or what we call the potential difference and the drop, we don't look at the potential difference on the pickup, and this is where the science of man has hit the wall. We ignore it because we have never been taught to look at it, because the people at the time, the scientists never understood themselves. Now we have to, because otherwise, if it takes you 1 minute to go to the moon, then how long would it take you to come back ... if it takes 1 hours, or 100 minutes to go to the moon, how long would it take you to come back. If you swim against the M flow, 400, but if you learn to flow within the reversal current, G pull of the earth, how long? 10 seconds? Man has

never learned the truth about the space T and you are still working in the matter dimension. The minute they realize, this is what I explain just a few minutes ago in the warning to the American government. We don't need to do anything, you already send the systems on, we just feed through your own line. Because you are calling us in, and we'll respond respectfully. When you open your lines of power and energy (2:02). you are calling me. It takes you 1 hour to get me, I get you in 10 seconds. You is going to be disabled? You because you don't have it ... then you travel the rest of 1 hour. People don't understand, but soon they'll understand. If I get involved in the matter of peace to stop discrimination, there will be no weapon left. I explained this to some military people very recently. Give me 10 minutes and there will be no battleship in the world that can fire. And it sits within the M field structure of the planet, you don't need to do anything. How long does it take for earth to change its polarity of M field? How come it takes the sun 11.5 years to 59

(2:08). ... Q: What role does the soul play in conditions like cancer, as the previous teachings talk about 02
Q: When you talk about understanding your soul, (2:18). we all ?? missing. If we want to understand our soul we really have to question everything we do ..? No you don't need to question! Dr. Alzar this is the problem, you don't need to question. (everything we believe in we think is good ?? ... since I have been with you.) It takes too much energy, why do you want to eat the food by putting it around your head before it gets to your mouth. (Mr. Keshe when you stop believing in anything and everything, you just start living freely) No if you are that ... then when, what is, when you stop believing in everything, so you don't believe you exist either. (No, ..) You have to understand the strength of the soul of the Creator, that's the secret of creation. And in what strength in respect to that you want to manifest yourself. There is nothing else. This is the ultimate goal of every soul in the U. How much ?? is there ?? between Him and me. What's the use in not believing in everything. Do you want to deny your own existence? Throw away ??? (Nothing, I am not saying I don't believe in anything, for example when I feel, when I see ?? the ?? off me, it's just like the experience of it is exhilarating. It feels good.). Yeah, but if you go to that step, go a step further, look at the soul of the Creator and your own soul, that is the next step for the development of those souls who mature. Now you are looking at the dimension of your own physicality and your soul. The true being looks at the space between his (2:20). soul and the soul of the Creator and they ?? the light, then whatever happens in physicality is irrelevant because the ultimate goal is the elevation of the STM, and when you get elevated a little bit from your physicality and you ?? die ?? some little energy comes up, but the true essence of elevation comes when you understand to the next step. Are you busy with this side bigger, or are you busy with the essence of the soul of the Creator. It's the same way as I said, if you have a cancer and you go and get a chemotherapy, or do you go to the brain and sort out the problem there. Now the next step is understanding the elevation of the STM is much easier through the soul of the Creator then the man himself. Man doesn't want to understand this, he has a fear, how can I. The truth is, I am. You can throw everything away but you still are working in the dimension of the physicality of the man. The next step for the man to understand is the space between the soul of the Creator and himself. It's like you are that soul with the finger at the end of the brain ??? in the middle are all the brain tissues. Now

that you know you are, were made of, the ultimate goal has to be the position of the STM and the soul of the Creator, then you can become whatever. What do we say in Arabic, it tells in the Koran, Mohammad refers to it directly, Christ refers to it. (2:22). We are afraid of our own physical being and attach everything to it to let it live. Now that we know that the living and the life of the man and the physicality depend on the STM, and you know your soul's connections ?? with the physicality. I always say I am ashamed to be in the body of a man, it's nothing but shame because you have to battle it everyday. Whereas when you work with your soul and the soul of the Creator, what's the matter, what's the problem. The U is your oyster. Here you are satisfied only with the oyster of this galaxy and only suffering. Any other question. Q: In ancient literature there is a description of an energy called Qi or Prana, the Life Energy or other terms flowing through the human body and other living beings, how can we understand this energy from the plasma perspective? ... I lost it, can you repeat. ... (2:24). ... There is a funny thing with the creation of life on this planet and a lot of times man never understood in essence, the true essence of it. It's like when you have like a Tesla and you put a pole or a beam in the ground and you have a current flowing through it and it creates its own M field. In the life of a man that pole is the spinal cord of the man. If you look at the structure of the spinal cord you'll understand how the energy flows, even with the animals and trees, plants, fish. If you look at the bottom of the structure of the man when he stands up, it's thin. As you know, as you wind up more and more M fields of wires together you get more powers. (2:26). You get more and more neural systems coming in. If you look at the spinal cord of the man it's a central column field. We see one half of it as that physicality of the man, which is us on the front side. But these field forces carry beyond you. It's equal. You have put the dimension of physicality of the brain and created the face, arms and legs. What happens to the other half behind you? Why do we decide to have a flat back and different shape in the front? Why do we have buttocks? Have you ever stood still (and wondered), where does the energy gather and goes in? And it starts from the planet. When you speak about Qi or energy in the U you have to look at the spinal cord and the dimension which the man never understood. How come half of it can be directed and make physicality, what about the other half of it? When you make a coil does the field only reflect on one side of the coil or does it circle around it. Your spinal cord is a dynamic situation. That's why you are successful with plasma systems when you put patches on the dynamic reactors. If you look at it, and then you'll understand the process of the Qi and energy elements. I used this a lot in the process of the applications of life. (He draws) This is the brain and spinal cord. (2:28). How do the fields go? If you direction it, it gives you the breasts, legs, whatever. When you make a coil, can the fields only detect this way? What happens to the other side of it? If man understands this part of it, you can bring a huge gain into the life. And what you call Qi, goes through here (spinal column). This is exactly what happens here (?back side) but we are not aware of it, because we never looked at it. You make a (Pain) Pen, a pin and a coil, you make a transformer (draws a coil around a central pin). This is what it is, if you look at the spinal cord it's not like this, it's the fields which they go across each other, electric current goes through them. Here's conductivity, how come it only appears on this side, and the back side is flat. Just because here (front side) you branch off it, you don't branch off it here (back side). Have a look next time when you think. In the dynamic systems we call up on these (?), because it's a balance. This flows and this is the opposite, this gains or this

gives. This is what the course of Qi is. Because you look at the physicality all the time, and you see the aura, you make a measure of this (?) then you'll understand the true meaning of the energy of life. It's the most simplest things but human beings because they only look at the face, breasts, belly and legs and they think that's life. Why are you .. why do you have that spinal cord? (2:30). Where is the other half of the story? Do you remember the first thing they taught you in the M field, left hand and right hand? When you measure Tesla around the coil do you measure only on one side, what happened to the other side, or is it the ignorance of the knowledge of the man. We don't see anything, so nothing exists. Man has a lot to learn. Any other question. Rick says, what you just said reminds me of an experiment we did with a small group many years ago, we made the room completely dark and everybody used their back as a kind of sensor instead with eyes or hands, it was to use your back to sense the other people around you, their position and so on. It was quite interesting. Normally we don't think about the back ... (2:32). If you want to understand it ask your lover to hold and cuddle you from the back, and see what fields you absorb about yourself. Do the same in reverse, hold your lover from the back in the essence of understanding the fields, and then see what you'll feel. Then you'll understand what man has been missing. You have to accept the status of love which means giving. How much I give, what is received. I do this a lot, not out of curiosity, but knowing that it can be done. You think what they think you think. And you can think what they think. They can lie to you with their lips but when you hold them in the back you can see right through them. 47

(2:38).
(2:40).
(2:44).
(2:46). Goodbye for today.

243rd Knowledge Seekers Workshop - September 27, 2018

(PROCESSING OF HERPES, VIRUSES in SPACE: In space even our soul can be vulnerable to the fields of the universe which can attach themselves to it once they are at that strength of it, The atmosphere of the earth absorbs most of the radiation coming from the universe, Man in the space will not die much from bacteria's and infections but will die of viruses or energy packages which have the strength of the DNA of the body, He will have more problems from viruses in the space then anything else, To handle viruses we have to measure the strength capacity of the virus and build a system that drains it, We have to look into the elements of the universe and not of this planet to understand the strength of them, ,).

(:17). ... As part of our teaching in being able to understand and work in the parameters of the U, we come to understand that one of the main works of the universal energies is how they interact with us, our bodies and its structure, would we get (:18). like what we call infections of the throat or heart and organs of the body, or the cancer of certain

elements, would we get these in the space, or when we travel in the space through the strength of our soul. **Our soul will come across fields which are at the level of its strength and it will attract it to itself and interact with it**, and somehow it would effect its working. This is all possible, it's not something imaginary. **We have seen that when a given strength radiation is interacting with the body it changes the behavior of some cells. Don't forget the body, the physicality is created out of the E of the soul itself in one way or another. We'll come to understand that even our soul can be vulnerable to the fields which can attach themselves to it, once they are at that strength of it. In the human body we speak about DNA and RNA, what we call physical structure and soul structure, and memory structure. As we develop our knowledge and we enter into the dimension of the U we'll come to understand that one of the biggest threats to the life of man in any dimension, be it in the physical or soul dimension is interaction with the fields of the U and those which will match or be parallel or be able to interact with our physical dimension**. (:20). We have never thought about these things **because to us these fields are far away, they don't exist because we have been in the cocoon of what we call the atmospheric condition of this planet. It helps us, it absorbs most of the radiation, it transfers some of it back into spac**e. But once we are in the space and we come across these kinds of fields which are much stronger, for example as when we enter towards the center of the galaxy as we go into the central line of the U. Us as humans will reach more and more closer to the center of the Solar System. Different fields of the strength of measurements as we have, as we spoke about Tesla and 129 and the others last week, these are all ?? learn more and more about us, and let's see how these fields effect us. How do we see them and how can we overcome them. **Man in the space will not die much from what we call bacteria's and infections, but man will die of viruses, energy packages which have the strength of the DNA of the body and in that process will interact with the man. The energy packages which have the strength of the STM, and in that process interact with the DNA of the STM. In a way they become a leech onto the leech**. They come to leech on the whole structure. They don't have physical characteristics or a physical entity, but they have **MG field strength in part of their composition which matches (:22). one of the pieces of the AA of the man or the elements which are connected to it, being the Fe in the blood or the Cu in the muscle, be it the AA itself ... they have a field strength of the C so they lock in, and once they do because they don't have a physical dimension they carry a massive amount of energy** because they are made in that way, they don't have the wastage arm of physicality. In that process, what we see, **we call them viruses. Viruses in the plasma technology is the packages of energy** which mankind needs to understand and realize. In so many **ways we have not managed to handle the simple viruses of this planet. Those energy packages that have no physical dimension to, what we call AA, but they carry the energies of AA. A lot of you understand this because it's not a theory to you. You put the orange (on top of the Cup) and you transferred the energy and taste of the orange into the Cup. There was no need for the physicality of the orange**, but when you drank the water you tasted it, so it means **it was an energy transfer**. It means **confirmation through plasma structure**. Maybe it came through the orange's AA's Hydrogen in it is equal to the H in the water of the Cup according to the mixture of the Gans's you have introduced. These are important and man has to start looking into it. Maybe we have a first glance to play

with, we are and we know and we have not found a way how to handle these. (:24). When we get touched by viruses on this planet we go into mayhem and panic because we don't know what to do. You have HIV, and Ebola. ... (connection drop) ... So the viruses like HIV when it hits mankind we panic with it. We see different flu's coming from birds, pigs and combination of animals and we have no solution for it. The nations surrounding it waits (to see) who gets hit. (:26). If you have an infectious disease by bacteria's or whatever we immediately have tablets or injections, we do something. **But with viruses we stand back, if you go to a doctor he says there is nothing I can do**, we have to see what happens. **Now we understand that viruses are packages of energy which leech themselves into the structure of the physicality of the matter state of the body, or what we cal the Gans state of the body**. In the process we learn and see more and more. **Man in the space will loose and have more problems with these kind of energy packages then anything else, because as we travel with the high speeds across the U we'll be touched by more and more. Our own spacecraft in interaction with the different field strength of the U**, like the way the earth in interaction with the sun creates different lights will create different energy packages that some of it might and could be at the strength of the AA, or the AA strength of the STM plasma direction. So what can we do, how can we handle viruses? Or should we call them the energy packages. How do we come to understand these more. How do we evaluate and measure them that we can say, okay this is the strength of this and this is what I need to do. When it comes to the viruses we call it an energy package, it's a dynamic energy package. (:28). As you remember there is a very easy way to handle these energy packages. We have been told, we know, we have done this before**. For the present world of science the viruses are a menace. There is no solution. To the scientists of the KF viruses are as anything else. Any virus or entity whatever we call it which has a ... dynamic plasma has a problem. ... What happens, any virus has a dimension of a dynamic plasma. It's an energy pack and it has a structure in it. The plasmas usual structure, we call it CO2 or whatever, is the same as the plasma of a virus. It has a strength capacity. We have to find out what that is. There is no difference. If we can measure its strength, if we develop technologies that can measure the strength of it, then all we need to do is develop a system that works in the opposite (direction) to it. G to M to drain it, to reduce its strength or one of the factors of the strength in it**, which let's say matched into the AA's H strength. Now it hasn't got. We see instantaneously that we can reverse any virus. **The beauty of the Pl T that we have developed (:30). is made directly for viruses. One of the reasons we brought up the whole T of the Pl through the Gans was as a tool for the space T for the deep space travel**. It allows man to learn in time all what we call, different strength of it, to apply to what. If the world of medicine and especially K Seekers who are in this field start working on this pattern, understanding this, there should be no problem for any of us to handle any kind of virus infection. It doesn't matter what it is. **We have to find the way it travels, where it nests, what is its strength in G and M, and in the body when you have viruses which attaches itself to one of its AA's then you can use any of the Gans' which are present in the position of ?? , some of the viruses have a different strength**. We have to look into **the elements of the U, not elements of the planet to understand the strength of them. Man has only seen a fraction ... of the MG fields, now we don't have any elements on the Periodic Table, multiply it by millions. It just needs the condition for it to**

manifest itself in the matter state of itself .. (:32). .. ?? it's course has a link to the AA of it, if you have a soul of the AA of "Mr. COHN" which was created on the earth ... on this planet, and you enter into another dimension and you want to manifest yourself, **but in that planet the structure doesn't allow you to manifest yourself, but it has a connection to one of the AA of the STM, and you want to manifest yourself as a being on that planet. That strength could be a virus to you. It could be a virus to the STM. Or once you manifest yourself in that dimension in that physicality, you become, or you make an access through your soul (:34). to your body to deliver viruses to it, which means it changes its characteristics, its energy**. If we look and change the name of a virus to "energy packages" of MG fields with structure but no physicality. Let's say in an easy way to understand we call this body that we see of an alien, so in a similar way the virus has not managed to manifest itself in physicality but has a dimension of the soul, which has an energy and dimension. **Then we can handle it and understand it and we can create another system which matches it so that it can drain its system that it passes the level to which it has attached itself to**. In the present world of science of man the biggest dilemma is viruses, it's so bad that they just ignore it, we have no solution for it. If you walk into a doctors office with a virus infection he'll tell you, sorry darling you have a virus, I don't have medicine for it. If it was an infection or bacteria I can give you something. **This is a virus, you'll have to wait until it goes out of your body. If you wait for the virus to go out of your body, or for it to go through its cycle, it means it has an energy level. You have to wait until that energy level is spent on the rest of the cells of the body, by the division of itself by adding to the others. It doesn't mean that it has disappeared, but that now it has spread its energy so it doesn't have that effect. It doesn't mean that it won't be there, but at the same time if it stays dormant and another energy near it comes, then it comes back up again**. (:36). It shows itself again because now you absorb more energy of itself. It multiplies in energy pack difference division, but it still exists, because it has that link to, let's say AA, or to the salt (in middle layer), or to something which stays in that level. We have seen this with Ebola. When Ebola hit Africa some 2 - 3 years ago, very soon we'll have scientists from Sierra Leon on our panels and you can speak to them and they can tell you directly. When we gave them the key on how to overcome Ebola they immediately set up a system to produce what they were told. They put it in the lab and it was dead instantly. They tried it on humans because it was hitting Sierra Leon very badly, and it worked, people with Ebola recovered within minutes. Because what we did was to introduce to there body another sphere we called the Gans and we drained its energy. What did the scientists do, they were proud they found a solution for Ebola. They were scientists of the U and went to the presidential palace with their system. And what happened? There were health people present from America, from a given university, you can read it on the Internet, they said you can't show this, it's impossible you can't show it, Africans are not that intelligent to find a cure or a process or whatever for such a disease. This is beyond your understanding. The scientists understood the T (:38). and took it to America and 3 months later published a paper. Exactly what the scientists in Sierra Leon, under the instructions of the KF developed and overcame. They told the scientists not to say anything and if they did they would loose their position in the university. You would be finished. They went back and didn't say anything, but in the university they started producing it and helped the nation. Because it was so easy they could make it again.

Because they understood the concept and process. This goes the same. I saw a talk or presentation in the Universal Council meeting on Tuesday where they started talking about malaria, typhoid and any kind of viruses. Now we have a knowledge. I explained to them, you can't detail what materials and what you used because we are not doctors, but we can open the knowledge that there is a process that it can be done. The part of the teaching of today is that, we are opening a number of topics on this level. Are virus positions like HIV now can be handled with the new knowledge. It has been tested and some results are very positive. Now we come to one of the biggest menaces to the human race. Now we understand how viruses operate, the way they operate, where they nest and the way they work. One of the biggest menaces to the human race has been Herpes. It's a virus and we never had a solution for it. (:40). It's an energy pack and it can survive in the middle layers of the skin. Sometimes it goes into the third layer but usually the inner layers, sometimes but most of the time it operates through a tunnel of the outer layer of the skin and the inner layer of skin because it can travel through. It's a virus, it needs M field protection. This is how it works. He draws a bottom and top layer of skin. As we know the skin is made of Gans layers top and bottom, and it travels in the M field of the middle layer. If you speak to many scientists who work on Herpes they give you this knowledge. Today I have decided to open a new chapter in the science of Herpes, a new knowledge and understanding and it will be published on the KF Journal on the scientific side and will become the basis for the future and most of the KF scientists to develop it. In the paper I will release the details because it's a scientific paper and you can give ratios, and what you did and used. I have asked them to publish it in the next month or November. But it will change, you have to understand how Herpes are. Statistically in America alone, (:42). ...it's very shocking, it says worldwide we have 2 types of Herpes, we'll discuss it later on, 3.7 billion people in the world are carriers, under the age of 50, which is 67% of world population have HSV, Herpes virus of 1, which usually appears around the mouth, lips, we know, then there is an estimated 470 million people, 11% of world population between 15 and 49 suffer from HSV 2, which is usually genetic and appears in the body. Strangely enough a large number of Americans more then 50 million have genital Herpes. One of the most advanced and cleanest nations in the world suffers massive ?? from this. And 85% are not aware of it, statistically. (:44). 42 million Americans are not even aware they have genital Herpes. What we see is this is a menace. The reason we see in the research papers, that are coming more and more, is that because of the structure of the Herpes, 85% according to some research papers of the ones who have Herpes leads to Alzheimer's after the age of 65. ... We can see that it is one of the most prevalent viruses amongst us. and it's .. The world of medicine has given up on it .. with what we are going to release today, and the scientific world will come to understand, we will see how much the new knowledge of the KF can change many lives. Herpes now can be reversible and can be handled. Herpes with what I am going to explain as a scientific paper is an explanation of how the processes can be set. In the teaching I will not dictate any numbers, figures, or materials, but I will explain the principle behind the way ... Herpes ... you understand now how it ?? itself to the body. Now for the first time the process of Herpes will be understood fully and then we'll explain how it appears. (:46). The world of science has never understood it. Parts have been done and parts could be understood, but in totality we have never understood how Herpes gets into our system. It effects more then 2 out of 3 of us across this planet, has it. Does it lead to Alzheimer's

and death, and other diseases and conditions? Statistically we see in every nation we have this problem, it's part of our structure. It is something which we never knew. We never knew that viruses are energy packs, but they have a DNA strength connection that they can enter the body. Let me explain a new knowledge in the world of science of the man then this will open up many researches in the future. As you know KF is leading, and started interacting with the world of medicine in different ways and in a very fast way. We see that many scientists across the world are listening and taking note, the way we brought other things in, they start researches on it. We have to see 2 things, now we know a virus, it doesn't matter what it is or what we call it, it is an energy pack. It needs to attach itself to an AA. (:48). In that process, once it finds an energy pack, with energy structure, because it has a DNA it can control itself, it can mutate to absorb more. It is a living thing, it's like us looking for food to survive, it looks for energy that it can take. It attaches itself to Mr. COHN, let's say it links itself to O because it's a G field of it, or to the weakest one of the H. We see that it needs and finds that connection. But how does it enter the body? It needs a weak point, a point of entry. One of the points of entry that we can show, is the lip of the man. We usually see Herpes around the mouth in these positions, he draws lips with dots. Why? At this point this is not what you see, what you imagine. The reality is that there is a space gap, the shape is like this, draws an outer lip line. Here (the outer side) is the skin of the man, the external part. Here (inside) is the internal part, the sausage, the breathing part, (:50). where we eat. These are 2 different structures, so what happens here, this is the weak point in the structure. It's like a woven chain, it's like as you see in your N layers it's an open space (between particles), it's like sewing leather to a cotton, there are 2 different materials. You can't put them together, you can't fuse them, they are 2 different structures. What happens is this energy here has its own characteristics. As we said in the medical teachings 3 - 4 years ago, every skin has 3 layers as I just explained before. When you look at the structure this (inner lip) is 3 layers of it, 1, 2, 3, and when you look at the other (outer lip) it also has the same 3 layers of it. Somehow the 2 bottom layers link up. But the middle layers of the same salt content because they carry the blood in the level of balance of it, which you'll understand later on. They have a space gap. It means they allow and link up, and now the virus comes into this space gap. Now it has a place to live. Why do we usually see it on the corners (of the lips), because this is where the space gap is continuously fixed to one point, moves to close and open. At the points of flexibility we see it coming up, because that is the point (:52). where it can enter. When it does it has found a nest. It can enter into the middle layers and it stays there. Now we see existence and the reason we see this energy pack which is equal to the energy pack of the AA of the 2 levels of the inner and outer, which becomes the nesting ground for the virus. Because don't forget it's 6 layers now and not 3. You have 3 layers of the skin and 3 of the inner tube. In that position there is a gap. It sits in there. Because the field strength matches the fields strength of the virus. In that position sitting in the middle section protects the salt content of the layer, usually on the skin side, because on the lip side or inside is fluid, you carry a lot of fluid. It is continuously changing, so what happens is the change of the salt due to the energy creates blisters, and the slat burning, and you see it as blisters on the skin. Then the infection slips in because of the energy level and you have all these, what we call the virus of Herpes. If we have understood this we can go to the next step. That is why we see Herpes of a given strength which appears only at the mouth. (:54). If the Herpes

moves inside then it's a different story. Now the story on the inside is different because of the acidity and all the different enzymes and everything else in the mouth. It has to mutate that it can become stronger that it can survive this position. If you have a cut in the internal part it goes in the gap of the 3 layers of the skin, and now it becomes stronger. It becomes what we call (Herpes) #2. At the strength it now becomes it has to handle the liquid inside the body which is a composite, where the skin was slightly different. But there is a big problem with the whole thing, if you look at it the skin is part of the brain. Now that the virus has entered the middle skin it immediately travels to the brain through the middle skin (layer). But at the same time, as the other side which is the lip skin is connected to the internal, but it works in a different dimension, links up. What happened is the virus through the middle layer of the skin moves into the brain, because it is made of the same, it's the same transformation. When it moves into the brain, the strength of the virus, if this is the brain and this is part of the memory of the man, has the strength that it sits in that space, (:56). and this is the reason we call it Alzheimer's due to Herpes. In a way you put a jammer on it, the way you package and you jam a frequency, this Herpes has a capability at the strength because it came through the middle section, through the membrane of the body, it has a strength that fits into the strength of the memory part and produces what we call Alzheimer's. It has a strength, as we grow older the brain function changes and at a given strength it matches ttoal blockage. You know like when you send a message and they block you, this is what it does. Now we understand the whole process of Alzheimer's through Herpes. It has taken me nearly 25 years of research into this. It has been one of the biggest dilemmas in the world of science. If you go back to the research papers I brought with me to Belgium when I came, Herpes was part of it. I could not understand why this things could not be solved. Now we can understand more how this research will end up. It will bring a lot of shocking news to a lot of you. What we saw here when the Herpes goes into the mouth, where it becomes stronger because it's a stronger dynamic system and it has gained energy. the way the Herpes from the outside moved to the middle skin (layer) to the brain, now the game changes. (:58). The game changer is very interesting because through the same process of the skin. He draws the mouth, this is the intestine, and you have understood by now you have 3 layers of it, and that Herpes moves down the middle layer of the esophagus, stomach, to the intestine to the large intestine to another point which again has 2 phases, the phase of the dynamic dimension of the internal organ, and the same story as before, the skin, this is the anus. This is how Herpes moves from the mouth directly into the process, into the genitals. And it's stronger. But 2 ways it happens, you have the reproduction of the woman, or of the man. Look at it, again it's the same place they turn up. It's an interface, at the point of the foreskin of the penis you have the same position, you change to the tube to go inside. The interface again comes into operation, we see Herpes on the genitals. It can do the same but we might not see it in the mouth. (1:00). The interesting part of the story is, the body carries bone structure. He draws the structure. This is your spinal cord, hip and the head and the rest of it. Does this remind you of anything you have done in the space T? Do you remember the Cup and the orange, transferring the energy of the orange into the water of the cup. Now look what is the Cup, it's the hip of the man. Up to now the doctors tried to sort out the problem of the Herpes (#) 2 as they call it. In interaction with the creams and everything else, it moves, it can't be done. Because with the new research which has been published recently, we

understand, and this supports what we explained years ago, that now the hip becomes the Cup, the Herpes virus now sits in the hip, this is why doctors couldn't solve it. They keep on touching and doing things, but it comes back. Because when this Cup, its energy reaches a point it releases the energy into the same layers, (1:02). then you have a flaring up of the disease. Now we understand the full process of the Herpes, be it #1 or #2, it's the same, it's just in a different strength. Now we understand from Alzheimer's all the way to genital Herpes, how we can do it. This is why we have 2 different types, but in fact 1 is stronger and 1 is weaker. The stronger travels through the intestines because there are too much acids and everything else which is has to go through. But there is again 1 point which the world of science has not understood, doctors have not looked that Herpes also appears inside the body. It appears in different locations internally. At the entry, at the point of the change, the same as the lips and the skin, the esophagus and the stomach, they are of different materials. Now we should look for signs of Herpes in the opening of the stomach. Also at the stomach and small intestine, and the small with the large intestine. If we look in general Herpes is the totality of the disease across the body. This changes the game. Herpes with the new understanding of the plasma T should be able to be managed (1:04). and reversed. You have to understand that I use the word "should", because the last time we explained about the cancer some nations took action against the KF, that they can cure, reverse ... no. We use a very direct positioning but in the scientific paper we'll publish we'll be very precise, because it's a scientific paper. Now the condition of Herpes if understood, handling the totality of the body can be handled. If those of you who work in research, doctors, scientists and the rest want to understand, then we'll publish the paper. A scientific paper has to be published as it is without peer review. This is how we give strength to KF journals, what we call the scientific paper of it, the journal of it, by revealing the most advanced knowledge that doctors can work with. I'll make this journal one of the most prestigious journal that the world of science has come to look at. When there is no peer review and everybody has a say in what they want to do and how they want to handle it. For the first time we understand the whole process of Herpes from head to toe. Why do we see Herpes on some points of the arms or legs? Go back and look at the structure of where it is. They could have been a puncher (boxer) in their life time. (1:06). There could have been a damage to the skin at that point, where again like the partition of the 2 lips, the weakness of the middle layer appears and it manifests itself. It just needs to get underneath with a few dots and an energy transfer. Herpes in every level with the new knowledge of the Pl T is reversible, because what did you do, do you remember the patches put on both sides. Do you remember a very simple way when spoke about the condition of when you had a cancer or a piece of metal in your body and you wanted to remove it. When you have a piece of metal there, you create a ratio of 4:1 (in patches on both side), or 20:1, creation of the fields (Infinity Loop between). Now very simple, take an extract from the Herpes itself when it flares up and create a Gans of it and place it in the same ratio. It should not take more then a few days or weeks to be able to drain the system. But don't forget the hip, or the body with the intestine, or the boss on the top (brain). Remember what I did and our friend explained to us how we managed to deplete the salt from the foot of Naomi. (1:08). We took the urine of Naomi, made a Gans of it, we patched it, what was supposed to be weeks, it was gone within days. The same applies here. When you have a (forest) fire you don't fight it with the water, it's too big, you burn more fires around it so that it

has no more to burn when it comes to it. You handle the virus directly this way. You can even handle the genitals directly the same. Then you remove the energy from it so that it is not there to flare up. But what is not understood is that the Herpes sits within the whole structure of the body, not where it flares up and we see it. I'll try to publish the papers in the full details with the cooperation of the KF team in the background. Two thirds of the human race suffers from one thing that is not to be and it is there. The point asked is where does the Herpes come from? It comes from the brain of the man itself. It is the release of the energy from the inner STM touching the invisible memory part of the body. This is why it goes back to where it came from, (1:10). and that's why it effects the memory parts. I'll explain for you to understand fully. Many of you in your sleep you dream. Some of the dreams are nice and some are not so nice. But if the dream is at the strength that it endangers or jeopardize your life or imprison the physicality, this is what we don't want to remember. So you create a field force in the balance of the memory that you don't want to remember, but because it hasn't manifested, because you are having it while you're awake (asleep), it's part of your soul operation. The energy transfer appears on what (the place) you can't speak, which is the lip. This is why when you have a very horrible dream you get a blister on the side of your mouth. This is the beginning of the process. Now we understand the whole process of the creation of Herpes coming from the inner structure and that's why it goes back to where it came from, because it has no memory, it wants you to remember that horrible thing or whatever. We call it, a heat temperature of dream, you know you get a blister on it. Now we understand the whole process of where and how Herpes came to be, it doesn't matter where you are in the U, or this planet you'll get it, (1:12). because your soul is the creator of it, but it has not found the physicality at the time when you are awake that your eye observes it, you see it with the eye of the STM. You have a dream, you're captured, they put you somewhere and you want to escape, it's too frightening, but then you wake up. But the energy is not there to memorize the energy part of the feeling. And where does it hit you, the place where you could not speak. Walla, the mouth is the point of speaking. It's where the energy will transfer. Do you remember what we said, if you have a problem with your son, as a man you get a cancer of the prostate, ..?? by the scientists, it's the same process. But this time Herpes is a condition created by the STM without the interaction of the physicality, but knowing where it has to go, because you (don't) want to remember that, so it doesn't happen to you. Then it goes back to where it came from. Now we even understand why Herpes damages or interacts with the memory side, because you want to forget that horrible point. If you read the paper I published called, ILS a death wish which comes true. This is another process, very much and directly from the STM, ILS is a wish through the soul that the physicality can't handle. Termination of contract you call it. Now we understand the full process and that even Herpes doesn't come from outside, but it is the creation of our own soul. And now as we understand the process of the creation and the work of the plasma, and as our body is a container of Gans's and we've seen how doctors have handled different (1:14). conditions with transfer of energy. We need Herpes itself to handle Herpes itself. If you have a lump of Ca in your body you need a Ca in a different strength to be able to move it. Dr. Rodrigo and other doctor scientists have shown us. You can do the same with herpes. Now with the understanding of this knowledge no virus should be a danger to man, even in the space. I developed this T for man to be safe in space and you have to understand the work of the viruses or what I call

energy packages without physicality that it can save your life in the space. The U is packed with Herpes 3, 4, 5, 6, .. million. Once you know how to walk, you can run, jump, dance and whatever you like. Now I have taught you how to walk. Two thirds of the worlds population suffered from it and we never knew how it comes, now we know it is the creation of ourselves, the way we create it through our souls, the structure of the muscles of a heart, lung, intestines. Now we understand that herpes is a condition of the STM, in a condition that releases such a huge pack of energy from the STM in a condition of interaction with the other souls that can not find physical position, but between the 2, the gap, the salt is so precise that it finds its way there. And if you carry the same emotion and you kiss another person on the same space gap between (1:16). the skin and the lip, or what we call the inner tube, you'll transfer it into the middle layer and they get it, because you have a copy DNA. Herpes in any shape or form, be it the herpes of U or herpes of planet Zeus, now you can handle it. Many scientists and world health authorities have been looking to find a solution for this, now the solution is there. This is a gift to humanity, if those who understand can apply it then herpes will become a story of the past. It's the memory of the STM on the physicality. The way it chooses the color of your hair, the soul chooses the color of your eye, the soul in interaction ?? time of life of the man does the same. We've seen this transportation across the body of the man, the way it comes in and leeches onto, how herpes itself as a virus travels through the body and at intersections of the change has to mutate to be able to move across because now the faces of top, middle and bottom layers that are linked together, so as it's going it travels through the middle skin from the mouth to the (anus), .. (1:18). ... (break).. . what we see now is the process of understanding how every virus in the world of the creation can be handled, be it AIDS, HIV, or Ebola or anything. These are what we call memory packages of energies that they can mutate and they live, they get fat and collect more energies and once they reach a level they travel to another position. Now every kind of any disease which is what we call virus or energy pack connected (1:20). is reversible. It's a process this is why in the KF we don't call it treatment, cure or whatever, because it's a process and now we understand the process. We understand the process of its creation, transfer, and how we can balance it out of the body, because once you deplete it of its energy it's gone. It's not something that can be done in a day or 2, the body is dynamic, it (the virus) mutates and you have to have persistence and understand it and you have to be able to develop new ways of developments of viruses. Because it can mutate you have to be able to mutate with it. The only way you mutate with it if it occurs, you pick up the liquid or inner skin of it and make a Gans of it. You use itself against itself to transfer its energy out of the body. It's the first time the human race has an answer for all the viruses that have been threatening man, be it influenza, to her flu's, AIDS, HIV and the rest. But nothing has endangered the life of the man as much as herpes. Now we know and can add to the science of the man that through the KF and you as K Seekers, doctors and whatever, I am sure that many of you have been touched by it and that many have told that they have this condition. (1:22). Now you can help yourself. I will try to publish the paper but I will ask the team in the background to make a transcript of this teaching as part of a scientific paper to be submitted ... If we can take one man out of the pain of his lifetime we have served our purpose to be here. This is part of the process which now we have to be ready for space. If we can't handle such a small virus with such a weakness that has caused havoc in the human race from the time the

first man had a horrible dream through the soul which had no dimension in physicality, then we understand the seed of it. In Tuesday's teaching I mentioned 2 or 3 times that I am ashamed to be in the body of a man and I received some complaints, why do you say this? Because the body of the man suffers too much. We come to live, to enjoy life, we don't come to suffer. And it is shameful to see suffering due to an act of the people, let alone through a virus in the body. It's a shame to suffer, what for? Living and existing has to be a pleasure at every point of it, (1:24). even at the point of transition from one dimension to another. We should celebrate life and not to suffer with life. Viruses will become and has been a part of our lives now we know how to handle it and to allow our body to go through the emotion of reversing. We understand the process from A to Z for the first time in the creation of man. Every one of you, the millions of KF supporters around the world, you can do and listen. I know and many of you know that KF reaches millions of people around the world and many people act on it and use it. I know we reach many places because I have been places where you could never imagine (that people have heard of KF) and people walk on the street and they ask me, are you Mr. Keshe. So it must be done, we know people listen and they'll find a solution from us. That on the street in Beijing, China to the streets in Italy and France and everywhere else we are recognized. I am recognized by my face, KF followers should be recognized their soul. (1:26). Teach it. If you live in a neighborhood of a hundred people you should understand that 67 of them suffer from it. If you live in America you should know that over 800,000 people are infected by this disease, that is 2,000/day, 100/hour and nearly 2 people/second and that's only in 1 country, because they are good at keeping statistics of people who are infected by it. Now we have a solution. Test it and add it to my papers as a testimonial. But understand what you are doing. Next time you have that boil on your face and they tell you, you have a herpes, take pieces of it, take all the liquid that comes from it and make a Gans of it, and add it to CO2 and add it to ZnO, the way you make your boxes. Because it has the interaction of the physicality of connection as the electric to the brain, and it comes from the emotional part of the brain. There are no muscles in the brain, now you understand the ?? effect of ?? If you as KF supporters start doing this for your own suffer or for the others, (1:28). then you'll understand how to do it and how it can be done. Teach it freely. Once I release the paper, hopefully I'll try to work with the head of the KF, Ella and the new team of papers who are there. ... This is a gift to humanity. I could make millions out of it, but as again, in the KF the knowledge is free. You have to understand it and then teach it, very much like you teach other aspects of the KF technology. There are people who want to publish the paper on malaria and other diseases. I support you but do it as a scientific paper. We have done a lot of research on it and we'll add to it as a collective paper and it has to be done in a way that malaria can be eradicated. I have done it. Alek can tell you. Yes, good morning Mr. Keshe. Hi darling. Alek would you like to tell us what happened with you with your malaria a year ago. Yeah, I came to Ghana and I had malaria and you gave me the Gans of Mg and ZnO, (1:30). which I did and the malaria went away. Have you had an more malaria attacks since last year? No. Were you spending all the time in hospital with it? Yeah, I used to, but after that treatment I haven't had malaria again. You haven't had malaria since I made you what you call, "The Water of Life"? Exactly. Alek was in hospital 2 or 3 weeks before you came and saw us in Ghana, and you walked back a healthy man and haven't had anything since? Yeah .. This is how easy it is. He was getting Malaria attacks more or

less once a month? Every 3 weeks to be precise. If I took the malaria medications which didn't work. ... It's so simple because it's a virus. ... He calls it a treatment, but we call it a process. We understand how it comes and where it goes. When you get infected by malaria from the animal (mosquito) from the fly or whatever, what does it do? It bites you, it inserts its energy pack in the middle layer exactly like herpes. (1:32). That's all it does. Now it finds a new dimension, a channel to fly and go through the brain and everywhere else. Any disease which gets into the middle layer finds its way to the brain and it finds continuity because in the brain of the man it finds a replication point like a heartbeat. It reaches a saturation point and then you get an attack, because it absorbs energy similar to it, because don't forget the bite of the mosquito carries a DNA and AA which is made of the body of the man, near enough. So it is easy to travel. All you need to do is to reverse the energy pack. But it has to be done in a way that we understand the whole process. When you drink a Gans water, it's not just a water that goes through your body, because this is the understanding of the present man and that is we think that when we drink water, in our intestine that the water goes through (absorbed), that is all it's going to be. And it's a water. But when you drink a Gans water, a plasma of it and not the Gans itself, what do you do. It's not anymore water, it's an energy fields (draws spirals along the body). It covers your skin and every part of your body because it goes, it creates its own aura, its own new field dimension. (1:34). It's amazing how far it goes. In a recent test in agriculture in China we have seen an amazing result, a 100 meter field, applying Gans on one end we can detect a peak of the fields like this (a curve that extends almost 100 meters), 50 and 75 meters away we still feel the field effect. This proved to us that the Gans materials have a spherical shape. Because we have had a 4 weeks trial to see how it goes and it's this shape. It's not if you water it, or if you don't water it, the field next door, you get this. When it comes to the new space T we have to solve all the problems of man, and what we call the RNA, without the DNA, energy packs. Actually they have a DNA of themselves but it's an energy pack that it keeps their shape, but it has a memory of itself as a field. One of the strengths of it. If you remember .. you'll understand this very easily as K Seekers. (1:36). When you have a CO2 it is all the same plasma, you don't see 2 different plasmas or materials. Whereas in the matter state if you have an O and C you see 2 and can separate them. But in a plasma you can't separate it, it is one Pl but it carries 2 strengths of O and C, where C is of the lower strength and is farther out. But it is all on the same structure. Where in a chemical binding it's this, draws 2 rings interlocking. If you understood this then solving the problem of viruses in the U should become a child's play. We have to understand the totality of the process. Any questions. (1:38). Q: How does colloidal silver and chlorine dioxide works on viruses? It doesn't work on every virus. Silver has the affinity of the common denominator field effect. I have explained this in other teachings in the past when we spoke about other parts of the development of the science. What they call silver or whatever, it's very much a monatomic, so even it's in a matter state it's a Nano material, and N materials have their own fields. This is how the silver works. If you look at like a Pl it's like this, but when you look at your N material like we just did, this. It still has a field, he draws rings around a center. When you convert it to a Gans, then it's not a matter state anymore, it's a field state only. (1:40). But when it's in a N state, and what you call silver is a N material. So it has a sphere of effect. And it doesn't work on all viruses because it is limited to a given strength. Q: And the same is with the chlorine

dioxide? Chlorine is a different thing, it's a cleaning agent that has an affinity to a different direction, to the bonding, we have it in our body, that works in a totally different way. One works on chemistry and one on N technology. Q: First, is about elevating the soul, if we connect our soul to the soul of our higher self or God, are we able to infuse any of our Gans material to a higher level vibration? They have a consciousness so the question is can they be elevated to (1:42). more then just being a regular Gans? In so many ways .... (pause and change in voice). This is another part of teaching, but maybe as I said, if you bring the subject on the table and I'll teach you. I was writing this to one of the K Seekers yesterday and maybe it's time to teach, that's why it came to be written yesterday. You speak about higher level, order. Let's go back and get a new understanding of life, because this is what you need, this is where the problem of the man is. I was writing this to the head of the KF Ella sometime this morning, she can read it. We have got used to feeding ourselves with the physicality, food, water, air. And with it we feed partially, we provide energy at a given strength to the soul of the physicality, we feed our soul. (1:44). This is what we do. This is something man never understood. What we do in reality, what man has done to himself, is that, we eat food through our mouth and it goes into our intestine, part of the energy of it not only energizes the cell of the DNA or RNA, but part of it energizes the soul of the cell. And the soul of man, if you look at it, because it is balanced to it and now moves at a slightly higher energy takes from it for its bottom order of the fields. (He draws a spiral with an X at the outer edge of spiral), if you look at it from here. So we eat food partially to feed our own soul. By conversion. But we forgot something. The soul itself lead to the creation of the physicality of the man. By collective energies of the souls of the egg and sperm in the womb of the mother we created this soul, which by the interaction of its fields with the interaction of the environment lead to the creation of the physicality of the man. Now that you are in the space, how are you going to feed this soul? For it to exist it needs to absorb the way now it uses the soul of the physicality to feed itself, now in the space it needs to be fed. (1:46). Now you understand, you were talking about a higher soul. If this is your soul, to be fed you need to tap into the higher energy. Man has to learn how to feed his soul in the space. If you go back to the teachings where I say man shall not kill anything, because we have to go back and learn how to feed our souls, that through the soul we feed the body of the man. Thy shall not kill. There is no need for killing or destroying anything. In the space there are no cows and sheep to kill and eat. You call it, higher then yourself, that you can change the soul to change the physicality. This is the whole purpose of my teaching. This is why we came on this planet, to teach this to man. It's time to learn. It's amazing, I thought about it, and I wrote it this morning, and you bring this subject up now. Which means now the STM is mature to understand the truth. In reality, we need to understand this, and if we do and if we understand, then we can go further in the whole totality of the understanding of the work of the STM. (1:48). Ella am I allowed to read the communication? Of course. I enjoy conversing with Ella to teach, it is very nice. ... It says, but we have the STM which itself the creator of this leech of physicality, so what becomes, our soul, is a virus of the planet itself. We need to teach our soul to feed off physicality, and not of physicality off of our soul. (?? wording). This is what I have been trying to teach and gradually getting there. Go back to my teaching, this is my message and no one gets it. That is why I teach about the soul. A change of habit is difficult. It is the soul that creates the physicality and its responsibility to find a

new way to feed it. We have to understand it and go back to our soul. Now you are enlightened. Now you understand where my teachings are heading to. The man in the space lives through his soul and not his physicality. And no crime. (1:50). And it is always there as a master. Now the purpose of the teaching comes to one point. You were all waiting for the Zn to change the man, the whole purpose of the teaching is to teach the man to go back to his soul to feed his physicality. You call it the higher order, higher level, there is no higher level. The higher level is the field of the U, the higher strength to feed the man, the STM that through it, it can feed the physicality of the man so that it doesn't need to kill. It is very much to the point. John Q: By the same token we can elevate the Gans as well? Of course. As you understand this, the more you absorb, the higher level of understanding, the higher level of the STM. And somewhere down the line you change. The point of physicality, that then you decide how to change that point of physicality. Q: With our spaceship is it possible that we have (already) created the fields of the SS but that we can't see it, or will ? (1:52). In so many ways the answer for you is ... I always said, that people will take this knowledge according to their intelligence. If you just change the words in a few sentence, it's us who has to see the dimension of physicality. So is the SS of the STM, the physicality of the man, or can we extend it that we see beyond the physicality of the man. Q: so possibly we already created our SS? You always have, but we decided that this SS which was created ... (break) ... It's your soul that created your physicality, now if you understood this, as I said, the STM accepted the condition of, according to the SS of this planet to manifest itself. What about if we move and change the position and conditions of this planet. In the world of science we call it evolution, but this time around we have to allow our soul to evolve that our physicality follows it. (1:54). The evolution of the time according to the physicality of the man is very cumbersome, very difficult. Q: If we are successful in removing the herpes from our body does it mean that we can remember more of our dreams? We remember the dream. We choose to ignore it because it is another dream. You wake up and say, I had a horrible dream. If you look when your herpes started... unless you got it from somebody who transmitted it to you ... How can a man in the middle of a jungle have a herpes but he was never in touch with nobody (modern man). But he had a fright of a tiger eating him and that is all he could see, a tiger, lion or whatever. (1:56). Q: So right now I can't remember any of my dreams, when I wake up I don't know what I have dreamt last night. So take a video camera in your dream and give it to your soul. It will record it for you. It's the position that we choose because our soul has a memory bank of itself. I made man in the image of myself. If the brain has a memory to remember things it has to come from his creator otherwise he doesn't need to have it. So when you go to your soul there is a bank of memories. this is what I explained before and I repeat it again, if you last with me long enough, I'll let you hear if you have been present with the voice of the Christ. Because your soul, who made you, was present, spoke with the Christ or saw him, will tell you how he looked. Surely not blue eyes and blond hair, we didn't have those in the Middle East, unless he had a European father. Then that is a very big crime for ?? As my mother told me once, I said, how did Jesus look. She said, look at yourself and you'll see it in yourself. He comes from your bloodline. (1:58). But I said, he has blue eyes, and she said, they can fancy whatever they like. The truth doesn't change. This is the part of the process of understanding and being truthful with oneself. Q: You were talking about general processing of viruses and you mentioned that we need

to know the specific field strength of the virus or element which it is connected to. Would it be possible to use a full spectrum of the field strength with for example the basic Gans's and just wait until we get the match with the field strength of the virus to drain it of its energy? Can you repeat yourself. (2:00). Q: Yes if you have a virus and you don't know the certain field strength of it, and maybe you also don't have the time to make a Gans of it, if you use a dynamic system with the basic Gans's ... and wait to match the viruses. Is this possible? Most probably. It can be done. But you have to have to make sure you can extract it. We don't have the equipment to do at this moment in time. But on the other hand you can do what you do with the "orange" if you understand. Then you have to find the ratio of transfer. Once you made the Cup with the taste of the orange on it, then ... it can be done, you can transfer into a dynamic system, into any Gans, like the orange, but you have other things that are around. You can take it and do it. But what about the next virus that hasn't yet appeared itself and is somewhere else inside you, you don't (2:02). How are you going to do that one. We have to develop a T where we can understand the measurement of the fields of the lower strength composite AA body of the man. Is there something else you want to explain about that Mr. Keshe? Not really I think I explained it. Q: We were talking about interacting with viruses, HIV and most of them. There is a scientist ?? who worked with plasmatic lamp devices some time ago. ... (2:04). he found out the interaction of these fields with viruses and created a list of 30,000 creatures, bacteria's and just found out the frequency that effected them and he used a microscope that he invented and he could see them .. the microscope disappeared and we don't have any trace of it. How long ago did he live? Something like 1900. ... Can we repeat his experiments? Is that plasmatic lamp available? There are some in America and England and a museum. (2:06). This is something we can find out. If you can go into it and bring it out, then this is another edition to the science we have, as I have said, we always build on the science of the others. This gives a leaping start. Now we have the Gans so we can diversify very fast. (Exactly, that one he was using was a dynamic one, he was using a light or invisible light, or direct emanation, we are using the alchemical side of it, he was working directly with the energetically fields). Yes this is what I was explaining last week. When you make dynamic Gans's in a dynamic system you create that light, invisible light, the interaction of the 2 M dynamic field cores, is not just something to rtoate, if you look at it. When you have the dynamic cores and the body, these fields interact, and somewhere they create that light. It's very much like the earth and the sun, but we don't see it. If we create a system where you can see these lights we'd see these interactions, bandwidth. What is applicable to the sun and earth is applicable to the medical system released by the KF today which Dr. Klaus has done. (2:08). (Royal Rife died in 1971 and he carried out this research in the 30's. So we should be able to find his machines) I think we have more advanced ones with the Gans systems we have. (Of course, but he was working with the universal microscope it was made with 6,000 pieces and he could see, we are not able to see live viruses now, because we have to kill them when we use an atomic kind of microscope. that's why he was advanced he could see the flow). He could see the flow of the energy. (He could see viruses emitting lights, he said, they were pulsating and there was a red light) Let me add to the knowledge. These viruses we see in the space. The videoing by the NASA space station has shown us these viruses. They have no physicality, but they have a boundary and they create a light. They are very much like a jelly fish, the ones we shine a light around them. We need to

develop a system that we can measure exactly and it can be replicated. And for the first time we have these dynamic Pl systems which is a matching of what we are, for the human race, for what we have on this planet. (2:10). But at the same time we have to create a condition of the U that we can measure them and see them. It's very interesting, if you can search for it and bring it out. We add it to the scientific paper which will go in the Journal. ... this is a beautiful knowledge to have. but again we go back to one point, we have to make that "universal microscope". (Someone has got it). Maybe Rtohschild's have kept it, we won't ask them. The process is that we have to be able to develop a common knowledge to be able to deliver this. ... Rick found something on Wiki .. (2:12). ... so the microscope is documented somewhere ... Our Dr. Paris has been working with the Rife technology for many years. .. (2:14). Dr. Paris comes on. . .. I have been working with the Rife technology since 2007 ...

(2:18).
... that's the story of Rife. Okay, can we with your knowledge add the dynamic plasma balls which we have and go through the same process? With the same machine, most probably I don't think so. No not with the same machine. I am talking about the process of the understanding of the dynamic system. (2:20). Now we have, and we can change the strength according to what mixture we put in and reach that point. (Because it works in a different way.) We are talking about in the Pl T the transferring of the energy. But the energy at some point when it interacts with the physicality it creates a frequency. (most probably sure, it makes sense, yes. In my opinion it's about understanding different sciences and applying whatever is possible for better healing .. plasma T is changing the field, but Rife's T is not changing the field, he is targeting a specific point,). ?? about the frequency as you said, we are talking about the totality. But he went for individual cell frequency. I understand that. You understand the process by which we work, how can we introduce this into the work that it can become beneficial more rapidly? (Do you mean just the plasma T?) The Pl T in conjunction with Rife's T. We can't be the only and sacrosanct. If there is a background and ground work we have to accept. The moment we say the rest are wrong (2:22). this is the end of the KF. If we see such a point we have to accept it as a beautiful job done. As I said, scientists are the messengers of God in a different form. And if this man has done so much work then we can build on it and give the credit to him, and maybe understand more because of it. And amalgamate the 2 knowledge's together that it helps humanity. That is all we are here for. ...

.. Yeah but you have to find cell by cell, but as we said the herpes lies across the middle layer of the skin. Now with what we suggested with the new plasma dynamic systems or patches, it doesn't matter what it mutates to, when it appears if you take it as the final mutation, and you can make a Gans of it, then you can zap it with itself. (I would love to try that and get some support by the medical system (2:24). of the KF so we can try it. I have enough willing patients to try it.) I'll sort it out that you get it from me. Thank you. This is what openness of the T can bring for humanity. Every man brings part of the knowledge in the music ... it's a symphony, many people have to play that it sounds good and becomes perfect. I'll follow this through and we'll come back with it. But now that we understand how to use the Gans T, and now we understand the travel of the Herpes virus through the body we can change a lot of things. Q: According to the rife machine

it's a precise device. We are using spinning Gans's, this will create a typical kind of scalar wave. ??How are the scalar waves (formed)? Q: The spinning of the crystals. What crystals? The Gans's, they are diamonds, thousands of millions of diamonds are spinning around. No they are not, they are not crystals. It's a plasma. Q: It's a Pl, of course, but it has a shape of a diamond. No, it has the shape of a sphere. I have looked at many of them under a microscope. (2:26). Q: Why would a scalar wave propagate from the ?? engine? They interact with each other continuously. Q: So we are using thousands of different frequencies at the same time? Millions and billions. Q: Okay, so we went the opposite way, Rife just looked for one and we are using billions. We have a spectrum of them, yes. Q: So it's perfect we just have to unite the 2 things and we have a precise. This is what I said when you put the patches in the front and the back. That's what you do. Because a thousands do not stay in a constant strength all the time. It looses in G and gains in M fields, it moves, it's a spectrum. When you do Raman spectroscopy and especially Infrared spectroscopy on the Gans's you get (it reads) 10 to 20 sometimes 30 different elements, are recorded. The scientists at Ghent University asked me, how is it possible, we have a C as a C, O is an O, how come we get 22 different items here? I said, it's a plasma and when you have a drop of Pl you have millions of suns and each one is radiating a different strength, or the interaction of them creates different strengths. So your machine detects this and that is what it shows. We have known this for years, it's in the book I have written, in the 2nd book. Q: So it's a configuration of different kinds? It's not a configuration, it's the totality of all the stars in the U. They interact and we see different lights and ?? It's very simple. This brings a lot of things to us, the opening of the horizon of knowledge. (2:28). Thank you very much for bringing such a beautiful knowledge to us and thank you Dr. Paris for such a beautiful enlightenment. We'll talk later on as we usually do and see where we can go to (with this). If there aren't any other questions, then there was a point risen by one of our scientists that one of her patients asked her a question. The question comes from a woman farmer in South America, and she has posted this question to us, she has a problem in her land in Brazil and the problem is, that the way the human body has become resistant to antibiotics, the weeds have mutated and become immune to herbicides used on farmland. The chemicals have no effect on them. In the same way Dr. Paris was saying about the herpes mutating, we see the mutation of another life form that we call the vertical people, that chemicals do not effect them anymore. She has asked the question, how can we as KF find a solution as in some of the lands they can't cultivate anymore. With the diversity of the weeds or herbs, (2:30). that their farmland has become useless. How can we come up with a T in the KF that allows the farmers to grow a specific grain, wheat, corn or whatever, but doesn't allow the weeds to live in that space. In her communication she says that up to 10 of these creatures have become totally immune to any herbicide. Can the KF come up with a solution. can we find a way that the farmers can claim their lands back and they can make a living. Then has any of the KF child's ever handled this, any of our agriculturists ever used the T to create a condition that allows one life to live but creates an environment that it is too hot for another to live and it moves somewhere else. In the life of the KF process we can not kill. This is one thing which we promised. The only thing is we can ask them, we change your home, would you like to move somewhere else. We give you a home but you have to move. Or we would like you to move that it makes us happy that we can make food on the land that we can have a life. Do we talk to the soul of the plants,

(2:32). or do we create a condition that allows one type of life to exist and the others don't. Our agricultural tests in respect to live animals or what we call parasites where you could use pesticides shows it could be different. Is Dr. Klaus online? Would you like to tell us about your test when you tried to move one animal all the animals moved. Which test do you mean? You tried to get rid of bark beetles but the whole animal world immigrated. Yes, we made a test with bark beetles which are a problem in a lot of regions. They are little animals that drill little holes into the bark of the trees and they live inside and they are very clever, in 1 or 2 weeks and maybe less and they become more and more and they suck all the energy from the trees. So there is no chance for the tree to survive. (2:34). This is why we did several tests to apply the T. We placed several specific Gans's around the tree and additionally we put them on a dynamic windmill that turn them around by the wind. We observed that the bark beetles disappeared but also other animals disappeared. ... the ants and other little animals disappeared from the little area around the tree. We were only working with fields and didn't spray any Gans water or Gans. ... as a whole these fields were very concentrated. (2:36). and the bark beetles disappeared. So you came to move one and the whole neighborhood moved. Yes this was a side effect we didn't like. ... So can we make a specific system that says, only you are not welcome and the rest can stay. Yes, I think we can we have to concentrate only on the beetles. ... A solution may be in this case to strengthen the tree. (2:38). Because what we know is that when the bark beetles come in large numbers it means there is some imbalance. We have to look at how we can balance the tree again. Okay, there is a solution, like what we just spoke on the herpes. There is a solution, I have done this and it can be done. What you need to do is, where the trees have fallen, some of the roots are still in the ground, you need to reach through at the point of the soul of the tree. I have explained already in the teachings where it is. You need to make a Gans of it, and enhance this Gans and feed the plants with it. The way we used the herpes (taking a sample of it) to create a Gans of it. By transformation of fields you can make a Gans of the soul of the tree, or the center of the tree which leads to its soul because when you cut (the tree) at the point it doesn't grow but is still there, what we know. (2:40). And create an interaction of the fields. You just strengthen the tree that it changes the condition of the existence of its physicality and the animals will move out. Did your system move the animals out or did it elevate the soul of the plant that it creates a condition that it doesn't want any neighbors. It doesn't (necessarily) mean that we moved the animals, (just) because we changed the environment. Maybe in that process, as what we saw with the Kiri tree (? last week) that it grew so much. We have changed the environment of the soul of the plant. Do you understand. We just need the roots of one or two trees, most probably you have them from what was already cut down. If you can get to it, we understand roughly where the position of the soul of any plant is, we have explained before. Make a Gans with it and feed the plant and other plants with it. You can strengthen it with CH3 and other things that are needed for plants. And see if the tree changes. If you (only) move the animals then the holes or wounds in the tree bark are still there, but if you strengthen the soul of the plant, as you have done with other propositions, then you will see the wounds on the trees will heal, the holes will recover. That's how you'll know if you acted through the tree or through the animal. This sound good, we are going to make it immediately, they need it. (2:42). You just need to put this across. Maybe the soul of even the damaged trees will repair themselves and you get the

woodlands back. With what you are doing you are moving the beetles out but the damage is (still) there, but if you can elevate the inner strength of the tree, understanding itself, then the farmers will claim their woods back. Q: Alek asks, what if we make the Gans's of the natural predators and spray it on the trees? You create a condition of giving them a strength. If you put it at one end of the woodland to the other and create a gradient, you might move only the beetles, it's possible. You just create a condition that it doesn't suit them. The whole work and knowledge of the KF is not to harm. And in that process of not harming you create a condition for them to live. You give a condition to what you want to live, to strengthen it. .. (broken transmission ..) by itself. ... (2:44). .. you hollow out the center to the point of interface between the ground and the air, it's roughly about where the soul of the plant, of the tree lives. You can replicate it and strengthen the soul of the forest. ... in that process when we elevate the STM it elevates the physicality of the man, diseases can't live. It should be the same for the plants. Now we still haven't solved the problem for our farmer woman. And we can't go and put a dynamic core around every herb, there are millions of them. I think the solution sits in what we said in this part of the teaching. If you want to think about it. We've been going on for nearly 3 hours, I am exhausted. Teaching at this order it takes a lot of strength and teaching knowledge which is not understood and opening it up into the world of science and it turns out to be 100% correct, it takes a lot of concentration. Think about this and we have an agricultural and other teams, (2:46). that they can come back to us. I know the solution but we need to allow other knowledge's to come in from the rest of the K Seekers that in time we learn that we can share in the same way as we have done before. ... I hope we close one the most horrible chapters of the life of the man with this herpes. We'll publish the paper .. we'll how we give credible to a lot of things. ... (2:48). ... (2:50).
(2:52).

(2:53).

244th Knowledge Seekers Workshop - October 4, 2018

(,)

(:08). Video on U Council. (:17). Mr. Keshe's father passed away 2 days ago. A video in tribute. 1 minute silence. (:20). Mr. Keshe starts. The instigator of this knowledge,

brings back man to a new dimension. The teaching of today is not easy because those opposite to everything we have taught in the moving away from physicality, and what has been known for us, in the teaching of today a new dimension will come into play, the dimension of non-tangibility in space T. (:22). We'll understand T in a totally different way, from now on, .. We came from matter state into Pl in understanding the work and operation and how to create the plasma and how the creation of the Pl will lead into the condition of what we call physicality, what it will bring us and take us to. When the man is ready we'll teach more. When I teach one group it means the rest of humanity is ready for the same. ... (:24). Today's teaching may be more diverse then what we are used to, but it is the direction we have to go from now on. This means we start going one step further in the space T. This is important because as a whole I think mankind is ready to move on, ready to take the next step, ready to understand the next step in progress in science and this might not be comfortable for a lot of people, but may bring new insight into the work of the KF. ... We brought the science into a position where we produced Gans, from the Gans we produced energies, and we put these Gans's into containers, (:26). and we changed the position of the containers, and we moved them as a core, in patches and everything else. As I said, I am going to influence the Iranian situation with the American government very powerfully and today is the beginning of it, sharing of the knowledge that will change the course of humanity in so many ways. The change has to come through science and its application and not through fighting, not through discussions, not through what I call different aspects of the work, which means we have to become aware and understand the knowledge in full. We have to become aware of where this new knowledge is going to bring us and to what extent. It is very harsh to say I have said so or that I have been able to do so. What is important for all of us is to understand the new knowledge very rapidly. Because I have shared this knowledge with one of the leading K Seekers, and I have always said that when I share with one I share with the totality but you have to understand. (:28). We took the matter and made Gans's and Nano coating, and with it we contained it, with it we made in the space T of the KF (draws a Star Formation) where we could see Plasma and some could see fields. As I have always said, if you look at the earth there are no jet engines or wings, there is no one to come and fuel the earth on a regular basis that the earth travels at 1,600 km/hr around itself 10,000 km in it orbit of the sun, and the sun in the galaxy, about 100,000 km and the rest of it goes to a million km and there are more speeds beyond millions of km when it comes in the ?? dimensions of the Universe of travel. When we look there are no reactor balls, there is no dimension of the physicality, the existence of the fields creates the dimension of physicality and the teaching of today are in these lessons. We do not need reactors, cores, or Gans's but we use them to do, but as we create the fields, as we came from the matter state into the field state, and now in a different way of using the field state we can create the matter state. We use cores, but there are no cores in the U. (:30). When we used the cores we created a SF effect, but in the U there are no cores. There are no SF I think, that it leads to creation of the spaceship (SS). This next step in the knowledge is how to use the fields of the U to create the SS of the U. What will this allow us to do? If you can use the fields of the U you can transmute man in physicality to anywhere in the U. I open a new line of teaching today, which with it will show the effectiveness of how the Russians took the American boat. This is a warning to the American government, we open a book. I open my knowledge and with it, I literally

demolish the knowledge of present. With the knowledge of today, there is no Navy that can touch anybody, no boycott of no one, if the world leaders understand. I was with one of the leading scientists of the KF in the past few days and I explained to him in a very direct way, and now I share with you what was said. If you look at the structure of the physicality of the body of the man in the 3 layers, as we spoke last week about the herpes. (:32). The rotation of the dynamic flow of the content of the Pl on the N layers, creates the flow in the dynamic Pl condition, which creates energy and the life of the planet, or the skin of the man. It's a combination of the N structured Gans's with interaction with each other influencing in different dimensions and strengths, creates the physicality of the man. (Can somebody leave that picture on the site please.) What does this mean? If you understand this you enter into the new knowledge of the U. Whatever we thought up to now will become meaningless. We become totally part of the knowledge but the jewel in the crown of the science of the U. As you saw and I explained before, when you brought 3 layers of the Gans's together, you created the skin of the man, depending on which layer of the skin you took the color changes, to blue, white, the transparency of the eye to the touch of the skin, to the roughness of the skin, how you position them in respect to each other allows in the gap of the tightness, even the hair grow. It dictates the grow of the hair by its interaction, what comes out, what color it's going to be, what shape that hair will have. (:34). Hair doesn't grow out of nowhere. If you look at the hair of the man it is literally like a plant, tree or herb, it needs the embedment of the skin in a different condition and position that allows its growth through the gap. We still have an airtight condition even with the hair growing through. It's not that they make a hole in it, it is the way the layers accommodate themselves that in the space of another manifestation in the tangibility can manifest itself, what we call a hair. This is how simple creation is to create matter state of its own. If you look, it's like a ??, a potato, you seed it in, you create an energy around it and it grows. There is no difference between that and a plant. This is a s simple ??? But now what is important for us to understand, where the combination of these fields put together, and controlled in a way that ?? body creates this containment, gives the shape of the body. And the interaction of the fields on the totality dictates the condition and position of the organ of the man. If we create a condition in this subject that we do not need to consider it as one part, but we consider it the totality of the work of the U, we can move this (drawn body) anywhere. We can allow it to appear in any shape of form as we wish and want and wherever we want. (:36). It means that if you manage to create a hair in the body using different species of the strength of the soul of the man (STM), what will this do if you now place it opposite each other, and be able to control the environment of the fields within a given environment inside this space. It's like a hair, or another organ. If you match this field and this one (middle layers) to another position in the space of the U and understand the totality of the strength of the fields you can transfer the body to any position in the U as you wish. Transmutation and transportation of the elements through the transfer of the fields. This gives you a new understanding, this brings into the game a new, what I call a ooftball. Up to know you all worked on the very essence of the KF, which was understanding the space of the reactor. Now you all did the spherical reactors and you created the condition of what we call the SF. Today for the creation of the field we look to the creation of the disc reactors, where fields, very much the layers of the skin, introduces to man a new dimension of the existence. (:38). Now the fields in this (between the 2 sets of reactors) is controlled. If

you understand this in a very simple way, this gives the field a new dimension. Some of you might be puzzled by it, but when you create such a condition, many of you will understand if I tell you the old scenario of "beam me up Scottie". The 2 layers of the skin on either side, this being the arm, stomach, which means ?? 2 layers of the skin, ?? back up. With the back of the skin and the front skin, if you want to call it that way. Now you can make a dynamic condition that you can beam Scottie anywhere. Creation of the boxing in the spherical reactors is not so easy. A combination of disc reactors which you have to learn more how to develop it, will give you the cylindrical confirmation where you can make your envelop. In the recent teachings I have referred to this many times, whatever you put in the envelop, money, letter, a kiss, a coin, that envelop carries it, irrespective of what is in it. So your new envelop will look very much like this. (:40). This is needed for, and in conjunction for transmutation and transportation. What this place, in the military technology, which literally paralyses any military force in the U or in this planet is, if you have a ship which you are so proud of, you mastered it up with all the nuclear weapons, and now I become the famous 2 Russian aircrafts flying over, 1st layer, 2nd layer, 3rd layer dictated, it (battleship) becomes part of the Pl, but because you dictate the strength of the Pl, no communication with it, no missile will ever fly, and nothing else. Now for the first time we reveal how Russia paralyzed the American system. This system will be used in the Middle East very fast. I warned last week. We take action, but the peace we will bring. Be it the battleship, aircraft, aircraft carrier, we need only to create 2 plasmatic M fields in connection of the Gans, and good-bye war. Go back to the 5th of May reports by the Russians in the international news on how the American's most advanced battleship was paralyzed. The skin of the man. (:42). If you can create the condition of the dimension of the reality, and you understand what it means the ship will not exist, you can transport it to any destination, right in the desert. It will be very nice to see aircraft carriers sitting in the desert of Saudi Arabia. Total cost, less then a $1,000 to do the job. If you see how the skin holds the dynamic organs within the body at different strengths be it the kidney, liver, heart. When the skin moves the heart has to move. When you run to another place, the skin that covers you, the heart doesn't ?? it goes in the containment. Now that you can create the field of motion you play the game of universal transportation. You create the containment. What you have been used to as dynamic spherical reactors has been for the communication and transportation in the body, when it comes to carrying matter states and containment matter states, you need a containment system where you can create dynamic fields that you make the envelop, then through the interaction of the fields of the reactors you connect it to the position, (:44). and destination that you can decide the field of and whatever is the containment is instantaneously transferred. This is not taught for defense purposes it is taught as part of the universal communication. We need it as part of the knowledge, and many of you will start developing what I call discs. If you create and understand what you are creating. You see when you have a mission and it is peace you can play the game to force and enforce peace. Many of you K Seekers who worked on the cores, now if you work on these disc conditions the body will find out, very soon, is that the condition of the Gans's that you choose, M field, direction of the rotation, MG fields forces, and then you see the creation of the containment is the same, to become, allows you to create a condition that not only within this field strength, if you know what to do, with this field strength can be done. In the case of the Russian American situation, the third layer of the dynamic layer

was the body of the officers. But at the same time you still can use on man's situation, ?? to bring the same situation if you know (:46). how to ?? use. If you understood this and you can position field dynamic motions, and you understand the T the way we do, you don't need any more balls, you create a dynamic flow of the fields, then has a meaning to you, then you have created your SS according to the fields you create. Go back to Book #1, as I explained, if you look while I am here on Wiki, put Hexagonal clouds on the north pole of Saturn. In a paper called the "rings of Saturn" I explained this, but now we have to explain it that you understand it very well. Why do we see the hexagonal shape in the upper clouds? ... nobody could ever understand, but they are created do to the interaction of 3 layers of the plasmatic Gans of the clouds underneath, (:48). or by interaction of 3 layers of N materials inside. Every star, planet, entity which works in the U has and possesses this cloud shape hexagonal as part of its dimensional control of its containment. The skin of the man has one, go back to the teaching of the Health, verse 31 it has been explained there extensively. If you ask for the north pole hexagonal (of Saturn) you'll see. In fact what you see is multilayering of 3 layers which gives this shape to it. It's dynamic. If you understand how this shape is created through the interaction of the 3 Gans layers of different, Tritium, H, He, or different isotopes of each other, like 3 He or 3 H, you get the containment, but you have the same underneath it. And the position of the man to understand this will allow you to creation that creation of what we call tangibility or physicality. These 3 clouds on the top and the bottom gives the creation of the sphere itself. No containment whatsoever, (:50). but the interaction of the fields of the U leads to creation of the physicality of the SS or the earth. What we see with the interaction of the fields of the U leads to creation of physicality. Then in that space and dimension, physicality in forming itself, dictates everything else which it is going to take from that environment. It's very much like the life of the man, you put an egg and sperm together, in there creation they lead to the creation of the soul, then in creation and containment of the soul by the interaction of the fields of it, lead to the condition of the physicality of the man, which through the interaction of the physicality within its environment leads to creation of the energy and the motion in the body of the man. Many of you have asked, where does the energy come from in the cell of the man. If you look at all structures of physicality as we said before, everything has 3 layers. The interaction of these 3 fields create the motion of the fields of the Pl, and then the interaction between the Pl and itself, and its containment of the fields leads to release of the energy. This solves the secret of the biology, where they did not know where the cell in the body gets (:52). it energy and dynamism from. Now for the first time you understand, one is the cause and one the effect, but in fact the effect becomes itself the cause of the existence of the other. And this interaction leads to creation of energy within the cell of the man. Containment of the energy becomes the structure of the physicality. Maybe now the world of biology and science understands how the energy of the cell, which has been a mystery in the world of science is produced. It's the interaction of one in creating its own dimension leads to the containment of the physicality of the plasma within it and between it and the interaction of that Pl with the fields which has created it leads to motion and energy, and this is how life exists. It's the pattern of existence in the U. Today's teaching opens up a lot of unknown and a lot of new ways in the world of science of the Pl T. We need this that we can understand how in the space of the U we shall make the containment and with it the containment makes its own energy and fields and structure.

Without the rotation of the Pl which created it itself by the containment of the fields there can't be any containment itself, that it leads to the motion of the Pl. Those of you who understand this and develop the new space technologies, (:54). the new line of communication, transportation, transmutation can only be created by Pl and by the fields of the Pl and if you understand this, the new dimension, what I call the disc plasma systems, which can't be in ?? said to be a disc, but it can create the dimension of the flow of the fields, can give you the environment which you can control and position from one to another if you understand the position of the transfer. This is how blood circulates around the body ... positioning of it. This is how the information transformation comes the brain to every cell of the body. This is how we create and convert the energies to the cells of our body and bone and the nervous system. Now the secret of creation is much more clear and you understand how your body absorbs and creates life for every cell in the body. You just have to remember which ?? shelf ?? by the strength and then you manifest what you need in that shelf as you change the strength of the MG in each of the layers. Before when we spoke about the existence of energy in the body of the planet, if you remember we said, the MG field of the sun in interaction with the MG field of the earth leads to creation of light and depending on its strength creates what we call matter state, be it O, C or whatever. (:56). But what you learned from today is a new dimension. You do not have anymore 2 but not you have 3 dynamic systems, which the interaction of the fields of each one of them on each other creates a new game of life. In the 2 dimensions you create matter in a plasma state, in the 3 interaction you create life, containment. If you understand this one thing becomes very apparent, the STM, the skull of the man, and in between the brain of the man, creates a dynamic condition for the existence of control of the man. Because he creates his own energy, each one in interaction with each other. The 2 spaces of the solar system, the sun and earth gives you matter state, when you bring the third dimension of the dynamism into it creates control and life. Because now it's not 2 fields, it's more then 2 fields. You have a field of interaction between 1 and 2, and the interaction between 2 and 3, 1 and 3, and at the same time their interaction with each other with interaction with what has created it, and this to become balanced creates energy and life. This is how life is created. This is what we understand about the creation. This is how if you understand you create your own body in the depth of the space. (:58). Because then you decide what layer and what strength and according to your emotion and the condition of the atmospheric criteria, what you'll get, your manifestation, with 4 legs or 10 legs, according to what the environment decides. Now you see every part of the teaching is connected to each other. Now we understand more about the process of creation and about the whole cycle of creating things. You try to put 3 spherical systems on top of each other, it will be very hard. You try to create fields flow, which means in some of the systems which you'll work on to star with, what we call the disc reactors, it will be very interesting to understand something. In dynamic reactors you played this game, (draws a SF), in the space program of transportation of life you can play a totally different game. (He draws 4 reactors with 3 discs each). While you are creating control and life here and here, these interact also. Now you can understand the new game. The new life can exist inside, your SS or the body. (1:00). Transmutation and transportation. Transmutation of the fields to matter and transportation of the different fields to manifest different plasmas and different strength and at the same time transmutation of the fields in the matter states can give you gold and silver from the same

composition. But there comes to you a very big question, it comes to those who don't understand it a bigger dilemma, and that is how are you going to rotate 3 plasmas. very easy. Are you going to put a machine through it and rotate it, or understand the balanced fields that in trying to balance fields together leads to rotation. You have seen this in some of the Gans units how plasmas work, and then in interaction between the 2 you can create your SS. Now the game of the space T comes a little bit closer to the reality of the space travel. Now we understand more. My condolences goes to all the research and development for creating the most advanced weapons to destroy and create sanctions. As of today they are all good for the bin. (1:02). I paralyze nations who create war by pure knowledge. When I teach like this world scientists listen and the game starts. If you know how to create these kind of fields, for one second you see it and the next second it doesn't exist. If you remember we had a guy in Canada who could disappear fields, but he couldn't see how he aligned his reactors. We all remember him. Now you understand how it is done. We can appear millions of people right in front of the Whitheouse without even them knowing. There will be more people sitting in the oval offices then those sitting outside in the green gardens. We enforce peace through knowledge. It's very simple, wherever you keep your computers, I just need to fly a couple of guys (over) without you seeing it. Goodbye the most advanced computers running, because they become part of the ?? term field, there will be no information kept in the memory and the structure. I said that a few weeks ago and now I teach it because we have to enforce peace. (1:04). This is a gift to scientists like Armen, people who work in Chinese space program, AZ, in the Russian space program who monitor the KF teachings so closely. The Iranian space program, to the Chinese space program who asked us for the fuel because they could not run the reactor they copied from us. Not only is it a flight system it creates the dimension of the existence of the matter, and creates the dimension of the existence of any entity be it in the plasma state up to the position of creating matter state itself. The field forces are so strong that in the interaction, open the gap. I ma sure you looked at many pictures and have seen it hundreds of times but nobody could ever understand how, you've seen this thing they call earth and they show magnetic fields going to the side and the sun is somewhere there, have you noticed the fields overflow around. the field flow strength to fly around it in the plasmatic condition creates the rotation, because of the inner sanctum, the Caroline Core contains a Pl in the dimension (1:06). of the Gans of itself. And this leads to the rotation of the planet. These (magnetic) fields are (like) the skin of the man, and these are the organs which in interaction gives the life to the body. There's no difference. Change the dimension of this (Core) and the name of this to the STM. Now you see how the physicality of the body which lead to the creation, now with the interaction of the motion of itself leads to the creation of the physicality of the man and the brain and then on its own leads to creation of life and existence. Teaching is very easy, but understanding and applying it will take man a long time. How do we keep them in position and constant and transfer energy from one to another and how to allow the confirmation and transportation? Because once you transfer to it you have to confirm that it is there where you took it. With the Chinese team we were looking at some of the reactors and interesting enough that the reactors have emptied themselves of their energy. What this means is, (1:08). for example, we have put CH3, or H3 and H2 in the reactors in a large quantity and after running the operation, as you know Deuterium is black in color to gray, and Tritium is orange to yellow depending

on what spectrum the H is in, and after running the system in delivering the energy the color of the ball is transparent. No color. Which means the energy transfer is so much that it has taken the ambient, what we call translucent condition ?? Means it has emptied all its energy and what we see is the collective energy of some 50 to 100 balls, very small, maybe 50 to 30 mls each. In delivering the energy and creating mayhem in the space and the stars, and if one understands this, it is needed for transportation in the space where you need to understand, as the SS you travel, you need a protection zone, and how you create the skin and the confirmation and transportation of fields ... space gap. And with it, the way you can do it, the space gap will have its own layers, it will be like a vein you are traveling through. (1:10). We are protected from totality, and distance at high speed, not only do you carry your own shielding but you create a vein like a blood you can fly through it. We call it in the present time, space tunnels, or the aircraft. But in the depth of the space you make sure the field strength in this tube that you create allows you safe transportation. You create your own tunnel in the depth of the U, in the structure of the U. The teachings will become very simple but very much in-depth. If you understand this you can bring a new dimension. Those of you who work in the space development if you can show it in the next couple of weeks, ?? those who don't want their name mentioned that they are good in translating the knowledge to physical systems, we don't really need physical systems, but you need a knowledge of understanding how to transport, to absorb, and to create motion amongst the layers. What I am going to do is take a space gap and in it, from now on you'll see new features in KF, changing ?? what I call K Seekers. You'll see new products appearing in the KF, and it's time to bring this in. (1:12). Listen to what is going to be described by Klaus, it has to do with the new medical system, but if you understand it, and can convert it, and understood what has just been said today, you can create yourself with the same kind of system what we call, your SS, or your transportation and communication system. It needs a lot of insight, understanding and development of new T. Where now you have a new dimension of disc, or we use the discs for flow of the fields. The beauty with the disc then with the balls, the different is you don't have much control of the fields. But with the Pl discs you literally narrow the fields if you understand it. In narrowing the fields and their interaction with another field position you can create the condition of anything you need. Or depending on how you position it, containment, and this creation (in the center). If you place the fields. When you put the discs in this position (vertical) you have the dimension ?? because if you look all the 3 fields they interact. When you put the fields this way (horizontal) you are dealing with the fields this way. (1:14). Where this field gets in touch with this one and creates a vortex of fields. 09

(1:24).

... as you learned it has to go back to where it came from. These are not for you to abuse the name and the position. The French have started selling products on the KF name. (1:28). Bring it under the banner of the KF. Speak with the management of the KF. The same goes for the Chinese, Romanians and the others. This way we give you more platform and you don't need to work the way you are. Is Dr. Klaus here. Would you like to explain what you are selling. Klaus explains the KF Products. ... What we have here is

a product which is working and you can use it immediately. It's a Plasma Ball machine (medical). ...(1:30).

... You can order it with pre-loaded Gans's ...etc ...
(1:38).
.. Are there any questions. Q: Have you considered a Tesla turbine ... (1:44). (it uses discs inside the turbine instead of blades ..) Keshe answers. If you go back to Tesla turbine, he was not aware of the Nano and Gans technology. If you take Tesla's system and replace them with N coated materials or with the discs, you will see a new ball game. This is something which in the ?? of the knowledge at the time, if choose 3 discs you'll find out Tesla, has done have the work for you. ... if we go into what we call neutron plasma you'll a totally different proposition. I think it would be good if you know someone knowledgeable in that field to bring a Tesla system to show and then you'll understand it. He was a genius but he was very much matter state condition. And if you change it to a N discs or go more advanced into different N layers of N discs, you'll see what we taught you in today and past teachings. (1:46). ...

... careful you're system will fly. It depends how you position your discs it gives you a dimension of what we call flight. Q: Should the discs all rotate in different directions? If you use different materials, the rotation will give different field strength. ... (1:48). They go back to questions for Klaus. Q: Klaus what are the typical rpm's for the system? About 2 to 3,000, you don't need high speed for the use. Keshe: One thing you have to realize is when you place your order, the ratio loading gives you performance, which means if you put 3 of the CO2 and 3 of the Zn, that's 6, and the opposite ball you put 4 of Zn and 2 of Co2, that creates a different field. These balls should not be look at the speed they rotate at but at the loading ratio from one side to another, then you have to consider all 4 reactors together. When you use dynamic reactors always look at the ratio loading, not so much the speed. After 2.5 to 2.7 1000 rpm the field strength adds up to is very much the same on the Pl then it moves up. So you have to mainly look at the ratio of your loading of each ball in respect to each other. Then you get a beautiful result. (1:50).

(1:56).
(2:00). There is another way you can use this unit. For those of you interested in the space T you can use this as a framework. For example, this arm can become the top and you can position the other 3 arms so they create a SF. For space development and if you want to feel the fields in between. There are a lot of work done this way where you can position this at the lower levels and then you can adjust the height of the top #4, or add another #5 to the center to dictate the field forces. You can get 2 of these systems and what we just explained create a transfer of energy, but you have to change it from a ball to a disc composition. I'll show Dr. Klaus soon the combination of the same thing, it's just an attachment to be changed. This gives you a framework for a condition where you can stand in between, and not you but you can put a box inside and see how you can transmute to another point, in connection. This will be developed in time, very rapidly I hope. You will see the flexibility with the system is not just a medical application but also a space application and even for the creation of matter. In future teachings I can show you and if we have Peter he can explain to you how you can use these arms to

produce matter you need, water, gold, silver, whatever in your imagination, but knowing how to use it. (2:02). This is the basic frame and how you apply it. This is the knowledge that you carry and you can extend it. It's a versatile system ...
(2:04). Any other question. Rick says, we'll see doctors of the future flying off to help somewhere and reconfiguring the system for what is needed upon arrival. ... You Dr. Klaus gave a list of elements, food, whatever. In the coming time we'll carry field strength mixtures in these systems that be it malaria, next patient has an infection, and the next something else, we'll just adjust the speed of the fields and meet the demand of whatever the need is. This units will very soon go into testing in 2 or 3 hospitals around the world. It has a lot of applications done by the doctors. The beauty with this T is that FDA has lost control over this T, because they have no tools to measure it or certify it. It's an enigma to them. But the results are there and government work by results and not by FDA, they have not managed to bring any dimension of control to say this needs to have FDA certification. (2:06). Because its use application. The governments are using this as part of introducing this T. Use application means that it works and shows that it works. The problem is FDA is trying to find a way to certify it, but the results confirm. And a number of nations are following that pattern of work. 25

... The beauty of it is, life doesn't last long on this planet, but the STM travels the U.
(2:56). Do we become slave to the physicality or do we become the free birds of the U through the STM. I have chosen the second one. Life has no meaning if you don't understand where your soul will take its position after, what I call the point at the time of departure. It's very much like when you get on the plane at Heathrow airport and you

don't die just because you left, your thought, physicality, your dimension of life appears in Paris or New York and a new life begins. This is the journey of the man in the space of the STM. And the sooner we realize the departure from this life is another airport where we depart and there is another airport in which we land and manifest ourselves. We call it the airport of the soul where our soul will take shape and will carry on with what it has brought. When you come to a new destination they don't put things on the airport in the airplane in your suitcase. What you put in your suitcase before departure is what you land with and you have to use. There is no use taking the jumpers, jackets and boots, if you are going to have a holiday on the beach. You'll burn yourself and visa versa. Man has to be able to understand and to put into the suitcase of life what is correct that when he arrives at the point of destination in the airport of the soul he has the fine (right) tools to enjoy the time and place. Are there any questions? (2:58).

HERE

(3:04).
(3:06).
(3:08). .. You see, if I can extend the knowledge because you're so physical. This is not much different then what you did in the spherical reactors. If you learn it through knowledge you should see through it. When you use the spherical reactors what happens. It's very simple, you don't need to be a Jewish man with a white beard who called himself Einstein. For the non-Jewish guys it's very simple. You have the ball, you put Gans's in it. The bandwidth came to here at certain speeds, the waters stayed there, this bandwidth became your Gans's. So in fact, the whole effective part of the process is this (the bandwidth). Now if you take it out, it works on the flat. Now do you see it. Now because it's in that order it becomes this (the disc). Instead of putting 3 (ball) cores on top of each other, now you are putting material on top of each other. (3:10). This is the difference, but in that process the fields cross like a rectangular magnet. But what you have is rotational field strength inside. Which this rotates this way for example. You'll find out you just need to do one thing, you don't need to rotate. You just need to introduce a Pl current in the speed control. Those of you who thought of getting a motor and how you can run 3, I gave you the secrets. Now where does this Pl current come from. Do you remember your MaGrav Units and where you plugged out and you put your frig on it, and you had your cable going out to your power supply. What you are putting out is a MaGrav plasma energy. Now you see where your MaGrav systems come into play. You don't need to make a rotation of balls, you can control with a Pl fields the speed of control, retracting or attracting. And as they say, ?? (drew a box in the middle). In the new Pl T you don't need motors anymore. We are done with them. If you have understood by now, controlling the field transfer of the Pl you create it. All parts of the T that I have taught you are all related. You looked in the plasma T MaGrav system how much current it gives you. It gives you millions of Megawatts in Pl field. (3:12). And some of you could do the transfer, you got yourself a dynamic system and you got your MaGrav system working. I kept telling you that I gave you a generator in the first teaching of MaGrav system and you were so physical, and looking for the current. I was trying to teach you Pl current. And you went for the cheap human size electrical current. If you understand how to use your MaGrav system and that will give you the power you

need. Electric current doesn't have much effect on plasma. Plasma current has. Your MaGrav system is a source of plasma. It's not your generator you were looking for. I told you I gave you the generator the first day, but you were blind to it. Now you understand what you have been blind to. It took me 2 years until today to explain to you. I designed the MaGrav Units with Vernie, we spent a lot of time -- 3 years ago? Is Vernie in the background? Yes, Mr. Keshe. Do you remember how long we spent making the coils .. everyday. To design. Everything was tested with Vernie because he feels the soul of the fields, he's very much like me. (3:14). It's a pleasure to work with him. Everyday we spent time making coils, we fixed it and put it another way, etc. We could have announced it at that time, this is a Pl energy, but none of you would have seen the value of it, and today you see the value of it. You see how it works, what it was made to do, there is a part missing in your work, which is how to make this MaGrav Unit independent that you can control your Pl. It's very easy if you haven't seen it. You connect your power supply back into the system itself, if you understand it. It's a self generator. Electric power has no use in the U. It's so low that it is not even considered to be used. Why do you get on a donkey when you have a jumbo jet or a SS. Now you understand a lot of T is coming through and people like Armen, Vernie, Chinese space center, understand this. They are listening in the background. In the past few days I had a beautiful 3 to 4 days with them and it's nice to see how things have developed and how we have managed to extract energy from the system without actually touching the system. The KF China is very powerful because they understand fully the whole process. It's just putting it in order. We are tackling it from 3 different ways, one is physicality, one through the soul, (3:16). and the other is through the dimension of interaction. Now you see the bits of the work of years are coming together. It's my deepest condolences to the American presidents who are announcing a war on the nation and a boycott. And my biggest gratitude to him, that by doing so it allowed us to release such a T so rapidly. I just want to know, you call it a boat, battleship and the most advanced aircraft and I meet the challenge. Not only me but the KF supporters will meet the challenge because now we can reach the STM. When there is no soul to ride it could be a beautiful Rolls Royce that has no engine. Any other question. Q: Rui (member of UC for Portuguese). Can we use for the discs, Cu N coated with different kinds, ?? essence on it? As I said, in this T you take it according to your intelligence and understanding. We left the N technology at the beginning of the teaching some 5 or 6 years ago, (3:18). when we started the teachings, that's why we went to the next step, free fields. You can do both but then you have a limitation of the fields, filtering, whereas when you use the Gans you have the dimension of opening up. You have to understand this very clearly. When Mr. Deleanois opened the boxes of the KF, what we call Pl systems, and he called it a terrorist unit, what they found and they took it to Mole Nuclear Center, they couldn't understand but they tested it for everything, on the science level the Belgium's are ignorant and stupid. They saw something very interesting, a lot or ring magnets, some with and some without holes, now if you look at the sequence of that, this is what they are (discs). I hide their most advanced T in a solid state magnet, because the field strength creates it. I showed you construction of one some time ago. And that's why they called me fraud, because you know something, when a stupid man calls himself a police but is a murderer everything has to be stupid to him. We'll show very clearly ... Because now you understand that if

you look at these and you put ring magnets together, how you create dynamic Pl. (3:20). You can give a match the STM. But this is the physical man, if I would have used 08

(3:28).

245th Knowledge Seekers Workshop - October 11, 2018

(,)

(:17).
(:22).

(:30).

(:42).

(:50).

(:54). Shows pictures of empty green box of 6 years ago. A green plastic box with many electrodes on top and Mr. Keshe is showing the electric potential inside. This is what is called the empty box of the universe. You look at what is inside the box. (:56). When we get the box I'll show you how the box was set. As you know a lot of scientists hide their knowledge in a way that people can't see because it's beyond their intelligence to understand at the time. Maybe I'll open this box and you'll see something amazing. There are a number of these boxes that I played with. There are a lot of the old Kodak film tubes, I created the condition of the U in them. Some of you must have seen some of them. In the construction you look for the energy, but I look for the fields. But because the knowledge at the time, and even now it's not understood, it becomes very different. When the box opens up have a look at something very strange. When I open it you'll see what I call parachutes. And each one when it's in this box is fit in. You looked at the energy conversion, (:58). what I used and what was the purpose of this system. In reality it's the universal field flows. So if I induce different fields, for example in this one, this and this one, I create a condition of the 3 layers of the skin of the man. And the fields coming from it is what I play with, not the fields which is inside it. You looked for the current flow, but I used and created the condition for the flow of M fields. very much the same as what you are trying to do with Gans's. When you understand the knowledge in totality you can play any game. It's not the magic or what we call, hiding the knowledge, but rather it's to show the knowledge in totality. (1:00). ... What is important is that when you look at the empty box of the universe, is that these electrodes are literally creating different conditions and different life forms. Because if you look at it, between these 3, you have the bottom and top layer and the middle, so here you create different life. Then

when you take a different set of 3, because this one now becomes the outer layer, inner and center layers, and this creates dynamic flow. You can create any condition. If you remember we showed in the same system in the ball, in the conference. Again it's the same principle because if you look at it, it's spherical with some 32 electrodes in different heights and depths so I can create the condition of a galaxy here, and another galaxy here. I showed it (that way) because that was the time of showing the energy, (1:02). but when I used to put current into it, you (would) see creates of life in here. When you use it against the ground flow, it's beautiful what you create. Now the knowledge is open and we can discuss a lot of things which have been shown, and explain it, in reality what it was doing. In the space, life and existence is understanding of the position, and nothing else. If you don't understand the field strength and the position you are, you grow beyond or you're doomed. But how do we do it? We don't have a tool to measure. What is the tool of measurement for us? The U has a common denominator life strength field and our soul locks into it. Our soul lives into it, and doesn't need different measurement tools to carry (with) so that this fits to my soul or not, but as it links up, it fills itself, if it matches to the strength it carries. Because the STM doesn't carry the full spectrum of everything of the same strength for one position. (1:04). It carries a spectrum and each environment allows to show itself in that dimension of the strength. We see this, created, when we look at the STM and then the brain, the field of the soul as it travels, in strength, it develops and manifests itself, emotion of happiness, sandess, the control of the physicality and of the extremity of the body. So in fact, the field strength is the same, but our environment dictates different things. Venus, Saturn, in one place, Earth, Jupiter and the others. We call Earth happiness, Venus joy, Jupiter arm and leg, there is no difference. The Sun according to the strength of the rays and interaction in that environment dictates what it manifests. So it is with the STM. When you build the new systems if you understand it in more depth becomes very simple. And that is, (1:06). you have a system which has the strength of the soul, very small and you can carry it, and then you create the environment where the soul is to manifest itself. You'll what shape you'll manifest yourself in this planet ?? . You do this. A lot of you have a problem with, what am I going to do with the soul, or what am I going to get the soul. Your soul at any time even as you listen now, is doing other things, because part of it is busy with the physicality strength and the other part of it is busy with the strength of the other souls, but you only see this box which is the physicality of the man. If you understand this you can create a box here where your soul is, and see who your soul is talking with, what they are ?? To you it's a stranger, but what do you think happens to you when you are asleep. Where does the STM go, or does it stay within the embodiment of the physicality, but now that the strength of the physicality due to the strength of whatever condition of sleep is in the physical dimension, expands the dimension of the soul to reach in the different dimensions. But in physicality we manifest ourselves this way. But our soul is constantly in all directions interacting ?? its own life. Now we have the T and understanding that we can create systems which fit to the strength of the STM (1:08). There is no magic as we have understood up to now, in the STM, it's just another state of the strength of the fields of the U. Just because it happens to be the source of the energy for confirmation of our physicality and this planet, it is unique. When we start being prejudice in the line of the creation of the Creator then we see the whole truth of the creation. The limitation is our own prejudices to confirm our own existence. Many people tell me I am atheist, I am not,

I am most probably closer to the Creator then anything else, and not be part of it. All of us have the same ?? gift, it's just how we perceive and how much of the truth we accept. The time when we are proud to be one thing, it stops us from growing to another, to be more ?? in our own existence. We have to move in the direction in the understanding of the interaction of the fields of the U, that may be part of it, is the STM. That may be part of it, become the physicality of the man. Man thought the Earth is the center of the U, then when he found out that actually he is a speck of dust in the U, (1:10). he understood how feeble he is. What you have to understand is that the STM is the speck of the dust of that speck of dust, and we think it is everything and the totality. Now if we put our prejudices away about our own existence then the knowledge of U opens up very rapidly. Then it is possibly to create any condition in the U within the STM, you don't need any reactors. You see the soul of your child, your partner, the child which you give life to, the soul of the dog, and you see the soul of the totality of the existence. But you still live within the dimension of the physicality. I am ashamed to be in the body of a man because it brings too much limitation to understand the totality of the creation. It brings limitations that restrict the intelligence of the Creator, to the feeble understanding of the man himself. Build these boxes. (1:12). AZ is very far ahead and heading this way. In understanding it and creating a dynamic soul through structure of containment, not within the core but within what I call, the rings, then you should be able to control and create anything. Some of you might have a problem thinking, how am I going to put the Gans's together, how am I going to create that I can create the rings with different fields. There are different options. There are many different ways you can take to create. When you create the Gans's, at the bottom of your pot, ?? water, drain the water and make it to a paste, then you make your pot with different pastes. Then the containment which you made for your disc Pl you place it inside. You can do a lot of things even in this position, you can charge, discharge or add energy, there are different strengths of the same Pl, exists. Then when you take this off (out of the Gans's) you have an empty box, but fields homogeneously controlled. (1:14). Two of them gives you the containment and then everything else is inside. When we draws this in a square shape, never forget that it is in fact a ring. So your rings sit like this. You create an envelop, confirm the condition of the energy, you create an energy field of the envelop and you download into it. Many times you'll make the problem with the interface, you'll find out that you break a few bones because the outside environment has adjusted to the inside, the strength of the field. This knowledge is so simple, you don't need any motors, because the interaction of the fields create that motion that you have been looking for, and the interaction of the 2 sides (top and bottom) gives you the dynamism of the life, you create your SS in the middle. You start the seed of the SS in a small system, then when you collapse it you can give it ?? If you go more advance you don't even need the containment of the Pl ?? the plasmas will hold onto themselves. It's how you can ?? move it and how you can contain it. Always work on the ratio difference. (1:16). Do you remember 24:1 and the rest, the fields carry the same but the strength the fields, because when you put 24 you have more fields higher strength then 1, and you always have to create a condition of misbalance, that the interaction between the 2 misbalanced is trying to bring balance gives it dynamism. If you put the top layer the same as the bottom layer nothing will happen. You have to make one 2 times more, then this will be 2 times the speed of light, if you make it 4 and 6 times more you go higher in the speed of light. Don't forget that when you go from 2 to 4, it's

not 2 times 2 is 4, it is 2 to the power of (10 x 10). It's the order of magnitude that ?? expansion. It's not 10 to the power of 2. It's very much different. This is why, what I keep on saying, in electric current you get 4 watts, in the order of magnitude you get 100, and now you play this one, 2 x 2 100 times. This is the power of Pl in that dimension. (1:18). Remember as I said, the king and the grain of rice .... You need this kind of understanding to be able to create the energy of the Pl of the U. And it can be done within the MaGrav System. I will teach a lot and bring a lot together in the next few weeks to bring and enforce peace, because we know that military people are in the background listening. I welcome the Chinese military in the space in the background and the Russians, the same with the Iranians, where you are all sitting listening and developing the T in different ways and you have done for years. One of the secrets I showed and explained 2 years ago was ?? system. None of you went to the next step. Two inner and outer rings. The inner layer of, middle layer of, the outer layer of, the 2 on the top and the bottom, the interaction of the fields, (1:20). create dynamism with, in here creates the condition of life, energy. Your MaGrav system if you look is the skin of the man. Why did you put 2, why did you put 1? It's repetition of the same understanding. You use your MaGrav system in a specific way, you lot were happy with 50%, I was happy in the Pl state (2 to the power of 6 x 10). But this you don't see because you can't interact with it, it's of the higher order, which has very little dimension of physicality electronic current in it. But it has a huge Pl power in it, where if you connect this to your ring, if you remember the layers. Now you understand how you connect and control your Pl. But by the order of magnitude. 49

.. we control the dial of the microwave. (1:36). But the strength, is it going to defrost, cook, or roast. The U field strength is the same, is it going to be 2 legged, 4 arms and no physicality but the dimension of the STM. Now we need to understand this if we are going into the next step of the space T. When you put a field inside an oven, depending on the environment ?? to the energy which you give and take from it, the material shows itself as a gold, silver, plutonium or H. The words of Bahaulah are complete, the maturity of the man comes when man understands the transmutation of the elements. And today man is mature. But we have gone a step further, where the understanding of the man completes about the creation, when he understands the transportation of the fields of the U. Because that leads to creation of the matter and if you can control that you can make gold out of water. Bahaula taught the understanding of physicality, we teach the knowledge of the universe and the Creator. It's very easy for you to create the box of creation and then you decide what you want in it. (1:38). You can take and add, you can subtract, and divide, you can do anything you like as long as you understand what you are subtracting and adding and what is the reason for it. The people who work on the medical systems, you have to understand this, if you take that long to create systems that patients like Dr. Rodrigo can walk into the space and a few seconds walk out of it, and nothing. No cancer, sugar (diabetes) or high BP, because whole body works on the strength of the field of the soul which wants to exist in a perfect life. It doesn't work by the transfer of the energy from the body, but it works in balance of the physicality with the measure of the soul strength itself, perfection. Any questions. Q: John, when we build our starship formations we have plasma in the central area of our reactors, (1:40). if we were to when

we capture that the energies of that field Pl and hold them or move them, then do we do that from our soul and wish and carry it to another environment. Yes. I am going to tell you something John because it's bring to you something very direct. It goes back to some teachings a very long time ago and then you might understand. I spoke a long time ago about using the headphones to find the position of your soul. You can hear the music but not through your ears but inside your soul. Now you made the SS and you have the position of that FP, move the brain of the man into that position, then you'll see what happens to the STM. Would you imprint the same as the orange and the water, your imprint of thought to the system, and move away and now you can control the reactor by your thoughts, the whole structure. Or would the structure transfer its wish into your soul that you can create the SS? What are your thoughts? (1:42). The STM, the soul of the system is where all of the energies of the whole system are related to, that becomes the center. That's where all are in balance with. When you put the position of the balance with your reactor of the SS, in a balanced position of the physicality which is the STM, you put 2 stars together that in that position if you get it precisely right, you become the captain. The physicality becomes the physicality of the ship and the physicality of the ship becomes the physicality of the man. Now you can think and the SS will ofllow because it is part of you. You called it arms and legs you move, now it becomes part of you. This T is very far for man. Very far. But as I said, we have to teach it that man will soon come to it and understand how to do it. Levitation through electromagnetic field is the state of ?? Levitation of the soul through the interaction of the Gans's or N material, is more advanced. But levitation through the fields of the U planetary ?? system with life in it is the knowledge of the Creator that you have been taught. (1:44). Now you can ask yourself, what does the soul of this planet think of what its physicality is doing to itself. Have I enligthened you, do you understand John? .. You helped me out a lot, I think I understand more now. You are very advanced on that side and the others are advanced in another part, somewhere in between I have to bring you together. I have started bringing the genius of the KF together in the recent past. Moving them in certain positions that gradually, what I call the elite of scientists of the knowledge of the U come together. In singularity they don't carry much in strength but collectively with what they know they'll bring the knowledge of the U within the reach of the man, then the rest will ofllow and come. In the past few months I have moved a number of scientists of the KF in a different position, even in their own position, by teaching them to be able to do. Because now we need these kind of scientists to be understood that people see the physicality and they can understand them. It's no use being able to create a machine that can float but it has no soul, but if the team that knows how to create the soul for that machine that can float, it will come to understand itself in the dimension of physicality. And the another team that understands how to interact can create the matters for it to be able to create (1:46). the body out of gold, silver or water, but it still lives and has life and makes decisions. Are we clearer John? We are waiting for you to show us how to fly. Everyday we try and we are getting closer ... Remember the MaGrav System and remember very simply that your MaGrav system has an orange water inside. It is you who are looking for the fields but in fact, their transmutation and transportation sits within the layers. The MaGrav systems are the most completed flight system we have ever taught in the U, but you don't see it. Any other question. (1:48). Klaus of Austria. Q: The last month I developed a very small system that we can come closer to this process of peace .. Gans's from a paste. Whenever

I go near the system I get a good feeling that this system locks into other systems .. I see ?? to bring more freedom when we use a mobile phone, PC or Tablet ... we have a new way to link our MaGrav systems for peace when we use some electronic devices. Thank you very much. I have to announce the Core Team of the KF will meet next Friday ... this meeting as always happens when the core team meets will bring new changes. (1:50). We'll see the changes that will be discussed in the meeting. Whenever the C Team has met in the past years has set the condition for the change. The meeting of next Friday is to change the course of humanity for peace. We did it before and have seen the result. The C team will receive new members to keep the position of what has been set. Possibly 3 new members will be brought in to keep the balance as it has been set. If you are called to become a member of the C team of the KF which is the universal core, please consider in what you have been asked to become. There is a lot of miscomprehension sits within the U Council of the KF. .. It needs a deeper understanding of its own work. Many people come in with emotional attachment to the physicality and dimension of process, (1:52). and many within the Council have taken a position to think they are there to decide. The members of the UC have to learn one thing, and I'll repeat it until it sinks in somewhere, there is no head for the UC you are all equal, and collectively you have to take humanity in the direction that it becomes peaceful. The Earth Council at the moment has an idle position, as we say to sit in the coffee room and have a coffee until the time comes that we can move. The course and time and place of the 19th of October, 2018, will bring that pivotal core change. The balance comes within the structure of the C team and the new member who will be asked to join. In the next few weeks we'll enter into a new challenge for the whole of the KF, and it is to catch up with what we have done because we sat back and waited for the others to do things while we were not there to do. In the coming weeks the KF will be pushed into a new horizon, into new dimensions internationally. And that is the ?? for the C Team is to make sure everything is in position for that transition in time to come. (1:54). The UC still needs many members who are there to serve with their soul and don't get bothered with the word of the others. We have reached the point of conversion, and with these teachings that we started in the past few days we have reached the point of the maturity. Now it is time to teach heavily and at the same time the application of the T. A lot of pressure goes on the Chinese KF and it will bring a lot of pressure outwards onto the rest of the KF sections of the world. It's not going to be easy, but the opposition to the work of the KF will strengthen in a positive direction and not in a negative direction. I wanted to share this for some time but for some reason or another we were not ready to do. With the teachings of the past couple of weeks we have entered into that phase. We need to understand to create conditions for peace through what we call collective operation of the STM, for this we ask for 10 CET on the 19th October, 2018. (1:56). The Core Team will sit and through them every soul on this planet will be reached and be with us that with it we can change. It doesn't matter where and how you join us with the soul of humanity and the light will bring the change as it is going to be. It will be important and the C Team has not met at this level in nearly 3 or 4 years. We meet and we change, and we'll bring the change. Someone told me this is the call of duty, but this is the call of duty for the STM. Any questions. Q: I am making this MaGrav (unclear what he is saying ..) ... (1:58). ... I don't understand at all. I put 1 MaGrav below my feet, and another MaGrav above my head, in each MaGrav, in the middle layer like a skin I put in a Gans of my soul. ... (2:00). does it need CH3 .. What

are you trying to tell or teach us. Many times you say control with the strength of your emotion and soul, and hemoglobin ... it's already in the middle or my soul in the middle? I am still trying to understand. Don't worry Mr. Keshe I am supporting your work. (2:02). Yes but what do you see, what do you achieve? For peace and harmony and everything. ... Now I understand, thank you very much. There is a very fundamental question to ask to man, with the history of man. How the wishes and thoughts of one man becomes the wishes and thoughts of the group, then a nation and then a planet. (2:04) Is it that the wish or the strength of the soul of person who starts it is strong enough or is it a specific strength that interacts with those who have the same strength, that they can enforce over the others. One of these in the recent history is the conduct of Hitler. How one man set out and poured so much changes. The thoughts of, the doing of, was confirmation of the existence, and with it a lot of covering of weaknesses for ones, what I call oneself and not for under the cover of the nation. We see the emergence of another person like this at this moment in time, of the present time. Their wish and the strength of the wish to create peace and be homogenizing the humanity on an equal balance, not by destruction (2:06). but by building and construction. Amongst us there is a leader who has set out and we see his work in the background, a lot of people don't understand, that he has set out to create peace, and most of it comes through the strength of his soul. It's not something that you do, Hitler gathered people to destroy. This man is gathering people to build but in a very specific way and target and with the collective harmony. We have not seen such a leadership for thousands of years on this planet. Somebody who unites to build and doesn't kill to divide. It's internal structure is set not only to bring balance in the nation but the structure is set to bring balance on this planet. As you said, do we need to make a machine, or is it the meeting of the C Team to support the STM. This will not happen if we do not take man through this transition. As I said in the introduction recording that we heard, the time is now and the ground and everything is ready for it. It needs scientific support (2:08). of sharing the knowledge and equality with the structure of ones soul to kick start, to bring the world peace. The man is president Zhi of China. The position in wanting peace and equality for the human race is part of the work of this man, this is what we see with the STM which is why the KF is putting so much effort into China. The test of time has shown and the sincerity of the man has shown the time is there. We see world leaders who shout and cry for equality just to kill. We see leadership which is trying to bring and correct and balance the wrongs of the past irrespective of culture, race, and religion. This is what is needed and where the time is. We will see the changes very rapidly because the cycle has started. The cycle of correctness and conduct in the correct way (2:10). in the structure of the nations, very soon will ofllow what we see in China. In correcting those who have done wrong by the structure set to correct itself. We've seen diplomacy living within the politic and with it sitting within the political structure. Those of you who understand geopolitics .. understand this clearly, the situation that is coming out of China and the structure we see in China will create that push for world peace very rapidly. It's not that everything is perfect in its structure, but through that process and adding the new knowledge into it will reach somewhere near perfection. It'll reach somewhere that the human race will go through the transition of peace. We'll reach in a position that the knowledge and the science (2:12). hand in hand with diplomacy and politic, geopolitics, and understanding of One Nation One Race will bring us to that point. I have released the knowledge into

China in a very different way. In the next few weeks you'll see. We have unleashed it because when we see a soul which is committed to equality and at the same time the transition time of equality to be achieved in a peaceful way needs that support. 50

(2:26).

(2:38).

(2:42).
.. The members of the Core Team, because that is where it all started, You see members that sit on the platform, you have Rick, Vince (2:44). Shandor, Manual, Armen, and as you see the others who are there with joy from China, you have Lisa, and one of the dearest member who has done a lot and is always in the background. The CT has announced that they'll be present. We have 2 Chinese, 3 Canadians, Armenian, Iranian, black American. They come from all races and backgrounds. The way you see the KF is today is very much in the effort put by the CT. We have Bret from USA. Three new members that will come in. Dr. Eliya Kostova has stepped down. We have 2 more members Marco and Wolf, (2:46). and one person from Portugal. There are 14 members of the CT sits at its 12 capacity. We will bring the change as we have brought the KF where it is today. A lot of work was done by the initial team and now we built it up. We will structure it in a way that every world leader will receive every person, on the Internet we'll see the KF Health application, just an ?? audio we don't show anything else. Case by case. The one who has a coma patient is not interested in diabetic so we have to concentrate. ... (2:48).
... 28 million farmers in poverty and we'll walk them out ..
... we have shown the highest level of protein that has ever been produced in wheat. New data will come in. .. Food security in China and they'll support KF with the rest. .. (2:50). (2:52). Dr. Klaus presents more on his work with the Pl Ball Unit and wants to show different combinations of the balls. ... Shows a table of the possible Gans's you can purchase. ... (2:54). ... shows where to find Gans balls on Keshe Foundation Store on web .. (2:56). ... Mr. Keshe asks, do you sell the Gans of soul as well? Yes, it's done, it's been uploaded, you can download it (laughs). (2:58). John says, what Mr. Keshe was talking about earlier with the starship formation (SF) ?? we put our self in the middle of the SF unit. You can see where that Unit (your ball unit) can come in very handy in creating our box. Yes, definitely. It's exactly like you said, it has several possibilities, you can even use it for matter production. It's flexible. You are giving your secret away there. I think now that you speak about it, you better explain it. ... You said it can be used in matter production. In the near future KF will deliver or offer systems that you can produce matter and materials. This is on the back of Peter's work a couple of years ago. Am I correct? Yes. It's an experimental kit you can set up and fill up the cores to see what materials you can produce. I saw it very recently. (3:00). It's a small unit and it gives amateurs a chance to start producing Ca from fresh air, or how adventuress you become to produce metals and other things from the interaction of the fields from the environment of the lab or home where you work. It's literally a new magic box as I call it, you can put ... change a ball and you can create a metal. It will be on sale soon. This gives correctness

of the T. You can't create materials out of fresh air if you don't create the conditions (for it). It's a small circular disc and then you have to play with it and see what you can produce, there'll be a manual with it. It's very expensive because maybe it produces gold and then we sell it. The tests from the lab in Germany shows Chromium was produced... The experimental unit I think is a couple of thousand Euros. We want 30% of the profits of what you make (jokes). So you'll see a new unit coming out from KF. (3:02). ...
Part of the food security for industrial countries has been the raw materials. This is what we are coming to very soon in the next few months and couple of years. Where industrial development has been taken to ransom by some nations to control the minerals and metals. This is the beginning of entering that market to show that every nation can become industrial and produce what they need from the same way the earth produced its gold from the interaction of the earth and sun and the atmosphere of this solar system. Now you see a commercial unit which can do it, then you can increase it to produce tons of Cu and Zn as you need. This will not change much for African nations who have been robbed for centuries by Europeans. They never received anything from it except slavery of the man. But this way it allows African nations and the others to produce materials that they can bring an industrial revolution to their own country, through their own process. As I said we are coming in very slowly but effectively. (3:04). And this little unit will be a game changer for the industrial revolution, a new revolution that no factory needs to haul tons of materials, and can produce as they need it from interaction of the fields which they create themselves. It won't cost tens of thousands of dollars a ton, but a few cents, but you produce what you need. This brings a new cycle of work, new conditions of work. Hopefully we'll see this next week. I have seen this machine a few times. As you put testimonials on how you change your health and how you grew this and that. Please put testimonials on what you made and get it certified to be tested. Now we have the machine for it. It's the brain child of Peter. Even we're trying to help his brain move out of its childishness. This is another ?? that will come. New commercial units for agriculture will come out of the KF where we'll change the whole thing for antibiotics and the rest of it. KF AZ will offer a new product to governments where we convert the rubbish into energy and whatever is in the landfills. We are talking to a group that will work with us, very little of it, this T is complete .... (3:06). It literally is that every ton produces 700 kilowatts. ... governments are spending 1 to 3 million dollars per day in holding rubbish in less then 6 months the system is payable ... plus the energy ?? With no environmental waste, the knowledge is complete. ...
(3:08). ... Q: How can we use our systems to bring peace and transmute elements used in nuclear facilities? We have a dilemma with the nuclear power. We saw this at the end of the Cold War and it has got to the point that nobody can solve it. We don't know what to do with it. (3:10). The condition of nuclear weapons worldwide is very strange. Most of our problems in nuclear comes with Americans and worst of our problems when it comes to nuclear with the Russians. As a nuclear physicist I never had much interest in weapons T, but as part of the industrial development in this T we have a lot of waste. As I advised the Japanese in Fukoshima to convert Tritium to gold and we saw them change it to the white gold which is very easy to be done. The conversion of nuclear materials to safe material isotopes is very easy especially with the new T. It's the cheapest option to clean up the mess. I have done this, you can contain nuclear materials and then convert them. If we reach the point when these stupid governments walk away from nuclear as a weapon,

even as energy, nuclear energy is not safe, it has huge problems with it. (3:12). It's brushed under the carpet. Then we can change the nuclear materials very easily. I developed a T for it as part of my work over years, this is how it looks in the Iranian space reactors we convert nuclear material ?? to different strength, as we need. I change through my T Alpha to Gamma and Gamma to Alpha, and I have changed Gamma to the light rays which become totally harmless. It's understanding the process of the creation of radioactive material. If we come to a point of discussion and peace security with the Americans. Chinese and Russians, it will not cost that much, not to dismantle, we don't need to dismantle anything. All we need to do is conversion of the warheads within the containment of the warhead into a safe product. We have shown that in Fukoshima. It means we don't need to dismantle, this is the biggest problem at the moment in the relationship between Russia and America is that they are paying for the Russians to dismantle their nuclear warheads in what has been agreed to reduce numbers. All it is, is you take it off, it costs a lot of processes to take it off. But now you have a radioactive material to hold and that is the biggest problem. We can use the new T to literally solidify everything in the nuclear warhead into a safe material which is non-radioactive. (3:14). ?? don't need to do, very little. I have developed a T, it's there if somewhere in the future somebody decides to use it. It's hidden in one part of the patent. To me even the nuclear power stations, all the nuclear materials can be made safe very easily. We have shown it and all these hundred of thousands of warheads ... would you like a nuclear material to fall on your head or a gold dust. We can make into gold dust the way we did in Fukoshima. ... It's just that, taking the fear of nuclear weapons out of the line of the thought of the world leaders for an excuse to use that to do it, which is going on with Iran. ... It's part of the T for converting rubbish, the same kind of T can be used to convert nuclear weapons or nuclear waste into safe waste with very little input. It cost a few thousand dollars, not billions what the Americans are paying the Russians to dismantle. ... burying it thousands of meters underground doesn't help because sooner or later (3:16). ??? but we can put the nuclear material through like a microwave machine and make it safe. ..

I have developed a system for sterilizing all the cutting instruments for hospitals in Africa. ...
(3:18).
.. Nuclear power stations are full of rare earth materials worth fortunes. They have space dust and we don't even know how to use these materials. (3:20). If you open a nuclear fuel rod in the power stations, oh my god it's not just radioactive material, it's some of the things the Chinese will give their arms for it, as part of their rare earth materials, and you can convert a whole lot of it into rare earth materials. What we call rare earth material is space dust, our planet doesn't absorb it because we don't have the MG field for absorption. In a nuclear reactor we produce it. Some of the Nano properties are unbelievable. I would love to get involved in decontamination of power stations. I have developed a T for it and it doesn't cost much but it makes al lot of beautiful things with it. We don't even know some of the materials that we get out of it. We haven't even seen them, we haven't made (a place) for it in our Periodic Tables. Some of them shine and some have various colors that we don't usually see. It's beautiful to do. Give me all the nuclear warheads and I'll give you back a beautiful toy. Any other question. (3:22). Q: Is

there a transcription site and about the 243rd workshop whether that has gotten transcribed. A transcription site is under public teachings in KFwiki.org ... In how many languages do we get the transcription now? We need a lot of transcribers and translators. The team of transcribers, there are 47 of them, yeah? (3:24). That's in the Zoom chat but not all of them are active in there. Our English group has dwindled, 6 or 7 that are doing the English subs. Then there is a French and German team and polish. ... We need a lot of transcribers because a lot of work that has been done in the past has not been transcribed. It's a very laborious job and a lot of translators give up after awhile. One of the longest transcribers is Dr. G? in New Zealand and he has done it for a long time. They are sold on Amazon as a package. Q: Is there an update on the KF space program? We are working, (3:26). I was with the Chinese system a couple of weeks ago. We have literally depleted the whole reactor system. We have no energy left. We shut it down last week. I was there when we shut it down. It's getting reloaded. What happened is what I explained some time ago, we have a surge on the 22nd of July, in which we blew out the, what happened to Rick, they blew up the sub-station in the area. We informed the government that it would happen, I already told you. So they couldn't do much damages to us, but there was some damages done. What has happened is the reactors in the space center. I have videos but we prefer not to show it because there are a lot of details with it. We have a twin system, one system more or less, all the reactors are ?? wired up ?? any fuel. Literally, very small. The second reactor, which gives like an electron and proton, we see massive amounts of Gans's in this area (towards the other reactor), the other Gans's in the background are all depleted. Being depleted it, for example if you use a material which is orange and you (now) see it as a total white, there is nothing in it. This is why I decided to step up the teaching to plasma Gans which is the fields. (3:28). You run the reactors, the Pl production is very heavy. So let's say you have a Gans with this color in your tubes, what you have left is just a white water. I have picture of it I can show you. We opened one, it is totally white clear. Rick I sent you a picture of it. This shows the effectiveness of the conversion of the matter into energy, It's very interesting to see. You see in the picture how energy has changed into some material, and how there is nothing left in it. The reactors were loaded. ... It's totally depleted. I washed the bottom of the cores. There are hundreds of these in this setup. Shows the picture. (3:30). This is near enough the color of the original loading and this is what happens after depletion. Energy transfer, huge amount of it. All the cores in one system are totally white clear also. We videoed it. What has happened in that surge is the back energy has given energy, different system loaded, and the front system has loaded up into space and created that huge surge of energy. We see the conversion of material to energy. Matter to energy in the Pl condition. Some of this what you see that is black is Deuterium. Whereas here (in this one) we are totally on Tritium and D3 plasma. We don't call it Tritium but D3 and this is D2, and partially H. This conversion has been so much, the energy release that created ??? spherical ?? under conversion. Into energy. This system was dismantled, I was there we switched it off last Tuesday morning. It's getting reconstructed, a lot of things need to get changed to free .. free engines ??(no motors), rotational dimension with the Pl. (3:32). And no liquid in the systems. I think it will be ready in the 3 or 4 weeks until we can get it reassembled. We ran (it) for 1 or 2 months to see what is the outcome. We did a live test on it last week for 2 days when it was obvious that there was nothing left in it, we couldn't create anymore for the plasmas. We videoed everything, I have them but I

prefer not to show. You can listen to part of the videos. It's totally white, clear, there is nothing left in these cores. All together there are a huge number of reactors involved. ... (plays the audio ..). ... there are Gans's left in system 2 but #1 is totally empty. We have consumed all the plasma. All the Gans, the energy of it is gone. It created as we know the surge in the electric power. It will be a month or 2 before the system gets operating (again). But the storm late that night created a havoc in the system. It was repaired but there is no energy left, we tried to see if we could revive it but we couldn't. (3:34). So we are going to setup 2 of the reactor load. And so ?? we are still trying to move the soul, and 2 other KF teams who are working on it are very successful and they are still going on. Anything else. There was a detailed question on Glysonate. .. (3:36). Caroline asks we are facing on the One Nation platform, a dilemma in one of the Commandments, if you could give us a head start. What is the dilemma? The Commandment is, Thy shall not rape ... we'll talk about it there, not here. Would you be so kind as to join us on our platform? Maybe. ... As a member of UC I would like to bring attention to a lot of mayhem going on because of hurricanes ... That we give from our soul to help those going through all those changes. (3:38). If we could create a moment of silence for all those going through , that would be kind. SILENCE...
... thank you for the wonderful teachings of the discs. (3:40). Have you managed to do the tests on the discs? I did pickup a good sheet of Cu ... Can I give you an insight. If you use discs, what we call Gans containers .. run them opposite to each other, you will se very strange results here (between them), much more effective then cores. If you are very observant you'll see a float of lights, the lines of interaction. Putting the fields on top of each other is different then putting them across from each other. You should see a twist of lights if you can choose it. It depends on what Pl current you apply to this that it create what speed of rotation. This is part of what will be as part of material production of the KF systems. You can create a lot of conditions but you need that plasma unit, which comes from the energy of the plasma itself when it is done properly. (3:42). Instead of running the discs in front like Tesla did, or whatever guys have done, to run Nano material, you can run Pl rotation, even in that way you see the fields in between. The levitation or lift through Gans plasma technology it will be very different and much more powerful. Don't forget to join us on the 19th, it's a private meeting but we need your support. (3:44).
END

246th Knowledge Seekers Workshop - October 18, 2018

(,)

(:15). .... The teaching of the last couple of weeks in going into what I call the ring, or the flat cores has caused a lot of problems for a number of active people because they don't see how they can make it. They could handle a motor before, (:18). where they could find a way to just stick a ball on it. Now the problem is how are you going to turn around the sphere. I taught a little bit last week and we'll carry on with the same line of teaching, that you were happy with your motor and now you have to become happy without the motor. As was said, one of the biggest inventions of mankind had been the

wheel. Now we fasten the wheel and your lost. This (sphere) you could associate with turning the cart, the planet, but with the flat core you can't associate with turning, but if you turn it this way (top view), you still have the same (circle) you're still home with what you feel comfortable with. This time the rotation is here. In a way if you look at it from the top side there is no spherical shape. In the future when we develop this T further, in the near future I'll teach you, what you have seen in the past what we call the "cigarette" shape in the space (UOF). It has nothing to do with the flat core, it's another mode of traveling, it's very much clearing a different direction and dimension of travel. But even when you look at these cigarette shapes they ofllow more or less the same. (:20). there are a number of ways of creating the cigarette shape, what we call a long tube you become like a ray but you create a parallel. In some advanced space T programs you'll see the cigarette breaks in 2 halves. What in fact it is, is 2 systems working in parallel, in tandem. It's usually done in towing system, in what you call carrying forward. The 2 spaceships are locked in that way and you cover yourself. This is done in many cases for creation of fields ?? When you have a field disturbance you cover yourself, you absorb as much energy as you like. This is your shielding, and both SS feed from each other. And you absorb what you need. You choose some systems that use this method for space travel because it suits them, it's the way they came to the knowledge and they developed it, and they stayed that way. It's very much like an electron and a proton, they understood the need for a secondary system and they've locked it. It's very common, you see these systems. There are very few races in the space that have developed this and when they come to earth we see them as cigarette shapes. They have a specific way. And sometimes they split up and you end up with 2 circles. If you go into the archives of videos you might find some of these. But at the end of the day, the new systems that we started talking about 2 weeks ago what we call the ring systems. (:22). These you can't rotate as such anymore. Because in the spherical shapes you managed to create different spheres (inside). In this one (flat) your spheres are internal but once you rotate the system everything else will rotate. You can use a pipe rotation, again go back to mechanical. The most advisable way to do it, and there are a number of KF teams doing this now, is as I said last time, you have to be able to feed the Pl through the Pl by the energy. The speed of rotation or the speed of MG fields, or physicality comes directly by interface change of the field flow of the Pl ?? to reach this. The discs can be stacked up upon each other or as I showed last time in different sequences. These are all that needs to be done. Not many of you will go into this territory because you lack 2 or 3 parts of the knowledge. First how to create the plasma current at a very high level, secondly how to create a disc that you can control the layers of the Pl, and thirdly is the field Pl when there is no liquid in this, but you have to create conditions that lead to what you need, trusting and knowing that you have the Pl you need inside the system. I saw one of the K Seekers going back to coils again, and that means we are not happy with the new teaching, before you were very rapidly coming up with new systems. (:24). In a very short time I will teach you how to create these very high level Pl, 1 watt in electric current flow could be millions of watts in plasma flow. You only see 1 watt of it because the rest don't fit into the bandwidth, but they are there. You can use different bandwidths at the same time. Plasma flow is exactly like the Pl itself if you remember it all sits on one (draws the spiral), it depends on where in the flow you lock into, that you can jump into and move across. It's not the strength according to position, but it's strength according ot what it has to do and how we see it,

and perceive it. You still have 1 megawatt if you go from this point to this one, or from this one to this one, but you have to understand how you create it and in what direction. Go back to the teachings of a couple of years ago, in the Pl flow you always have to remember that it doesn't just flow in one direction, your G and M balance usually counts. Are you going towards the G your Pl flow, is it stronger in G or in M. I'll keep on covering this until somebody shows the first disc reactor. That's the time one of you sooner or later (:26). will come up with a physical development of this and then we'll start moving. The new understanding will come in and we can show it and you can see it moving. If you have a problem with this go back to your systems where you produced Gans's and you used Gans's and put 2 buckets of Gans's next to each other and see how the fields flow in respect to each other, different layers. And how the speed of rotation changes as you move one box nearer or further from the other one. These are steps we have to add to the knowledge and I keep on touching on it very softly until we see movement from the spherical systems to the ring systems and then we'll see how we can move on. With both systems with the new present knowledge we have passed any (use of) motor, which was eliminated some weeks ago from the operation in the Chinese space program. Now another KF team has moved into this part, you'll see what they have understood very soon, because now it's so simple. You'll see the first non-motorized, very much the way it works in the U, actually commercialized, then they'll be delivered. It will be very hard for Chenlin who worked so hard to get these motors and everything else done, and now we have moved a step up. two KF research centers have moved into (:28). non-motorized Pl flow. A third one (KF) is working on it, but the confidence has not been gained.

... The KF research centers are working on this and it is very simple. It will come to you and it's the next step up. (:32). It's not theoretical anymore. As I said, when I go to the research centers I teach and bring the new technologies online and this is what you'll see very soon. It's very much what you saw when you started with the coils, if you remember, maybe a year ago and then we went to the dynamic cores, and now we are into what I call plasma ?? flow. It's very simple, you can even choose a spherical shape or the flat shape. If you go to the spherical shape you can keep the integrity of the cell, but you can target the center of the cancer. You don't touch anything, you just disable the cancer. You can watch it and see as the field flow depletes the cancer cell. Because now you control the field flow, as I said, before of between the two. You sandwich the body, in between, and you want to take the Ca out of the breast tumor, you target the cancer on line and by controlling the power flow you just deplete the Ca within seconds no cancer center, what we call flourish under. We can increase this into further cancer developments in the body itself that the process becomes what I call a natural way. You walk into a space and walk out (cancer free). At the moment they give you huge amounts of radiation. Now you go for a Pl flow, (:34). you watch there is no harm done. The rest of the cells stay in tack, because it is targeted only for Ca, wherever it sits. You can take the tumor, understand the composition, Gans of the Tumor, and play the same game. You can do the same in reverse, let's say you want to build a tissue in the heart, you have a heart ?? , you go through the same process, but you remember you have the polarity, one has to be bigger then the other one, how are you going to work. Now we reverse the system, you bring it

in and you make it very much like, do you remember positive and negative, north and south pole, you put 2 north poles together and in that process where they meet, the strength of the tissue, and you can just build that tissue up at that point. It's extremely easy and changes the game in a lot of things, even in the production of the systems. In the very near future if you understand things, you can create constructions of anything you like with what you need at the point you need. You can just build on to it. It's very much like what we call the 3D printers. This is the next step up, with the beauty that now with the KF we'll put into the market. I have seen the prototype a few days ago. As you are producing gold and silver or whatever. Now as you produce you can allow it to create construction if you don't need to hold stuff. I told a few weeks ago, we bring and change industrialization totally, it'll have a different meaning. These (discs) are part of the beginning of the new development. You don't need any current flow from the wall, you can use the Pl units which create plasma current, you can control it. (:36). You can't control, as we saw in the Insano, after a certain current the whole thing doesn't work, rotation doesn't come into it. In the tests we have done in the Chinese space development, we can run an AC and a plasma current concurrently on the same line. They don't interfere. They live 2 different lives but the same pattern, you can have an AC motor and your Pl reactors on the same line and they just carry on doing what they are set to do. This is the beauty of it, because even the electric current is part of the plasma spectrum strength field. These are the new changes we have to, not we have to, we'll see in the coming weeks, it's on the horizon. We have no choice but to push this out. This gives me another dimension and that is, what do we need to do, if you do the same thing, and you put something in between (the reactors). What would you like to add or take out. Nuclear warheads still sitting in the ship. We know the range of plutonium and uranium. The beauty of it is, while you are watching it, you are dismantling it. This is the power of the new T and you'll see in it in the next week of two. (:38). Because nowhere in the warhead is plutonium except where it sits and we know the ignition system. The hollow ?? blood. Any aircraft carrying warheads, doesn't matter which nation, now we can directly ... the bullet is there but there is nothing in it to fire, you take the elements out. This is fantastic because if you travel as much as I do, all we need to do in the airports and set the parameters of the strength, you don't need to ?? a street ?? Anything that has a weapon or let's say certain chemicals you target with the field strength and it just takes it out while you are passing through. It's the security. We need this in the deep space, because we need to take certain fields out of the way, or we need to carry certain fields into another position, ?/ energy. We can't just absorb energy, anything in the space just because it's a field. We can only absorb from the fields what we need at the strength we need. These are part of the space development, which is translated and back into what we call security. We can change a lot of things. We can bring a lot of advantages with what I call national food resources. You can target people to feed, they just need to pass at the field strength that you create any protein to, you just create a tunnel, as they go from zone to zone they pickup protein, Ca, Na, (:40). whatever they need that they walk out and everything they need has been met. When they are hungry again they make a circle, in a weeks time, 2 days, or in a few hours. This is not something which might happen, KF researchers are on it. It will come out as a product. KF will market, I was hoping to see it today, I don't know if it's done or not, you'll see the first unit where you can produce materials. Where you can produce Ca, Na, silver, whatever you need. We told you can

do, there are a number of researchers deeply involved together ... not only can you produce the material you can make a construction of it. You can decide where you want to put it. As I said, a 3 dimensional printer but no ink and no material in the background. It's creation of the material according to the interaction of the fields. Exactly what happens on earth when the sun and earth and moon fields interact, they leave certain kind of fields that leads to creation of materials. We always look at what field strength absorption or interaction of the fields of the earth an the sun creates. But the same kind on of materials on the weaker or stronger ?? between the moon and earth too. The moon is provider of a lot of energies for materials that are not in the spectrum range of the sun. We produce a spectrum of fields from all directions that come to the planet. It's not always one direction as we always thought. (:42). It's the totality which we have to cover and some fields are too strong and ?? to get to the earth, so the compensation is the moon is used as a filter, or the M field of the earth and moon create the ??? .. what comes from the sky during the night, it's very much different then what falls on the earth during the daytime, light time. I taught this a long tome ago but maybe it's time to refer to it. As we go across the path of the solar system we produce different kinds of materials, as interaction with the other solar systems, stars, what you call planets and moons allows to be created. We receive a spectrum of fields continuously, it's not the sun, if we were always under the direction of the sun continuously we will not receive what we need as a total spectrum of fields. The night time brings its own energy, its own delivery of materials which we need. Partially if you look in very deep space and understand this work you can translate it very easily. Why do they say you absorb more CO2 so don't sleep under a tree, because a tree is ?? CO2. Look at what condition and what material are released by the interaction of the fields of the sun and earth. On the other hand other stars in the galaxy, other moons and planets in the solar systems. We need all the full spectrum of the field forces to be able to be, to survive. (:44). The whole structure ... now we have to open our eyes to everything else, this needs dynamic systems without any rotations using motors. We have come to pass the step when man ?? grows. We grew, we acknowledged, we developed new .. we came to create engines to create rotation. For the first time we have moved in the direction where we create rotation without any motors using plasma currents, which again comes from non-dynamic systems. this is the evolution, the next step in the knowledge of man to step up where we don't rely on rotation at all. Most probably when you develop your system what you'll see ... I brought the static, you don't see any rotation in your fields, in your Gans's, but the energy induction allows the field transfer to occur on the plasmatic level, and what you have is not an electric current but a Pl current. You decide if you want to build or take out. The new plasma reactors what we call the generators of the systems which you'll see very soon are in development. (:46). We were told that we can't use the generators, plasma in China. Now we are developing and completing the new generators, outside in the West. Because the new generation of Pl reactors don't use any motors, any fuel. It uses the interaction of the fields. It's very much what you want to collect on the other side when I have ?? Brain tumors, building structures, these are all part of the development of the T. If you look, this is in part of the patents, now you can see it can be done. Some of you would like to elevate your soul, how can you do it? Some of you part of your intelligence or part of the brain which needs to be processed from what I call ?? In the next months and years as people like Dr. Rodrigo and the others move and understand the work of the

Pl, you'll see how fast we go through evolution, in a matter of hours, literally a matter of seconds in the life of man, compared to when we started teaching you we have jumped, leaped frog the whole world of science. A new understanding a new way. What we are looking at in understanding these things and creating conditions (:48). how we can make cells in the body. The game to secure man in the space has changed, in what we know as the physics has changed. How do we do it? Only a handful or very few of you understand this process now, but in the next few months and weeks as suddenly one of you shows one thing or another, you all will leap frog. The Pl system reactors are ?? and it can be shown. But what are you looking for ?? ?? working in the Pl condition. Now we have systems that can use systems that we have already developed. Now you start seeing the beauty of the T and what is to come. It's in the patents, that you can use this T to cut, as a laser to cut, to bore holes very easy if you understand the Pl. Let me explain, I have to open it so you understand. If you have a Pl flow in a system and you have a piece of metal, (:50). ... you change the Pl flow, 1000 to 1, what's the field flow and how do you decide to flow it. If it flows at the strength of the melting point of the metal, you bore your hole. But with this process there are no residues because you transfer the field strength of the Al and the Cu, so you receive the energy of it in this part. These are all in the patents ..... to create these kind of things with a spherical reactor was nearly an impossibility. Spherical reactors are good for the creation of MG fields ?? in systems. The ?? ring ?? are needed for the ..(unclear ...) now we look at applications of it. It will inspire someone somewhere and they'll start working on it and we'll see what it brings. (:52). You can see how easily you can create the field strength of the STM. Do we need to imprison, to except guilt, or do we just need to elevate. The time of killing of murders is over. ?? The beauty of it is I teach you something, man with the knowledge has to fully mature, can not deplete another soul. You don't know how. But because of the field strength delivered to it, you can always receive it. I'll explain the reason. I always said that with this T no one will be harmed. Unless they ??? My wish is whatever, it comes through because I wished it, I released fields for it to be done. It can't be taken from you unless I want it to be done. ... Use the system in a very different way. (:54). You beam them up into space, use it in a different way you heal the man with it. If you have a cancer which is psychosomatic you elevate the fields of the strength of that emotion at the point of the cancer. Then there is no cancer because you elevated through the soul. In the coming physical time, as I said, in time we won't have mouths to feed ourselves, we'll feed the STM as man creates the physicality ??? I'll feed it through the soul ??? .. every man can do it. I am hoping that the team that is working with this to deliver the Pl probably a new generation for other applications ??? you'll see these systems very soon on the table. Any questions. Q: In the teleportation unit, if I put a stuffed teddy bear in that field and I want to send it from one office to another. (:56). How do I reach that destination, what determines that destination? You have to target the destination. Q: with thoughts? You could do but you have to understand 2 points, how are you going to target grandmas house in Australia when you are in US? There is a process of matching systems and one for targeting systems. 54

(1:06).

(1:16).

Q: How can a SS traveling in space be protected from the rays of the sun or other stars so that it doesn't overheat and burn up? Oh, that's easy, next question. Maybe john can tell us. (1:26). John says, I don't know the answer. Back to school. Rick says, if you don't know the answer John how are you going to make a SS and go to space? Oh, he will don't worry. Rick says, I think he will, he knows the answer but he's not telling us yet. You see, M shielding as part of the defense T is very mature. Depending on what field you cross you strengthen your shielding. It's the same process, you just increase the Pl current flow. It's not that you have a generator. In the space T once you mature enough and understand the process, you understand that you have a field flow, and by the sligthest change in flow you create a huge amount of current. You can increase that current into your shielding. You go one level higher. Go back to last week's teaching, physicality is created through the interaction of the fields and through the interaction of the fields it creates energy, it's a plasmatic energy. There is no conversion to the matter state because there is no 3rd state to convert it. The fields of the sun in interaction with fields of the earth create fields of O, but it stays as a field until it interacts with the G field of the earth in the dimension of the Inertia of it, then it converts it into the matter state. The U is full of entities, unless you match to the Inertia of the matter state. (1:28). This is how matters appear on this planet and this is why we only absorb certain materials and not the others in the U, because the Inertia of the planet dictates absorption of certain fields and that converts what is in the space into the matter state. We have taught this before in many teachings. When you come to a very hot sun you create very strong fields at a further distance out, and if it is too hot you create a 2nd or a 3rd layer, or as many layers as you like but you make sure through understanding of the flow of the Pl in a reaction of ratio of delivery, this one goes this way and that one goes that way. Any field that comes ?? stilled by friction can be reduced. Part of the layering of the reactors was this, now that you understand that you don't need motors, you just need to know which layer you need to increase the Pl field flow. I said, to our friend who was selling a lot of motor for plasma it has come to an end. If a lot of you understand the process. I am sure you can receive the new systems from the research centers, you can purchase as a kit very soon. The time of man's dream of rotation, of motion through mechanical motors is over. Long over. We have finished with industrialized motorization. (1:30). I think when we show the first ... I was hoping to show today but I don't get any answer if they are going to show it. 12

(1:32). Armen Q: When you say to increase and decrease the Pl current, how do you do it? You need a Pl power source. Q: I understand that but how can you increase and decrease, does it have to be mechanical or a different way? (1:34). No do you see any ... Marco favorite word, gradient. There he answered you. ... a bigger ratio will give you a larger Pl flow. Go back to the ratio, remember we said, 20:1 now you go 1,000:1 45

(1:40).

... A lot of you, part of being physical, (1:42). You know that earth has a soul, so does every star have one. How many of you can close your eyes, not trying to say, I close my eyes I don't see. How many of you can see the soul of these planetary soul. Even look at

them with the open eye and try to see the soul. Stand in front of your wife and child and see if you can detect and feel their soul. Man has to go that way. This guy is not from earth, he has no feature but exists there. Man has no eye, you don't have a radar system. We lost our trust in our own creator which is our own soul. We are not playing magic anymore, it's not something for fun. Gradually we have to. We have to elevate our own soul. If you look at it this way, he draws a Pl spiral, our soul as a human being, we are operating at this strength, we have to step up. Because at this strength our soul is in communication with the rest of the souls. Where do we want to go, with the soul of humanity at this strength, or the soul of bla, bla and the rest. Man will have a hard time in the space if he just tries to look and see what he can see. (1:44). Because some of the souls have no physicality at the strength of the man. It is not very easy, but it is the beginning of. Would we come up with soul vision, like we have night vision glasses. These are the steps which we go through. A lot of these things which I taught today and the past few weeks and some times. Then you come and say, oh you said that in that teaching one hundred and something. Just remember what I taught in 246 in 2 years time. It's not .. We set the path, as I said, I don't know if I spoke about it in the past times. I wrote to one of the K Seekers, A Messenger, when he tells you there will be such and such a person, in such and such a time, in a thousand years to come. It's not that he has pre-seen. He has set his own soul to be guardian that his work will come, will happen. And it comes through what he said, the way he said it. Because the souls when they commit themselves they achieve it and do it. (1:46). In so many ways, when I wish, it's not a wish, when my soul decides, it will become my wish. Then we understand more about the world of creation. 23

(1:52). Q: You once said, we can succeed or fail according to our beliefs, what are plasma beliefs, how do our perceptions and beliefs work into the plasma point of view? My explanation is very simple, in what you think is right for us to have and to be in and to exist with it. If I am a Moslem and I believe that killing and shooting is my way because Mohammad said, so it becomes my belief but it is not what Mohammad said. Or do I become a Christian in my belief and I do everything wrong and I go on Sunday and I put a pound in and that's it my guilt is washed and I start doing it again. What made us believe or is it the way w accept to be. Our belief comes from what we think is our right to have. (1:54).

(1:56). Rick shows video of sky formations. Mr. Keshe says these are natural air flows .. (2:00).
(2:06).
.. The lady says she wanted to sow that here in Denmark there are a lot (2:08). of trails in the sky, when clear weather no trails and then suddenly lot of trails. The atmospheric condition decides the manifestation of the trails and not the plane, the pressure and the temperature and a lot of other things. It's not that they changed fuel, it just the change in the atmospheric condition. Anybody can tell you this, you don't need to be Einstein to understand this. Somebody Google how many jetliners Boeing put on the line last year.
... the ticket prices we pay covers the costs of parking all these (empty) planes parked at the airports. (2:10).
... (2:12). ... double standards ..

(2:14). .. chem. trails. ...
(2:16). Q: Is there a way to use this T before we start the space travel to clear up some of the pollutions that are in the air? I have the pleasure to say yes, because the Chinese KF has made a system, which is actually sitting in Italy, for the team in Italy to make their move. You connect this unit to your car and according to the governmental test centers, they have reached zero emissions. ... there is a need for it in the car industry they know what to do with it. ... these are 90% ??? The spending of the (airplane) fuel creates these cloud, there is some waste in it, we took it out of the ground and now it's in the tank, where do you want it to go. With the new Pl T we can change the composition of it (2:18). as we need we change the energy of it, we don't need to go through a matter state conversion. ...
Q: So we'll have a transition period where we clean up the water and air until we are ready for travel? It's time to do it. ... we saw literally whole trees burnt from the drought in Europe. Old and young trees. (2:20). thousands of trees in Northern Europe. We need that moisture in the chem. trails. ... .
Can we put Gans balls around the trees to change their environment.
(2:22).
... the Kiri trees have started growing spring buds in autumn. We have managed to change conditions. (2:24). ..
.. I am going to be very direct. The AA which has made the oil and we take it out and use it as a fuel came from the upper atmosphere. Now how it is composites together, consider different conditions and how it suits us. We have to look at the cycle of life on this planet and become realistic and not just what and when it suits us. (2:26). We have the sun the source or our energy, life, existence, and we have the earth, what does it do. We create from the interaction of them, fields, then we convert the fields into a condition of matter state for life as we like it. We now have matured enough to convert the matter into Nano and Gans and back into the ?? smaller sun. How many of you have ever considered that when you made your Gans's, is this what you see, all that you made, or have we created some Gans that are the MG fields of the sun and have already ?? Do you remember the story of the orange and the water it's no difference. How many of these Gans (which you made) have already come part of your body. How much of it has gone into the trees and plants. We did an observation in a test in a cornfield, the farmers left a Gans (2:28). container here, and I was there a few weeks ago, and these are all lines of corn, to get the Gans for the other fields they have to go through this field, ??? every thing put together. I picked up some corn from different place and the corn near the tank is fully matured but the corn away from the tank still has a long way to go to mature. Those of you who have Gans containers in your house, you are continuously ?? .... look at your habits before you started the Gans T and look at them today. We ask them to tell us what the emotion of the workers who go and spray these Gans's are. There are happy to be putting Gans on.
(2:30).

(2:36). Carrie and problem of ant infestation in trees and house .. (2:38). Pictures. ..
(2:40).
(2:42).
(2:44). The Gans is actually growing the ants. ..
(2:46).

(2:48).
(2:50).
(2:58). ... Dr. Gaotoa says they just apply wood ash to where the ants are and they move away. Apply dry, it burns, it's alkaline, you can make caustic soda out of wood ash. So they just leave. Mr. Keshe says, yeah but wood ash is a Nano particle too. In Kenya farmer use it and it's beneficial to the soils, and it sends the ants away. (3:00). Caroline says, in Ghana we made a corridor to prevent animals, creepy crawlers, we just poured CuO water around the house and they just don't cross the barrier. ... There is enough information of what animals like and dislike. If you can make a Ca Gans to remove a cancer, you can compose a specific Gans for ants that they don't like it. 59

(3:02). Q: I used to do the 4 Gans's for the ?? pavo virus, does a virus carry a soul? Yes. So then we have to find what they don't like, because I used the CuO Gans to literally kill them because they were killing the dogs. No, you don't (kill), you create a new energy condition. A virus is an energy added which has an AA strength, or linked to an AA strength. The viruses are packs of energy which they mutate within the presence of AA or they live within the presence of AA. They have a cycle of life but on the other, you don't kill, you deprive them of the energy which are effective to us. Without viruses we can't live, we all carry different kind of viruses, but at a certain strength they become dangerous. If you use (how come if you take this it doesn't kill the other things but it kills only this) I said it's the dis-balance. Because when you give a field everybody takes from it what they need and equal, and if the virus has more it has to give to the others to bring up what is depleted. the way this T works in the virus basis, (3:04). or in. We have to understand the science behind these things as a Pl T, then we change it in a totally different way. 22

247th Knowledge Seekers Workshop - October 25, 2018

(Meeting of the Core Team about November 1st peace, Wife of the presidents, Teachings start :47min, We need to know what a plasma is and be able to explain it to men of science, A plasma is like the skin of a sheep turned inside out and the hairs are like all the fields being freed, Why is light sometimes a particle and sometimes a ray, The difference between Rays and Fields we need rays to make a field and the rays within the field can become rays themselves, A ray has only M and singularity of direction, A field has both M and G, both a ray and field can become a plasma, At a given point of the MG field

there are barriers that require different strengths to go through which are similar to the sound barrier in matter state, This also applies to the soul of the man, At this point in time we are pushing for man to reach the first plasma point of interaction which will elevate the soul and then there will be no need for physicality, The totality of the knowledge under the banner of the KF is the knowledge of the Creator and not of man, You have gotten stuck with your reactors you have fields going out and also fields coming in the balance of the 2 is the direction of the plasma, A plasma is dynamic in every direction, The process of interaction of the fields and compression of the plasma is the secret to man's access to the universe, The interaction of the plasma of the 3 layers of the skin create other fields and matter states this is a model for the spaceship, You have managed to understand how fields change to energy and energy changes to fields and in that interaction they create the matter state or the plasma state depending where we are, You have inner and outer skin which leads to creation of the bone and muscle this is how the floors and walls of the spaceship will be made, Because if you understand the rotation of the plasma in the perpetual condition then you don't need a turbine or a magnetic field or copper windings to create or release energy it becomes the same as the rotation of the plasma of the sun and the earth which leads to creation of everything, Our body is totally plasmatic but it manifests itself in the illusion of matter, the fields of the environment and the fields of the plasma in interaction slows enough that to you and me it becomes a matter state and if we increase it and feed it from inside it becomes a plasma state, The body is always spontaneously pulsating between the plasma and matter state, When asked if this is what is called the subtle body he doesn't directly answer (as these are someone else's concepts), Instead he says, RNA is created by the STM in interaction with the soul of the physicality of the man. Whereas the DNA is created by the interaction of the physicality of the man in the dimension of the plasma, One day I'll teach how to make RNA, Explains why light behaves as a particle and a ray, Explains why gets warmer closer to the planet and why we have seasons from interaction with the Inertia mass of the planet, The RNA of the man is the collection of all the interaction of the fields of the past times of the same fields, If you actually make Gans's of different ratios and put them on the disk you'll find out they hold their position, and they create their own gradient and their own motion, Explains that when 2 magnets fly together that this is space flight and that even iron magnets have their own M and G fields interacting on each other this changed NASA space program, Armen shows current flow on new disks that are fields, We are trying to push you away from current flow and work only in the plasma, We don't work around resonance in the plasma, Shows silicone balls soaked in Gans, Man is institutionalized with the work and rotation of this planet, How to ease the fear people have of going into space a way to temporarily experience it, You do it in your sleep, Mr. Keshe tells about his own experiences with detachment from the body and how as a child he started separating himself from his body and seeing it from outside, That's why we dream it is a connection between the world of physicality and real no dimension and the creation of the work of the soul, Detachment from physicality is the key, Does the soul have gradations or levels of understanding? -- It's us who decides what to open the physicality to, the soul has all of it, when you reach the point of maturity of physicality you find that the soul you carry doesn't fit because the soul hasn't upgraded itself, , , The prophets became profiteers for what they could have, You have to realize the STM has to be aware of physicality and the physicality has to be aware of the soul, He talks

about how he refused his mission at 18 and 28 because he wasn't mature enough to handle it, It goes better when the prophet has matured with age, Christ was too young,)

(:17). ... (:20).
... Last week the Core Team met ... and we asked many of you to support us, (:22). was to see how we could use what we call, the calling of the CT to support the wishes of the KF. The wishes of the KF is more or less sacrosanct. We sit there without expectations and we are there to serve. Most of us have been there from the beginning. We do not count on the physicality, we count on the soul of the presence. ... what we have discussed and considered is the creation of peace and (due) to the situation we see a number of points have been raised. .. we tried to concentrate on what is needed to be done. The CT is well known to be established this way and they get what they wish. They have always achieved in their endeavor to attain perfection and reach most of what they wish to do, ?? a second time. ... one wish we all have is peace. We see establishing peace major in the coming week from the 1st of November, when relentless efforts are put by one nation, actually 2 nations, 1 is US and the other is the State of Israel, the 52nd state of US, to create mayhem in the Middle East by sanctions on Iran. Whatever reason they see it as their right, (:24). but the reason that the KF and the CT sees is to elevate the soul of the world leaders who are involved in this endeavor. To elevate their souls and what we came to understand is that the world leaders have reached where they are on the shoulders of those who support them from even ?? , in a way, no one knows them. But there is a backbone into the success of these people, and it's called the wives of the presidents. Some of them endeavor to be part of the whole establishment and some are pushed to the front and been put there. What the CT has asked to the supporters of the KF is to elevate the souls of the presidents and their wives, especially their wives, that by elevating them there are those who whisper to the ear of the presidents and most of us as men we know that when it comes to what we call wife we are absolutely powerless. And we always listen and in so many ways we obey. .. to listen to the message of peace and elevate each others soul. ... we'll achieve peace in a correct way. ... one of the key players in this process is president Zhi of China. He has brought a lot of balance and with it he has become a key player for world peace. The end of wars come if China would not have taken its past position that it did. (:26). The Chinese government has decided to be involved in development rather then in warring and conflicts. The American president Trump has chosen a path of war, the same as is embedded in the Whitheouse through his son-in-law, the State of Israel, as we know Trump has married his daugther to a Cohen of the state of Israel, one of the richest families, and they are dictating most of the terms in the Whitheouse. We pray for both ...

(:28).
(:30).
... As the Core Team has advised that we take a minute of silence for the world leaders and their wives that we achieve world peace. (:32). I think all of them needs elevation. When the Core Team meets we usually take one leader at a time and each member supports the soul of one leader. **The CT decided that this time we collectively support the 10**. And hopefully we'll see the result. .. to elevate the soul you will not loose much,

you'll gain much more. This is what we need, and what is to stand. The main player in this game is president Zhi of China without a shadow of a doubt. One of the worst things we can do is to take one without the others. To elevate all shows that we have matured. We have reached the point of maturity and have understood and reached the strength of our own soul. Thank you very much. (:34). Rick says that as a member of the CT that he is present with this ... and may we reach their souls. I have an idea, why don't we invite all their wives to eat and forget about the world leaders and then we'll achieve what we like. ... There is a club called, world leaders wives club and they meet sometimes on a regular basis. I know a couple of presidents wives who are very proud to be a part of this organization. (:36). They have access to ?? and some of them work in the background. 09

UC members say they are present ... (:44). ... peace talks between nations is not easy. ... how they push the human boundary to accept pain and suffering for no reason. There is no reason for war nor for tools of war, but somehow man for centuries has chosen this path and it's now time to switch over and move away from it. It's time to mature and the science of man has reached a point that goes beyond this planet and there is no war in space, and the time man matures and walks away from war is the time that man can walk into the Universal Community. The universe will be open to the man. Do we choose the path of suffering or that of elevation of physicality and the STM. Gradually we'll move away from the world leaders and be in the hands of every soul. Many world leaders decide to play games to show they have power but in so many ways many of them are still children in the knowledge of man. (:46). They need to be elevated to be educated more then anything else. 09 ...

Going back to education, the science of knowledge goes back to the basics of the teachings, have far we can reach in understanding the fundamental principles of the T. In the past few weeks we were talking about the Pl, fields, rays, how, what and what becomes a ray, and what is a field, and what is a Pl in its own structure. (:48). **Most of us when we are asked what is a plasma, we say, it's a bunch of fields. But maybe in the language of the science of man we have to explain it differently. What is the difference between a Gans and an atom? The matter clothes the presidents and the Gans can create the presidents**. The matter is what the man puts on himself to manifest the weakness in the structure of his physicality, where what we call the Gans or the plasma is the creator of man. **One is fields, and one is fields in a matter of tangibility of its stability**. What does this mean, how do we explain the difference between the matter and the Pl. What creates a Pl and what becomes a matter? The Pl makes the president and the matter makes the clothes of the president. (:50). Many of you have a problem in explaining what a plasma is when a man of science asks you, you say it's a bunch of fields. But it's more then that. It is so energetic that **Pl can manifest itself in the size and shape that can be seen by the eye of the man, whereas an atom needs collection**. When you can see an entity in the size of itself it means it has more energy and more fields to show. If I ask you again what is the difference. Can any of you try to explain what the difference between a matter and a Pl or a Gans as we call it. How do we describe it. .. the easiest way that it can be understood**, it's a jacket inside out. This is the atom, if you turn this jacket of it to give the freedom of its fields**, now this is your jacket, (:52). where the jacket sits inside and the inside is opened up outside. The easiest

and simplest way to explain it. **It's like having a skin of a sheep and you turn it inside out. All those hairs on the outside are like the rays and when you turn it in, they become like solid, and it just becomes the skin. It's the same thing. Where in the matter state we see the skin, where in the Pl state we see the fields. We literally turn the structure of the fields interaction, in the dimension of the environment or in the dimension of the field strength of the inner self of the atom.** There is no easier way to explain. When you turn the skin out you have a bigger dimension, you have all the hairs, the wool has to be everywhere, when you turn it in, you can squeeze it and you have a toughness, you have a physicality. Where you have the hair, you can move your fingers through the wool, it's soft and goes everywhere. For those of you who have a problem in explaining the difference between a Pl and a matter, (:54). **a Pl is when you get into a matter atom and you turn it to open, and it releases its fields**. This it the easy and beautiful way of explaining such a beautiful knowledge. We become more and more knowledgeable so we should be able to explain the knowledge in a simpler way. With the matter state which is the skin, everything is inside, all the strands of the wool hair, all in, but it comes out. When you turn the skin inside out, all the wool, every single hair is one ray, radiates, short, long. One goes one way and another goes another way. In this way we can understand and explain the true meaning of Pl, in a simple way, where a child can understand. And this is the reality between the matter and the Pl. An atom inside out, we call it a Pl, it shows all its fields, what it is made of. But still the skin sits inside to hold the Pl together, where now the skin inside becomes the Principle, becomes the holder of everything together. Those of you who can understand and explain the Pl in this way, it can guide many people to **understand the principle of the Gans. What it is, Gas in A Nano State we call it, (:56). but in fact it's a Pl opened up, it shows its beauty, that's why it shines, why it's white and it shows itself. In many ways the present science has chosen itself 2 point of reference, we call it the white shift or the red shift, does it come to us or is it going away from us.** Why is it white when it comes to us and red when it goes away from us? How do we explain this in the world of Pl. There is one thing important to all of us and that is to **understand what is the creator of what we call a field and a ray**. Where is the line, how do we explain the ray and the field. **Why is light sometimes a particle and sometimes a ray. We need rays to make a field, where we have many rays within the field which can become rays themselves**. What makes a ray to move or any entity to move? **Can a ray becomes a Pl or a field become a Pl. The possibility for a ray to become a Pl is as much as for a field, (:58). which can become a Pl, because a field or a ray as we know now needs a point of reference that is stronger then itself**. When a field moves it needs in giving, to reach, it has to be stronger that it can move to a weaker. But **it doesn't hold G, it doesn't have the reverse fields with it. Rays are singularity of the direction** of the motion. In the process of reaching and receiving they become fields. Where the fields possess the 2 (M & G), in so many shape as a plasma. When the M field of the planet like earth and the M field of, let's say, the sun**, both M and G interact with each other, what do we get? A mesh mash of both rays and fields, where the balance between the 4 field forces (1:00). creates a particle behavior, where the residue which one of these left on its own becomes a ray. All the M fields are not exactly of the same strength, and in some point on the other they become separated, they have no matching opposite with them, then they become a ra**y. The M field doesn't have the G field at that point due to interruption or

whatever, of the strength of itself to manifest itself to become a ?? ray In the teaching of the past 2 weeks I referred to this knowledge because it's important to be understood. It seems that many of you have not understood. When you have a field you have to have both the G and the M. But there is another point to the whole of this discussion, as you are a M or if you are G, you have a different position. If we take .. (break ..) .. the (M) field comes out and it spreads. (1:02). the same fields, that's the mother field of a higher strength, and it opens up. But **for the G field it's a different story, it has to get through to be able to join, it's got a hard task and it needs a higher strength. Where the M field opens to the space, but G has to get in-between the space. The order of magnitude is 4 times the ?? . Then it builds up, the higher strength** you go in the curvature of the Pl the order increases to the 40th, and 400th and plus if you can ?? ?? **And at every point of increase there is a new dimension of understanding and new knowledge. Because the characteristics of the element changes according to the strength of the MF field. At every point G and the M fields** have to match and then one increases inwards while the other one decreases the other. This you will not understand at the moment but in the coming time you will understand the gravity of this knowledge, how important it is. (1:04). **In the common language if you understand it, you call it a sound barrier in the matter state. At a given point of MG field, there is a continuation and the strength needs to go through, what we call different barriers of the MaGrav strength of the Pl. You can't see the one behind if you have not reached the point of conversion, for you it doesn't exist. This is very much the way, even if you listen to the introduction part of this session today, applies to the STM. When the totality of the STM become peaceful man will pass the threshold of receiving more in the higher strength then giving to the lower. Because what is important at this junction is that you are receiving equally from 4 sides**, again the same, the planets, and the earth and the sun interacted. It's a point of balance, and when it reaches a MG field point that it moves inwards, because it gains more as it is coming in, plus itself which is ?? mutated, and man's interest, next elevation of understanding. You will understand different, **you comprehend totally new dimensions**. (1:06). **At this moment we are trying to push man to reach the first, what we call, the plasma point of interaction that elevates the STM that the man sees more and that that elevation of the soul elevates the physicality of the man, then would there be a need for man to take physicality. The totality of the knowledge of the Pl T on the banner of the KF is the knowledge of the Creator and not the knowledge of man**. Once the man understands and comprehends the depth of the knowledge of the creation, man will become wise to have his eyes open to elevate his own soul. **To see through the eye of the STM which is comprehension of the totality and not singularity of the existence of one physicality. Then it becomes, when you understand more, why and how you create fields and how you come to divide the fields and interact the fields at any point reach the point of material state in that strength**. Look at book #3 you'll see it. (1:08). The fields of the 2 (M and G) come and interact and create a new matter state and this is where we are going. **Today's teaching is going in depth of the basics of the T**, because many of you have not grasped this, and **many of you who are practicing it and trying to develop different systems have gotten stuck**, which means you can't go to the next step because it has not been fully understood, so you are stuck. And then there is something wrong with the teaching. The only thing wrong with the teaching is that you

have not understood. Try to step up in understanding the simple part of the teaching, and then the complicated parts become simple. It's easy to teach but it is very hard to understand, it depends on the point of the understanding of the teacher of the man. Are there any questions up to this point. (1:10). We lost part of the critical teaching on the M fields, could you go back and describe that again. ... You were drawing the M tentacles on the right. The M direction is the free flow, and the G is compression. As the fields flow out as the M, they are ?? freed, they become, they push. But where they become G you get pushed on, you have to enforce, whereas the other one (M) is the freedom. As M (means **G) fields, as we flow in, we need more energy to get through, whereas with the M we have the freedom to go where we like. There is less resistance** here (at the top) then here (lower in). (1:12). **The choice of the word is very hard, but the explanation of the understanding of the totality of the knowledge is very easy**. And many of you have gotten lost in this pattern. With what is on the screen many of you have gotten lost. And that's why you can't move into the next step. Part of the teaching I was trying to explain last week was very simple. **You have fields in your basic reactors (draws 3 arrows outward), but what you forget is that you also have fields (draws arrows coming in) in your reactors too. The balance between the 2 gives you the direction of the field**. And this is part of the teaching, especially those involved in the space T have not understood for months, years. **You are dealing with Pl which means it's dynamic in both ways. And it's dynamic in every direction. (1:14). The process of interaction of the fields and compression of the Pl is the secret to man's access to the U**. Until you understand this you will have a lot of problems. When you **look at the skin** of the man, **you have the fields of the layers where the interaction of the fields gives the Pl of the layer, but in fact, it gives physicality of the existence of the fields, you need one to be able to create the other, while the others creation depends on the existence of the first for the order of itself. What we see is not that difficult, we see the ease that the fields and matter intermingle and they change**. As it was said today in the KF it was achieved, **you have managed to understand how fields change to energy and energy changes to fields and in that interaction they create the matter state or the Pl state, depending where we are**. (1:16). This is important for us to take the next step to understand. **The top layer of the skin leads to creation of the middle layer, by the existence of the middle layer we give the confirmation to the other 2. But the skin has 2 sides, you have arm, inside and outside, so now this has to interact with the other side. So your skin is not just on one side, it has interaction with the other side and the balance between the 2 dictates what sits between and where the bone and muscles shall be.** When we look at the skin on one side we think it's on its own, but the position, shape, color and size and thickness of the skin dictates this too. **If you work in the space T and you ignore this, you'll always have a problem. But at the same the confirmation to exist of this, it needs to create that Pl field of its own that it can lead to the manifestation of the physicality**. When you look at the skin, and man matures enough to understand further in the structure, **the skin of your hand is totally different (1:18). structural wise then the skin of your upper arm, this supports longer strength fields, and this one shorter strength fields. The skin dictates the position and thickness of the bone**, ?? You have to **remember that the brain was grown first and it is part of the skin, and that is what leads to positioning of the bone structure**. This is the same in your space T. When you

understand this **then you'll understand how you create the floor and walls of your SS. How is it created? By the strength and condition of the skin, it dictates the size and strength of the floor, and the dimension and diameter of the whole SS**. There **is no difference between the skin of the man and that of the SS**, it's exactly the same. With the difference that with the skin we don't see that kind of motion, but with the SS due to the dynamism we'll see what we call the skin of the SS. When man matures and travels the depth of the U **you'll see spaceships that have no physicality or ones that look like a jelly to you, but it confirms the existence of what it needs to be inside**. (1:20). The human body needs bone, **but not every creature in the U has bones, where the MG field of the skin dictates what shape it's going to be**. Why some reptiles and some animals have no bone. **Because the skin can't support and create the condition of the solid state and then for it** to be able to give structure to its physicality. These are parallel **knowledge we have to learn if we want to create a SS or to create anything that we want to be a part of the space of the U**. The knowledge has to be understood in its totality and not with the prejudice of the present knowledge and man's ego and lack of understanding of totality. **The world of science has to be in balance with the world and understanding of the STM and through it what we call the condition that the soul creates for it to exist, what we call the conscience of the soul. One can't exist without the other**. If man has a conscience or a feeling, where did that come from, if the STM does not have that. These are what you have to learn, then in the space of the U (1:22). you see the consciousness, the behavior of entity through his soul. You have not seen, but you have to live with it. But you have to understand it. The chap has no bones because in the structure of his skin from one side to another doesn't support solid state. **Why don't some animals in the sea have any bone, or in a worm, because of the state of the strength of the layers of the skin, and no other** (reason). So the same applies to the skin of your SS. Can a SS which you create the fields strength, support the bone structure of the man and physicality, or will it change the man that the bone and the strength of the matter state of the bone cannot support it**. It doesn't mean that you will die or that it's the end, it means now another state of the strength of the skin is needed to support the motion or the physicality of the confirmation of the existence**. You will come across all of these. Your offspring's in the coming time, traveling the depth of the space will experience this. (1:24). We have to be prepared and understand how the physicality is dictated exactly as I said, the skin of the ship inside out**. Do you want to be the Pl which dictates the skin or do you want the skin to dictate the physicality**. The understanding of the totality of the knowledge and not to be prejudiced to one because you learned the other will be a key point for man to understand the operation of the U. **You have to stay open minded and very impartial that you can educate yourself with all the knowledge of the U. The minute you take position and side is the point that you have reached the point of stagnation**. You will not go any further **and this is what has happened to man he can't go any step further because he has dictated that position to confirm his own existence**. The teachings have become very fined tuned because a lot of you will start moving, a lot of people are searching and developing ... those huge metal reactors we created at the beginning and having come to little reactors and now we need no dimensional reactors. **Very soon you'll see Pl rotation without physicality. (1:26). Then you can create any SS**. What I am trying to teach you with my teachings .. a lot of pain and development over millions and millions

of years. **We are pushing mankind, some of those who understand to the next level, the present level becomes worthless to be because we are already one level higher**, that's why we are doing the disks. Those who have to understand that you were in this position before and people tolerated it, so we have to understand that the point of maturity of the knowledge has reach the turning point. When soon you will once see this transformation, the KF research teams have already achieved this then you'll understand that the time of the motors and engines is over. Then you'll understand how the next generation of the science through the plasma T comes into play. I encouraged this a few weeks ago and now some of the KF research teams have achieved it. **Rotation of the Pl without any motor at the speed they dictate, they still need to mature**. In the coming weeks we'll show this, that we have past the point of the maturity of the man in the next step in the creation and control of the Pl (1:28). and with it through the emotion and STM .. by a motor, but it is very easy when the reactor is made of the same fields as your emotion. We have reached a breakthrough point a few weeks ago and now more people are understanding how to do it and as the knowledge is shared through the STM others will be enligthened and we'll achieve. As the old song says, good-bye generators and turbines, everything else the wheels, carts, and the rest of it.

Because if you understand the rotation of the Pl in the perpetual condition, then you don't need a turbine or a magnetic field or Cu windings to create or release energy, it becomes the same as the ROTATION OF THE PLASMA OF THE SUN AND THE EARTH which leads to CREATION OF EVERYTHING.

KF research teams are in their infancy and they have achieved it and 2 teams have passed this point and very soon we'll see it, that in interaction of the fields without physicality you'll start seeing creation of matters and everything else. We are reaching that point in the future. I can show you 2 videos of it and through it we understand more and more, the creation of the rhythm and everything else. You have to go to the level of the reality, (1:30). that as **earth has no containment for its fields, and the fields pass its boundary of its physicality, the same should be, from now on, for the reactors of the KF research**. Any questions. Q: You spoke of the fields and energy and in respect of the relationship of them, can be either Pl or matter, but our body is both Pl and matter, so how does that work**? Our body is totally Pl but it manifests itself in the illusion of matter**. Q: **So the relationship of the fields to the energy, so it carries both of them? Of course, in one of the space reactors in China, we transferred the Pl energy and current as I said before, the matter current states, what you call voltage or whatever, on the same platform**. They both exist and some of the energy of the Pl converts into the matter state, and some of the energy of the matter in being released becomes part of the Pl. Q: But when we said, what is the relationship, you can have either Pl or matter? It's what I just explained in the teaching, **it's the point of balance, the barrier, the point of conversion. (1:32). You reach a point that the fields of the environment and the fields of the Pl in interaction, slows enough that to you and me becomes a matter state, and if we increase it and feed it from inside it becomes a plasma state**. Q: So am I correct to say **the body is spontaneously pulsating between the plasma and matter state? Always! That's why you have a heartbeat**. Q: **Is it the same thing if I call it the subtle and physical bodies?** You see if you can call ... If you

can go back to something. I wrote this to Dr. Rodrigo the day before. And you have brought it up, with the permission of Dr. Rodrigo I read it for you, maybe you'll understand. Because once we teach one, it is for everyone the same (we teach everyone so they are the same). ... I'll read it to you because it will have a meaning for those who understand this. This is part of the medical teachings, but those who are ready to elevate their soul **will understand that this is the next step between the soul and matter**, interaction. **"Correction of genetic is a different ballgame, you need correction and imprinting DNA. You use patches, but dynamic systems is more advisable to change DNA. You should allow slow genetic correction, otherwise you get it back, (1:34). which means even genetic into RNA can revert back into DNA if you don't get it right because they interfere. But what it is, it is this part that is important. If you can make RNA of the man then you achieve it faster in being able to support the man, physicality, or the DNA. RNA is created by the STM and soul of the physicality of the man, so if you can create that, this will be one second jump, but you have not reached that level of understanding of it. I'll teach you how to make RNA one day, it is too soon. Or maybe if you'll contemplate on my teachings you'll understand and you'll be able to do it." What it means if you go back to it. It says RNA is created by the STM in interaction with the soul of the physicality of the man. Whereas the DNA is created by the interaction of the physicality of the man in the dimension of the plasma."** It's the first time we open this channel up in the teaching. Because what **is important to understand is that the non-dimensional, non-tangible condition what we call RNA, (1:36). is created by the interaction of the fields of the creation of the physicality of the man in interaction with the STM**. The water is created by the interaction of the fields of the earth and the sun and what they produce and then they come together. If you look at the creation of the H, N, O, C which leads to the creation of AA, where in respect to earth H is created closer to or further away from the earth, and where is the N created closer to the earth then H, or away from the H. And what the light you see is the composition of the left over of the strength of the whole lot of the O, C, N, and the rest. **All the rays of the sun which come to us is not from just the interaction of the fields of just the O, some is from N and some from other matters. It's a composite and it's in the ray form, which means it doesn't have gravity, it has only the attributes of M, which means it's one direction which the G of the earth can attract it and it's given to it, that's why they say sometimes light is particle and what we call ray**. When it is particle it has absorbed, or it has been attracted or interacted with the MG field of the earth, (1:38). which is weaker, and as the stronger feeds the weaker it passes through, and in that condition you have a Pl which becomes with interaction with the fields of the earth, the light, the fields which shows itself as light. Where if it is from the interaction of the balance of the fields you get rays, but because again, it is of the higher order it tries to feed the earth, and in that process and in most of the time, as it is going through the atmosphere it slows down and creates the matter condition in interaction with the Inertia of the field of the earth. And it converts. The change of the temperature on the surface of the earth, as you go up in reduction, is the clear understanding of the science of the Pl, and nobody understands this. **Why are you colder at higher altitudes but you are closer to the sun. You should be warmer**. Where does the heat go? Or are **the heat and temperature attributes of the fields which arrive to the planet earth in interaction with the Inertia of the planet, not**

with the MG field of the Pl of the solar system. The Inertia has a space gap very short. The Pl of the soul of the planet, what we call its MG field from the center reaches further out. That is why you create, you feel temperature when you reach near the surface of the planet, because now the fields which have traveled the space in interaction of the fields of the earth and the sun, (1:40). now they have to interact with the fields of the mass of the Inertia, matter state of the planet. In the depth of the space the MG fields in the open spans of the U hardly interact because it's open space, it can travel in any direction. It's not zero, but it has zero Pl temperature in respect to the U. **The temperature of the U across the Pl of this U is constant across it, unless you have conditions of interaction of the fields. It's very much when you call sea level zero.** The whole Pl of the U is at zero level MG field unless there is interaction of the fields of different entities in a given position. **If you understand why it gets warm as you come close to the surface of the planet, it's to do with the MG field of the mass of the Inertia of the matter state of the planet and nothing else. And why you have seasons is due totally in respect to that** and nothing else. Because when you tilt a little bit away the field MG field of the earth have lower interaction. It's not what they said, that we go further from the sun, we go now further from the sun, totality is left to the Inertia of the planet to interact, (1:42). and it's not that much. **It's the completion of the fields of the sun which pushes in the G, which allows the creation of the heat. That's why in the summer it's hot, because the Inertia of M fields can spread up**, even though the MG field has, what interaction is of ?? that. **Understand the principle and concepts of the creation, because that's why you have a temperature on your skin, it's the same** and nothing else. **And if you can embed that constantly, you create what you call RNA. And that RNA dictates the creation of the physicality, what we call DNA**. Creation is very simple, maintaining it at a given condition is not that hard, it's just that you have to understand the whole structure and not ofcus on one thing. Q: Talking about RNA, I am counting the memories of all of my ancestors, I don't know how far back it goes. If I carry all those memories, am I connected on RNA ... but these memories are playing out, if I can erase it, the memory, I go back to the original, totality. Am I correct to say (1:44). that the memory that I have is the same as RNA? **What you call the RNA of the man is the collection of all the interaction of the fields of the past times of the same fields. It's the positioning of the fields which (it) obtains, it's so fine, it's so strong that it can last, and it does carry on to exist**. **What your great grandfather saw is on the disk, but now the disk is gone but the noise is still there**. And in the interaction of the fields of your mother and father which lead to your creation that disk has just been copied down. You carry the same copy as your brother and sister and everybody else. And whatever you have added, you add more**, it's a lone disk which keeps on adding up on it, but because it's Pl has no limitation. But on the other hand, does it expire or diminish? Not really, because it is continuously kept at the same position**. **If doctors and scientists understand this position of RNA and understand that it is the interaction of the fields of the STM and soul of the physicality at a given point in the direction and position, then most of the diseases become solvable in seconds**, but we are reaching there. The scientists will reach there very quick. **The point of the change of the course for mankind has arrived**. (1:46). In time **we need to understand that how, without prejudice of course, we have been created and what has lead to our creation. Do we carry part of the soul of the U imprinted in our RNA that when we**

come to that part of the U we say it's a dejavu, I have been here. Of course it is, it's part of us, it's within us, it's the structure of us. And if we think we only carry the memory of this planet, the mother, father, great grandfather, by god we have a long way to come yet. **In the imprint of the RNA of the man lives and exists the imprint of the life of the U**. But man doesn't understand until we get to that point. A long way to go. Q: **What I realized is that everything that man has created on this planet is something that we have it inside**, for example, if I have a heater in the house, I have the ability to create heat in my body, and if I have an AC then I have the ability to make myself cool, and if I create a plane then I have the ability to fly, if I create anything, then it comes from inside the intelligent mind, in regard to physicality ... (1:48). **We can manifest everything in this body why do we need to make a SS in physicality, why can't you teach us how to press what button in this body? I already taught you.** You are not listening. Q: I am listening. I mean humanity. **In time we'll understand**. I was in a meeting yesterday and they brought a material on the table **.... I put my hand in this matter, and as I was touching it, I was tasting it. Because I carry within the structure, I have always done, I taste things through touch. When I touch radioactive material or Nano or matter I taste it**, I know what it creates in my mouth. I said, this is a N material and secondly it carries a radiation with it. They told me it's radioactive or so much of it creates radiation, I said, can you tell me more. **It's us, we don't need to buy an expensive detector to say if it is this or that, we have blocked this as part of our own knowledge. It's the ability to be able to touch and (1:50). to be able to say if it is good for me, or what does it do to me**, what does it bring to me. When I touch radioactive materials, I have done it for years as part of my work, I taste it and I know if it is the Gamma or what kind of radiation this material has. When I used to work with diamonds by touching the stone I can tell which river and part of the world it comes from. What conditions have created it**. Because to me the barrier of the physicality is not there, so I feel the energies**. When somebody lies to me, does it lie to them, but I listen to their lie and I feel the lie. When somebody tells me a good story**, I feel but I still have to play the ignorant that I don't see. It needs a lot of tolerance, patience, understanding of the interaction of your own body to be able to reach that point**. Q: I understand this, I can feel a lot of changes, if I close my eyes the fields of my hands go about 1 meter ahead, but I don't know what is this or what should I do with it ... You learn, let it go 10 meters and see if you can feel it. See if you can tickle somebody. I do that quite often and Caroline gets fed up with me. (1:52). I do things. ... I walked into an office ... My mom said, how did you do this? I said, because my soul liked her and liked being with her. .. **It's us who has to reach physicality and go beyond it, it's we who have put a limitation on ourselves**. You always could do, but now you become aware of it because you are trying to find the strength of your own soul and beyond your boundary of physicality. **... As you mature and start understanding, as you enter the SS of the dimension of the physicality then you see the other dimensions. Many people will change once they enter and they feel the condition of the flight in a SS. (1:54). Instantaneously they mature in what they have not understood about their own creation**. And when you board an aircraft it's the physicality that changes, but when you enter a SS it's the STM that matures and changes. The soul of this SS we call earth has created this condition that we all go through the same motion. When you enter into the SS which you'll travel in you will understand very rapidly the change in, change in

physicality, because it's created and controlled by the STM, **so it elevates your soul to a peace point and then you find evolution of the STM. A lot of you will feel this**. A lot of you who listen to these teachings will say, how did he know. **I have been there for thousands of years in** ?? Those **who plan to do wrong, we are aware of, we just close our eyes but we change the course because it's our position, the way we do, we reach their soul. But you don't need to, you just create a condition that they are all on a catch up basis. Man has a lot of power it's for him to realize the strength of his power and understand that his power can only create positive move and not negative**. (1:56). Sometimes we think negative, but that is the point of maturity that allows us to see further on, it's the wisdom of the STM. Any other question. Q: (Dan is not very clear and difficult to understand)

(2:00). You see as you ... **if you use a pipe you have this problem, but if you actually make Gans's of different ratios and put them in the disk you'll find out they hold their position, then they create their own gradient, their own motion. You can create a condition that different layers move in different directions and speeds of the same thing. You have to understand what ratio is**. In one of the KF research Centers they are testing it. They haven't understood the other part of it but at least they are one step forward and that is, they have a jar like this and the flow is this direction, you can actually see it in Gans state, but this is the limitation they have. If they understand more they'll **create the same Gans (below it) moving the other way, in different layers**, but that is still in the maturity of time. If you turn (this jar) sideways it is the same as your disks. **You can create different strengths and layers that different layers move in different directions. And this creates for yourself, life and motion. (2:02). Dynamic disks can fly, can find position in respect to each other**. Many of you who have watched my teaching in the past, you have seen sometimes, and Rick does the same, you put this magnet here and hold this one there, and then you see this one jumping to the other one. Just watch how it goes, **how the fields balance each other (draws a wavy line), that this flies. Holding this magnet in the hand and having it fly to the other one, changed the space flight for NASA.** When we at the KF, the directors, we went to the University at Salzburg to meet top scientists from Europeans Space Agency and NASA where they had a meeting. Just to meet them their. They wanted to understand what we discovered and what was the KF space flight. And I thought these guys don't understand a thing and that we had better show them something very simple that these simple minded scientists could understand it. I kept 2 magnets in the hand and I said, they both have the same properties. Put them together and they repel to a distance or they attract and come together. (2:04). **The difference is if I put this small magnet here in my hand and I hold the other one up (it flies up to it). Have I spent any energy to fly? And I explained the principle behind it, where both have G and M in respect to the other one. The top guy stood up and said, the game of space has changed. This guy has discovered the gravity**. I can give you the dates and point of meeting, very rapidly NASA closed their jet propulsion. But they have not matured to understand the work of the Pl. It's not just his guy that pulls, it's also this guy who pushes. At the same time this guy is pushing and that guy is pulling. **The magnet doesn't fly, plop (straight there), but it flies with balancing itself, he draws a wavy line**. When you speak about **solid state magnets you have that but when you work with disk "magnets" or disk**

plasmas, you can create MG fields in respect to each other and then you can control the flight. You can control the remove of Pl or Gans inside it. Which **means it allows you to create life. If you watch and understand in future the incubator that creates life, it doesn't need much just the RNA (2:06). and if you can find 2 RNA's of different strengths in one dimension** or the other, **you create life**. And you can control it. Many races in space do this. (Dan starts talking again ...) Any other question. Can we allow other people to ask questions. (2:08). (Dan starts up again ..) ... (2:10). Q: (difficult to understand ..). Draws a 3 discs new reactor .... Couldn't complete it. New question. ... (2:12). Q: Armen asks, **when you say make a gradient of Gans's on the disc. On the disc you don't have any Gans's you have only fields of Gans's, you don't need to layer they layer themselves? Very much so**. But they are all at different stages of learning. What you were explaining to me today about Iran and what you set up. **Each one of us gets to understand more so it's better to work with the physical tangibility**. Rick asks, how did your empty disc obtain the fields Armen? ... Come on Armen explain you're a master in this. (2:14). ... What I have noticed that if I have 3 electrodes and I scratch a little bit over here on the N coating, you create a motion, each field is different, different mille-volts, but if I connect this to this, it doubles up to 4 to 500 mille-volts. ... (2:16).

(2:18). ... Mr. Keshe says, can you make a video of this and show it next week, because I can't annotate because you are coming from a different program. ... If you could take the gap between the 2 discs. (bad connection) .. (2:20). .. (2:22). .. I was trying to tell Armen, in the gap between the 2 discs is the same, he's still working on the current flow, where if he works on the Pl flow he would get much more response. (2:24). Yeah, I know Mr. Keshe**. I am trying to push you away from matter world and current and to work on the Pl. Okay, I'll do that then**. Because we have passed that point, **we have to move into the flow of the Pl and that way we can go much faster in the structure of what we call space T. You need that energy to create flow**. Are you going to show us. (2:26). Armen shows his reactor. **Shows voltage change. Do you remember that empty space of U?** It's nearly 1 volt. Yeah **you should reach 1.2 volts, it usually depends on what is the depth of the electrode in the liquid, or the space empty space. This is what we showed in the Coke bottle 10 or 15 years ago**. .. (2:28). What happened this is what we achieved in the Coke bottle it goes to 1.2 volts. But now we are looking for, if you have this box inside a box or in respect to another box, you can use the energy in between, which is plasmatic. **... At least it is moving (the new disc development), at least you can see it**. **If you take this voltage and current which you take from this bottle and connect it to different Gans layers in that disc and see what happens to the Gans layers, then in the trust you have you can move the Gans liquid, then you'll see the Pl of the Gans itself. If you position the right way, then this will fly**. Q; Here? Yes, just leave it, you have to connect, now you see what we are trying to explain (2:30). to take further is the introduction of the plasma field into the Gans or a Pl liquid, but you go a step further where you can create a Pl, you control the flow of Pl through the Pl itself to create field motion and tangibility. You don't ... **you are creating a plasmatic field in a battery and you are trying to connect it to a liquid or a meter to show it. So if you connect it to a Gans or to a Pl of the Gans in that disk, and you can add different voltages and different layers of that disk, you'll find out that this will start shivering and shaking and moving.** It's understanding what you

have created. **Cold plasma technology what we develop here, is what we call room temperature Pl and something which is not known, we create a massive heat and lights in these things.** But if you can do that and understand what you have there, you should be able to do magic with this. And thank you for the knowledge Mr. Keshe. **Now try to put another bottle next to this one with a gap in between and put N material and take the path (2:32). or field of it into that disk and you'll see wonders**. In that bottle you have you are still dealing with matter state, because there are some fields you have inside, you have moisture or whatever. **But make another bottle and put a space gap between and put a N layer electrode into a Gans in 2 or 3 different positions from the Gans and see how it will change, how the things will move**. This is the step we are going towards, that we are trying to develop to get there. Meaning if I have 2 containers (he shows it puts finger between the empty space), the fields (here). Yeah. But **you have to create motion in both at the same time that there is a flow flying between the 2 disks, then in fact, you go into plasmatic condition and no more matter state condition. Q: But each N layer pin has its own field creation? Yes, but now you can take those fields but use them to create motion in the disk and then connect it back, it has to be, a control conversion on it**. Then you'll see if you have a Gans or Pl in that disk and how they behave. **You have to leave these disks free for them to be able to find position**. (2:34). And further on one should learn this so you understand interaction of the fields of the disc, **then you create spherical dynamic systems**. The 2 plates you have there, if you can create the right conditions**, in-between them you should be able to see a sphere. That's the skin of the man. And then that will decide the speed of rotation on the top and the bottom.** Some KF research teams have already achieved this level of motion. We achieved it weeks ago in China. Q: Try with sound ??, raise the frequency and voltage by adding sound. Test it with the physical sound and then the plasmatic sound. Resonators will produce change that will manifest energy in different ways? **What is sound? It's another part of M field interaction**. Q: **What about the concept of resonance in this setup, is that relevant to it Mr. Keshe? You mentioned that we don't use frequencies, that the U doesn't have frequencies? (2:36). No it doesn't have a frequency so how can you have** ?? ... Q: What about resonance or some sort of interconnection? **When you speak about the plasma you only connect, the interaction, connection is profound**, it will do, but how do you do it? How do you create that balance within. **You have to have that exchange in the field strength**. Q: **What is the difference between a disk N coated inside, outside, of both sides? Not much difference**. (Armen says when you have a Gans it's already plasma condition). Q: So you can capture the field of the Gans very easily if you understand .. **You see, yes, but then you have created a bandwidth filter. You create a bandwidth of MG field plasma at a given strength**. Q: In this way you can do ... to the N coated? **Maybe**. It's one way I know. (2:38). You have to understand that when you N coat, especially like these Cu wires. We ?? setup the Cu wires even if you decide to take your point of reference or anything from ... can make a lot of difference. Q: Can we use the method of the Pain Pen to transfer energies? Why not .. if you can transfer ... you can do it ??? with any means ??? matter state as an end use. Any other questions. ... (2:40). It's **good to see some of you are moving into the disk testing, it means we are progressing**, moving into the right direction. Q: From Jedhi, (pushing his own ideas) Resonance is in fact a MG electric etheric state of vibration of all the fields, heat will

show up, light as well, by controlling this plasmatic sound, etheric resonance, all the elements will interact, fire, water, earth, and air will mix and configure themselves. It's not frequency in the sense of a singular value, it's a ratio of a very high dimensional order, has to do with orders of magnitude. **We don't speak or work around resonance in the plasma, but everyone has his own translation of the knowledge and interpretation of the knowledge**. (2:42). Q: Shandor wants to ask about when he **explained the basics of MG fields. He draws a graph of strength versus distance**. We have a G component which is exponentially going towards the center and it goes weaker and weaker exponentially as we get closer to the center. At the same time we have a M component which goes in the opposite way it becomes stronger as we go away from the center point. Is that correct? I said, it depends on the strength of the point of the observation on the B side (of the graph). (2:44). Let's say at the point where these 2 are matching in strength we can have a manifestation of a barrier? **Very much so, but it's in the plasmatic field strength.** You can do a lot with it. Sometimes in the space T we call these points, zero point references, because it's the only place that we can compare ?? on either side both for M and G. Q: So in order to change the strength of manifestation can we manipulate A's G, or the M in such a way to make the matching point .. **You see if I were you I would draw it maybe the wrong or the right way. You reach the point here, this way where here you go that way.** When you reach a point here you have another cycle. (we didn't see the here and there points). Yeah, you don't go through the zero point but at the same time it turns back up ... this you see with the battery Armen was showing, if you hold it you have a point of energy conversion, (2:46). and then it just drops again, many of you have seen the positive and negative ?? The drop and the rise here, you'll will switch in Pl. It depends what is the source of reference. **In Pl T you don't have point of singularity and point of start where there is nothing else, there is always something somewhere**. Q: So we would need to have 2 points in space in order to have M and G? **Because those 2 point themselves have G and M. It's like a man swimming in a water, you are just in the middle every direction is the same**. Q: We have **distance without direction? More or less**. Q: One directional space I mean? When we define distance from only 1 point of direction of the angle? **Yeap, You have to look at the strength on either side, both M and G. If you can lay the G against M and M against G, you achieve the point of perpetual rotation**. Q: So we can change .... (2:48). can we compare that with a balloon as in the Kids Workshop, pressure inside with pressure outside. ... **You see in the Pl T we don't have this, there is no. What I am trying to push you is to think in the Pl condition. Don't go back between matter and trying to confirm something in a plasma**. Q: I am trying to find a model that people can understand. Yes, I understand that, but you have to realize that when you try to make these definitions of understanding, try to put both sides on, G and M, and the dimension of the field of tangibility. (2:50). Q: I understood that we never have a field alone, there are always other fields relative to it, it's an environment which both interact. Q: Caroline asks. Isn't it ?? when you are holding the magnets and showing they're attracting. ?? didn't you explain that the magnets have their own field frame of fields pulling in and out .. let alone when they are reacting towards one another. Can you repeat. (2:52). What I am trying to do is to show it, as the 2 magnets are going towards one another as you are showing whether they are repelling or attracting. ... **even the magnets on their own have a full flow of energy flow both in and out**, as we have shown in the

small videos, and at the same time you are trying to move 2 which are individually beaming out .... **That's the whole principle about magnets we can't attract or interact with all, at the same time what interacts with you is what is the stronger towards your position that it comes to you**. **So when you look at a magnet that is interacting with another magnet each magnet has their own fields which confirms their existence**. That's understood. We deal, interact with part of the fields of the same (2:54). in the strength that's what is approached. And there are still other fields which possess and continue to possess, put different magnets and different sizes of magnets, they interact with all of them, because it continuously has that field. **Has anyone ever measured the speed of the motion of the magnetic field in magnets. In some point in the MG field structure, even the matter state, you pass the speed of light**. Any other questions. Q: Armen shows**, I came with these silicon balls, each ball we can soak in different Gans liquid, of different strength, if I put it in the syringe in different strengths it will increase the interactions. I tried it and it works perfect**. Can you explain it for others to understand. This one is soaked in CO2. Rick says you have to tell that they come really small like little pebbles and expand out with the liquid. You can layer the different Gans more easily. Q: Are these **the jelly's they are using to put in the plants? (No). Rick says, yes they use it for that. Yes. You can buy these in the plant shops as well or online.** (2:58). Q: If I put these different balls, can I get different energies out of it, different interactions? Why not. **... But as a Pain Pen it works perfect**. Q: Armen have you seen that when you make the plates, that things change in your environment? What do you mean? That time changes? For me time doesn't exist. .. (3:00). I mean it's an awareness when you are around SF, reactors or Gans, it's like when you go out of the lab it's like you are in a different time zone. Sometimes I don't even notice how the time passes. .. . Mr. Keshe you made us all addicted to knowledge, thank you for it. The point is a lot of us have been told that we don't understand or we don't see, we could not be, and now we see how simple and beautiful science is. **Knowledge is not just ?? all these biology, chemistry, and the rest is a manmade knowledge. Now ?? creation is a plasmatic** and once we understand we say, oh my god, I can understand this. I was told I could never understand Chemistry, physics, etc. and couldn't do much with science in school, but **this is the science of creation, it is us. Without us it is powerless, we ?? are born with it. It's so logical** that you don't need much to worry about. The only thing ?? this science man won't have to think, .. time and space, The life of the man is connected to both of them and that's why man has problems to understand this T and be able to use it. (3:02). **In the depth of the U there is no time and space. But everything on this planet is connected to time and to space**. What time of the morning it is, how many centuries it is, but in the space you are where you are according to the strength of the need and want of the STM. **So you can never be somewhere out of time and you are always in a position where the soul is in balance, so it has no position**. And this is the biggest problem for humanity as a whole. Space and time and both do not exist. Q: **Where can we start making the change** in that to adjust because it's something that if we don't use it. You see the only time man will do it is when he goes into space, there is no sun, sunrise, no evening, no hungry, I haven't slept enough. In English language when prisoner are released we say they are institutionalized, so they do more crime to go back in, because in there everything is there and they don't have to do anything. **Man is institutionalized with the work and rotation of this planet**. One of

the biggest fear for man and why he always finds a way not to understand this knowledge because he knows when he goes out, that time and space (3:04). **This is one of the biggest stumbling blocks for humanity, time and space**. ... Man is institutionalized with the dimension of this planet. **Once you go into space and you don't have that 24 hour rotation, annual rotation and dependence on the food that you have to have it so you can move the physicality, it's a different life. There was a man on the road showing where the car can go on the road, what a waste of soul to do that day after day. He's as intelligent as anybody else, but we have conditioned him that to be able to sustain the physicality for his presence on this planet,** if you do this (guide traffic) then we'll give you something that you can confirm you exist. In the space we don't have this. And man can't comprehend this and this is the biggest problem for humanity, understanding the truth of the reality of the creation. **You are institutionalized, this planet has institutionalized to kill, (3:06). destroy, to be dependent on when the sun comes and goes**, what happened, how many of these stars in the sky you se sunrise and sunset. Or when you into the depth of the galaxy and you have hundred of thousands of the suns rotating, which one are you going to make your day according to and which one the night according to. We had some very early ofllowers of the KF, they're still around from Saudi Arabia, the Turks, they received the first books, very knowledgeable people, they went to the professors in Jedi University, ... the scholars had to ask me questions, I says to **them in the space we don't have direction to Mecca because the earth is rotating millions of kilometers away** and you're going in a different direction, where is the Mecca, where do you bend to. If you are Jewish which wall are you going to go and bang your head against. When you understand that the temple of belief has to be in the STM, then there is no time, no position. The institution you call the prison is not there to go back to, you call it the prison of earth. Then **you become detached. You don't have to worry from where the food will come, it's there and your body takes what it needs, and if you take the food of a higher order then you feed your soul, (3:08). then reality has no baggage**. It's what I said at the beginning, **when you turn the physicality inside out, when the STM takes over then you'll see the real existence. At the moment we are stuck with the skin out**. So we have to turn it back out (in), when the fur comes out it has every direction to go to. This is the problem for a lot of people, they'll **go to that barrier point of understanding and knowing their soul, they'll come back to be with physicality because they're scared, literally scared about what is going to happen to them, because now I am at the mercy of the soul of myself**, and where you understand, I mad man in the image of myself. If you have intelligence, insight, or emotion, where do you think it came from. ?? that fear of physicality will come. Then you open yourself to understanding the totality of ??? creation. Q: ... **to ease that kind of fear for a lot of people**, can that be created while still being on this planet, that they can go and feel and experience, elevate and **taste that kind of change without have actually to go into space? You do it in your sleep. (3:10). ... When you go to sleep. You can yes.**. Q; To remove the fear that they are not going or leaving to space, that they'll still be on this planet, but go into, like going to university to learn, to grow understand, to sense, can we create that condition first on the planet before they have to (go out), their own free choice to go out. Is that possible**? A lot of us can do it, and sometimes we do it, but the fear of that point brings us back to the dimension of physicality. That's why we dream. Dream is a connection between the world of**

physicality and real no dimension and the creation of the work of the soul. We all do it but we are ignorant to it. And **you can stay in that dimension, and you can move out of, and look at your physicality**, it's there, what am I going to do with this thing here**. I have managed to do this since I was very young. I sit outside my physicality and I say, what am I going to do with this guy, I have to go back in it. The detachment comes knowing that part of your, what we call the soul of physicality which pulls you into it. When the soul of physicality is not there, (3:12). what we call the point of death. We become that**. But you can do it. **A lot of people can do it. Many times if you become aware of it you see it outside, and you sit with souls and they see the physicality of people who are out, and you still sit with the soul. It's very easy to do**. **It comes from detachment**. I don't want to do with this (body), but I have, I am connected (to it), I made a commitment to look after it until a point of whatever, it decides to separate from me, not me from it. If you become detached, you decide to do it, **many prophets of the past have done it**. You sit outside, this physicality is too cumbersome. I did this from when I was very young, I could sit outside the physicality, I have got no attachment to it, but it is there and by law you can't .. **your soul cannot separate from physicality. Physicality itself has to separate itself from the soul**. When you see it, it is there, it sleeps, it rolls .. but it has nothing to do with me. It's the leech that has anchored me to it until it decides**, even though in part, I reach, I receive from it**. Detachment from physicality is very easy when you are totally detached from knowing that this just a space gap. **The first times that it happens it is frightening**, you think is it possible, but as you become a master in it you understand it, it's part of it. At the age of 6, 7 or 8 I could do that. (3:14). Not could do, it was something to me that was natural, even at this age I see my physicality in bed or whatever, I have not got (nothing to do with it), but I have to be around it to make sure it's safe or whatever. That's why, 24 hours a day I am there, just there, you have to handle it. It's very easy if you become (detached). That's why (some people) ask why did you give this T, because I have no attachment, it's just knowledge with me and I have to pass it on, and whenever the physicality decides that's it, you have had enough abuse of this institution what we call planet earth, then it gives up and I can go. Many times, it's just too cumbersome to be here, there's no attachment. Things come to be there and you see things happen to exist. Any other question. Q: What about the voice which is talking to us every millisecond and tries to bring us to elevation, (3:16). like you said the prophets have received revelations by being infused with that plasmatic voice let's say. That's way of communication of the Creator. Is it getting closer to this source by cleaning, like you said, the dirt of the window and letting the light of the sun enter, so you light more bulbs, that will make us fly? You see, understanding, **any of us can make that conversion from the skin to the wool, by turning inside out, but what you want to see or achieve, it's very much different then what you have already achieved**. Q: What does the intent have to do with it, you referred one day to your friend blessing the soul of the rat in his experiments to get the results he needed to achieve? I think you mentioned about intention? You see the condition of ... **we decide on how our destiny is set and how to make the destiny in acceptance with the other souls**. (3:18). Maybe a lot of you who go into the dimension of space T in operation and control of the systems through your own emotions and the STM because computers are too slow, then you'll understand a lot in what has been taught. **It's a natural progressive evolution of the soul. The soul gets educated as**

much as the physicality. We are very ignorant of it because we choose to become ignorant. Q: **Would it be correct to say that the soul has gradations of understanding**, levels of understanding perhaps? **It's us who decides what to open the physicality to, the soul has all of it**. It's hard to .. **When you reach the point of maturity of physicality you find that the soul you carry doesn't fit, because the soul hasn't upgraded itself, they call it, it's not there. It's partially stuck where it was, it needs to be more so that it can master itself.** A lot of people will go through that, now with this technology. **The spectrum of the fields which you create for different applications, somebody enlightens you, some of it will mature you. It's not that you came to the wisdom, it's the fields that you receive (3:20). has opened the next level of the strength of understanding of the STM**. To a lot of you it means nothing, but if you sit where I sit you understand exactly what I am talking about. **We are creating such a condition, it's just with it today. We put a few pictures and we elevate their souls**. We used to see a beggar and cross the road to put money in their pocket for them. Now we see the corruption of the world leaders, we used to give money, **now we give from our soul from the essence of creation for them to become as rich as us to understand what peace means**. Why do we elevate these presidents and their wives, because we have reached from us ... but many of you have wished for but if you haven't reached that peace, you can't give something from lower, which you don't understand. Those of you who become detached and give from their souls will reach these presidents, because then they receive part of what they don't have, and with that the soul elevation creates the physicality elevation. It's extremely simple and doesn't need for you to be, god knows, a prophet to understand it. I said in one of my talks, and it offended a religious man, I said, the prophets of the past had been there for the profit of themselves. They changed things, **the prophets became profiteers for what they could have**. (3:22). The understanding of it is **when you elevate your soul, by being able to elevate your soul of physicality is a strange development, but you go through it and see that the soul of physicality has reached a maturity that the STM has not opened that door yet** to go further up with. It's not that it doesn't have it, it can get it, it's just that you have to go (to) a higher level and we can reach that point. All of us can reach that point. And **they brainwash people to think they are doing this and that, they reach something and then they go through this level and that level.** (He could be referring to the belief that you can reach enlightenment through spiritual practice.) We see it in fanaticism in respect to some religions. Planning destruction and murder of someone because he doesn't fit into their way of being taught that the god is. You just need to elevate their soul and they walk out of it. The guy who straps himself with bombs that he can go to heaven or hell, where that key has set. We call them crusaders in Christianity they did the same, they went through that phase. They robbed and they stole, and we see where they are. We see the new way, different names, it became fashionable to people to start understanding. (3:24). **You have to realize the STM has to be aware of physicality and the physicality has to be aware of the soul. Anyone of you can elevate their own soul, but you have to understand does the physicality fit that it can carry that elevation**. Those who were around me know, that **when I received the message when I was 18 or 19, I refused to accept. I flatly refused. Because I said, I am not mature enough I can't carry, it will not be done correct. When I received the message for the second time in my late 20's or early 30's I refused to accept because I was not mature, I could not do what I**

have done today. When I accepted the message in my early 40's, it was clear I carried enough, and this is why I can carry what I do. The knowledge of physicality matches the soul, the strength that the soul carries it. **Young prophets make mistakes out of lack of experience. Old prophets who accept what we call the message to carry, always comes out of maturity of age, so that they understand how to handle it**. (3:26). (interruption again by Stephanie) I think she is shopping to go to a graveyard. This is what each one can come to the maturity of the totality of their own. **Christ was too young, he could not understand how to handle it, so he got carried away with the time. Look at the life of Bahaula, in his old age he set up a structure for it from the experience he had had. Look at the life of Buddha or others, they came out of the maturity of time**, then you become detached from physicality. You just open the soul to a higher level, of the same soul, but in that level it has received the maturity. **Your soul just because you don't see it, it doesn't mean the higher levels don't exist. They coexist along with, it's like when you draw that circle of Pl, the inner stronger still exists and have their own lives, so your soul, (3:28) at a higher level still communicates with the souls of the higher, but you are not aware of it**, it's not accessible because you don't see it, you are not aware, you are not mature enough to be. It's like when a child goes into a room with adults sitting and talking about something, it means nothing, what does he do, he plays with his computer because what they are talking about, politics or world economy doesn't mean anything to him. .... that gadget he is playing with. The same with the STM. Man is that little child playing, it doesn't mean that the adults sitting there .. they have already done (their work) with what they have developed and are at the end of it and it makes the economy for a better place. **The STM is that little child, the rest of the soul operation of the U carries on within the structure of the soul**. Any other question. ... we might have a wonderful news for you next week, it's the 1st of November, we'll see it may be the beginning of a new cycle for many of us. Don't forget to elevate the soul of these world leaders. One needs to be elevated and one needs to elevate the others. (3:30). And this is a very strange position that man has found himself. We elevate the soul of president Zhi of China as he has to deal with what I call unruly children. We pray for the president of the US this unruly child that he understand the balance of the soul. One needs to be supported in how to handle the unruly child.
(3:31).
END

248th Knowledge Seekers Workshop - Nov 1, 2018

(BREAKTHROUGH lighting of the plasma in China and shows rotation without a motor, this big release of knowledge coincides with the start of sanctions against Iran by US;;;

Conference in Brazil, KF Times 5th edition, A new Periodic Table of Plasma elements, China is doing extensive agriculture tests, New 1 thousand count measuring standard for plasma results, The high production of grains does not lead to change in the genes there are no genetic defects, We are here to change humanity and help the poor, We are here to bring food security to the nations so that countries like US can't force their will through food policy, When you understand the totality you understand that it is the same

knowledge repeating itself whether the 3 layers of the skin or the 3 cores of the planet they create physicality in exactly the same way, The new space reactors are without motors, If you put some magnets on these perpetual motion reactors you have a free generator, There is a part of the brain that contains the knowledge and it can be transferred to 7 billion plasmatically without having to learn it and this is to elevate all of mankind at once to join the Universal Community, New Health systems without motors will scan the whole body and eradicate disease, They decided to show the new technology this week, Shows videos of breakthroughs in the plasma technology with the creation of light of the plasma and the creation of silver light in the empty ball through the interaction of the fields, The creation of perpetual motion without motors directly through the transfer of energy through M fields has been the dream of the man, This is the reactor that blew out the power station last summer in China it's obsolete and replaced with non-motors reactors, Rain or water is produced by reactor can be used in agriculture, You don't need to Nano coat plastic balls that creates a filter the system will draw energy from the environment, Once lighted the plasma will stay permanently lit and draw energy from the environment, ,)

(:18). We'll start with the KF Times 5th edition, November 2018. (:20). Have to wait. (:22). The T will be disclosed in an international **conference in Brazil. ... Claudia Untar**. (:24). ...a world government may release the technology.. Going back to the teaching. ... We'll try to go more in-depth. (:26). (lost signal ..) (:28). **Ella presents the KF Times, 5th edition, November 2018**. They now have click links. "Our eyes more than a sight". The language of the universe. "The Lie Detector", which is embedded in our body. 129 Tesla explained. The Soul Ofcus group, discusses about the soul. The Plasma Seat Pad. (:36). Rising interests in plasma science classes in Kenya. Water purification using Gans, by Mosleq. Plasma in Agriculture, cultivation of corn. Plasma in my car. (:38). (:40). Those who submit papers for the KF Times please do it in your own local language. This is not a journal just for the English speaking. Like the Romanians with Corn or Dr. Gaotau, we are an international organization and as a whole we have to represent every language. We'll provided the facility for translating into English... please submit in your local language plus English**. This is important that we cover all aspects of the T that is done in tits original way. (:42). There could be some changes in the language and someone in the original language could understand it**. ... The same with the KF Wiki. ... We need to create **very much like the Periodic Table, a table of plasmatic elements. Because if w go this way we'll see a new dimension in the behavior of the plasma of certain products or certain elements** like CO2 or ZNO, they show different characteristics. **When we come to behavior of the Pl, in matter state we call it isotopes, in the Pl state we call it the energy level balance**. What is the energy compared to and what level, material, that Pl can manifest itself to be. (:44). As we develop this new T the isotopes in matter states has to be shown as a Pl field strength in a Pl state, as we know it's very much different then we **understand in a matter state where we say this is Cu and its isotopes. In the Pl state we see the energy behavior pattern** of it. For example, in Raman or Infrared spectroscopy **we might see 10 - 20 different parallel elements like this**. For the first time when you look at the data for these spectroscopy elements which in physical matter as being impossible to reach we see the system call upon, these are the matter that will be developed or discovered in the

future, but they exist in the U, but we don't have it here. **For the first time we see these coming up. Maybe we can start patterning the whole CO2, have 3 - 4 characteristics of the other matters near to it because it can behave that way**. I have seen this in spectroscopy and it's time for it to start as a leading organization in this world, as the founders of this knowledge as K Seekers we need to set the standard, pattern it out. Those of you who are interested in this **start setting up a Pl Table for the elements**. ... We need to develop these new Plasma Tables, (:46). what these elements are and how they look. This will become very important. The other thing is that when you are looking at like a corn test from the Romanians. **The Chinese have done a very extensive test on corn**. It will be published in the next edition (KT Times) because it's very detailed way and the material has gone for a test of the quality, some new developments had to come into the KF, **we had to come up with a new standard that we are setting up. When you grow a corn there is one with Gans and one without**, you get a better and bigger harvest, but we want to see the actual structure of it, so we established a new system for measuring the test, **we count on a 1 thousand seed base, which means it gives us the actual amount of weight increase**, and not by bigger harvest or whatever, we look at how much a thousands seeds of corn weigh in using which Gans, because how you use the Gans, **which process of it, do you soak the seeds, spray the water, do you water, spray or just change the environment, creates different performances, different kinds of production of materials for the harvest,** for that reason I have developed a new system, we call it "a thousand counts", and the laboratories that work with us are asked to do this from now on. (:48). **For example, we take a thousand grains of rice and we see how much it weighs in the CO2 condition, which condition of CO2, and without using the CO2. Also for the different types of application of Pl (spraying, soaking, etc)**. This thousand grain count will become a very important characteristic for us to understand how the seeds are growing and how much has been the actual gain on the materials. In the Romanian paper the ones without the Gans are 1.5 meters plus and the ones with the Gans are nearly 3 meters. This makes a huge difference, if one produce one size corn and the other produces 2 corns, it means profitability for the farmer, or hunger. It means if he has a surplus to sell, or as ofliage or green parts, for us we just look at the corn, but he ofliage has a value to the farmer, he has more surplus to sell. If it's 1 meter different it means a lot of weight. It's a big difference for him to feed his animals or to sell to have an income. In developing countries where the farmer lives on the bread line these little changes is very important. A farmer friend asked, how do you make a million as a farmer, you start with a billion, because you are constantly loosing money. We have to reverse the condition, that these data become effective. (:50). **In China the officials were concerned that such a growth in production would mean a genetic defect that it changes the genetics. But it has proven that it doesn't touch the genes.** The seed's genetics stays in its original sense, it doesn't change. We have proven scientifically that through the application of the Pl T it doesn't change material genetically. We have asked further seeds to be tested and we know the results, it's as the results in the first report. We are testing rice, wheat, corn, and other materials which have effectively been modified by GMO's, and in the coming time we'll take the GMO ones and grow them and see how they have changed. It's important for all of us as I have said in the recent past, **we are here to change the life for humanity in a different way, that the rich can afford everything, but the poor need a helping hand**. They were

complaining in the KF that people are making things in the name of the KF and selling it and this and that. I said very simple, this was the purpose of the job**. I didn't come to create exclusivity I came to bring inclusively. Our knowledge should help every single one of you. If you make a crème and sell to a French company as we have been told and you got paid for it. Congratulations, this is beautiful to see. But don't hide it**. (:52). ...

.. It's the difference between poverty and sustainability. Part of the KF (:54). program in the coming time, you'll all see it, **is extremely targeted on to the farmers, because if we can raise the harvest of farmers from 1 ton to 2, 1 ton is poverty line and 2 tons is comfort. It helps the nations and create national food security. 24 ... it allows countries like the US to force their policies through food. When we can bring up the nations that they can feed themselves then no one can push the others**. We have set the policy out, very soon some of the world's leading grain will not look to America any more. **This will bring pressure on the American farmers and government to be equal and correct. If some of you don't understand the world policy Americans have put so much grain on the back of false subsidies to stop the nations to grow, that now these nations don't grow (their own food) so now the Americans control through food policy, the farm policies of the nations through their food**. (:56). ... **We have managed to eradicate viruses through the KF, Ebola, and other viruses** through the hospitals. We see the genetic modifications as another virus ..

(1:00). We have the data that shows we achieved it and we carry on with other pieces. National food security for every country is essential, we have the knowledge. .. we'll release scientific laboratory data that will be used. **If we can make nations like India, China, Japan, Korea, and some of the Western European countries like France and Germany through the development in the new Pl T where the harvest doubles and triples, and where the quality of the grains move from average to medium to the maximum protein production, this is what our target is**. 51

(1:02).
... increase **in rice by 200%, wheat 100%, in malt by 30%. (1:04). 100% increase in wheat moves China into a supplier rather then being controlled**. The same with India, 10,000 farmers have killed themselves in the past 3 years because of the GMO. I move into India very soon. We take the banner from the Chinese government and move into India. No Indian farmers son should be without a father just because the Americans have cheated with the GMO. I'll teach ...
(1:06).
(1:10). **The time has come that control of nations through the food supply will change. This is the gift for the first of November sanctions of the Americans from today. Very soon, faster then you can think, the American farmer will have nowhere to sell seeds and grains**, because the farmers will start producing better quality and half the price of the Americans ?? We bring sanctions through knowledge and not through ?? .. (1:12).

(1:14). (break in connection) (1:16).

... The third team of KF has managed to reach Pl condition. That's a beautiful developed that they have achieved, then the flight system comes. **The understanding of matter from Pl is one of the cornerstones of your work**. Many of you have to go back and **reassess a lot of things that you learned and how you come to understand the same in parallel. For example in the Pl T when we speak about the skin of the man, (1:20). we know it has 3 layers, the interaction of the fields in these layers allows the manifestation of the physicality**. And one day when totality comes, as much as these 3 layers are needed for the manifestation of the physicality, **everyone of these layers themselves leads to the creation and manifestation of other layers internally, it's not just in that level, they all have a common denominator so every layer of the skin of the man, including the intestine and the heart, they are all part of the same structure**. Their part ?? third and how third they interact (determines) the size of the organ. But if you look at it, the same way as we know on **the three layers that leads to the creation of physicality, you have a parallel.** If you understood this, in the very first pages of the first books, you have the Caroline Core, inner and out cores, the interaction of the fields of these **3 layers of the plasmatic fields leads to creation of the physicality of the planet, where the magma is like the brain in filtering the information and the strength. It's exactly the same parallel**. Where you have the STM, brain, and in interaction with the boundary (? skull), creates the physicality of the body. **These are part of the same teaching, nothing has changed**. Now we can understand and relate more and more to it. (1:22). Now you even understand how planets become ?? physicality, dimension of reality and tangibility. They call the inner core the soul of the system, the transition, and the matter state of it. It's the same with the bottom, middle and top layer (skin), then from that interaction you get the physicality of the body of the man. In this interaction (of the planet) it's a closed sphere, whereas this is an open body, whatever shape it is it creates its own.. **It needs the magma to be able to transfer the energy, to be able to convert it that in the lower strength it becomes the physicality of the body of the planet. It's the same knowledge. the same thing**. This is important for those of you who are going into the space development testing, because you'll **see phenomena that you can't explain or you want to reach physicality but you can't because you don't understand what you have done**. When it comes to the process of **running your space reactors, which are without motors, in the new Pl T we do not have any motors,** we have managed in the past months, and other groups in the KF which I teach and guide with it, we have managed to achieve rotation of the material without motors, the way as it is in the U. We don't see any motors and the planet rotates at 1600 ?? 1000 of the sun, 100,000 in the galaxy. So what we see, now we have achieved. (1:24). **In the world of science in the cheating of the patents any perpetual system which is natural can't be patented. So they don't allow you to patent the new generators, because on this perpetual motion of what we call plasmas if you can fix in a few magnets, you got yourself a free generator**. Those of you who are in the space (program) and you achieved it, now you understand how you have a free generator. All you need to do it to fix a few magnets and you have your power supply. Free generator. There is no difference. We burn nuclear material to heat up and run a turbine to create a rotation to be able to **run a few magnets across a Cu wire, that we can produce megawatts**. Now the KF scientists have achieved this position, perpetual with very small

amount of energy input that the output can cover itself. The whole position was to create a material which can plasmatically be effected. Those of you who are working on a generator system now you understand. It's not creating the dimension of Pl even for motion, but once you have created it, motion through current flow, then you can see a few magnets will give you a beautiful generator. (1:26). Total cost, maybe $10 for a 1 megawatt generator. And the beauty of it is, ?? I have been given a piece of paper for new reactor energy ?? turbine. (he draws 2 circles) 10 magnets around outer circle, coil around the inner circle, ??? ??? How many coils to put here a few magnets here. Then you achieve perpetual rotation. ... if you set it up the right way it can give you 1 megawatt. (1:28). This is not a theory, I can just send a picture through to be shown. In KF research, when I get involved I go 100% success, and I go for making sure that they understand the basics before they jump. In China we have achieved a lot. For the K Seekers to see what they have achieved, in time it will be opened. I am sure the KF researchers who are working on the generator within hours can put together a small generator to show the public. For 5 kilowatts, I don't think it will cost but a few dollars. But KF will sell it for $3,000, because that money goes for research and pay for those gifts that never came back unless you took ??? (finally it's recognized that we can't hear him very good). (1:30). **This is what is coming up and sits with the KF**. It's important for us to understand how the next steps will develop. These kind of dynamic systems with a field radiation will change a lot of things, in farming, in animal health care, energy production, and medical application. As many of you said, I am pushing a new dimension in the work of the KF. **It will take mankind to push 7 billion in understanding the language of the space, another 1000 years if you are lucky. Now that we have managed to produce dynamic plasmatic systems and we understand the operation of the work of the Pl there is a part of the T that has to be discussed and has to be brought across, for us to teach in universities and they teach the students so that in the next 2 - 3 generations to become knowledgeable, takes too long. In the brain of the man, (1:32). when you gather knowledge, the way you inherited knowledge through RNA about which plants you should not touch and what conditions can damage you, there is a section (in the brain) that creates and holds knowledge. In the coming time, now that we have achieved plasmatic systems, the knowledge should be able to be transferred to 7 billion people on the earth in one go, that they all will know what to do in the space. Teaching doesn't need classrooms anymore, if you understood, and I encouraged you to go towards development of the soul and understanding how if you put a MaGrav system on the head or on the leg, you created the brain**. A lot of you when you started to see how the brain of Naomi was created and developed, you should have realized by now, if we can create that condition to re-develop the brain, with the new Pl T we can educate all of man at the equal level. In a very short time we can make everyone to be as good as Einstein, if he was a good man to have a knowledge. Most probably we can make a lot of De Vinci's out of you. **The knowledge of mankind can be transferred directly into (the brain), as you have inherited the color of the eye, what to eat and what not to touch, and what to do, that sits in a part of the structure of the brain, there is a special location for it which receives the knowledge**. As I said in the book**, I understand the book becomes my knowledge, it doesn't stay in the sky, it stays in a specific (1:34). position within the brain**. Now we target that point that we can elevate 7 billion people in the knowledge equal to each other. This way

Mr. Doctor, PhD, professor and engineer and all that will sit exactly with ?? each man. **Gathering of the knowledge that will become part of the common knowledge of the man is the next step for the human race in the KF**. One of the reasons we started to setup the new KF Wiki, as KF members know is this, **because most of the knowledge prior to this has a lot of falsification with it and mistakes, you don't need to teach the mistakes with it. KF Wiki with all the new technologies coming in across the correct way with the correct knowledge can be loaded as one knowledge to every man**. You don't need to teach the guy in Africa 20 years later or the one in S America 40 years later and refuse to go. We have to speed up the process of knowledge. The example is, if you manage to bring an Alzheimer's (patient) back to understanding, read a note and you remember it, you go to university and you become a professor in mathematics or physics**, it means the brain has a position which holds knowledge, information for the betterment of man. We need to transfer this knowledge in 1 step across to most of human beings on this planet**. That by going to space we don't carry a few privileged ones who made a MaGrav and cheated the others, but we bring the farmers and all the people. **To bring One Nation you have to bring equality of knowledge.** (1:36). This is part of the KF One Planet, One Race. Now we understand what has been the work of the KF. The scientists around KF AZ especially John, now you have to understand what I have been telling you about. Giovanni by working with Naomi understood how the brain was controlled, developed. How you have to be able to find and develop a system that we can transfer the knowledge. **This is within the brain of the man. It takes me 1 second to show it, but you have to understand it that you can carry the knowledge across and through. This goes back to why we setup the U Council, because the soul of the UC is one, it doesn't matter what language they use, it's all through the same soul as the child**. This process of understanding all the languages in essence will be carried in this technology. **Because this way the same knowledge carries through for every being in the space**. If you are Chinese and you are brought up in America and speak American or English, what happened to your original in China, or is it in there that we can embed it so that you can speak American in America and Chinese in China, and in Spain speak Spanish. This is very good for people like me, I am the most lousy for learning languages, now I can do any language. (1:38). **Because I work through the soul and transformation not by the word but by the STM. And this is the job coming up, the knowledge point in the brain is your position to find, then we can transfer, KF Wiki knowledge which is getting developed, without any wrong information ?? that sets us back thousands of years, ?? will be transferred through. The time you have is 3 to 10 years**. As we bring the equality of food, that erases poverty, no control through food, we have to bring the equality of knowledge. I can't go into Africa and teach one by one, but if you understand the work of the dynamic systems it can easily be done. We have satellite that reaches mobile phones in every corner of this planet, **we have energy units that can do the same, now we can do the same through Pl in teaching and transferring knowledge to every man because every brain has its specific location to receive all knowledge's now we have it, we know where it is. We have to be able to move the 7 billion to be able to enter into the U Community**. I remember Dr. Eliya and Caroline said many times that we can't leave people behind, we have to take everybody with, we can't leave the children behind. There was never such a plan. But we needed that time to mature and now we have reached that point of maturity. John

in AZ has done a lot of work but it needs to be tidied up. Other research centers have done a lot of work in anther part, if they come together they'll understand. **One of the new health systems which we'll release in the coming time (1:40). it's what we call, full scan body, which means if this is your body and you have a disease, now you have seen that if you have these motors, now they become motor-less, which has been developed, and you have to learn about the ring magnets, now you need to move the ring magnets. In every section that you move, you change the whole structure within the soul and the physicality**. Any disease within seconds will be eradicated. No cancer, Alzheimer's, ... I told you that I would bring such a change by November that it will change everything, and now we are at that time Understand how you can create rotation of the Pl without any motor or pump, then they dynamic center of the brain where the knowledge sits .. dynamic, it's a sun, and you transfer energy or knowledge to it**. Do you remember the (Cup with the) orange and the water, now the orange is the wisdom of the man and the Pl is there to transfer it. (1:42). No when you have done that the Cup becomes the STM and the system becomes the orange**. These are not fairytales, this is what has been achieved in different KF researches and individually they are going further and we start supporting it. Full power system, full agricultural system, health, and with it space, merger of the ?? When you have the knowledge and the know how and you still want to do farming you make the best of the farming, ... US and Western Europe are 3rd world according to me, because if we stop electricity in any of these nations all of the (people) will start eating each other up, their freezer doesn't work .. the cooker doesn't work. In Africa the third world man is the first because he can go up the tree and catch what he wants and feed himself.... now we educate exactly the same. As I said, we'll have a surprise for you this week, now you got the surprise. (1:44). The first of November is a change for mankind. .. **As One Nation, food security is having enough ... a dynamic system that carries all the energies which a man needs. Do we need wheat and flour or can we feed the man through the same energy that we did with the orange in the Cup**. As I said many times, orange and the Cup, the Cup is the body of the man and the orange is what we ?? The security of food control as of today is finished and we teach it in-depth. **No nation can be taken on ransom or boycotted. Now how are the American farmers going to feed themselves, they'll change the government, that's their decision**. .. (1:46). forcing other nations to do what you want because you carry the food. ... We bring a boycott on those who boycott, with knowledge, with peace, with application of T. Next week when I meet with the KF research we'll decide collectively what to release and to show. Next weeks presentation will be a change in course for humanities science and knowledge. ... We respond with knowledge and authority, we do not respond with gin policy. (1:48). In the process of changing the environment we have shown that different materials can behave as we want. We can show that the knowledge of the man can be taken across the span of the U, that I will not take man to space as subordinates, but as equals. We'll do the same in the coming time with the transfer of the knowledge of the U, the same as we'll do for the knowledge of the man to another man through a system. To transfer the knowledge of the U in the same way to the STM. This is how we welcome others, but it takes time, 3 to 10 years will be a good target. Maybe if one of the nations work with us, 3 months to 3 years, working open. I .... Perpetual rotation of a planet, and now a rotor on the end of, or a Pl in a dynamic system in interaction is much easier to achieve then the rotor. It just

needs the KF researchers to gain their confidence and they'll do it. (1:50). Next week we'll start showing a new T the way it is and not the way you have been used to. ... Any questions.
(1:52). Stephano presents experiment with cardboard discs sprayed with Gans to show rotation without motors. ...

.... (2:06). ... There may be a little tiny movement. What I am going to do, I understand what you are trying to do. **There is a discussion going on in the background with KF research groups. Three of the groups have decided that we are going to release the creation and motion of the Pl today**. We are going to take it one step forward. You might see part of the Chinese space reactor, there are other reactors, we are trying not for you to see the whole structure of the Chinese flight system. Let's take 10 minutes for the KF research teams around the world to put together a presentation. (2:08). ... you'll see motion of the Pl, Pl across water, you might see part of the Chinese space reactor. ... We'll extend the knowledge beyond the understanding of the man. ... Q: Caroline says, Stephano's presentation brought some memories, that when he walks in the room he gets the reactions, the same as when he switches the lights off. Wasn't that exactly the same thing we noticed in the Insano? We always discussed that. The lighting, the thing is with him it is when he switches it off, but with us it was when we switched it on. (2:10). This is going to bring a change in T for man. This is the first time we show perpetual motion of the Pl and creation of the Pl within the liquid, which has never been achieved to such an extent. I thank the Chinese group for letting me to release part of their recording ... We do not want to release any names or identities for protection of our researchers. But you'll see how the change has come ... **creation of perpetual motion has been the dream of the man and it can be done so easily. Power stations will become suitcase size**.
(2:12) ... Break here for about 15 minutes.
Shows video: "Where Science Meets the Soul". ...

(2:30). We need a little more time. Video UC. (2:40). (2:42). (2:44). Shows Video 1. Shows the creation of Pl in liquid, Americans and CERN have been wishing to see such a thing. And it's been achieved very simply, on this belt it's part of a system, there are a massive number of cores on this belt. Video 2, **Creating Pl in liquid at room temperature, room pressure at very low voltages has been the dream of world scientists**. (2:46). ... The light you see is lighting a number of cores. **This important to show that when the Pl lights up it can stay lit**. (2:48). Another one with lights. You see 2 lights, this is a second reactor lighting up. (2:50). Another. **Those who are in the space program understand the lighting of the Pl and with it comes the release of energy**. (2:52). Shows the lighting of the Pl. (2:54). I sent **this one through for you to listen to, there is a noise in the background, the reactors speak to each other, the systems talk. This is not so much for showing the light, if you listen in the background you hear, like a heartbeat**, and this we have seen in other systems. In the line of communication, we hear them, the make different noises. Plays again. It's like in the womb of the mother, the systems talk. (2:58). Show another, where we can control and create motion of the Gans's. It's a little Gans at the bottom, but **we can control the speed of rotation**. This is for confirmation when the do the next test they know the Pl is ?? ... Video. **In a ball with no motors. We can control all the directions**. Is that a plate in there. (3:00). No, no,

just don't ask what it is. It's a pure Gans and it is there and when we can decide rotation without a motor, we can replicate the work of the U. When you look at the Chinese video and see those lights, it's the same Pl condition. But achieving perpetual rotation without any motors, we don't need to have any motors. You have to understand that they had to cut a lot of things not to be shown. Another video. We'll show extensively later on. **In one of these videos we can even see flying objects**. We'll explain that later on. Shows another video of Pl ball lighting up. **This is how your SS will look. This is the whole ball lighting up. Now for the first time you see full ligh**t SS system setup and in the coming time we'll show these systems flying, for now we just want to show the creation of motion and the full Pl. (3:02). **This is a huge breakthrough in the world of science Pl T** and the space development. **The system is literally empty**. We said that when we see reactors interact, then you'll see light, now we see the light. **We are on the verge of a major breakthrough for the space**. ... in video something on the top flies off, but these are to be shown in the future when there is more knowledge that can be shared. Thank you so much for revealing these videos. For **those who don't understand it's just a light, but for those who do it means we have achieved lift and motion**. **We are on the verge of a major breakthrough without motors. And the course of humanity changes**. As I said if you learn how to control the light in these systems, F-18's the most advanced .. Aircraft carriers are just a tub on the oceans. ... (3:04). For those who understand the space T has changed. **The creation of perpetual motion without motors directly through the transfer of energy through M fields has been the dream of the man. Creation of light, if you go back to my teachings some 15 years ago, we always said that when the fields interact we'll see silver light. And we see the light. This will come beyond the boundary we can live in the future**. The researchers will be taught how to bring it beyond the boundary, and this is ?? 3 legs ?? flight. This has never been achieved. Now we are on the understanding of the new T. We can load this system with vitamins, with a change of line of thoughts, we can put a person across it and within seconds the cancer is gone. We'll show more advanced technologies that have been developed. What would you like to have if you have seen the first video when you can control the speed of rotation of the liquid and then you just put the magnets in that position floating, what would you like 1 megawatt or 1 kilowatt. You have to be knowledgeable and understand the implications and applications of these technologies. It looks very much like a spot on 3 legs, but (3:06). ... Q: How big were the fields? **These fields cover when we can control them 10 - 20 km. Q: I said, how big the sphere is? 5 cm. They're very powerful ... look at the shape of the Pl. Scientists at CERN would kill themselves they spend billions and it can be done for a few pennies**. Just watch and **observe the distribution of the Pl, it's so homogeneous and unique**. ... you get 1 spark to each part of the ball, this is a homogeneous Pl. **It has never been achieved**. We saw it in multiple reactors in the Chinese setup. Q: sometimes it looks like the top half and the bottom half, it's very strange ..? **It's the loading that gives this effect. The sphere has been loaded to create this condition. They have full ignition, we have already taken off**. (3:08). If you measure the M field flow around this system it stretches for kilometers. **Q: Is this what you call opening the Pl? This is actually igniting Pl on its own by fields. There is no liquid in there. It's an empty space**, you can actually. **The researchers can the 2 halves apart and the system will light up outside. This is what the future lighting systems will be, by the interaction**

of fields. ... This is a direct warning to the American government, peace is the only path and the science shows. We can choose where to light up. If you see it the lighting is light, so we can concentrate certain fields in certain positions. This gives us a new opportunity in the space travel, energy, feed. **It will take years to understand the implications of this light the way it is**. Q**: Is this what is happening to the entire planet, perhaps, at this point** and time, in a way? **It can be created to become a feeding system, yes**. The knowledge is there, it can be done. (3:10). Is the planet entering into other field conditions that would create, we are starting out what we see right now, but maybe we are entering into the space conditions which would start to activate? This is an experimental system but it has been setup, but the .. **I only teach as much as the researchers can see and understand and this team has reached that level**. There is **no liquid whatsoever in there, it's total Pl, and it has been set. you see clearly lines. They have drawn the lines where to be, and when the lines line up, everything lines up**. If **you make it all the same, the whole thing stays on full time**. I told you that you'll see the silver lights, it's not prediction, it's knowing and understanding the T. In the coming weeks we'll show a full flight system. If you go back to the first video the **perpetual motion of the liquid, now you can understand we can turn it to 1000 rpm or 500 rpm and you just put floating magnets on it like this and you have your generator.** The history of the science of the man has changed as of tonight, because it's in public. the (3:12). research has been worked on by the KF. ... Creation of motion in the Pl has been one of the key understanding of the creation of life in the U in motion. You can dictate the motion, you can replicate the structure of the fields of the planet earth or any planet and you see how it behaves and you work with it. Q: Also it looks like a miniature galaxy in there, it must be a spiral what we se as rotation? There are ways to set the system center of motion, and this can be controlled, it's amazing how you can control it. The things are being learned, they (3:14). are in their infancy and are being learned. Very rapidly they are developing to everything else. There is video where the things fly up on the top but I don't know if you want to show that, these are the next steps in the development because **if you reverse that, which is on the top to the bottom this system just takes off.** Our researchers still have to get to that understanding. ... (3:16). .. We have to keep the identity of our researchers secret these things are dangerous in the hands of ... **Creating lift and takeoff is very easy** if you understand the video which is coming in. **If you turn the ball upside down it creates a condition inside the ball, the ball will fly**. They still have to learn what that means. (3:18). Shows image of a Pl lighted full sphere. They can light up a house at no cost. It stands on these 3 legs otherwise it would be on the floor. .. they are going to show the flight. You can do the same thing with the system or change the polarity of it. ... This is like the moon in respect to the earth, you see how above the moon you can take materials off. Flight without fuel, it's very simple. .. (3:20). (waiting for the photo upload) .. Okay, I'll show you this but you have to understand this otherwise it doesn't mean anything, if you create the opposite condition, replace the system, then you understand, **the new flight system you just need to create the opposite condition**. ... You have to understand what you are looking at and then you'll understand how flight systems have changed. **Q: Is it a Gans produced light by electrical induction, would it be something like neon lamps**? No, **no it is totally plasmatic interactions**. (3:22). Do plasmatic lights interact with our lights ... can you open it ... if you create the same condition and reverse it into the ball, the ball will fly,

then the paper will fly. But the researchers have to do that. ... You have to notice at the paper how it flies... by interaction .. **don't forget the hand of the man is another Pl condition, another earth or whatever**. You decided to come ... **paper is made of AA, it's a vertical object from vertical people so you'll see when you introduce the hand to it, which is of the same, it flies towards it because it is more powerful**. (3:24). It's not just paper ?? and if you reverse that position with the MG fields of the planet, then you can see how easily flight can be achieved, and you can control it, this is how flight systems has literally become child's play. This ball on the screen, even if you opened it, it would light up. You can open it in a controlled manner and position. That guy says, is it a neon light, no it's a Pl. It's a new knowledge. Forget about what you knew, this ?? is finished. The sun doesn't have neon lights to come on in the day. Q: Could this be replicated without the N coated pins? **What pins, those are only legs they're not pins, so the ball can stand up. (3:26). Technically you should have no intrusion of material into this syste**m. ... Just watch. We use everywhere N coated material because this is the only way you can work in the Pl world, if you use Cu wires or whatever it's finished, it doesn't work. Plays video. The paper flies off the N wires and sticks to the hand. **This is what I showed to the Americans. If you reverse this condition to the bottom of the cores, then you can fly**. (3:28). **As I said, in many of the teachings when you tune into the MG field of the destination, you just get attracted by it. You can do Cu plates or whatever you need and it will still do the same. If you get an antenna beneath this core, then you create a condition in respect to the planet earth and you fly**. Man has passed the time of jet engines and the rest of it. He is done with the motor. Our researchers still have to understand more and more, that they can do. ... After this we have Dr. Claudia to speak about the international conference in Brazil. She needs a translator. ... (3:30). .. **Now we can fly objects, we don't need to rocket launch it. If you understand the teaching before, if you create a dynamic system in front, if you can put another ball in front of the antenna and create a condition, it repels it. The whole system can fly in any direction. Rocket propulsion to put satellites in space is over**. The weight **and mass become irrelevant**, because the weight is respect to the dynamic system of ?? If you look at the piece of paper or whatever, but still it is made of Pl of electrons, protons, and neutrons and molecular magnetic field. ... (3:32). .. We have many videos showing the development of the space program and we encourage many of you to start working on it and we'll change the course. (3:34). Any questions. ... **The importance of this is that now we can achieve the light and if the teams understand the work of it and extend it further, the boundary of the containment of the ball will not exist anymore.** The strength of the field of the Pl will go past the physical boundary, and then the system will go on its own flight path. Then you have to learn how to control it, which way it goes. And how to launch it. We have set out to bring a fundamental change and the knowledge will be spread very rapidly. **The creation of the motion doesn't need liquid or gas, it just needs a condition of the presence of fields**. (3:36). The sooner we understand this now especially they are resetting their space systems in China, **we don't need to have liquids inside to fly, we just need to create a condition of the Pl inside the reactors**, which can be done in a very easy way. Claudia comes in to present. (3:38). **Claudia said, today we are going to present in a conference. For the first time she'll be in a Congress in Brazil** ...
(3:40).

(3:42). (3;44). (3:50)

(3:52). Thank you Claudia, we wish you all the best and you have been working hard i Brazil .... Last video, this is with the permission of the Chinese research team, we'll show part of it, you don't see most of it. This a only a part of the Chinese space reactors, one of the most complicated, sophisticated developments. We control every space of this system. A lot of you don't understand that there are a lot of things happening around this system. It's one of the most advanced systems and considers every aspect from production of material, water, and everything else which can be assessed, direction of lift, flow, (3:54). it's an amazing setup. Shows video .. **if you look at the direction of rotation, at one point it changes and flows backwards with the field forces**. .. **These systems are setup as a twin system. (3:56). One is loaded to behave as an electron and one as a proton as you call it. The loading is very special**. A few weeks ago I showed you these cores and that the red color went to clear, we had consumed all the energy in the system. **What you see on the ground at the bottom is a launch pad. We had never taught a launch pad system, what you saw with the paper** and the ?? this is the purpose of this system. **With this base we isolate the system from the ground and the earth's MG field forces.** As you have a launch pad in say NASA to boost the rocket, **here we neutralize and feed fields directly into the central cores**, then as you see above there are other systems internally in this reactor, space system, that allows other actions. System control, ?? production, don't forget this is a prototype system and is an initial version. Now the system has been opened up and doesn't have any more motors. With what we understand and develop it should be very easy to operate. Other systems have been added to it to understand more of the Pl. **What you see as a rotation with what you see here is created with motors, it will happen automatically through Pl positioning of the side reactors. (3:58). On the belt reactor you see 36 of them on one belt** and it moves inside of this one for different operations, there are a number of belts and settings in this system that is for pulling the fields from the top reactor down to the middle, while at the same time giving boundary condition to the system. **This is the reactor that emptied itself at 1 AM, the whole thing at the central power station of the city, causing a black out. Every reactor is specifically loaded**, these are mostly multiple core reactors. ... when we go back into the space limit, we have to create neutral ground, very much like airports where people can walk into and enter. ... this system is already obsolete that is why we re showing it. (4:00). **Where this reactor is standing we created a lot of water, rain. So we could create the condition of liquid that the system rained things down. This is important for agriculture and other application**. ... It's a very elaborate system and can deliver megawatts of energy. You see we have **come a long way from the Iranian reactors of 10 years ago and in the last 3 weeks we have frog leaped more than 10 years. ... we have groups in Russia working** and a lot of development going on around the world. I think this was a gift for the 1st of November for those who prepare a lot of other things. We can reach any nation, no borders exist and this is another dimension to the T. (4:02). **What you saw in the initial presentation with the balls lighting up, this is what you see in UOFs ?? flights in the center**. They dictate their own speed and rotation and direction of rotation, because the fields overpass any current flow. **Many times this system stop, recuperates, starts again, all the reactors together and then decide how to do**. What you saw in the earlier

videos, rotation of a lot of lights, it came from these balls, all of them get lit up and they release their own energy. **As we learn more through K Seekers we'll release more. We are in a game changer**. At KF as we have done in agriculture, medical, and in the space development, and now **in the next few weeks we'll see the flying saucers**, as you call it, as we have shown with the paper. The K Seekers have to understand the knowledge that they can go a step further. They have been taught that they can fly any time if they can set it up. **But when they don't see it then you can't teach it**. As our friend came and showed how he could fly with cardboard boxes, this can be done. **But this program is some 4 or 5 months old and it's already obsolete, it's been dismantled and reset, and restructured with no motors. You have seen why no motors in the other presentation in the transfer of liquids of the Pl, (4:04). and in the other one where there is no liquid. The time of these things is over, we are going to a total Pl condition. No matter state**. If there are any questions then we can stop. Q; What does elevating frequency ... (stops him) I have never heard of such a thing so I can't answer him, I don't know where this comes from. .. Q: Stephan, **Does the system (clear empty ball that lights up) have to be Nano coated, or is it just induce the Pl inside? You can induce Pl, you don't need to N coat. Once you N coat you put a filter, above or below you won't accept energy into the ball.** (4:06). If you go back to the light system, bulb and other developments there is only 2 or 3 watts very little has been used, ... A very small amount, we are not looking at kw of energy. **If we take the power boaster out, it takes a little longer but (the Pl) stays permanently, because the Pl will pull in from the environment very rapidly what it needs**. (4:08). These are literally **open (space) reactors**. Q: **Is there a load as such? No nothing, why should you have a load? Q: Well in terms of increasing the Pl current I suspected? No it uses only 3 - 4 watts. It's very much a repetition of the system in the Insano, with 129 Tesla**. The K Seekers are still in a very preliminary stages, they are just learning, if they can ofllow what has been done, you don't need any system, because you can build a system inside this naturally that it absorbs enough energy from the environment that it lights itself up. **We are a few weeks away from this, they have to understand first before we go there. It's a giant gain for knowledge. It's an open space, once you set up the ball and open it up, you still get the lights.** Q: Someone is asking if there is a carbon rod in the middle of the reactor? (4:10). (silence). Is that a no comment. No I don't think so. Test it, a lot of you can do this, it's a knowledge which sits there. **It goes through a Pl current, when it does it becomes much easier to work with. There are new system to be setup but they need generators for them, you don't need anything**. Now we put the pressure on, we release more and more information, new developments and the change of the things. How fields and reactors are made.... **These are the very first systems that were used in the space, universal transportation, simple reactors like this, they just replicated the bandwidth system, they took the Pl inside, they understood, and they just flew. If you look in space sometimes you still see single things like this flying, these are the ancient systems**. And some of the races that have just come to the knowledge still do these things. **Spherical systems with the copy of the Caroline core and the rest of it. (4:12). and the system flies, you just have to create a condition for it**. We are what you call the newcomers, but the T which I have taught you passes this point, because to get to this from the SF takes millions of years of understanding. And what the use ?? if **we can transfer knowledge across to all 7 billion human beings, we transfer the**

knowledge across this way then going through a process of thousands of years to understand. Yes, it says it uses only 9 watts of energy. Tell this to people in CERN, they're going to shoot you, call you a liar and everything else. **Q: Is the giving and loving aspects of it, can it increase or decrease the flow, communicating with this living light entities? I don't think our researchers have got to that point yet**. The AZ team is working in that direction. John is very busy with it. Any other questions. Shall we call it a day, I think we shared a lot of knowledge today, some jump in the science (4:14). and understanding of the T and in a few weeks time we'll share more, hopefully. We are a few steps closer to show you the space reactor flight. Q: So Mr. Keshe is that what you mean, "good morning"? A very good morning. ... (4:16). We are still on the target of flight into space for 2018, we still have 60 days. Now we put the pressure on. ... A lot of you are scientists in your own way. .. My job is to create a peace condition which comes with knowledge, sharing it and food security ...
(4:18).
Video
END

249th Knowledge Seekers Workshop - Nov 8, 2018

(Change to pure PLASMA REACTORS without motors, In agriculture using reactors to change the environment for huge areas at one time instead of Gans watering, When they create the condition for COHN or Amino Acid for the plants then irrigation won't be needed, Grow crops in places they normally don't grow, Harvest is 2 to 5 times more means national food security and freedom, Food energy medicine delivered through satellites, The lighted ball that was shown last week is not like the lights we know bulbs, fluorescence, laser it's a new phenomena a natural light energized from inside from the soul if you remove the ball it stays lit like a sun, It's plasmatic he discusses how the light and the fields rotate in the ball to form a vortex of energies that lead to the creation of the soul or Principle Matter and once created you don't need the ball, You need 2 directional motions for this to happen vertical and horizontal, Interaction of your own soul with the reactor to create light, materials, A single man can reproduce himself to create a partner, It's the will to create that leads to creation, In space you have to feed the soul give and receive, The plasma light is also a mirror there's a dynamic plasma in the background like silver spaceship, The 3 layers of the skin creates the bone structure, internal organs and the brain, Up to now the motors were the limitation through copper and magnets, After lighting plasma ball you can pull the plastic ball apart and it will remain lit, Massive fields above the MaGrav Unit, Create both vertical and horizontal rotation and you'll get bright light then don't need containment or reactors anymore, Foretelling civil war in America need to stop and elevate Trump's soul, In China we created the maximum amount of protein in rice plants, Nobody has ever measured the speed of a magnetic field, I am the Creator and I can teach you as much as you can understand, We need to elevate the soul of the man to that level that there shall be no religion, When you get pain in places it means something was wrong and the plasma mended it elevated the soul, This technology will bring a new type of man on this planet, Claudia talks about Brazil conference, , ,)

(:19). ... After last weeks workshop many of you said you understood more and began testing the new systems. Claudia's conference was successful in Brazil and the following day the Minister asked to meet with her. There is **a massive progress coming in Brazil** and we'll let you know as it develops. (:22). The government has taken a direction in regards the KF in the health application and we have seen this in other countries. We keep silent and we hope they succeed in there work. ...
(:24). .. with the change in the American elections it helps the KF in there work for peace ... **From now until after Christmas into the new year the majority of our work will be the space T. The Space T is the backbone and is what this T was built on**. We can develop and expand every aspect of the T. (:26). ... **What is the new development. Up to now you put the Gans in bottles and Gans Waters for agriculture**. When we deal with governments, the farmer can't go and water the plants everyday, he sows the seed and it's the mercy of god if it rains, that is all he has. If it rains he has a good year otherwise he'll suffer. We are a space T based, Earth has its space, a hectare is too big to be watering by hand. .. (:28). .. you'd have to get a bucket and water everything. Now we come to the real application of the T, space and energy development. What does this mean? We use the space over the land to cultivate. If it's a rainy year the farmer gets a harvest, but what does it need. The rain brings the water which the majority is used to evaporate and the majority is back on the same position, but in that process some of the Nitrogen and whatever comes in gets converted back as much as possible to a protein, or whatever that plant is doing. **With the new space T, we call it a space, which means we change the space. The land and above, this way we don't need to irrigate or create the condition that you have to water. You take the job off of what is, the process of creation. We know that all plants need protein (COHN), so one of your main condition is to create abundance of "Mr. CONH", in that process what you actually do is to create a new environment.** There are different ways to do it. As you have seen in the tests you have done, you hung bottles around. How many bottle can you hang when you do a hectare of land. Or **you create the new systems of using satellites, in which you just deliver the Gans (:30). and you allow for the change of conversion. These systems to our estimate can cover 10 kilometer distances**. Very much like the ?? masts, you ?? the land across, in a way that allows you to bring in .. you cover everything that is vegetation, **but this time you make the availability of the Amino Acid (AA or CONH). This is what the plant needs and it absorbs it and in that process in interaction with the O and H it creates its own water, moisture. And N and C add to the strength of the growth and partially in that process AA is absorbed. That is why you don't need much water**. The next step in agriculture is very much the change of the environment over the land at the time of the harvest. The beauty of the new T is when harvesting over the land you can change nothing to go from one seed to another. If you harvest wheat and then next time cabbage they all need the AA, nothing else, it's the same rain. In that process part of what is the ground will come into play because the **minerals on the ground decide what can grow best. But that is not a problem anymore because you decide (about) this environment**, whatever is in the land then you decide what you need (to add). Then you find out that it grows perfectly. So you make it and attach to your AA what the land in that area produces (what the land needs). (:32). With this new T you can change the condition. **So you can grow wheat in a place**

that has never grown wheat before, the same with seeds and roots. Some of you have a problem in that it is only for plants above the ground. What about the roots that grow underground, potatoes, onions and the rest? There is no problem. All you need to do is to bore holes in the ground, (for the reactors), it doesn't matter the distance, the fields will interact. Your potatoes ... very small number of reactors will create the condition. In the past you sowed the seeds, in the present way you don't need to wait for anything else, you can still use the above ground systems but to bore holes is one of the most effective ways. It depends on where you put the containers and their depth, to cover the area. **This has been done and it's amazingly effective. It changes the harvest up to 2 to 5 times, what you harvest underneath**. These are new ways in which we will change the conditions. ... (:34). If you go a step further, what we see at this moment in time, in time of trouble, earthquakes, natural disasters, hurricanes like what we saw in the Caribbean's where people had to wait for the food and medicines to arrive. Again if you understand the process, it can be put on space satellites very easily. The KF will have these ready for the coming time in emergency cases. By positioning satellites with reactors, we can feed people, and deliver medicine **according to what is needed. We can target delivery of energy. We are trying to show you the new developments that have come out of the KF Chin**a cooperation with official channels. All the latest developments will be delivered to the Chinese channels, where in the time of disaster we don't need to wait and everyone in the valleys, hills, rivers, and seas will be covered instantaneously. **Again the human being is exactly like a tree, how we created an environment, that it created a protein, that it could absorb, we can do the same**. Injuries, infections, all can be covered, this is what in the next 12 months the KF will endeavor to deliver to proper channels and distribution of knowledge, now that we have moved into the Pl as a space T development. (:36). There are a number of solutions which will come through the new space T of the KF. **One of the biggest problems for nations is feeding their nationals. If you need for example, 1000 tons of grain to feed say 10,000 people, when we can put national space conditions in an environment, 1000 tons will feed 1 million people, because the surplus will come from the space position. Because now the food isn't a essentiality it becomes a pleasure. We can deliver medicine the same way. In a way we take the control through food out of the hands of nations. This is part of One Nation program**. Very soon we'll announce cooperation with nations in these kind of technologies which will cover immediately**. It's not a T to come, but one that is already completed and we'll deliver it. You have seen examples of this in a very different way, when on the 5th of May the Russians took the American ship by just flying over it (in the Black Sea). This time we don't fly over to disable, this time we position to feed**. The T belongs to the KF and we'll use it, extremely effectively to change the course (of humanity). (:38). **The eradication of hunger is one of the main priority of the KF because this where the nations will talk**. We are setting up One Nation, but through collaboration with the nations. Those in the KF research teams extend your research to see **when you run a new reactor without a motor, because the motors were a problem you were limited to the M field of the motor, with the new systems as we have shown it, with the dynamic fluid**, grow plants in your garden and see how they grow, extend the fishermen, and animal husbandry. **You do not need to rely on feeding the man the food as you can transfer the energy. This is how you are going to be fed in the space**. We take a few kilos of

potatoes just in case near Christmas the British boycott the roast, but the knowledge is there and we can create and replicate the potato exactly as it is. But we will not ?? this process, because **by delivering the energy directly to the STM, to the physical position of the ?? the total mass of the body, you'll feed and feed**. (:40). Would we have any mouth to enjoy the potato, or do we have the emotion of it the way it is. ?? In the coming weeks the space development has taken a new course and we do it, or you do it, nothing has changed, nothing in the direction of the knowledge has changed, now we are going a step further. Test these systems, non-(motor) dynamic. **The motors have a problem, we always knew, but you were not ready to go into the next step**. Now the T has been shown last Thursday. **Rick if you can put the lighted ball from last week, if you look at the shape of this light, the pattern of it, the way it shines, it should give you a lot of information about it. We don't see these kind of performances from the light bulbs we have in our houses, nor from fluorescence lights, or laser beams. If you look at this light you understand it's a new ball game, a new phenomenon, a new understanding of the T. If what you have not noticed, in the ball and the light of it, the size is dictated by the ball, if you can move this ball, the light shall be there like a sun. We have always energized to stop, but this time we energize from inside, from the environment to dictate. Reversing and going to the center, to the soul, (:42). the way we fed the soul, would allow what the light dictates. This is a natural light.** In interaction with the body of the man or the plants would give whatever the plant needs, the conversion is already done, there is no heat, except transformation and transition of the M fields. For this technology, those of you who understand, with this T, a new cycle , a new knowledge is released. Now you have enough confidence to take it over. **Understand how you create, not the rotation of the liquid, but the rotation of the liquid of the plasma. It's the same thing. You have enough confidence, when you sit between 2 balls and you see that it helps with my pain or cancer, so these fields must be going somewhere. So these fields are the same in a reactor rotating somewhere**. What you have to do, especially the research centers is using these dynamic systems with no Gans, liquid Gans, and putting them in front of each other and see what you collect here (between them**). If you are looking for confirmation of existence**. Water, vitamins, minerals, we have a long way to go, **none of you up to now has managed to confirm the production of vitamins, or transfer of energy equal to vitamins** as we have. (:44). Now **we need to build confidence in all of us, by those who are ahead how this energy can be transferred and absorbed**. Would you stand in between the reactors and see how much fatter you get, or stand over here and loose some weight. Gaining and loosing weight in this system is very easy, because you only take what you need, and the body in that process since it has taken whatever it doesn't need, it burns into itself (the extra). We have entered a new understanding, and what are the opportunities and possibilities, beyond your imagination, because now we have seen with the reactors, what we called the Cup of Life and the orange, now this orange is dynamic and it carries everything, and this water is the body of the man, be it his emotion or physicality. We saw our Chinese friend drinking water for 7 months and not needing food, that's gone, it's old fashioned, the new Pl T can feed you for hundreds of years in space, would it change our character, behavior, would the elevation of the STM change the color of your eyes. (:46). All are possibilities. **Would we eradicate genetic diseases and inherited defects, all can be done, because we can put in order the basis of the**

structure of the man's DNA and RNA because we have a system in balance that can feed both. RNA carries the electromagnetic fields, what we call electromagnetic field on the matter state, but on the plasma condition of plasmatic fields of all information of everything which the ?? particles and the cells of the body need to produce, we can correct to it, add to it and it will change. We showed you last week new reactors, we are holding back, maybe next week or the one after. We'll release more information. We are waiting for a couple groups who are testing to catch up. ... in that process we need to understand, this needs time to digest, no need running so fast. We have known this all the time, for thousands of years. Now research centers are working to start creating the conditions. We need that time, gap for you to setup and then we go. We allow more expansion in the knowledge but we have to be able to see it to gain the confidence that it works and is there. (:48). Any questions up to now. **Q: You mentioned 2 reactors that can change us in whatever way we want, instead can I use 1 reactor and my soul or my emotion.** Between the 2 the same thing should be possible as well? Who said not. Do you want to feed the reactor or get fed by it. Or do you want to find a balance in respect to what is in the reactor. **How far is the reactor from you? How close are you to it, because positioning changes the ratio**. Q: Can I use my soul to interact with the reactor and adjust the fields at different locations? Of course you can. You can carry a reactor in your pocket, when you feel hungry you use your soul to feed your body. It will be done, these things are not theory anymore. **But be careful what you put in your reactor as a mixture**. (:50). **Shows video of reactor lighting up** last week. A number of people are testing these reactors, dynamic systems, balls, and they developing it, I have seen a number of people who have achieved what we showed last week. You see this light (in the ball) if you freeze it somewhere please**, it's a strange light, it doesn't light up its surrounding as such, the boundary stays within the Gans**, within the ball and it covers to the edge of the ball. Look at the shadows on the table, they don't change that much. Where with a normal light we get a different proposition. **You have to reach a point of saturation**. People are using different ways, some are sticking 2 wires in the middle, some with a distance between the wires and they are trying to create a jump inside. Everybody is doing it, but now you have seen what it is. **The shape and color of the light, these are all different properties of M fields**. (:52). It's a very unusual picture, **it's a plasmatic (light)**. You see these fields, now **if our people use their understanding of rotation. now it's a different game. At the moment they see the light as coming from this way and that, but if you can make a system where the light rotates, the field rotates, then you create interaction.** Those of you who are in this game I explained how you can do it with development. You have to be able to rotate your plasma. At the moment this Pl rotates in this way, we need to get a dynamic system Pl that is very simple. I'll explain to you where the new game comes in. The new game changes to this, which is something you never considered. **He draws rotation lines for sideways and up and down.** With the dynamic reactors the rotation of the motors enforced rotation in that direction. (:54). In the new Pl T in which you have no motor but you enhance the motion of the fields, the game is much different, and if you manage to create such a condition you'll find out that something very interesting will happen. **You will enforce the creation of the soul. You enforce the creation of Principle Matter, and at that point when you do, the Principle Matter will take over and it goes beyond the boundary of the light. Then this thing has to interact with the interaction**

of the fields of the base, which is the earth. The way you see this light, it's a small rotation but the interaction of the field charges. Now you understand**. It's very much like a tornado which tries to find its center, which absorbs enough energy from all the plasmas that it breaks open. It opens its skin and you achieve long beyond the boundary, you achieve lift and motion. Then you dictate how much of this energy you allow to come out, to what distance to create**. You saw last week the dynamic flow (can you switch pictures to the dynamic flow ball from last week), if you look the condition of the fluid, now you are sure the Pl field (:56). is dynamic. Now you have 2 choices, fill up the whole container with liquid or find a way to create a dynamic Pl fields without liquid and then **you have to find a way to create 2 directional motion**. Why 2 directional motion? Because it's very simple, in the U, opposite to what you lot have taught, you see motion here is in this direction, if you fill it up, this one might go here, and what you might see is, you need this one, (a field goes perpendicular) to create that. Go back to the knowledge we had, this is what you call, (our eyes fool us in a way). If you look, the fields are in 2 ways, in every direction. Now you understand. This will match up with this (M to G), etc. and in some part the same light and in some parts opposite. **Then you understand the creation of MG field, (:58). why the earth has G balance more or less everywhere.** Even though it's not balanced, if you look at the MG field daily report you'll understand that a lot of these things change very rapidly, but with your T you can achieve because you have predetermined all the characteristics. You see the rotation when you take the liquid away it will still be the same rotation but how you rotate it dictates the span it's going to come. **You need the 2 to be able to create motion and lift and protection**. As you don't have anymore motors and you can control this in a very simple way by the fields from the other systems. ... you can do what you like. **Creation of this motion without a motor is one of the biggest achievements of the U.** In a way, what is going to happen if you understand, if you explain this scientifically. This is what happens, **compactness of energy creates ratio. (1:00). And in that way this will turn in .. so it creates a vortex of fields inside**, very simple. In the next few weeks those of you who are trying this, you'll find that you can control it. You haven't reached a point of testing that something very strange is going to happen to some of you. **It will be interesting to see how far any of you can take it when it happens to you. In the creation of the envelope of fields accidentally you find yourself to be in the center of the fields. I wonder how would you react**. Even though you are standing outside, but the fields are so strong that you become part of its center core, center line. But what is going to happen to those of you who get to this point, **you will see with the vision of the STM and not with the vision of the eye. Everything changes. Because the physicality instead of being at the boundary of you now has move the boundary of ?? outside, you are part of its outside, you are part of the fields**. (1:02). Confirmation of physicality of existence doesn't exist because it creates a lot of confusion. The reason I teach you these things is that some of you, I have seen some videos, are about to get there but you don't know what you are walking into. Those of you who work on these dynamic systems or at home, you bought yourself a ping pong ball because they think they can do it, it's fantastic what you are doing, you can so some simple works. Some people say that I need a spherical ball, but you don't need, absolutely not. Walk to a hardware store buy a ping pong ball and syringe, **fill in a cup with Gans's, extract some and inject into the ball and then empty the ball. Then you have**

to understand how to create a condition of dynamic flow in these balls, very simple. Don't forget you are still finished with the matter state. You move into Nano state. **Connect yourself to some small battery (1:04). but try to create a boost in the battery and then you'll see the light come out slowly**, slowly, but bring the battery as close as possible to the ball because the ball will feed the battery, not by the connection but by the fields which are coming out of it. There you are, you got yourself a dynamic ball. It cost a few cents. Then you can **start testing. Put them in the house and see if the obesity of the child goes away because he takes what he needs and doesn't feel hungry. The whole structure of the physicality of man depends on different strengths of AA**. Very simple, create that condition of AA, go back to the principles, and create a dynamic field flow, the availability of the energy at the point of conversion. In a way you become the center of the energy yourself and you take what you need. **A dynamic system with a gradient of strength in the key to the operation of the motion in the U.** So it should be easy for man.

Any other question. (1:06). Q: Can this T be used for food and peace in Palestine? Bernie says, it can be used anywhere. ... You got to understand a simple thing, that this T doesn't know race, color or religion. You feed the wheat and the same T feeds the apple and the orange. Do you think man is any different with respect to race, color or religion. The situation with Palestine needs a little more growing up by a small nation called Israel, and what we saw in the elections of this week they lost a very big support. (1:08). The same with other places, political wars in the name of religion and race will soon be over. I wonder if we can make any systems that won't allow any Jew to become intelligent anymore, which is very easy. They are not very intelligent people, they pretend to be and the bigger baffle they make the bigger bluff they make. ?? what we call Einstein, the biggest rubbish ever in the world of science written by a ?? because he was a Jew they made him a hero and he is actually a zero from science point of view. Do not worry about Palestine or other places, I am more worried about what the man will do in the space. In a very short time man will be forced to be united, you will see, we see the pattern coming up. As many of you start testing then many others will start testing. The KF T soon, a lot sooner then you think will be part of national governments strategies, feeding, health, energy, space, and everything else. **The biggest problem will be how to keep people busy. When you don't feel hungry or aren't sick and have learned what you see in front of you, how to make a safe shelter. I wonder how many of you are going to be slave to imaginary money**. (1:10). We are uprooting this condition that man has created for himself, valuing everything, and it is coming up very rapidly. You K Seekers have done jobs without your knowing it and it has changed the course of humanity. You are working at it very nicely. Just keep at it, develop it, move from ... you are like a bunch of opposition that we have to win the vote of, like the left wing and right wing and we have to bring you to the middle ground so that you are all happy with what you got and what you get. **We had to push you from dynamic nuclear into Gans's, then the cores and cores and everything else, and every time moved a lot of you kicked and shouted. I promise you after this we are not moving anymore**, this is as much as the intelligence of man can understand, more or less from the work of the U. There is much more beyond it. I promise you for the next few weeks I will not change anything. But if you can go through this process of what you believed, you took a water and it changed your headache, or you cleaned some dirty water with it or got some

energy or whatever, **now believe in the dimension of your own soul and then interact with i**t and see what comes up. (1:12). I'll go back to what Mosrac said, I taught this before but maybe now you'll understand. This will be interesting for Mosrac. **This is done by many races in the space**. You'll understand very soon why I am bringing it up. **He speaks about the STM and a single reactor. I said to him it depends on how near or far away from it you are**. This is the soul of Mosrac ... then you have this dynamic reactor, again plasmatic (shows arrows going top and sideways). He puts his hands here or here. Remember I said a long time ago that **you can put your hand out and take what you like**. Now you understand, this is the earth (Mosracs soul) and **this is the sun (reactor), interaction of the field of the man creates different conditions**. If you understand this, (1:14). if you want water you'll have it. **Because you get the emotion of it, if you want gold, you collect gold, and you (get) emotionally rich too**. Now you understand where the T is going. Very simple. We are reaching a point for man to be ready to go into space and I always said, how are you going to feed yourself if you are the last man standing. **Are you a solitary animal, do you want to be on your own or do you understand the process of what is said in Torah, would you like to have a spare rib. Would the dimension of the STM lead to creation of another for him not to be lonely in the space** and would you ever become the last man in space. Or would you choose some religions that you have many spare ribs. **It's the will of creation that leads to creation**. If you wish to die with ILS, you dismantle it (physicality), and if you wish to create, it shall be created. (1:16). And it will not be illusion but separation and creation of another dimension and when it takes shape and form, then you disconnect. Now you have your ?? Madonna. **This is how life starts in many parts of the U. In the history of the man, he has moved from one village to another and he started a new tribe. One man and one woman they started a village and it becomes a city. Now if man understands that the STM is the creator of them both**. The name of the village is any spot in the U. Start with Mosrac game and try to make your Cups, and try to see if what you feel on your hands is what you feel on your body, your taste, feeling and emotions too. **Don't push too much on your soul because you haven't found it, you still don't know how to react with it**. Q: **Why do we have to feed the soul when going into space, I thought food is for the physicality and not the soul, going into space we go as the soul without the physicality? What do you think your soul can operate without receiving**. My god you have to go to class one, go to the first teaching and come back up. (1:18). **The process is what we call a MG field, the soul has to share, and this soul is already sharing with another one, and this one with another one, whatever it doesn't need comes and this one takes from it, what do you call it, feeding, or absorbing. You still need to feed**. You know that song that says, goodbye loneliness, that's when you can become the creator. Then it becomes hello happiness. **If man's understanding of the dimension of the T becomes deep enough, but allowing the understanding, you can change everyone to the level of the peace. And this is what is happening now**. If you leave one nation out of the equation and put them back in their place, isolate them, the rest of humanity will gradually reach the peace point. **Wherever we see a problem, amazingly the superman is there to create more war to rescue. At the moment the earth has a superman called America**. (1:20). But the problem is the superman creates his own problem to be able to come and rescue to confirm his own existence. **The knowledge (given today) ... what I am trying to do**

today is to inspire you to take a step. Part of the teaching of today and from now on, we have taught you enough, you have seen a lot of things, motion and everything. Now it's time to inspire you to move into the next step, to test, to move into total understanding of the T. Because as I said, **I stopped making things for people because you copy**, now I teach and inspire you to try because you have to gain enough confidence. Any other question. Q**: Plasma light is this similar to polar lights?** I don't know you have seen it, what do you think. Do you see a mirror in the polar light, if you look at some of these lights you see in the ?? it's like a mirror, why. **Why does a light become a mirror of itself? What do we know about mirrors? If you look at this ball like the ball you have there (plasma lit ball), not only do you see light, (1:22). but in seconds you see the mirror of the light, the mirror reflection**. That should have given you a lot of knowledge and insight, **that within this there is another dynamic system, which is like a mercury in the back of a glass, but in a dynamic system. This is how when some of you extend into the space you'll get your silver SS** because of the reflection of the lights in the back creates the illusion of the physicality on the front. **This is something I think you missed in all my teachings** and I was thinking, shall I teach them or not. then I thought maybe they understood, but they never understand. Let's see where we go. He draws 3 layers, this is the skin of the man, now what happens the interaction of the fields **in 3 (layers) leads to manifestation of what we call physicality, but there is a problem. Man's skin and all the problem of the structure of the man, which man has never realized, has a big problem. This surrounds itself. In that structure of surrounding itself (1:24) creates a special characteristics, which means centralization of the Ca**. Now if you go a step in a different direction **something very strange happens this becomes the first layer, second and third layer here, but the physicality has to appear in here. The containment of the skin of the man is the creator of the internal organs. This skin on the stomach level is not the same skin as on the arm level. The skin on the stomach dictates not much ribs but a lot of liquid condition in the stomach. The condition of the skin of the arm creates a center bone and the rest of it**. So the skin in its 3 layers just doesn't create the skin. This skin now has to create something in here, **the 3 layers have the other way as well M and G. But in one case something very strange happens where now the bone structure goes out and the other parts come in. (1:26). You call it the brain**. But at the same time allows for the Ca which is the ?? center of the ?? cell to be existing in the ?? spread. But if you look there is a very strange animal here called the skin of the man. **This skin through its interaction dictates creation of the Ca outside. But this skin through the interaction of its 3 layers dictates creation of Ca inside. So even though it looks like a skin it has different MG fields where it holds the Ca out and when it can no longer hold it in it rains in and become the ?? brain** of the man. If man understands this it should be very easy **for you to decide if you are going to have a SS outside or one inside**, you are going to have a solid ball outside or a soft interaction. This is something that you could not do up to now because if you go back and listen to most of my teaching when I spoke about dynamic reactors with the motors**, I always said that the problem with the motor run reactors is the Cu, it's the M field on the Cu or the brush or brushless motors, on the magnets. You had the limitation and none of you could understand**. There **was a mutation and a creation because that magnet, that dynamic motor which was rotating you, was dictating second, third, forth layers outside away down the wire of**

the system. (1:28). Now you have gone to a dynamic and that doesn't exist. The game has changed, now everything goes centralized. Now those of you who work on the new dynamic systems with a power supply, you have to move away from this gradually in a very simple way. I know 1 or 2 people who are working on that. Create the parallel system that they feed each other. Go back to the understanding of **my teachings. RATIO! GRADIENT!** Many of you working on this system .. they were saying, that they went through the video frame by frame, and they said, oh there is a white clip there, and someone says, oh look there is a wire hanging. But did you see what is hanging on this end? Did you **make this a ratio of 1:2000**? Or is this in fact, this wire is here and this one there. You haven't gained confidence, you still need these little power generators and sparklers. You don't see it but you have it there, but we keep on teaching it. (1:30). What about if you put your sparker here and see what happens in this one. But (you say), I put it there but it doesn't show anything. It means the field is too far. Bring it a little bit closer until you see it lighting up. **This is Mosrac and this is the system, Mosrac moves or the system moves. You have Cu, gold, food and everything else, and if you get it right you create the field of the emotion of happiness, satisfaction, anger and everything else**. Where would you like to move from happiness, anger, food, orange and everything else ?? Now we can play this game because we have moved the biggest obstacle, but you had to go through it to see it. The biggest obstacle which I keep on saying were **these beautiful motors that you kept on hanging. This was your demise, the biggest stop to your progress, but nobody listened to the teaching**. Many times I said the brush with your motors is the problem, now you understand. Now that you have seen the dynamic rotation without the motors. **This (the motor) was your filtering, where the energy loss came into. You continuously created (energy) but you couldn't see anything because this motor was the cause of your energy to disappear**. You couldn't build it up, you were feeding it, the motor was your other channel. Now you understood the science, you take away. (Like an) electron and proton, they both happily run, bring it a little closer (to the other one) and it runs faster, move it further away it goes less. (1:32). Now there is no limitation and you work on the principle of the U and not the man's little motor. Sorry Chan lin even I love you so much but find a new system, sell motor less reactors, you're intelligent enough. Now you can understand how **the game has changed because it's as simple as A, B, C. Look at the work, this is your reactor #1 and #2, even though it's here, small, but this needs to get a feedback on its fields otherwise you have a waste of it. The sun, the earth, Mosrac and reactors. The STM and the physicality. There is no difference**, now that you understand.
The sun and the earth have no motors rotating it. Now it's the STM and ?? If you put Saturn, smaller fields, weaker strength and you get He and H, come closer earth dynamic fields you get H and N, and if you go closer you get heavier elements. There is no difference, it's just that up to now we had a leakage in the system where you could not hold on to it. (1:34). Motors ?? The other leakage you had is your cable into the wall. Now with this system, if you understand, this is gone too. **You become a universal independent system. This is the change and the development** we have brought in the past 2 - 3 weeks and now you have seen it, you have seen the light. If you go a step further and understand the work of the soul, and I just explained it in a very simple way. What did we see in Einhooven **when I showed you the light, he draws ball with both directions of fields and a person next to it. In the field interaction of the STM and**

the physicality, which strength you choose in the path of the energies, you call them different chakras. I call it, H, N, C, O and whatever, or is it the reverse. Now that we have come to independent reactors, life is cheap. Now there is **nothing to stop man to replicate the work of the U. My teaching is complete**. You had a problem, you had to gain the trust, to see the fields, (1:36). you made the cores, and now the reactors. What I said last time, **I choose my words very carefully in my teachings, then I go back to it**, oh, he said that. Listen to the teaching of last week when we were showing the Pl ball, I said, that **if you pulled the ball apart the Pl should hold. If you have created a dynamic system in your system you don't need the cup (plastic ball), you have created the light itself and it will feed itself. You need the light shinning without a container, this is your next step of development, but you will not achieve it until you create both dynamisms (vertical and horizontal),** which is very easy to create. If you look we have done this in the coils. **In the creation of the coils I created this in a hidden way. The same fields as it goes, the same fields as it returns, in this position it becomes different and it creates a vortex**. How many of you ever tried to **measure fields above your MaGrav systems**? None of you, not many of you, because you never understood it. There is massive energy (above it). This is the energy we are looking for, not in here. This is what we call the antennae. Now you can work. Many of you were puzzled last week with the hand and the paper. (1:38). A ?? friend ?? hand ?? . Now you understand the progress of the T. **Maybe some of you will become very clever, you put a MaGrav system here and one here, and see, this creates a rotation here and this one here, and see if it shines. But does it have to shine to confirm existence of rotational fields? I keep on saying we are pushing the space T beyond the understanding of the man**, but the K Seekers have been educated enough that they can see the next step. It's time for you to move and move very rapidly. Have enough confidence in what you have done, and that what you do is correct. Create a motion. If you have to confine to see it, that's your problem, but if you understand the average in the law of physics of MG fields, then this field should be much stronger then here. Do you need a container. Or like when you go camping, (1:40). you take 2 pieces of wood and some metal and you rub it against each other and there are **sparks and the fire starts and then you take it away when the fire starts. Are these 2 pieces of metal, like the 2 MaGrav's? The answer is yes. You can create 1 and when it becomes independent then position it there, and make another one there, etc, and then you'll see that your spaceship SF is complete. That's why when you see the SS in the sky you see the bright lights but you don't see any containment.** Because this is how this started. And they link up, and according to the strength you decide if you ?? I told you I will take you into the space T beyond your imagination and now you don't need to imagine, because you have it on your plate. Will it work if you mix, which you will be happy to do. If you create this and then this. You'll have both and then you'll get your light. Then you strengthen it enough that you can just guide it, move the lamp, the light will shine. Armen Golan do you need anymore teaching? Are you flying yet? I am in the lab. (1:42). Now you see how the interaction of the fields work. If you can create a dynamic rotation, this you can create a plasmatic rotation in the flat. **A combination of the teachings of the past, this creates fields in dimensions here and this one here. You get your space reactor (in center) without containment**. Oh, I forgot something, you might get some gold, water and other matters around here like we did in China, there you have your food.

There is no need for physicality, but if you increase the pressure, the field reaction will take over and you'll get physicality too. I can't teach you any more, it's in your hands. And **if you go and do it the right way, what you loaded up here, please change the soul of Mr. Trump, don't take away from it because it gets worse, just elevate it** and it moves up. **The biggest nation on earth has divided between color and race for the first time in elections this year. And the poor and rich have separated, Democrat and the other side. And that they have seen that it is separated internal war in America is guaranteed in the coming time. And this is what we have to stop. These guys all have guns at home, nobody will be left alive.** (1:44). Any other question. Q: (hard to understand ..) (1:46). I am from Holland ... **I can't see the fields with my eyes but I know they are there, when I was a child I got hit very hard** ... (1:48). with your knowledge all the new people don't have to suffer, you bring a treasure of knowledge for us, I am very grateful. As you know we are a Dutch structure ... I feel very close, I have been in your dreams with the equinox reactor, when I worked on the future in my dream. **The position will be in the coming time, many of you will see new dimensions and new ways, because working with these reactors elevates, you'll receive energies, fields what we call, from the systems and the environment. We change the environment, there is no difference between a man and a plant**. What we did in China (the tree grew within weeks), we changed the environment**. In China in the tests** which will be released soon, (1:50). you will see (results) not by us but independent labs in China. The average protein in Chinese rice is 11 - 13g/100grams. **The highest ever achieved worldwide is 20g/100 grams because the seed doesn't have any more room to accept the protein. Each section has its own capacity. By creating a new environment in agricultural lands in China, we have created 20 grams, the maximum amount** the plant can absorb, no Nitrogen, nothing has been given. China has never produced 20%, only in the best labs in the world have produced this. Just watered it for 27 days, (and got) 20 grams. This means the energy in the environment has transferred back into the plant, it has taken as much as it needs to take, its maximum to guarantee survival. **Now here we watered, here we used the new space reactors and the STM is no different then the grain of wheat. You receive energy and you elevate, and that elevation gives you a new insight into understanding, and seeing the strength to be fulfilled. The wars will finish. An emotionally satisfied man through the strength of his soul doesn't see war as a solution**. Because he doesn't need to, (1:52). he has, he has reached the point of maturity. If we have managed to do this in China, then (to do it with) man is not that big of a problem. But up to now you have had the limitation of the dynamic reactors (with motors). Now you don't have and **you are exactly like that plant, ready to be elevated to reach the maximum capacity of the STM in interaction with the environment of this planet**, which creates a peaceful condition. **I have walked you into the path of peace, you have no way to escape, just watch**. Do you remember the orange and the man, the orange is too powerful and tasty for man not to taste. **You have to understand the structure of the brain. This is the STM , the closer the fields are to the brain, to the soul, there is less interaction, the less interaction creates a more peaceful man. The anger comes at this location, animal behavior sits here (farthest out), when you elevate the soul, see what it covers, even the anger of the animal becomes peaceful**. (1:54). Because this receives more ?? (the inner brain). Very simple. But up to now as I said, **that thing hanging**

(motor), was your demise, now this thing (reactor) is free to feed (the man). ... Now you understand how we have come to where we are. People like Dr. Rodrigo, you don't need to change the child understand elevating the soul of the child. In that process somewhere the strength of the field will interact with dimension of the RNA and DNA and what is wrong, will convert itself, it needs time. **When you correct the strength of the RNA the DNA will change the ?? because if you look at it RNA and DNA are same thing, one is much stronger and if you strengthen this one this other one will strengthen and it puts everything in order**. Now you understand where we are going, you came from the reactor and made the Gans', (1:56). then you had the cores and motors, now you have the dynamic square ones, you make your Pl without the containment, you energize it as much as you like, and let the sun shine. If you can do this you have your space reactor. I go back to one of the teachings in Barletta, remember the hands and the light in between, now you understand 2 or 3 years later down the line how the light is created. The dynamic system is the heart, the emotion is ?? ?? . There is everything to feed, you don't need to feed the child. ?? Now you know how to make non-tangible, non-physical, Pl which you can control to feed not only yourself but ?? in any dimension in the U. In the space reactors travels of teh future we go a step further, because if you understood how to create these things then it's very simple to go to the next step. (1:58). De you remember, stronger but tighter you create in your SS one which is stronger moves further and in the space reactor you move into it ??? How much you made this system tighter, stronger, the further it goes and then you might move into it. And you can continuously feed this to be ahead of you, trying to follow it ?? moves you, speed of light. **Nobody has ever measured the strength of the magnetic field**. This is what the future stands, and this is weeks away. You learned about the 2 cores. Somebody should have asked, why is he teaching us this. This creates motion ?? if you know how to use this it creates motion this way. The interaction would create light and it grows ?? speed of limitation. But if you know how to pull one in and one out, you create your ?? plasma, no containment. (2:00). Any other question. Q: **When you elevate the STM is it that experience that man become so peaceful that at that moment man can travel to different places**, I say travel because you can witness a different place while your body is still in the physical, is this the same thing as the planets, let's say earth you have N, O and the closer we get to the sun it's heavier elements, When there is elevation of the soul does this mean that the physicality also exist in a different manner, in that perspective, in that level of existence? Very much so. Q: Yes, this is how I see it also. **This is how our soul finds the dimension of its existence. (2:02). Interesting thing is in the near future some of you will do a test, and it will bring you a lot of shocks, when you see it for the first time some of you will deny existence, and some of you will go mentally demented with what you see, but this is part of the process of the knowledge. Some of you will deny existence, and some will elevate to the dimension of existence. Some of you will do a test which will test you, not for you to see the test. In elevating your soul through the process of creation, in creating other dimensions of the soul that you release what is released, you will come to understand something new**. What will shock you is this, in respect to this you'll see yourself as a man, in respect to this you'll see yourself as a new creature. Many of you will go through this because when you enter the dimension of the space the STM doesn't change, it's the environment that has changed. (2:04). Then you'll wonder am I Either or am I Or. And how come I

exist in both dimensions. This is what I have been teaching you for a long time, man will change in the dimension of the environment. Now that today I have taught you the FP condition of the containment, and you understand it, it's in front of you. **Would you see yourself as a man or as a new creature? The soul is the same, it's the interaction with the environment that creates the new dimension**. This time you don't need to go to planet Zeus to see how you look, you create the dimension of planet Zeus in front of you. Many of you in the labs, once you go into non-dimensional, non-tangible systems, if you achieve it, you'll be faced with it. Is what you see the reality and not an image. Then would you be animal behavior here or peaceful here, or would it be visa versa, or would you feed the STM to be its maximum that he finds peace in all dimensions. (2:06). I told you**, I am the Creator and I can teach you as much as you can understand. It's time for man to mature.** You have to understand what is about to come and to be and you have to taste it here so that when you go outside it doesn't become a problem. **Minimal strength has to be at peacefulness, so we need to elevate the STM to be all the time at a minimum which is a maximum at the point of peace** as I explained just a minute ago. It doesn't matter what you manifest yourself as. The process has started to make One Nation out of this planet and this is how we'll do it. It was the biggest regret to see the election results of the US in the past 2 days, the color of the man put man in different position**. Now the race has taken the color of the politics in a direct way. This has to stop. (2:08). If we don't stop this very fast we'll see the same process as Nazism in the 1930's and 40**'s. But the teaching has to be there and you have to understand how it will effect you. How you can handle it. **Can we elevate the STM to that level that there shall be no religion because man because wise enough to understand the process of the creation and doesn't need any false intermediaries. I promised that I will take the stones of Vatican back to the coliseum.** The most important part of the teaching in the past 5 years was to bring you to this point, freedom. **Freedom of the soul as it is without the condition of tangibility and now you have it**. (2:10). I could have taught this over another 5 years, but the time is right and the men of peace are in position to deliver it. Man will accept this T out of fear of his demise and not out if its beauty, but I am making it so beautiful that man will not even think about his demise. **Some of you who are Jews go and listen to One Nation, One race number 56 you'll understand who has lead you.** Some of you who follow the others will understand that you can give your soul but not your physicality because you can change your physicality. **Man in the space will not wear suits and jackets, etc. he'll create the cover of the skin of the man through the STM that he needs no covers. ... there will be no exports in the space**. (2:12). Any other question. It's fairly quiet on the front here. .. they have surrendered .. Q: **How can I capture the energy** (that is given off)? But you did show bringing in another reactor and it sprinkled gold and matter all over the place, deliver light and heat and everything else. So why would you want to capture the things .. **You are still in the world of physicality, so we have a long way to go. You have to go and educate yourself. The position is, when you reach the maturity of the soul and what I have taught here even in the past 2 minutes, move the reactor closer** and you get yourself gold, and come closer. Do you remember that old song it says, come closer darling somehow I can break away. ... Come closer and see. (2:14). "Come closer I like to taste your smile". See if you can taste the smile in your reactor. Will it be the soul of the reactor or its physicality. And if you touch the physicality it means you have a long

way to learn. You're still physical. Q: **Does the soul need to capture energy** or does it just go with the flow that's happening at the time? No it's a hippy. Q: It's not into capitalizing it's just into going with the flow. **What it needs, what it gives and what it takes .. mankind from last week has entered a new position. And we teach very direct. I don't think any teaching has been so direct as today and last week**. You have to understand that the team of **the KF research teams are part of what we call, pure souls and physicality in any dimension does not really matter and they are devoted to change. A lot of research is done by them**, they come up with, try, test it, and stand all of it. One of them writes to me, I put these things on my head, I am getting headache, I am afraid I might change my soul or something happened inside. **But I thought, the soul has already been elevated. You might get a lot of pain in places you don't know and think something, it means there was something wrong, (2:16). It's mended. The Pl T, the beauty of it is the purification of the STM**, which means we elevate it**, it stands all the bandwidth. And that in turn will change the soul of the physicality as it gives it more, It does not find a solution. We'll find a new type of man on this planet with this T, we'll find new behaviors**. Can we create new suns to shine across every land that it feeds and makes man peaceful. On the other hand when we all become peaceful, would we cultivate for our hunger or for purity of just doing something, which means we don't need and nobody can pressurize or boycott us, but we do it just because we have to keep busy. **We'll grow the food and we leave it on the streets for people to have if they want to have the pleasure of it**. This is not a fairytale, you'll see. We set out to do in the past 3 - 4 months an amazing amount of work has been done for the confirmation of the T and governments have started seeing it. The biggest problem we have had was to show governments**. A lot of us did a lot of research with small pieces here and there, and now these small pieces are being taken to governments and they are prepared to invest everything to change the conditions of their nations. And when all the nations change to one direction, then we are One Nation. I am ruling with love and not with gun policy. (2:18). The rule of the U is no conflict**. And we created the ground for it, and man now rules himself. If you start making these non-tangible or non-containment reactors and you will see the change on the human race in no time. I will be interested to see how many of you shine when you are walking down the street. Would it be radiation or as the guy said once, would it be "soul-ization". The soul will shine like, if you go back to the teaching I said, the **members of the EC and UC will be recognized by their soul**, now you understand. These containers, these cores and balls had a filter that was just below the strength of the elevation of the man. Now you don't have any limitation. Should we call it a day. You have a lot to think about and a lot to change. (2:20). I hope you understand what has been taught today and I hope you don't do it for the sake just to see what it is, but for the sake of changing the man. ..

... About the KF Wiki ... and Journal available. .. (2:22).

... I am using my position as head of the KF to push for something. (2:24). Now that we have opened 02

(2:26). .. They'll publish Mr. Keshe's paper on Black Holes. ...

... but remember one thing you need a pulse, the variation gradient (2:28). and the fields to ?? even within your plasmas, there's ?? gradient, you'll achieve. I taught you how to make the flat rings, but ?? ?? that's the key to your success ?? Gans's. That's why we'll

achieve it, not by ?? one ?? each one of the gradients creates the wind of the Pl. ?? I think those of you who understood the last 2 sentences ?? ?? Thank you very much for today, and these kind of teachings take a lot of strength out of me. Thank you ?? ??? hopefully somebody will show a flight system for a soul. **Claudia to say something about Brazil.** (2:30). Good morning Claudia. Would like to tell us what damage you did last week in your teaching? Can I ask you a question Claudia, what was all that shouting and dancing? Rui translates. The dance was a call for the soul, because people aren't aware it's like they are sleeping. ... Our way of showing was that the physical body has to be present with our soul. (2:32). What I couldn't understand was why she was clapping her hands and shouting? It was an exercise ... make your MaGrav fields reach your soul in the moment ?? What does "shaman" mean, she said that and clapped and everyone said "shaman". It means a "call". To call your soul. She said, it means I am here, I am present. Have you noticed I have a new name in Portuguese, it's called ?? .. (2:34). ... Would you like to tell us what happened in the conference. We had a big chance to be seen, even from ministers of government in areas for Health. And they found it very interesting. ??? ... And that we are in a new movement of life and new ways to reach the people in health. We are linked through energy. (2:36). The state of the M fields around changed and the public felt it, and in that way we managed to prove the fields. After the meeting one of the members of the Health department, called me for a meeting, ... (2:38). They showed interest in the results that I showed. We got an invitation for the KF to participate**, the program is called Project for People Organization. To test plasma therapy. (2:40). ... they will try to make the Pl therapies official, we are organizing it, we are coming through the front door**. We are going to show the Pl T and what it can do . ... (2:42). ... I didn't expect so big an acceptance in the Congress. I have been invited to collaborate for the Congress next year. .. (2:44). (2:46). ... Claudia could you submit your report in the next publication in Portuguese ... (2:48).
... in the coming weeks a number of papers will come out of the KF China. ... (2:50). It will show the full data so that you can use it for your government ... increasing the harvest more then double. ... (2:52). **In rice production in China we have increased the harvest by 2.2 times. Partially some of the harvest was lost due to pest. You'll see in the corn section that the seeds were somehow different, the weights are different**. Next season when we plant these seeds we see if things changes, do we get better growth and harvest in the next cycle. In the northern most part of the country they are testing to see if they can create 2 harvests. It's the same in other parts of the world. I think we should have people submit papers in sections like agriculture, health and the rest of it. It's very nice how the whole thing is getting structured. It's in the hands of all of us and not just medical applications. In the next few weeks, very soon, KF is going for a full trial in medical applications of one of the major countries in the world for it to be commercialized in public domain. (2:54). This is a major breakthrough for us to start these trials in a couple of weeks. And it's done by the pharmaceutical side, they have seen and they want to test it and very rapidly we'll change the course ... the topics covered are diabetic which is epidemic, high BP, weight, and old age recovery. In countries like Japan looking after old aged people is breaking the back of the nation. They don't have enough young to look after the old and they have to bring people from Philippines, Vietnam and Thailand and they don't understand the culture of Japan and they are causing problems for themselves. With this way we try to alleviate the pain of the old and

that they become more mobile, more energetic. .. (2:56). .. we are concentrating heavily to change the course in China. ... this will extend into may fields, now that I have taught you how to make the free plasma you understand that freedom is absolutely free from now on. You see many stars on the screen, none of them has a core made of plastic, none of them rotates on motors, they are free and now I have given the same knowledge to mankind. It's time for you to make the ?? ?? **Thank you for such a beautiful day. I think I have taught 5 years to reach such a day as today and I think it's a beautiful day to understand the freedom.** It depends on how man will use this knowledge from now on. (2:58).

END

250th Knowledge Seekers Workshop - November 15, 2018

(New more powerful fuel for space flight, Tests show no genetic change in super high crop yields, Technology will be offered state by state as breakup of US coming in exchange for stopping arms production, Information to disarm nuclear weapons has been given to military men, Shadow particle plasmas, You make the environment around your spaceship hundreds of kilometers, Spaceships can park in space and look like stars some are near North Pole, Mirroring effect with the light of the plasma, It means there are 2 magnetic fields through it you learn how to create gravity and to creation of the magnetosphere and body of spaceship, When holding 2 hands together to create light you have to have different strengths in them to create dynamism, How the 2 halves of the body are coordinated, Sleep is in 2 4 hour cycles 1 side rests while the other is active this means the man will always be alert to awake in time of danger, This is important for treating illnesses, , ,)

(:19). ... We'll open the first UC center in South America in Mexico. .. (:22). .. **They'll test new fuels for the space flight. The present Gans T is not powerful enough on its own to provide the pressures for creation of the motion and gravity. You have to comprehend the ?? the lights you saw, the interaction of the fields, the motion, but we need stronger motion and fields. (:24). I have released in the past few days a new material hundreds of times more powerful then the present Gans T, this allows us to enter the phase of the shift, and what we call the lift of T into new dimensions. This new fuel will allow researchers to achieve lift and motion and creation of the dimensions of gravity**, very soon. I'll be testing this in China in the coming weeks as part of it and then we'll release more and more information on this. **The new fuel allows us new dimensions, to reach powers that the present Gans doesn't carry with it to release its own energy**. Now we can develop this next cycle. It's very much, as close as it gets to the Iranian nuclear power stations for space T but without radiation. This T is on the back of the Iranian knowledge and will be developed further, through and with the Iranian and Chinese government officials of space T development. We bring it in the open to be done. The collaboration of the Chinese government and KF tightens up rapidly to reach, achieve, lift and motion, under the control of his Excellency president Zhi to enforce peace. As many of you know we are fully committed to the Chinese government and nation as we see them as a peaceful nation to develop the next steps of the space

development and defense T for space. We have brought you up in a soft way with the Gans's so that you could see, but to breaking through 3 dimensional conditions of tangibility, (:26). a more powerful fuel is needed. **This new fuel has been introduced into the KF directly to our research centers. It will allow more powerful up to 1000 times stronger plasmas through the same Gans's** and the development of the Gans T. We are proud to release this T. It was to be released in 10 years, 5 years time, that it could bring another condition up. But now we see the maturity has reached enough to be able to bring (it out) to people close to the KF in the past 2 weeks. The teachings are going in such a positive way that it allows us to introduce the new T much more rapidly. We tried to explain but now you have to understand **a number of teachings which went on last week, and a number of you have understood the principle. A lot of you have seen but haven't comprehended the gravity of the knowledge that has been released in the past 2 teachings.** I have ?? in a way, power through these teachings in the next 2 - 3 weeks that we try to achieve and keep to our promise of 2018 for the flight system to be seen. This will change the course for a lot of things for the KF and it's changing the course for the development for the KF. We need to understand that this new development will effect everyone of us. We enter a more powerful T, but at the same time in tune with our lives, it will not change, not go into dimensions, (:28). that will be changing the structure of the physicality, but it will work and it's needed to be there for the next steps the development and teaching in respect to the evolution of the STM. As we cross into position of the operation of the STM, which is the creator of the physicality this new T is needed. I explained to the medical teachings yesterday that **the doctors of the past used to deal with the herbs and roots up to a hundred years ago. We developed a T which now handles chemicals and other things, we call them pharmaceuticals, it's a development in the knowledge of the man. Now that we know and understand that the operation of the physicality has a direct relation with the STM which is the creator of the physicality, our doctors and men of medicine have to move and become medicine men of the STM and the physicality and the soul of the physicality**. This is a step further and higher. In this process we need to introduce to these men of medicine new technologies that they can see and effect, and interact, and **elevate the STM that with it they can change the physicality**. This brings new dimensions and interactions that it gives a scientist in the space T and especially in defense and in peace process to elevate the men on this planet much more rapidly. We needed to introduce the new T and new power T. (:30**). A parameter of this T was shown on the 5th of May some 3 years ago by the Russians, but nobody understood it. When the Russians used the T to interfere with the most advanced American navel force** in the European waters, after more or less disabling electronically the whole system as we said before, **they changed the mindset of 27 navel officers**, that they didn't want to be onboard another ship, they resigned. It was said, they did not want to be where they can't be defended, but in so many ways through the elevation of their soul, the direct effect of the defense T, further developed by the Russians, showed that they saw no need for warfare. Now with the new T which we release we are extending this knowledge, **where we enforce it. Where men of military see no use in using arms**. But our work is effecting a lot of people, governments, we are directly and indirectly involved in negotiations for these kinds of work. It's the job of the KF K Seekers to understand this process very rapidly. **We will release through the right channels in the KF new agricultural data**

in the coming week that people who are involved in agriculture can approach their governments directly and deliver the change of course in agriculture in every aspect. (:32). Data's are coming in through research and getting confirmed how much this T can change (things). We have to do this as some governments don't understand how such a growth can be achieved, (perhaps they think) we could be using fertilizers or whatever. It's not even ?? because if you are ?? (boil) you shouldn't even see these changes. There was concern from Chinese government officials that such a rapid growth in one cycle .. should and must effect the genes and genetic structure. **The tests in Chinese laboratories have shown that there is no genetic change.** And this has brought a new dimension, we changed teh environment. If many of you can't defend your position at this stage the people who tried to take what we call the KF T will take it into obscurity and they'll win. KF has decided that in the next 30 days we'll release a full dossier only toe the KF people to deliver to their nations. These documents are signed by officials and independent laboratories to show the change in protein, starch ad everything else except genes. We show this in rice, wheat, corn and one more material for human consumption of oil. This is part of the program KF has gotten itself involved in, which is food security. (:34). We had to. The data is so convincing and correct as it is done by independent teams and not KF. 12 .. the results are staggering.

(:36).
(:38).
(:40). We know about the fires in US and if we come to an agreement with teh government to use for peace we'll release this T immediately to the state of California. We have a prerequisite. **The state of California is one of the most advanced arms dealing states. Peace and elimination of the military development in exchange for the new T for the people**. It will be refused because as more people become homeless and entangled in teh fire, you are used to it**. We will make this offer state by state. We see teh breakup of the US 50 states in teh coming time**. You will understand soon the why and how. It will happen in a very beautiful way in which each state becomes on its own a nation ?? to carry to defend but to look after their own citizens, The setup is already there and it has been done by their own government, itself, but it will speed up in the coming time. We are prepared to negotiate state by state against reduction of arms and building of arms in each state in exchange for peace. Peaceful application of the T. We target the US and certain European governments on this matter that we can breakup the monopoly on arms and collectively bring peace. We will deliver the new space T and new space materials which we delivered in teh past couple of weeks, the space development allows us to do such a thing. (:42). **We have released information to men of military on how to disable nuclear weapons.** This is a clear indication to the governments. 13

(:48). Fifty to 100 years in the life of the span of the U is seconds. The T is in the hands of us, it has been taught but we have to understand it. People who head the KF medical teachings have to open their eyes, it was explained in a nutshell yesterday in the private teaching, the same goes for the agriculture, and defense and space T. **When we speak about defense at the KF we are not talking about military defense, military defense**

is dead. It doesn't exist and if you understand this T you understand it's long gone. **You need to understand the exchange of shadow particle plasmas, that you can move it ahead of you, that you can center to, as at the same time G pull can pull you to itself. You create it and then you use its creation to position yourself, to create dimension of the speed, dimension of G and field protection**. If you understand the process in the long run, what you create and can create the shadow of it, it becomes like an electron that you deliver what we call the proton. These are the technologies which in the defense T brings a lot of need in the space for it. It brings a transition and the change of the condition for life, how we can live. **How in space when you light you need to create the spaces where there is no need for wearing clothes when it's not more then 1 or 2 meters from your umbrella SS. (:50). What you need, again, position, and with it position hundreds of kilometers, you have a free running of the land or the space. In the development and the further steps that we'll teach, you make your SS a zone where your people can live in the space, you create and you become the new planet**. You decide the dimension and the surface which is there, then when all the passengers have had enough of space gazing, you close back to the next step. Creation of tangibility for them to be able to start life. **There are many SS which are made like this and when you look into the deep sky they look like stars. It's literally created in the center by a massive star, which is called a SF spaceship**. They have a different look and a communication line and they work in a very specific way. **If you look into the northern sections of the North Pole you see 3 of them, they have positioned themselves with a forth one. These are not stars, they are SS who have managed to create tangibility** and distance. There are 2 on the equator lines, we are preparing the human race for direct interface with space and the Universal Family. (:52). **Knowledge has to be transferred and trust built up, but first of all mankind has to learn that every man that comes from space is not Christ or Buddha because they know so much. Now they become ?? This is what we stopped in the KF development**, we don't have any priest or temples because this is how you have to learn to become. It's a new knowledge, embrace it and don't make priests, Christ's, Moses and the rest of it. **The only thing you need to understand is how does it interact, why does it give and what does it want to take. Can I afford giving to it, or can I afford taking from it. And what shall be the interaction and what shall I see.** Do I need the eyes to see or the STM. In the teaching of last week and what you saw with the disk and the light, you saw the mirroring effect. **You see the light and then you see like a mirror, what happens and why? In fact, how do you see these mirrors, because this becomes important in creation of your Pl reactors for the space T. How do you get the mirror and light effect? The light effect is when the field is mono and you have not created the second division.** When you go into the mirror effect, which means there is a secondary fields of (:54). the strength behind this, that this creates reflection and blocking of the light. You see it as its own reflection. **A glass is a glass, until you put mercury behind it reflects the light. This is what happens inside your reactors.** If you look at your light system which was shown last week and the week before, you see a white light and then sometimes you see like a mirror. You have to understand what that mirror is. **It means there is a secondary effect in the background that reflects the light and absorbs what it needs that you see like a mirror. This is the first step towards the creation of the body of your SS**, but the difference is that this time the condition of manifestation is inside your reactor and not

outside. If Rick can show it, you see the light coming up and for some seconds you see like a mirror, there is nothing there but you see it. **This is because of creation of 2 dynamic fields, one is inside the other which blocks the light from the one which has passed through and reflects back.** So this what it meant when you saw it, but you are not educated to it, but it's simple. **There are 2 M fields working inside the system. This means that you have achieved a double M field. (:56). The double M field means now you have to learn how to control it to create gravity, the shielding, and what we call the magnetosphere.** This mirroring has a significant importance, it means the knowledge of the KF K Seekers in space development has reached a point of maturity of double M fields. **Now you have to understand how you can create one and hold the other that in that process you create that mirroring effect, the creation of the SS**. What it will do, **this SS at the moment is somewhere in here (inside the ball). the fields are random in respect to each other and what it needs is for one to become stronger then the other one and then you get the 2 double M fields. With the stronger one trying to feed the weaker one the process starts, the position in interaction, it creates the 3 layers of the fields which you need for creation of matter state**. There is a lot of knowledge in these pictures, but as you are not aware nor do you understand the interaction of the fields, to you it's just a light. **In that process one leads to the other and creates the point interaction, the balance and this leads to manifestation of physicalit**y which you have been looking for. But at the moment this is happening inside the ball, now with the new powerful systems (:58). we pass the boundary**. Or do we need to create a second reactor in the space and in time .. so what you need to do is to create a space-time, a second reactor**, then you'll see, as we did in the Iranian reactor, own leads, and which one depends on how you load it, it will interact with ?? earth's MG field which is closer will interact and then you dictate the direction of motion. **In the past week I have seen many of you go through this process** of trying to, ... **in respect to creation of 2 dynamic or plasma systems that are put opposite to each other or in an angle in respect to each other. This might not give you what you are looking for because one reactor has to have a different power ratio then the other one. Otherwise just 2 reactors of the same will just create a field**. You have to create different dynamism that the interaction of the 2 (1:00). will lead to interaction and creation of dynamic plasma. I have seen many of you putting 2 MaGrav systems opposite each other, yes, but take 1 coil out or add 2 coils in. **When the 2 coils are equal they won't give you much**. If you use the dynamic motor which creates fields, then use another one which runs this way. Go back to the understanding of holding 2 hands facing each other, but in fact, if you want to create the structure of the Pl you have to hold your hands next to each other from the small finger to the palm of the hand, next to each other. When you hold it face to face you create 1 dynamic system, when you hold them in a 90 degrees hand to hand, facing each other. You put your hands the way you pray, only 90 degrees, you create a field inside, in-between 2, **because 1 hand creates the fields in horizontal line, and the other creates fields in the vertical line, if you can control the strength in one hand or the other , the light will shine in your hand**. The 2 creates dynamic, with the hand, this is way man prays, in so many ways. But you don't see the light so you don't understand. Now you understand the purpose, when you put 2 hands opposite to each other, you literally create that motor effect. (1:02). When you put your hands against each other you create the field direction in the middle, because 1

rotates this way and the other the other way, and in the center you create a dynamic field process. I said this many times to you, that you can deliver lights, but you have to understand. **You can't do it when the 2 hands are equal in the strength, you have to have a different strength in 2 hands that creates that dynamism**. You have to understand the science of it and not just to be the copycat of it. There is something I have taught in the private teachings and it comes back to you in the private teachings, many of you who know the knowledge of the science as **I explained in other teachings**, now this is important when I tell you that the body of the man is a cycle of the evolution of the man. **If you look your brain is in 2 halves, and your body is in 2 halves, and in the process of the knowledge as we gather, this one works with this one (right to left) and left to right.** Stand still for a second and think, the next time ?? There is the STM, there's the heart. But there is a step further. In the present world of science and the present understanding of the world of creation of the man, (1:04). there is partially**, part of the knowledge is missing, and as we said it has never been understood, it's been fabricated, as it has never been understood** it has never been extended, part of the knowledge especially to our doctors it will be an amazing insight. Go to the body, and those of you who work with psychosomatic knowledge you need to understand this, it is an essential part of your work. Go back to the same process, does this ring a bell with you, or the knowledgeable people in the world of medicine, or sleep pattern**. Why do we sleep on a 4 hour cycle? What happens to the other 4 hour cycle? Why do we need 2 4 hour cycles to sleep, and why some of us can sleep only 1 cycle**? It's very simple. Those of you who are knowledgeable in the science of the body of the man, you know one thing**, the lung and the nose works, one in the space line, when the left nose works the other one rests, and when 1 lung works the other one rests**. If you haven't understood, then now you do, that each cycle of the living in the life of the man, is literally, collectively dictated by this. (1:06). One 4 hours the left side sleeps, one 4 hours the right one sleeps. **Which means the man will always be alert. This is why you can wake up in the time of danger**. And why do you actually go through **the whole process of waking up from sleep is a handover from the left side to the right side of the brain. Now we understand why we have 4 hours of rest in 2 periods**. One 4 hour (period) for the left hemisphere which controls the right side of body, and the other 4 hours is for the right hemisphere and controls the left side of the body. **But in that process the STM is all the time, all the time alive and working**. This has been a mystery of science, now we understand. (telling of another instance ??) When you sleep 1 cycle of 4 hours you need, instead of seconds gap, a 24 hour gap, so this time this part sleeps, and tomorrow (24 hours later ??) that part sleeps. It brings a lot clearer vision, people at the point of power, **many powerful men, governmental levels and world leaders go through this cycle**, because the soul doesn't trust the people with whom they work as a leader. Churchill was 4 hours, Hitler was 4 hours, I sleep 4 hours, many people sleep 4 hours. We work this way. This is important to people like Dr. Rodrigo if you understand (1:08). how to use the presence of the STM at all times to change illnesses, why you're successful sometimes and other times not. 10

(1:24). What is actually already here, we have to understand it to see how we can apply and use and develop it that it comes to be an advantage for the man. We have to take

steps in the opening of the horizon of the knowledge of the space. We have to become tolerant to new knowledge and don't get locked up in conditions of ?? the man. Any questions. Q: ... one time I saw that I was 2 but I suppressed my other side because I was left handed in school and I had to become right handed. .. (1:26). then I started brushing my teeth and shaving with both hands ... Can I ask you a question, were you forced to do it or were you encouraged to do it? I was forced ... I want to ask you a question because it's important. How did you feel? In the beginning a little down ... What does it create now? .. ... What I am trying to ask you is how did you feel initially and what was the emotion afterwards? (1:28). My soul was damaged from the environment. I was hiding myself because I thought that I was not beautiful..... I don't like to say, I would like. The interesting thing is, you said as a child you said there was some part of it you didn't like ?? , but now that you speak about what you can do with both hands you are proud of what you went through. Now you can write with both hands and wash, where at that time it was totally different, it had to be done. I know exactly what you are talking about because I went through the same thing. I was totally left handed and I was forced to write right, given double time to do exercise, and given all sorts of encouragement and punishment because being left handed was a crime. And now I only write with left hand and do everything else with right. (1:30). It creates different complex conditions, recently I watched a movie with a child going through the same process by the parents, the left hand being tied up like a rope to the side of the body, there is something wrong, you have to use the right hand. And then what does it do when you grow up. ... people in the west don't understand this, but still in the east writing with the left hand is some of the worst things you can ever do. It's like God hasn't been kind to you or the family is a disgrace. You have to understand the logic behind it and you have to be right handed to be like others. I went through this in my first years of education, the only thing it did, I still write with the left .. but I write with the left and everything else is done with the right. It puts you through a torture, but in a way it balances your brain, you see life in a totally different way. I eat with the right ... the enforcement has brought a change in the balance of the physicality. (1:32). .. They should have taken an MRI before they did it and then after to see how has the brain changed. I think it's changed, I know. For good or for bad? ... What I learned from this is to angle, I a great ?? .. ... we are already mirroring ourselves to the other sides, with love and not agony. Then you already have the components to radiate, then if I put my intention, I see lights going through my body through my skin and then feeding the STM and the creating the equinox, and then it radiates around the world .. that is what you teach and try to give us, and it hurts me that many people don't understand it .. But what is interesting ... (1:34). if anyone can come up with the statistics, what does this create when it comes into brain hemorrhage and strokes. Which part of the body gets more damaged or is it equal. Or does it create different things. As I explained before I had a silent stroke around the age of 40 and nobody sees the side-effects of it. It's something you don't see, it just changes you because of the position of damage and then you think if I wouldn't have been forced to use the right hand it would have brought different balances to the part of it, would the effects of the silent stroke be different. Many people don't understand the effects the stroke has, because certain things don't change and other things change and you have no control or tolerance to teenagers for example, you can't tolerate young people, things are logical, it doesn't exist, sequences are too rapid to be slowed, read about it on internet. If

you don't understand it, it creates havoc, and some people don't understand it. That's why I try to promote for people to understand. It happens between the age of 35 to 50. If you have a stroke at a younger age, which happens in the lower part of the brain, you may go paralyzed. If it's after 50 - 55 you get it on the side of the body, it depends which way the energy was released. But silent stroke ?? spreads equal and it touches emotion and tolerance. (1:36). And you become intolerant to the illogical things and things which have no sequence, which doesn't make you .. ?? handling teenagers is very difficult ... because they are adventurous and the body doesn't have that time. And part of it is you don't understand that there will be another time that there will not be time to survive the stroke, so everything has to be done in a sequential manner that there is no time. .. and does that effect when you change your hand from left to right because you bring into operation different part of ?? ... I met a guy who had a stroke from age 19 and he was paralyzed from the neck down, he could not take the loss of the father ?? and he went through a stroke and went directly to a wheelchair, he couldn't walk, paralyzed the whole body from neck down, because it's so powerful. It took me 2 or 3 months to make him walk, to reverse the stroke pattern. He's one of the listeners, he knows who I am talking about. We have videos of it, they brought him in a wheelchair and 3 months later he walked out. (1:38). He flew the last time I saw him he was 45 years old. For 20 odd years he was in a wheelchair.... . What does the stroke do to the human brain and how many of the cells can you reproduce. ... A lot of people don't understand that position and structure of the brain in different stages. How would be the strokes when we are 200 years old? Would we get a stroke or would we come to the point of ?? passengers that the energy can pass through. ??? 2 or 300 years old in this physical body, how many wives do you think I would go through, how children and grandchildren, because we extend life. (1:40). The longer we live the more load we carry, or do we become ?? live a perfect clean life or doesn't it matter how we look at it for us, to live without the burden of the ?? pressure of the physicality and have no problem with all these things which are ?? The next cycle of the human race especially if we 30

(1:44). Q: Dan. He was born 2 months premature and is left handed ... (1:46). .. I know what my purpose ... Are you in a hurry to get everything done? Yes. Armen you have a partner. People born early in 7 months are in a hurry and ofllow this pattern the rest of their life. 05

(1:50).
... only 5 euros.
(1:56).
(1:58). ... Q: I am still trying to figure out about the 4 hours sleep cycles, would you say that 4 hours would be enough if we sleep a 4 hour cycle? I do and have done so for years. I actually come down to sometimes 2 or 3 hours. I have done so for 30 or 40 years. Rick says, I just read about Tesla and that he went to bed at 5:30AM and got up at 10:00 AM. He slept for 4.5 hours that was his routine. Churchill and Hitler used to be 4 hours. (2:00). Many leaders ... Obama was told to be sometimes 4 hours. You see when you go through the phase when you are busy, you wake up, the time doesn't matter. It's hard on the marriage to wake up and walk around the house doing things, it doesn't bring a peaceful marriage. That's how it is, sometimes you tell yourself to stay in bed and not

move. But you are there and you're solving problems in different directions. Q: When you said that 1 part is asleep and the other part is awake, would it mean .. It's on a lower level. Q: Would it mean that we hve 2 bodies, 1 that is connected with the left part of the brain .. It's not 2 bodies, it's the way our bodies .. we have to have cycles. It comes to the material content of this planet. A 2 hemisphere brain is very unusual in the U. Extremely unusual, there are some other cases, but they are unique. Q: What did you mean when you said that 1 part was connected to the maximum boundary of the energy of the soul and the other part is connected to the minimum boundary of the energy of the soul? If you look at the electron it has a bandwidth, so a minimum and that applies to the body. (2:02). When you have. It's the way, there is something in the knowledge that has to be discussed, but maybe, since you have raised a point, we can discuss it now. I have tried many times to explain this, but, how to explain it that it is not misunderstood. When you have a M and a G, if you take any point then you have a M and a G. What do you have? At this point your M and G are both at its maximum. (2:04). Maximum to give and Maximum to take. If you look at any point you have the Yin and Yang. Look at this proposition, ... look at the top ... the 2 legs of the man, 2 arms, 2 lungs, and the 2 halves of the brain. The whole structure of the U works on this basis. But on this planet there is a physical dimension which this Zn and Cu enforce total physicality. When we walk we don't hop, we put 1 leg in balance of the other. It ?? comes ?? enforce a different strength. The brain does the same. (2:06). The lung. Some psychological studies show that when for example you take a kidney, in certain operations the behavior changes. If they remove the lung the behavior changes. Because now, if you look at it, the kidney has to deal with 2 halves of operation, so it has to adjust itself and that creates a different position from the soul's point of view. that has to be ?? We see a lot of changes with people who have slightly different physical dimensions. Look at the ?? balance of the fields from the soul. This part of understanding of the teachings is very important because it applies to a lot of other things in respect the STM and physicality and the soul of the physicality. Where does the point if death comes? How does the body prepare itself to create its own demise, separation of physicality from the STM. Why do we organize 80 years to reach that point? (2:08). From the second we are born, from the time we are conceived, our destiny is for that separation. What triggers that point of separation, that it is so important for the body to achieve it? Why do we look at death, or we are getting old ready to separate, why does it make that arrangement between the soul of physicality and the STM, does the soul of physicality take so much from its environment of the lower levels, or the higher levels, that through it, it feeds the STM to be strong enough to last its journey, it's like we pack little foods in the box so that when we go traveling we have everything. Why do we need the dimension of the physicality, from the soul of physicality to feed into the dimension of the STM, that the STM itself can't do (it), why does it need that strength (from the soul of physicality)? Is it below its (own) strength, or is it above its (own) strength that it needs the physicality to collect (from)? Because otherwise it can live on its own, because it lives on its own after the separation. As the Italians say, there are 3 things in life guaranteed, birth, taxation, and death. Why do we even come together, to gather together as cells, (2:10). and spend 80 years preparing for it to be released to be free? Does the soul of the cell of a toe give a spectrum to it that the STM cannot provide himself for himself. And the lung will have a different strength, and the cell of the brain has a different soul, that collectively it allows the soul to collect what it needs. And we know

that the soul itself is collecting its own energy as well, because it's dynamic. As I said in early teachings, the STM has created itself a leech, but why does it need that shell and that leech, which is the physicality of the man. It must have a benefit for it, it must have something for it that it can't do itself. Then comes the next question, why does it plan from the time it starts feeding it, to separate from it. We have to answer these questions because that is the only time we start understanding our soul, the operation of our soul. Those times when the STM was somewhere in the sky are gone, the fairytales are finished. We have to let ?? ,in a very short time, the way the T is going. Most of mankind (2:12). will be able to separate their soul from their physicality. This is done in the space in a very easy way, you might call it by proxy. But you can physically create a condition that you still work and move the STM from the body of the man and both coexist at the same time ??? This is a knowledge which mankind will come to understand once you start traveling in the depth of the space. Physicality suffers, it has dimensions in which it can't carry itself, but the soul stays intact as it is. But you have to understand the full spectrum of the strength of the plasmatic fields of the U to be able to ?? Some races in the U are that mature. A couple of races in the past times have tried to understand this, to replicate the soul of the Creator. It's funny what they achieved and to what conclusion (2:14). they came to, and how they got for a response. And mankind ?? most probably ?? in the future will try. But you need to understand a lot to be able to reach that point, even to attempt it. Any other question. Q: You spoke before 4 or 5 sessions ago that Herpes is an inside job, can we consider the hemorrhoids as the same thing? Explain so we understand what you are talking about. .. (2:16). Q: Are hemorrhoids the same as for herpes.

(2:18). Can some body go on Wikipedia and tell us what the world of science tells us about hemorrhoids. Rick reads it ...
(2:20).
.. These are usually very much psychosomatic. It can be sorted, sometimes with different combination of Gans's. (2:22). There is a specific way to handle it and it has nothing to do with herpes. 12

(2:24). A large percentage in Africa suffer from this, and the T is there to help and it has done well. That's why when you about it (occurring) around a hair that I asked you to be clear about what it is. First question is free the second with love. Q: When you taught about the positioning of the hands, last night before sleeping I said to myself, I love you soul and I live, and that time I was practicing exactly what you said, putting my hands in different angles. .. When I woke up today I felt different, ... the feeling was amazing. If I gain knowledge does that mean the others (2:26). soul who gain the same knowledge I become connected to. So the other entities when before they gained their knowledge, did this knowledge also come through a plasmatic way through the whole U, is that knowledge coming to us, but we don't notice it, or do we block it that it doesn't come to us? The knowledge is, as my second son used to say when I was telling him something, he would put his hands over his head and say it goes over my head, it's no use telling me because whatever you say goes over my head, because I don't have this understanding. When the mankind is not ready to understand the knowledge, that knowledge is just across the universe. It's very much like if you don't have a mobile phone you can't tune

into your number, but the information down for your number is always in there and can be called. It rings right across this planet, it just doesn't ring where your phone is. Your phone is tuned to pick up that frequency. (2:28). If you understand how the new mobile or communication works, it doesn't target from there to you, it spreads the knowledge of your mother ringing right across this planet, it's you who has that thing that picks it up, it doesn't matter in America, Europe or Asia. So the knowledge of the U is available to all the citizens of it, it's just whether or not you have managed to have the mobile phone that it can receive that knowledge. That knowledge comes by the ?? enligthenment of the knowledge gained. In all the teachings I say we can only receive, .. the magnet for wood doesn't pickup a magnet for iron. If you are not mature enough to analyze at a certain strength, that ?? creates at a certain strength, then you can't hear it. The knowledge of the U is free, who wants to tap into it. The other position is, who puts this knowledge out in the U. When man .. it's very harsh to say this, but, you know now we have problems in say California, and you open the radio and it tells you there is a fire coming in a certain direction, or a disaster coming your way and you try to clear the way to be out of harm. (2:30). This happens when solar systems and galaxies come to collide. Those who are knowledgeable to send out the SOS, and those who have been educated to understand the SOS and do have and care about the responsibility for the knowledge and ?? are other entities in the structure that can be harmed. We start to se evacuations like what you see in disaster areas, but who hears it, and who is aware of the life position and that there are those who need to be informed and be given a chance to decide to become travelers of the space. But then it comes to the next level when the universes collide, how do the citizens of one U become aware of the interactions of the other when they can't see beyond it. then this comes out again to those who are citizens of the U or Unicose who accommodate such a transformation and transportation. The knowledge is transferred to the soul at a given strength and those who see and understand it start moving with it because they feel and sense the knowledge, the danger. (2:32). And many races have been saved this way. You need to understand that it is like a weather forecast, I am going somewhere, how is the weather there. The knowledge is transferred through the soul of the entities of the universe across the planet. The same thing is with the U we have this. In a way we are trying to develop a miniature version of it, for disasters. We have a very nice plan for it to be shown very soon. The best way to get man's mind changing in warfare is to show that the men are not ready to fight. Very soon, certain armies will be conditioned into this. That the soldiers will not be there to fight, I warned this a couple of teachings ago. (2:34). Fighting takes energy, elevating doesn't take much. If you elevate they'll elevate the others. 21

(2:40). It's very interesting what we see happening, I explained this in the public teaching on Tuesday. We choose what to believe, but now our soul decides to accept and then you'll see we'll choose the path of peace of being happy with what we have and not looking over the shoulder at what the other one has, if it is more. There is a discussion group going on in the peripheries of the UN, you have to understand, the implications of what this T is bringing into international politics. If you sit in my chair you're a diplomat, business, politician and everything else because at the end of the day, ?? one nation, every corner of it ends up on my desk. I have to look at it and understand it. We have an inside to a lot of things I have to keep quiet about. There is a group who have started to

look at the eventuality (2:42). of the One Nation and how the present structure can be adopted into it that the One Nation can survive and last. This proposition is getting strength because a lot of world leaders can't defend their borders anymore, because their citizens live on the other side of the border. There are more Greeks in Australia and America then are in Greece, they say. There are more Irish outside of Ireland then the potatoes they grow inside Ireland. The second generation sees themselves as one but they're still loyal to the other. With the new T when the transportation that is coming, this is going to hit the governments rapidly in the next few weeks, when the flight demonstrations are in the hands of the people and not the governments. The students of Dr. Gautua in Kenya decide to see the Q gardens in London, flight time 10 minutes, no passport control. They just want to know how they grow things. (2:44). ..

.. The showing of the Pl ball a couple of weeks ago was a wake up call for the governments which are watching these teachings. That was a white light for the peaceful transition. (2:46). Now that we are pushing with the more powerful systems which are non-nuclear and safe and which allow you to be in flight ?? protection. ...
.. many of you KF ofllowers will become the ambassadors for peace without your knowing it, because they'll ask you to be there, because you understand it and hopefully you carry the ethos, and don't allow the selfishness of your soul to become bigger then the foundation for humanity. Two weeks ago when we showed the light a lot of people said, oh this is a Tesla light and the rest of it. Tesla could never create or even dream of creating these things. Now that we are going to the next steps and more powerful systems and create motion with a ping pong ball. ... but the process is conditional and the governments will be forced into it. (2:48). The knowledge as it comes to, would we create, as I opened the discussion last week, the stations to open the totality of the human race. Don't forget the AA of the lion and tiger are not very far from the man's brain level too, would they change, would we fulfill the promise of ?? Bahai. It has already been done. We are not philosophers, we don't foresee things, we are the doers and that's what we were brought here to do. I have never failed in my work throughout the U, and earth is a child's game. We'll deliver peace in a very rapid way, but it has to be in a way that doesn't create more chaos and mayhem. It's in the hands of you KF K Seekers to start assisting us in what I started teaching today and last week. Understand the power and strength of your souls, that you can be pillars of strength for the time of conversion. You have to teach yourselves if you don't understand how so you can teach the others. Millions of KF ofllowers will soon understand why you have even been there, no palace, no what we call the front of kingship is worth (2:50). a penny when you can change the whole structure of humanity, but it's there, you've been taught, you understand and when it comes time that we elevate the souls, you'll understand and reach it very fast because you've already understood the ethos. I could have taught you in one go in the first week and said goodbye, but it wouldn't have gotten engrained in the STM, now it's ?? Now we'll start teaching in a different way. In the next few weeks, there won't be any border. We gave the warning to the American government in 2012 in Brussels, when the American officials asked me, I said to them very easily, we cross your border and you don't have a system to detect, how do you want to know where we are. If you ask the CIA they'll give you a recording of that meeting or Pentagon. These are exactly the words, as it applies now. Even the UN has lost its credibility and the only alternative to it is the

Universal Council. People who have nothing but to serve, ??? I think in the coming time those members of the UN who are still alive, and who signed on petitions for invasions and the rest (2:52). should be committed to the European Court of Justice and the World Court, why they allowed such atrocities. But as we develop these technologies, it's there, in the past 4 or 6 weeks a new ?? turning has taken place and that's why we are releasing more and more, stronger and deeper knowledge into space development. Partially it's to achieve the flight system that it shows you the T, secondly to force the governments to sit and talk. The minute any of you will show the flight system, which 2 or 3 laboratories should be able to do, and then we teach all of you how to do it. Would you like to be on the control of an African, American, or European nation, or would you like to be in control but correct. I think the last one will apply. When you don't have systems to detect and no systems to register, how far can you go, what can you do, to what level can you operate, and be able to call yourself a nation. Do we need security forces to look who is a terrorist or do we look at the governments who create the terrorists to do what they like, and then who is answerable for it. A lot of things will change in the next few weeks, just sit and watch. You are doing it, not me, I am just guiding you. I see many of you have started creating the non-tangible (2:54). core but you haven't got the knowledge how to do. Soon you'll achieve. None of you will be able to achieve lift and motion if you don't understand the principle of the heart. The mixing of the fields, that is what a heartbeat is. When you mix the horizontal with the vertical, and when you reach a point of saturation of balance, it becomes vertical, horizontal, or in the world of Pl we call it change of polarity. That is why your heart turns ?? back and forth 56

(3:06).

(3:10). If this is the brain, and let's say the soul has gone or whatever position with it, the physicians, .. remember I said you create a position of space and you walk into it ... this is the job of the physician. It gives from the soul of the physician ??? in the dimension of physicality. then that soul establishes its own physical dimension. This is very normal in the depth and science of the space. Sometimes the soul through certain interactions looses most of its energy that it can't create its own physical dimension at the point where it arrives. The doctor or man of medicine is not to give injections, it's the one who works from his soul, gives from it, and that strength allows the body to create its physicality, or resume control of the physicality. We do this partly in resuscitation, what do the doctors do when they resuscitate, add to the cycle of the soul through the physical motion, until it reaches to what has gone short and the soul has released to the physicality. People don't understand what resuscitation does. You look at elevation, bringing the body back, but how long can you pump until you create a friction between the heart, the soul of the physicality and the STM, and then he comes back. (3:12). So it can be done and the people in South America understood this. Q: this is when you recover damage in the brain, my question was when the heart is not good anymore and you change it to a new heart (transplant), the same with the brain, which soul is added ... Even if you talk about the transplants from heart, the soul dictates, the ?? STM dictates, not the soul of the transplant. Last week we were in Paris, for the meeting of world leaders, and partially for KF ... We were sitting in the traffic and we saw the police and a transplant organ car going to save a life. This is a soul being carried from one place to another, it's partial, but

when that soul arrives in the dimension of physicality, ?? to the dimension of the STM who receives it. The STM is much more powerful then the soul of the physicality, it doesn't matter what part or organ it is. Then they'll find a balance point, like I said at the beginning, (3:14). the behavior of the man changes because it brings a different dimension to the soul, absorption from it. My brother was a heart surgeon, and he was saying that you'll find that people who have a heart surgery, when we do the operation, it could be snowing or whatever, ... when we put the heart back in, they (patient) changes, and the behavior changes, sleep patterns change, and no snoring. I asked him how come? He said, we can't put everything back together, there are still a few millimeters expansion between the bones and whatever is left. 57

(3:24).
(3:26).

(3:34).
... Those who with the space systems be careful from now on how you handle and process, and load your space systems. This is important and soon you'll understand. Try to keep a distance between your flight systems and yourself that you have a time to react. This is a ?? message to those who understand what I am talking about. Do not stand near your systems, always stand 3 to 5 meters minimum away from the flight position that you can react. Be careful with the surges of the power you create or extraction of power from the environment you create. Understand the position you create in respect to your system. Flight systems always (3:36). work better with 2 systems rather then just 1 system. Those of you who work in direction of ?? remember 1 thing, the G field forces sits within and not outside, you have to understand what that means. You need to absorb from the environment to be able to protect what want to protect from to increase the shield. It's understanding the conversion, how you convert G into M, your M tends to be stronger but you have to understand what you are gravitating to or what you are absorbing. These are things you have to be very, very careful for successful flight system. ... most of the knowledge is shared freely and that is the beauty of it. (3:38).

END

251st Knowledge Seekers Workshop - Thurs November 22, 2018 (,)

(:15). ... What we understand of the new T will become part of the structures of tomorrows science. .. different governments will allow the teachings in universities to be done. This process has started in 3 nations ... We need Portuguese KF science teachers .. (:18). ... we need to start training teachers to teach in the universities especially in China. We need you to bring the T into the public domain. ... (:20). ... We'll place you to teach in the government institutions in Brazil and China. ...
(:22).
(:24). .. It's important that we succeed in 2 nations of BRICS ..

(:26).
(:28). .. One of the agreements with governments is that whatever is developed remains open to the public ...
(:30). ... I am getting a lot of requests if I can go a bit slower. You are teaching too much, too fast, we need to absorb more. In the past 4 - 6 weeks we have to go too fast because there are other things which are part of the work of the KF and these are important for us. One of the reasons the developments are so rapid is because I got involved back into research. When I get involved in research a lot of things more very fast. It brings a new insight. A new system has been developed and it's getting tested, and ?? other new systems. We have not set the KF to be uniform, but diverse. And as you keep on telling me that I am going too fast, please try to catch up and understand. What I have decided to do today is that we try to see what is missing in your knowledge. What are your questions and within those questions we try to teach more, which means we not only answer your questions but we enligthen also. We did this a few times ago and today is the time to
(:32). your questions. Keep it within the frame of our present work and not in the frame of other work, I will refuse to answer, otherwise I can't teach other things. ... but there is one thing, we'll teach only within the parameters of the space T, be space defense, energy, medicine, agriculture. There are a couple of products the KF manufacturing wants to display, it'll be available sometime in the middle. ... (:34). ... There is a very clear question, we do not work to create conflict and separation between governments, we work to unite the governments. This is a message to the American administration. We are here to support peace talks, and development of technologies and to share Iranian space T with American scientists on an open basis. This is another invitation to the Iranian scientists to the Americans. 45
(:36).

(1:06).
(1:08). (break)

(1:14).

(1:20).

(1:30).

(1:42). She didn't start with a science background, Q: How do you compress the fields, how is that done and what does that mean? That has a special meaning for you Mr. Keshe and maybe you can help explain in the context that you are conceiving it. What does it mean to compress the Pl, or the fields rather, not the Pl. Is that right, is it the fields rather then the Pl? To what we say in space T, compressing means understanding the point of

return. In the position of plasmatic compression you use the addition of the field to create a compression by itself. It's like a sound barrier, it's you who puts that barrier up where you want. This is what I just explained a few minutes ago. You have to understand, each MG field within itself, it has a bandwidth. That dark line, the narrow line, is where you are traveling in, but in fact it has many traces. (1:44). ?? Keep back but play with the fields (draws lines going forward and some turning back on itself). because this in due course will create its own fields. When you speak about compressing, it's understanding that how much you can do (press at one point) that this guy will do too (turn back on itself). What happens when you fly a plane ?? operation, it flies back at you and at that point it goes "a bunk". If any of you have listened to the sound barrier being broken. In the light that change goes from G to M. It's the saturation of the field flow. How do you create it, you squeeze this with other fields to narrow that point that it becomes a turn in position. This is why you have different reactors, to create that compression on other fields, that then they squeak. This is the process of development in the space T. We can't change it, rather you have to understand it, you've got to realize, to feel it. It's the keeping the track compression, that in turn it turns back on itself. (1:46). It could do it at any level, here it could be at the level of gold, here is one of Cu, here is AA. When it comes to this (AA) it becomes the human race. Why do we have AA as the basis of the race of the man, because that is the level of the compression. 21

(1:50).

(1:58).
(2:00). It sounds a little like getting into the seamen's union .. how do you get into the union, well you have to have been to sea, and how do you get to sea, well you have to be in the union. (not really) Well to get around it you have to sneak onboard the ship and once you get there you declare yourself to get your work in, then you get in the union and then they allow you on the ship again. Yeah, or they get you to walk the plank. ... There is a woman sitting in the background in this teaching she can tell you that many times I used to get hit just by putting the plasmas together and they release themselves, and sometimes the release of Pl burns your skin, very deeply. And she used to say, what you burnt yourself again? I said, the plasmas I can't control. It's like a cat or a ball that you squeeze and it suddenly bursts, and when you get a burst of Pl it burns heavily. It's doesn't mean ... I learn that I don't have to squeeze the Pl in this corner. I have may scars on my hands and my body by releasing Pl energy. It's worse then fire burn and it burns in the inner skin and sometimes you can't even see it, sometimes it burns in the bones because you had the Ca in it, because you didn't watch what water you were using when you made the Gans's, it wasn't distilled water and there was some Ca in it.
Miscalculation. (2:02). It's understanding the process. I used to carry the wound for 2 or 3 days and out of nowhere it used to heal, because it was a plasmatic burn. I used to shout because it really hurts. The burning of a plasma is different then the burning of fire, because it's plasmatic you feel it in your nervous system and emotion. It's very different then when you get burned with fire or hot water, and you shout beyond ??? The woman here said many times I shouted. I stopped working because it's too deeply, it burns inside you. This is the process, you have to learn part of it. I have made it very easy for you lot, I saved you a lot of pain. None of you have had a burn of the Pl yet, when you feel it, it's

horrendous. So it's hands on, join the union or jump off the boat. .. it's very easy to land you just get a parachute and don't need to jump into the sea. Or you do it the Russian way, you get a submarine and drill your way in ?? ?? can tell you what happened to them. Next question. (2:04). Let me explain another part of the teaching, it has been taught but it inspires some of you to understand more. In many of our teachings I referred to intestines and understanding its work, I explained many times that when you eat the food the banana doesn't cross your intestine. 38

(2:12).

.. would winding and unwinding fit better this explanation? No it's not a clock. (2:20). Well, he says torsion fields, are we, have we been working on, we've been making Gans, ?? making it rotate by understanding ratios .. Yes, that's another way of explaining it, you are right, but you have to understand and use different strengths of fields to make it easier for you. ... A plasma is like a drill in the hand, it has a reverse and forward button, and then you have opportunity to change the drill head, and the drill bits, the it's you who has the opportunity to use it for wood, concrete or metal. Are you drilling out or in? Are you creating a compression against a surface or are you going backwards with it on the reverse mode. When you get it and can't get out, you just change the switch and you reverse. It's very much like, exactly what we do with the Pl. You have to understand that at the same time this drill has a hole in the center that you can add gases into your balloon and change conditions. (2:22). It opens not in a matter state but in a Pl state. It's you who has to decide what you are delivering and what you expect to extract. In the space systems defense system these kind of things are very important. You carry a system and you have a target ahead of you, a meteorite and there is no way you can pass, what do you do? You assess its strength and what its composition is according to the speed and position it has. All you need to do is to deliver a field into it, you saturate it then you can usually go through it. When you pass the field is gone and it goes back to it origin. Many SS ?? human beings have seen this but they never understood. They call it a neutrino, it goes through earth, they go some kilometers into the earth and put special waters in and see if it comes and changes. Many spaceships do the same. Because they create that field strength. Now do you need compression, expansion, or Pl saturation? In a different ?? section of the space T, it's very easy, if bend backwards to win, American ship just saturated would not exist. The life is there, the electrons will be there, the ship will be there, (2:24). but it has no tangibility, it's like putting your hand through it. 03

(2:34). I would love to recreate Tesla, it's easy to be done, because that skull dictated the position of the soul and that soul dictated the position of the representation of physicality. Because when the physicality was made the skull which is Ca has dictated the strength of the fields of the brain. It's very easy, but man can't understand at this moment. If you give me the skull of the dinosaur and I'll give you the dinosaur, because with the structure of the skull I can create the soul of it and the soul with ?? physicality, if at this moment where the pressure stands, and can support such a life, you'll see every dinosaur. It will be done by the scientists in the coming time. Man will do it, we call it the wind tunnels now

a days, and replication systems, man will do it when you create with the soul and you create an environment where you are going to land, how are you going to look, can you stand it. You don't need to put a man under compression, make a replication of the STM and you'll see how it fits. And then in the advertising they'll say, would you like to be 20 legs and 15 things, we made one in that space, would you like to go and see it ?? You don't need to go to the planet, you can replicate it, if you can stand it you can go there. (2:36). I here answering questions and teaching through them. Q: Is the position of the fat in the body an indication of the body? What do you mean? There are 2 or 3 parts in the ?? mind, is it in the energy level of the body or psychosomatic, in the position of the fat, is it in the position of the lower level, or is it above the other part of the chest ... What are you talking about the belly and breasts? yeah. Of course you dictate it. Look at the women with the huge breasts and look at the man with the huge breasts, and some of it is physical, (2:38). but you have to look at the rest of it to understand it, and understand the ancestral, understanding of the history of the genetic of the life. Yes of course it has. Have you ever seen a ?? barrowman horse in Belgium, they have huge thick legs, why, because they carry a lot of weight, they need that strength. Go to the West Flanders where they grow the grass that they use for clothing, linen. You see the same structure in the women, thick legs, they're like Barrow (horses). Very thick legs because they have to stand in the water, all generations, and they need the strength to pull, short and very fat legs like the barrowman horses on the other side of the country. Both have been put under the same pressure, so same condition, so they react, small spaces and they need to pull a lot with a lot of strength. That structure in the legs dictates .. you can't go suddenly to a skinny top, so it dictates a bigger hips and breasts, and the shape it makes. But why has it stuck to that, because of the pressure to the feeling to survive has forced that condition, if you don't bring that food in, the children die. When the father died, the mother was always the bread winner, what they have done psychologically is they made conditions for themselves to live and then it has become inherited in their genes. Is that fat on the top due to the survival of the race or is it trying to say I am big I can stand. Why do the ?? daugthers have big breasts when in conflict with the parents, (2:40).

(2:46).

... If you see some of the Nano materials and you can induce power into the N material from inside you'll see a different light coming through. (2:48). These are some of the lights we are not used to, it's a specific colors, because the MG field of the N layer is absorbing the fields which are coming from outside, but if you create it from inside it's totally different then when coming from outside. Let me explain, if you create this as a creation (draws N layers) of light in N layers. The strength of the fields which come in now, dictated by the atomic structure of the N layer molecular, here. If you can take this layer away, but you can hold on to the boundary of the N layers, through a simple way, then the light (passing) through here will reflect in a totally different way then the light you see as black. These light are very much cosmos lights, what we see from the cosmos. I have done this and it's very interesting when you look at them, but if you understand the space gap of the materials, and understand how to create a gap in the space, the N structure, don't forget this is a tube, so they are all connected to each other. You can create the fields here, that you can go through, that condition of the receiving here, the

interaction of the fields, (2:50). it interacts with these atomic structures and they release light in a certain way, depending on ?? . Then you create this as part of understanding, and in the space T you create these corridors through creation of MG fields, that the reflection of your own light gives you the indication of the light in the space. If you don't have a torch you don't create the light, but the field interaction with interaction with a given space creates your light. It's how you create light in the liquid environment, and even in gaseous environment. 38

(2:54).

(3:00).
(3:12). ... Klaus presents new products. Plasma water dispenser that is certificated. You just place the Gans's in bottles around the dispenser. (3:14).
(3:16).
... The Gans bottles are 100 gram and not 100 ml. The volume of sediment of different is not the same. It's not the dry Gans. (3:18).
(3:20). .. The KF has moved into teaching at the universities. ..
(3:22).
(3:28).
(3:31). This setup in the universities will become the responsibilities of the Earth Council members.

END

252nd Knowledge Seekers Workshop - Thurs November 29, 2018

(Swine Flu resolved in China, ,)

(:16). (:18). Today we announce a major breakthrough in the world of science, this is why we call it a ?? farming, and it is dedicated to the Chinese community. 20

In Sierra Leone I taught them how to make the Gans's, that proved to be effective immediately against Ebola, Once they showed it the World Health Organization said the Africans were not that clever to do this, you can't show it, and if you show it we'll withdraw your certificates to teach in the university. And strange enough, 2 months later the paper gets published in one of the most famous (:24). universities by the same WHO and officer who ??? it is. We have had enough of what we call the atrocities of the governments and scientists. This time we show it ourselves, we took charge and control and asked the KF scientists around Russia or China to find us a live specimen. Nothing that could be possibly, but something that was 100% confirmed to be suffering from this pig virus disease. As you understand and know that the KF is right across this planet. K Seekers started looking and as you know everything to do with this virus is under full control of governments. But you have to understand farmer cannot loose their animals, they nursed they, they're their children ...

.. I made a promise to the Chinese nation and government, I am here to change the national food security of China and we set out to do it. We have shown it in grain production and now we have shown it, the pig virus is over. (:26). We have made a pig presentation that it can be understood. 03

(:34).
(:36).

(:40). Play video of KF about cure to virus. ... (:43). .. (:44). Rick reads paper of African Swine Fever in China...
(:48).
(:50).

(1:14).
(1:20).

(1:26). Play video of pig recovering from Swine Flu. Any questions. (1:28). Ruthi speaks. The Chinese people are asking who to contact, etc.. Contact Lin in Being and we'll coordinate. We have 500 liters of Gans available for support. (1:30). .. We are holding 200 liters in reserve. This is a specific Gans mixture, it can't just be done just because you do it. As you understood it's a digestion problem and it has to be structured in such a way that it looks after everything. Because if the animal bleeds internally it can lead to his death. All of you have access to Lin and others... (1:32). .. We are giving some supplies for prevention. We are giving to big farmers with 10 - 20,000 head of pigs. These are the backbone suppliers of the nation. There's a problem between the north and the south, in the north the fever has come and the price has plummeted. We have to speak with officials in what has been done and how we can support them. ... It has to be done in a specific way that it can be eradicated. Every virus has its own strength and its potential has to be understood. (1:34). Q: To my understanding the Swine Fever has many types and can you use the same method for each type, do ??? .. is the KF in charge of the work or is it the Chinese government? They are aware of what we are doing, fully informed, and there are processes which are taking place. We are working through pig farmer associations. If you get in touch with KF .... (1:36). .. We are working within the government structure .. Q: According to what you said before that nitrogen Gans can resolve a lot of viruses, ?? is N Gans for Swine Flu? No it's detrimental, you can't use it. You break up the structure of the protein. In this case you can't use it. If you are talking about the neutron Gans, that's a different thing and even that has to be understood ?? and we can handle any strength of the virus. The mixture that I have developed can meet the full strength. It will be more effect, rapid on the weaker one, and on the stronger one it just takes a couple of hours more. It's so instantaneous, it changes immediately, the farmers will see. This what we call, the killing pattern, has to be reconsidered by the central government. But they have no choice. It's very difficult to tell something which was not there. (1:38). We have asked the KF to go to full production as much as they can. And we have chosen a path of prevention. .. We are working at the highest advisory level in the government. 23

(1:40).
(1:42).

(1:48).
(2:00).
(2:10). Q: The first pig the way he shook his head, I have the same experience when I touch a pig with my intention. The water in the bucket is not just water, it's fields, and this developed in a way that the pig feels it. The pig has to want to survive and this pig has ofught months to survive. 57

(2:00).
(2:10).
(2:14). ... (drop out). .... (2:16). Any questions. Q: I understand we have the soul in our physicality, the way to feed our soul (I cannot hear properly, pieces). repeats. in a way we need to go through a process to feed our physicality. And in the future we'll go through a process where our physicality (2:18). will be inside our soul? (repeats again, only parts) .. yes that's correct. (Mr. Keshe has to change systems.) (2:20). (a new microphone has been bought but hasn't arrived yet.). .. Currently we have the soul within the physicality, in order for us to feed the soul we have to feed the physicality. In the future as I understand it, we'll have to go through a process where our physicality will be within our soul, and in order for us to feed the physicality we only have to feed the soul. My question would be, do we have a say in this process, is it like something that we do, like for example following the Commandments and trying not to kill in order for us to feed, or is it going to be some kind of different condition that is going to come from outside, let's say something happens to the sun or something like this, in order for us to reach that condition where our physicality will be within our soul? And today you said something about the "alkaliness", the giving, so would it be like if we give more we receive more and in this way our soul expands so much that it entraps the physicality, in this way we position. (2:22). Am I getting it right? Yes, in so many ways yes, but on the other hand you have to remember a very simple principle. Is the giving part, or the radiation or the field strength of your soul which has dictated the dimension of your physicality. In our physical dimension we live within a M field of our soul, where the G field part of our soul is within the structure of our brain. The sun sits in the center of the solar system, you think so ... I don't think so. The shell of the sun is not spherical, it's as misshaped as God could ever have created it. It's trying to juggle its way but it has some sorts of symmetry, and that is the physical dimension of it. But it still has its G which holds onto everything as much as it can, ?? it backs all its strength in the center. That's its soul. The soul of our solar system is the sun itself. So is the STM. It's not that we are totally outside our position (2:24). outside our soul with our physical dimension. Our physical dimension is decided by M force of our soul. 09

(2:32).
(2:36).

(2:40). Q; How does man take his life experiences and memories with his soul? It's already in the soul. Now go and tell the scientists about the RNA, they're going to be shocked. 32

.. Q: Can we change the principle RNA that is the source of the failure in this solar system? ... How do I answer you that one? (a pretty big question). (2:44). No it's very easy, but how can we .. We know originally where this sun came from. We had the problem with it at the start. In the dimension of universal understanding, one of the problems with this solar system occurs very occasionally on a boundary .. of galaxies. It's too far to absorb enough energy to carry the totality and it becomes part of the system that in its cycle of life, it will mature and receive what it needs. But it takes a long time to come up what we call the arms of this galaxy. It's not the DNA of it, in the process of the creation of this solar system. There is the same problem with the twin sister of this solar system. There are similarities in problems, but not as bad as this. In collection of the fields, some of the fields were not absorbed which were needed. It's like with you make a dough and you forgot about the salt. Or you don't have a salt and you make the bread anyway because you need it, and you end up making it without the salt. (2:46). This is something which is ... it's the position of this galaxy in respect to the universe (U) and at the same time the position of the solar system in the galaxy which has created it. But there is a bigger problem, this solar system galaxy and this solar system and this U, are on the edges of the Unicose. So it's a complicated situation due to the position in respect to what we call the Creator. 38

(2:48).
(2:50). Teaching in Iran
(2:54).
(3:00).
(3:10). Q: You have explained that in the Cup goes the characteristics of the soul of the maker of the Cup, (3:12). now the person who will drink from the Cup does he acquire part of the characteristics of the soul of the maker? Of course. 14

(3:14).
(3:22).

255th Knowledge Seekers Workshop - Dec 20, 2018

(Further discussion of HOW THE MAGRAV systems work (1:30); ,)

(:14). (:16). We hear as of yesterday that the Americans have decided to pull out of Syria. It's the beginning of peace. And as we said, that will be the last place man will fight with war. It was from those who wish for peace in the KF and others we have seen come to reality. Americans pulling out of Syria means the beginning of peace. 25

(:18).
(:20).
(:24).
(:26). ... In last week and the week before' teaching we spoke about the creation of life on this planet and the creation of soul and the dimension of soul. What will be nice for this week is to go one step further and understand ( ) ... I explained this in a very soft way where we understand the why and how the STM (:28). confines itself within the physicality of the man. What we explained and what is interesting for all of us to know is that how do we go to the next step and what can we do 16

(:30). (tech problems) (:32). Klaus ... shows products. (:34). A next step further, using Gans balls without motors.... (:38).
(:46). (:48). (:50). ... Mr. Keshe comes on. If you look at it, it is the basis for the Star Formation (SF) where the 4th element is the capture and transmit. It has the 3 base reactors and 1 on the top, that the rotation between the 3 base reactors feeds the top and then the top, like an antennae creates a M field. This is the principle behind it, it's very simple creation of fields without any (:52). rotation (motors), but if you look at it, it's like the 3 AA's, and the base like H, N and O, sorry O, C, and N, and the H is on top, which is a weaker and the that the 3 base, with the Nano material which goes through the center and concentrates the fields into the top and then it transmits. This is the basic principle behind it. By gradient of the materials chosen for the elements you create that rotation, and it spirals up into the antennae and transmits. This is what we call the SF system. If you look at it further, if you put these 4 units in a SF and you sit in the middle of it, you'll feel the same. It depends on the height. The height you see can telescope so you can create the condition of a dynamic system. This is a very powerful system but the next step to it is without these coils. It's just gathering more in the strength of the knowledge being able to move to the next step. You can choose at what level you want to radiate inwards, for example you can put the 3 base at the liver level and then put one on the top level. These are very effective systems for technologies like cancer for removal of what elements you might have. (:54). In the present world of science they use radiation

(:58).
(1:02). ... Q: What is meant by Plasma (Pl) in the N layers?
(1:04).
talks about MaGrav ..
(1:20).

(1:30).
(1:36).
(1:42).

(1:46).
(1:48). Klaus finishes showing products. .. (1:50).
... originally if we go back into the teachings of past few weeks. (1:52). We understood the creation of matter, and the interaction of the creation of matter, how life was created. Then we spoke about the soul, which is again the opposite way. 21
(1:54).

(1:58). spine = DNA
(2:00).
(2:02).
(2:12).

(2:20).
(2:26).
(2:30).
(2:38).

(2:46).
(2:48).

(2:54). ... John of AZ shows video of CH3 that was dried and heated with fire and how it reacts to a neodynynium magnet, it makes it stand on end. But with a regular CH3 that is dried without fire, no reaction to the magnet. .. (2:56). .. Show it again. (2:58). John says, it is our belief that when we did it with the fire we created Nano (N) particles of CH3 in a matter condition. We did a similar thing with H, Deuterium and Tritium, when we put those through a fire, we added some what we call N materials in with our Gans materials. (3:00). Then we put them in a blender and amplified the fields of the Gans material to what we believed was a much greater extent, so rather then being a 1 times a single field of a Gans, maybe it's 50 times stronger that goes through the blended and contains the N materials, which work similar to N materials that we talked about with the Cu wires. One of the things we found it can do is take a weaker Gans or original Gans and put it together with an amplified Gans which would be one that has gone through the blender and the 2 of those being the same material, (3:02). it's the concept of the weaker feeding the stronger, so you can move the direction of your compressed fields, which you want to do is compress the fields in the middle 16

(3:04).
(3:06).
(3:08). Q: How could feel the soul, while you are talking I am trying to communicate to reach this soul, but it is hard for me because I am still stuck in the physical. Rick says, you had a comment where you said, Mr. Keshe I wish to get some understanding, the way to encompass the soul/sun and allow it to shine around our body manifested as the aura, as you referred to it in the past teachings, thank you. (3:10). Mr. Keshe is talking about that in his diagram in encompassing of the sun and the Gans. Thank you very much. We seen something from today in this presentation from John, we have seen how using the galvanized metal with the N coated Cu, which lead to the creation of the CH3. 42
(3:12).
(3:18). Q: It's my thinking we can create Gans material that can feed our soul, and we can put our soul into that material and create the field Pl from the Gans material of the soul, in thinking about that, if we did that, then we could take 3 or 4 empty balls that have this soul material or nothing else but the field Pl of the soul material and have our spaceship (SS). Any thoughts? I think you are 99.9% wrong and 100% right, it depends on which side of it you want to sit. 59

256th Knowledge Seekers Workshop - Dec 27 2018

(No teachings today but a year end executive report of what KF has done and will do in 2019, Portals to the Universal Community will be setup in 6 nations, ,)

(:11).
(:16).
(:18). .. On 22nd December we offered the Chinese government an opening into space ..

(:22).
(:26).

(:32).

(:40).

(:46).

(:52).

(:58).
(1:02).
(1:06).
(1:12). Play the introduction video again, now it will have a totally different meaning with what we are teaching today. .. we already knew the date and time, it was just to make the man ready for it. Start .. (1:14). .. (1:22). Know you understand what have planned and what is about to be delivered, and what is happening and be delivered. The space T is a mosaic of work that is done by may of you, some understood this and others that ... the last part when mankind will take to the wings in space, it will come through the interaction of the Universal Community (UC). .. in the coming time the totality of knowledge will be shared by those who have expertise in their own field. This means we start understanding the totality of the work in interaction. People like Armand who so much desired to achieve space motion and lift will be the front runners of this interaction. They understood it, and the yearning of the soul will be answered. Those who came around the KF for their own ways of thinking have to learn that their is a bigger picture and not just ones own wish and desire. (1:24).
(1:26).
... for governments telling us it is hard to sell, but it is the only salvation we have. We'll see the resources from the Illuminati's to the Knights (of Malta ?) to what we call the Masons, will be all brought under one cover for what we call elevation of the STM. It's very hard to believe, but maybe when we speak next Christmas and the one after, you'll say, Keshe said so. The whole apparatus of peace and of One Nation is set, it just needs a master who knows how to bring them together to complete. I have worked with very competent teams in different countries and now the degree of competence will show itself. Those of you who thought that the N coating was so important, (1:28). that you could leave the KF, that something is wrong with it, now find out that it needs a lot of maturity. 10

(1:38).
(1:44).
(1:50). .. Today we are not teaching anything, we are explaining what has been taught and what is the purpose of it, which is more important then any other thing, so that we all understand where we are heading for. As I have said, I have resigned from the seat of the head of the KF and handed it over to a beautiful woman. 44

(2:00).
(2:10). We have to be open to be able to operate, to function as One Nation. Any questions? .. Q: Is it true the secret space program has the technology to create "star

gates" everywhere, meaning to get a lift and a passage onto another planet? Rick says, that's not what you mean as far as the Portal Technology, yet maybe it's similar in some ways? Singularity they haven't achieved. Understand that the knowledge of the man up to now has been on the matter level. (2:12). .. there has been contact with the human race several times in the past ..

(2:26). Q: Shall former leader of Boeing Patrick Shannon take over at the Pentagon? Would you like to comment on that Mr. Keshe? We shall see. Q; regarding the Inertia of the soul interacting with the other souls, what will be as positioning in space? And is my soul part of the other souls or are the other souls in my soul? I think it's a beautiful question to ask and I take it into a new dimension. In opening of the portals, the members of the U Community don't speak Farsi, English, Chinese or any other language. We will see the communication and enligthenment on the STM, and how hungry the soul is to be able to receive, that in receiving it can share on its level of understanding. This means that members of like the U Council, we will not hear the voice of members of the U Community, (2:28). We'll learn and be taught, and communicate at the level of the soul, then the members of the U Council in the language of the man which is part of theirs will that through the souls of that language. This is why the U Council was set. 25

(2:36). Q: Can we build systems that can link up everyone's physicality so we all understand each other? I think we moved into a different direction. There is a path through the soul to connect and it's for mankind to tune into that level. 23
.. the biggest problem was to mature the soul of president Trump. You'll understand very soon, the withdrawal of American forces from Syria, the 2 sides are talking in Yemen. 51

(2:40).

(2:50).
(2:52). Dr. Gatua talks about his teaching success in Kenya.
(2:56).
(2:58). (drop out) (2:59). I went to Iran to learn this. the orange one is CH3, white one is CO2 ... (3:00). Color coding the Gans's. ...
(3:02).

(3:20).

... There is some censorship going on, (3:24). on my Facebook, Golde Age of Gans, where we'll have 40 to 50 new members per week subscribing but the numbers don't go up even when they are added to the group, so we are being censored. It's the same with KF which is run by Caroline, they show an organization with 2 or 1 million ofllowers, which is, whatever. They got KF at 60 or 70,000 (ofllowers) and won't let it move, because this is part of the work of the Rothschild's group through Ofx. They made a decision that KF can't be going public for nearly 10 years. This came through the pressure of the king of Belgium. We know the process and how it's happening. Because they saw it as a danger to their structure. No Ofx news can report anything about the KF. Anyone connected or who gets financed through the Rothschild's group can't promote the

KF. This is why we see world leaders bend toward the KF but they can't do much with it. We see it in the background. As I just explained to the Chinese community in the background, if a government censors a teaching like this, now that the Chinese are taking the leadership in the KF space program, ... they don't want most of the nations to do until they announce it. So they censor us. The same with the Whitheouse. We have everything in the background. It's amazing, how come we talk and it gets done in the background? Coincidence? No they are sitting there. (3:26). They are listening and read your articles, they know you are sharing a lot and this damages the pharmaceuticals. Shutting the small doors, it comes through other holes. That is all they are doing. 14

(3:28). ... Mark made plastic from CO2 and ?? chemical. .. Can you explain how you did it. Yes, it's a very simple process, just to add the de-limonene , it still needs to be tested whether it's ?? de-limonene is from citrus, it can be orange or lemon peel, it's combined with Gans, whether it's still in saline solution or if it has been rinsed. I am still looking at different ratios for adding the de-limonene (3:30). Explain to us how you get it. All you do is to add the de-limonene and its solution whether it's in water or saline solution and you stir it until it is fully mixed and you pour it out into a form and let it dry out. You get a plastic from it, a polymer. It was a very simple method but there is still lots to do. A team would be essential to speed up the process. What? A team of testers to look at the ratios to see which one works best. You see a paper like this, or a disclosure like this which we already know, it start a lot of people working on it. There was an envelope on my shelf when I walked in. I told Ella about it, it says, all gas protein and earth. This paper has been written on ?? 2014. If you read this paper and understand it, then you can produce anything, any kind of petroleum. (3:32). This is the original paper, then there is another one, it's called "Creation of Motion in the Universe". 07

(3:40).
(3:42).
(3:48).
(3:58).
(4:00).
(4:02).
(4:06).
(4:10).

(4:14). Control is out of hand. They left me too long free to do, publish, teach and spread the knowledge. .. 19

(4:18).
(4:20). (4:22). (4:24). picture of when they poisoned Mr. Keshe, 2019, they were sure he would die so they could take over. (4:26).
.. We have to become collective, it's not any more one person. 2019 is the breakthrough for the KF, for humanity in the knowledge being used, especially in the upcoming situation, a third university has been added in Brazil. (4:28).
(4:30).

(4:32). I have done a lot of transcribing of your workshops in the past and lately too. Whatever happened to "transform.com" whatever happened to that. The transcription of all the workshops that disappeared off of the website. (Transformacom was not an official KF website, I don't know and they shut it down ...) It's a sore spot because that was a go to spot for finding what I might of missed by the microphone being at a lower level then it aught to be. (we have been working on this part for quite a long time ...) .. Talks about microphone volume dropouts and transcribing. Of course people can complain about anything, but when it comes to listening for 3 or 4 hours they sometimes complain most about the microphone. (4:34). You know what I say Mark, instead of complaints I like delivery. ... Mr. Keshe comes on. It's very interesting that we can share so freely. The ethos of ours is to teach freely, and then they teach freely has gone on. A lot of people came to make a lot of money out of originally with these teachings, Gans and K Seekers, and they found out that they don't make much money because they didn't put anything back in it. Those who teach freely have made a lot of success in getting people to understand it, because it's very simple, when you give freely it freely comes to you. ... In 2019 will see the end of religions fighting with each other. I like that prediction. It's not a prediction, it's already happening, we see it happening. We see amalgamation of organizations because they see they have to work together. .. (4:36).

... Q: Will the Earth and Universal Councils take over the political domain? We don't call it politic. It's plasmatic. There is no politics when you have ?? on board, you don't need diplomats. You don't need politicians. When you create one country out of the whole planet, we don't need political parties. (4:38). We don't become communists but we become all one target dimension for the betterment of humans. Human race will evolve into it, they are good evolvers. We knew nothing about computers and now we are all computer freaks ... 25

(4:40). One of the beauties with the human race is loving and being loved, and this is one of the precious things in the U. A lot has been done for humans. That's what I tell to people but they don't understand that I came here to enjoy the beauty and love of this planet. It's one of the ... not uniqueness, but very rare things in the U, the way mankind loves. Q: Well you can feel a lot of love coming from you every time that you speak because you are always offering things that we need and we should have. Oh, maybe you (I) have been touched by humans, you never know. It's one of those things, my mom used to tell me, you fall in love and out of life, God knows everything, but we need what you love. ... what, everything on this planet is to love, every creature of it. I adore working with Armen, I know he gets a of pain with me, that's okay we all suffer, and it's beautiful to be in touch with Ella, they give you a lot of beauties of human beings, and with people like Rick, you drive him crazy and he is still there. It's part of it, and then you fall in love with a woman like Caroline and then you see the beauty of life in other creatures, how they serve the nations. It's all there, you see Dr. Gatua, the color has no meaning any more, of the nation. (4:42).

(4:46).
(4:48).
(4:50).

(4:52).
(4:54). cancer
(4:58).
.. we have received a green light from the Chinese government for the meeting. ..

257th Knowledge Seekers Workshop - Jan 3, 2019

(,)

(:11).
(:14).
(:16). video of conference in Iran.
(:22).
(:26).
(:30). (:32). (:34). .. . Ella presents the KF Times 7th Edition January 2019. "You are a galaxy" , "6 Portals, the gateway to the Universal Community"; "Spaceship Program Teachings" ; "1st International Conference of SS nations" ; "Interview in Kenya with Dr. Gatua" ; "New Teaching Format in 2019"; Launching new cosmetic line, "K Plasma Care"; Plasma Teaching in Brazil Health Conference"; "Oil Gas, Protein and the Earth"; "Production of the 4 basic Gans's"; Magnesium Gans, production and uses"; "Viruses; Energy Packages of the Universe"; (:40). Testimonials on CO2 Gans Water, scratches.
(:42).
(:44). .. we saw a paper on creation of Mg Gans. Why do we need Mg Gans. We saw before in the creation of the STM, it bring a new dimension in understanding the structure of the body 32
(:46).

(:52).

(1:00).

(1:08). A graph of spectroscopy of CO2 with the appearance of many other elements.

(1:12).
(1:22).
.. Would the portals become the demise of the man. Would they bring viruses by mistake, what we were not expecting, not educated for. To what extent are we ready to accept such a new change. (1:24). Is his too fast for the human race or should we go through a crash course and do it anyway, because we have come too far to go back. There is no way back for any of us now that we have opened this Pandora's box, or has the invitation for space

become our doomsday philosophy. Have we gone so far forward without being fully educated? Or we go through it anyway and we see what education we gather. A simple spectroscopy explanation understand gives you most of the materials for man to exist in the U on one graph. When you put this on another IR or other spectroscopy the writing on the reports coming out is absolutely horrendous. We never knew that we are possessor of such a knowledge and so much of it. We call it the body of the man. (1:26).
... (1:28). .. or do we shut the doors to space for mankind, the way they did centuries ago, because the mankind is not ready. Or the very few people who are and get ready will become the passengers of the U. Now we can see the dilemma and its extent. Now you understand why we have delayed everything so much, both in teaching and in understanding. (1:30).

(1:34). .. are we willing to change, to accept the new ..
.. the colors and number of colors and shapes changes (1:36). now that our knowledge of U has increased. Are we still colored prejudiced, language etc. Because when you look at this graph something really scary comes out and that is, up to now all of these peaks were just peaks, but now we have understood something new, creating any of these peaks in the right direction and strength, in the new Portal, means a new life, and not necessarily shaped like the man. Are our leaders ready to accept such a diversity, because this guy is more intelligent then our king or presidents. And through his dynamic Plasma can control the brain of the president. And coincidentally the (1:38). the strength of his emotion sits with laugther, we have a happy president. These Portals are not going to be easy to understand now that we look at this graph. 21

(1:44).
(1:50). .. Q: If we build these Portals then do we need Spaceships (SS) or do we travel through the Portals? This is exactly what I just said. (1:52).
(1:54).
(2:00).
(2:10).
(2:14).
.. Any questions. Q: When I can control everything by fields ... it will come to you, mankind will very soon understand this sentence. (2:16).

(2:20).
(2:22).
... (2:24).

... Q: What about a conscience, a guilty conscience, not that but when you know to do what is right or wrong. Do all beings have that? Let's do a different thing, what do you call a conscience? Q: Making a distinction between conscience and consciousness which is a different term. (2:30).

(2:36).
... Q: John asks, so these Portals have doors so an entity just can't show up? I am going to stop you there and answer you in a very direct way. When you eat the banana and it

goes into the stomach, does it open the door for the banana to jump into the lymph, or does it find to match its strength to transfer its energy across to manifest itself with the energy of the banana ?? Why do you expect a door? Q: Okay I understand. (2:38). Let me add to it because what you raised John is very important 08

(2:40).
(2:42).

(2:46). If you go to the field system and repeat the same thing, but understanding that you need totality of the dimensions, in both ways (horizontal and vertical), then the U is your oyster. Q: When you go through the Portal is that like a new dimension or higher dimension of the earth plane and can you just walk through the Portal and have your soul elevated, is it that simple? Simpler then that. You are still looking for physicality of walking. Q: Just by being in the vicinity of the Portal? If you create the right link inside it, and if you have the banana inside it will pull you in and you'll ?? feel it. Q: And on the other side of the Portal is it still earth, a new earth, a different earth? Yes in dimensions, it will be, because you created that dimension according to MG field of this planet, minus or plus. The game of space technology becomes fantastic from now on. (2:48). Any other question. ... I think in due course a number of KF members will start defining their understanding of these Portals and their operations. One thing we should not become, to see them as gurus and whatever. (2:50). They are just tested in their own strength and that is all it is. 04

(2:54). Snap is one of the most beautiful souls you come across ...
(2:56).

... It brings up a very ethical question and man will answer it in a very short time. I know the answer because we've been through it, we've seen it. When ?? gives birth to a child and you're in the depth of the space and the mother has to nourish the child through breast feeding, would the mother feed the soul of the child to grow, and would you change the dimension of the soul to the physicality of the milk that the child can drink from. Which way do you think the man will feed the child in the depth of space when there are no cows or physical matter to feed, then you'll understand how you behave in respect to the guest and how you'll be treated as a guest when you arrive. (3:00). Then you'll understand, do we need to kill to feed. This is an ethical question that every man in the space is going to face. When you go out with your wife or girlfriend and you decide to have a creation of your own to confirm you're powerful, you exist, and you're god and you can create. How do you feed that child? This will be up to man in a very short time. Space comes with other dilemmas if you decide to travel with what I call the American way, wear a suit, a backpack and food, and as long as it's a tablet and you can put it in a microwave, ?? How do we feed our own offspring's in the depth of space. Then it comes to would the father feed the same as the mother, do we need the breast of the mother to feed the child, both can serve through their soul. Then does the sexuality exist? Or is there a truth in what is written in Torah that, I made Eve from a rib of somebody, (3:02). or was it passed on through a traveler of the U, that one can create one, and Eve to be a partner was a creation of the STM to confirm and to be able to transfer energy that he can

confirm his own existence. A lot of riddles are getting answered with these points and understanding more of the true knowledge of the U. Q: A question about the rib from Adam, I think it's a ratio like an electron to a proton, if I take my rib out and weigh it, it may be 1 to 1800, ??? , but maybe we have to weigh the rib and see if it's the same ratio, because I see Adam and the electron ????. I said, next time I see him I'll ask him. .... What we need at any level, even at the creation of the 6 members of the EC and the new, what we call space groups, we need the totality to confirm the existence of the singularity, and within that singularity we still need (3:04). integrity and collective awareness of the full dimensions of the fields of the U that we can create that lower, or weaker, or more humble position, that by existence of that, that we can feed it and can confirm our existence. The reason for the planetary system is for confirmation of the existence of the sun, otherwise ?? it can't exist. If the fields and the size of the fields of the solar system is at the point where it can create the smallest entity and the farthest point, that from the more stronger one in the middle, and the smallest in the far end and the weakest can create the dimension of the motion of the fields to confirm its existence in that dimension. Nothing else. ?? same with the size of the body of the man, same ??? It's the size and what that environment allows that size to be. As you understand now, a lot of things in 2019 comes back to us and how we want to be in respect ... we'll still build the factories and do the research (3:06). We'll do everything else, but more or less all the development of the mankind in the past millions of years, where it is now and from now on, as we are born and destined to die, mankind was created and destined to unify with the Universal Community for the new ?? And that time is now. How we decide to interact with it, it totally us, we can go with shout and screaming or with a happy joyful time. But is the shout and scream out of the joy or out of the fear. Any question. Q: We read about freedom from the monetary system, we now have 2019, when will it happen? You decide. Can you have an apple without paying for it? Have you found somebody on the street that will accept a kiss for an apple? Or can you buy a shirt to be on your back in the cold of winter and you can say think you and walk out of the shop? (3:08). Or the other way is, would you work all day and bake a bread and put it outside and do that everyday, and the flour will come from the roof and the heating from the wall, and you can feed the whole humanity. What do you expect from the monetary system if you yourself expect something to given to you for what you have done. This is what we have created, but would we need to go into that dimension of physicality that we need a monetary system. A lot of you don't need if you understand the work of the KF, the teachings, but then if you can take the fields of the U to feed yourself and a at a certain distance create the fields that no cold or heat comes and you stay warm, and make it a little tinted that nobody can see if you are a man or a woman, that is the only part you care about, then if you want a water you can create, or a food it all comes in because you draw the energy, then you are happy with that life. if you can use your soul understanding of positioning to get from London to New York in 5 seconds why do you pay a monetary system into an airport, taxis to get to the airport, pay the pilot and the fuel to ?? What is good for the goose is good for the gander, (good for the male is good for the female). If we want to get rid of the monetary system are you prepared to work for free? (3:10).

258th Knowledge Seekers Workshop - Thurs, January 10, 2019
(,)

(:16). We are coming up on the 5 year anniversary of teaching in a few weeks. It will be a good day. .. Book #1, 2, 3 in English are now again available on KF website, after being stolen by the Belgium's. (:18). The publication is in our control. ... (in Farsi, and Chinese). .. Now we are releasing all the books in electronic and digital. This is a big achievement for the KF. (:20). .. Those of you who took the book off the Internet, your soul will pay for it somewhere. I didn't want to release this for awhile because of the criminals who stole them (we paid for a half million copies in Belgium) in the state of Belgium. Now we have managed to print them outside, we have thousands of books printed and paid for. It was to discredit us but it goes back to the people who have no insight into the knowledge. .. The KF T as a whole will be brought in line as a space T through a conference in China in June of 2019. (:22). The conference is a joint operation between the government and the KF China, with all the other scientists from other countries who will be there. This is a major breakthrough in all aspects of the T. ... This is not a public conference but by invitation of the Chinese government. ... World ambassadors will be present. This is the opening of the space technology. (:24). .. (:26).
(:34). .. We'll try to go live with the Conference ..
(:38). Rick shows the photo of Mr. Keshe first book released.
(:42). (:44). ... it reduces the power by 30 to 40% and as you use it further the reduction increases to higher percentage. You can purchase Accra products directly online through the KF. If you are from other countries you have to certify the products, we ship to you if you want to test it. This has Ghana board certification. .. (:46). Rick can you show it on KF store. ... we are all seeing reduction. This is the first time w are using a cascade system. If you go back to the last couple of weeks of teaching we explained about the transformers where the government will receive the reduction, with this system what is recommended is to put one in the furthest point of electricity in the house, and one closest to the inlet (incoming power line form grid) in the house. You don't need to add anything else to it, you just plug something in to it that you always use like a refrigerator or whatever, that the cascading allows the power to gradually to be generated inside the house. You buy one unit and the second one becomes the transformer of the first one, and visa versa. You start seeing reduction in your power consumption where the Pl replaces it. (:48). This is the beginning of the second stage Power Generators and then it will be added on in the coming time. These are ready to be shipped. ... If your in Ghana they'll be sold in some 200 fuel (gas) stations around Ghana. .. The oil companies who

has certified it has tested it and it has been certified by one of the major oil companies in the world. We'll run this for a few months in Ghana and then through the oil company we'll move to other West African nations through the same organization. This is a great achievement for Africa and it has been tested in other parts of the world and we all see the reduction and the performance. .. (:50). .. Another breakthrough in our products is In China with our energy and decorative product. Ella would you like to share. These are all hand produced by our Chinese KF team. It's beautiful, when you hold them you feel the energy, when you place them can feel the essence of the energy in the environment where it is used. They don't need to be certified because they are all decorative things to be used. ... Ella shows ... (:52). First product is 3 coils and spheres and it looks like a MaGrav unit and can be used for educational purposes in the schools when you would like to teach about the plasma devices. ... Another product is decorative cups one with CH3 and other CO2 Gans. ... (:54). Decorative Gans paste you can use it as display or table mat. (:56). Coasters for drinks on furniture the picture is symbolic and will be decided on. (:58). Plasmatic cubes with Gans inside. ... Plasma cylinder. .. (1:00). ... Plasma pyramid. ... Plasma sphere. .. (1:02). Books are available, all 3 for 89 Euro. (1:04). There are first and second editions, the first is written in Mr. Keshe' style in broken English, there are a lot of mistakes in it, having the mistakes a lot of people enjoyed reading it because it brought a lot of knowledge. The second edition is the polished one with editors going through the book. There are 2 versions of the books, the first is the raw one, and the second is by the editors, some things they put in there where they couldn't understand what (I was saying) it is. Currently we have only the second (polished) edition in the paperback version, in the beginning. But on Amazon they'll publish all 7, 2012, 3 books are second edition, 2011, 3 books are first edition, and then Mr. Keshe started with a book in 2009, and this one is called collectors edition. (1:06). We used to sign books, but this time there are no signed books. We know we have a German edition, first, second and third book. Spanish book number 1. ... These are books with ISBN numbers so they can't be published anywhere else. If you go on a website and buy a stolen one, that is your prerogative, that's what you see. We are backing with the full presentation with the books. Maybe very soon we'll write and release Book #4 and 5 which are fully written. Maybe we have to add a little bit to it. When I retire I'll finish the books. ... Would you like to show us other products in the shop. Wellness section. For northern countries in winter and running heating devices we have humidifiers, we have the Gans ball humidifier. (1:08). Gans water dispenser. Mr. Keshe says, this has different herbs in it, Chinese herbs will be introduced in the next couple of weeks. ... We launched at the beginning of this year the cosmetic packs. .. (1:10). Shampoo, soaps, Pain Pads, MaGrav Alkalizer for water, T-Shirts, eye masks, feet pads, knee pads, Pl liquid hand soap, neck pad, seat pad. (1:14). ... These cosmetic packs can be mixed with the cubes from China so they can be made a set ... (1:16). MaGrav Units and the cascading pair from Ghana 2 for 1000 Euros. and Sanitizer. We are encouraging people to do their own experiments with Gans at home so we are offering Experimental Kits, CO2 Gans, complete capture kits, (1:18). Coils, field transferring kit (Orange and Cup), Plasma ball unit, Medical Field Units, and the portable units. ... (1:20). Dr. Klaus discusses new project in German speaking areas. Austrian KF is giving for free to people who open their houses for others in their neighborhood to come and sit in the fields to experience the plasma fields directly. ... (1:22).

(1:28).

(1:36). (1:38).
(1:40). We can go deeper in understanding the science and the knowledge. In the past couple of weeks we entered into a new era of teaching and understanding and in that process it has been important for us to go in more detail, in more depth of the work of our systems. The new space T requires the feeling of the fields, and the knowledge of understanding what that field means to me and how I react to it, it's very much like we have made senses like the vision, and smell, we don't see it but we can smell it. We have made senses of presence that somebody is near us, and for what we taste, but what mankind has forgotten is the feel of the field of the STM. (1:42). This means in space where we exist and we are planning to travel into, and open the door as us as the human race. We have to open the essence of the feel of our soul. 17 (break) What is important is now we come to the understanding of the feel of our soul, how in the space there is no physicality, in the space we don't ?? our vision, and to our strength cannot see. (1:44). Our vision and our feeling is restricted with the matter states of the planet earth. 09

259th Knowledge Seekers Workshop - Jan 17, 2019
(,)

(:11). In coming weeks we'll announce new collaborations with organizations and governments. Scientific organizations are looking at KF work. ... (:14). We have received some orders for the Cascading power Unit, and it is good to see we have overcome the barriers of race, because they may be thinking that because it's from Africa that it's no good. It made by the KF and certified, we don't get everything right all the time but on the other hand, these systems have been tested by the petroleum groups and there is confirmation that it gives reduction in power. .. The cascading system starts feeding itself that it is a true generator, over time it just needs the phases of AC. If you can create that condition it works more or less 100%, we have seen it achieved in a number of countries. I ask you to support the Ghana CPU, ... (:16). ...
(:18). .. some of the advancements of the KF is leaking into the international press. ... we try our best to keep very low on the radar. .. We'll go back to the teachings. We have a question from Caroline. We leave it to you to decide how to make the Portals. Tomorrow in a location to setup the first structure of a Portal. Tomorrow physically on the premises, the first Portal will be set up around the middle of this year and the structure of the organization. What will this Portal give us and what is a portal. A Portal is an eye into the future, another dimension. (:20). That's why we call it a Portal. If you think, the STM has its own portal. .. Now for the first time, those of you who speak about dreaming and opening of the STM. How the physicality has created what I call a portal for its own transportation, communication, ?? value strength of the softer and higher order. What does this mean? If you look at the structure of the physicality of the man, puts a ?? of the STM, you'll see the portal, it has been there, it's a portal that we as human beings never considered it, but now that we understand and we graduate into it, we have to, we have no choice. If we look at the skull, the STM has made a portal for itself, very cleverly. (:22). The eye in the dimension of physicality and an eye in the soul. If you look at the picture of the soul and draw a line right across it, what do you see. If you take the totality of the wavelengths or what I call the bandwidth, the eye of the man, what do you see, you cross the position of the STM. very strange, but what is important is, the eye, or the STM has chosen a dimension of the soft tissue where the rest of its structure is considered to be well absorbed. When we look to the neural system and structure of the eye, and the STM, we find one of the most important Portals of life and ?? self. If you can increase and understand the strength of the STM and its operation the whole universe becomes visible to you. In the Universal Community many, many races are like this, it's all closed, but they have used the strength of the soul to go beyond the dimension of the physicality of the structure of the boundary of the emotion, or what we call the brain. When we speak about the STM and a portal, the eye of the man. (:24). Skin. But at the same time this skin ofllows a structure of the physicality. How far can we go and how far can we extend this knowledge? Do we need to have vision ?? direction to be able to see or can we direct

our vision for us to be able to transfer the strength of the STM through. When you understand and humanity comes to mature enough, you'll find out that the physical eye of the man and its body, physicality, is one of the most powerful tools that a man could have been given to be able for the transportation, communication for the soul with the ?? universe. Vision as we call it, the eye of the man, is a soft tissue ?? If you look at the position of the soul and at the other dimension of the brain, the soul sits right through, looks down, ?? the eye of ?? Up or down slightly and you'll see the ?? direction of the soul. We are looking at the side view of this, when you look at the frontal view you'll see the eye looks direction into the STM. (:26). Do you remember the first times we started speaking about the position of the soul I explained to you if you can find a stereo (head) phone and how you can locate it. So you have your stereo (head)phone and your vision, you can pinpoint the soul. If I draw this in a different dimension in a very practical way, you have the 2 hemispheres of the brain, and the 2 eyes which cross, and the 2 ears, if you draw the lines straight across in a very specific way, you should be able to see the dimension of the soul, and the position of the STM. We always had access to, and you always gained access out of, and in the future when the man grows in knowledge, you'll understand something very simple and that is, why when we have a dream we (also) have a vision. (:28). When we have a dream about our mother or loved ones or children, why do we see visually, why do we connect with the noise and the place, it's because the STM sees through the eye and in that process of ?? and reaching other souls what it gets back, it comes through the vision, therefore we have a vision of it. Up to now, man has never understood this. This ?? absorbs, has a limitation, some ?? visual of the eye and the liquid within the eye is the transformation of the level of the soul to the level of the physicality. And in conditions when you don't even have an eyeball, the structure which is built by ancestors in the position of the conversion sits within the eye. The physicality of the eyeball is more or less irrelevant ??? This is why our soul's portal is the eye. And that's why everything we see as a dream, ?/ a connection between our soul in understanding connection with other souls goes through the eye at a given strength. But we have to understand that the whole structure of the skull receives other strengths at the level of the vision of the man that we see (:30). our loved ones or we see ?? , we see through the portal through the strength of the soul, through the vision of the eye which in turn ?? soul of the environment, and the soul of the loved ones, we see converts back into and becomes what we call the vision, or memory or what we had a dream of. Even in the daytime when the man is awake and looks through his eyes, the soul is still in communication with the others, and what is coming back and gets registered within the structure of physicality. The STM never sleeps and the eyes never stop converting. But it comes to another point, when you travel in the depth of the U and this vision of, or condition of what we call vision, or this condition of hte rest and sleep disappears because now our rest and sleep time is totally dependent on the rotation of the sun and earth, in the space there is no sun, and we are in the dimensions of no time, and no space, because that space is yours, there is no other space you can be in. A lot of you don't understand when we speak about no time and space, ?? the U, because the time, place, and space is you, nothing exists before or after. (:32). When you are in the depth of the space and you don't have these parameters (earth rotation) which have literally controlled the physicality of the man, is there a time for rest or do we live through the eye of the STM. Do we go through 8 hour cycles and 16 hours of waking because the 8 hours in the

depth of the U is 1 second and ?? is less than 1 second ?? does it exist. Or do we go as part of the understanding of the regeneration, or replacement, do we take and wait 16 hours to recharge, what we call during the rest time, or do we recharge as we use, or do we take from the environment of the U as we need that we don't need to recharge or that rest time. In ?? countries, and lack of our ancestors, except now that they brought their religions and they shut us closed down because it's a Sunday, or Saturday is a Jewish holiday and Friday a Moslem, if 4 more religions are brought in the whole week will be holiday time ... (:34). .. then we become true man of space, there is no space ?? gap. It goes back to the olden time when all the religions came in to rob the STM, ?? work 365 days of the year. They found that they celebrate for something and they celebrate. So we go back to our origins on this planet, there was no weeks, days, no time. But the difference with the world of the space when you go into it, there is no lack of energy, because as we use we replenish, actually we don't use, we tap into the universal energy, as we use it, it ?? Do I need to hoard food that one day I am going to go hungry in the space. But the food is there, it's not part of my ?? it will be there as I need it. Then it comes to one fundamental question, what is man going to do with the life of no tiredness, no hunger, and no dimension. How do we spend our time in the depth of the space. When you watch some of these futuristic movies they put people in capsules to be asleep for a hundred years until they get to the destination. A hundred years in the life of man is nothing in the space. And if you read the news, now that we understand how the STM works you don't need to put anybody to sleep, but you bring balance between the STM and the soul of the physicality that they work (:36). in a synchronized way. ?? how many nuclear physicist, I am a scientist by nature, to me when I look at the STM and the soul of the physicality, it explains to me a proton and an electron, an electron moves and it takes energy as it needs to find a position in relevance to its proton, in the depth of the space the life of the man will be the same, the physicality will absorb what it needs from the soul to keep within a position and a distance from its creator then do we need to look fro food in the span of the U, or do we actually become another work of nature, an electron and a proton. This is 1 atom and this is 1 atom .. the existence of the man. If you understand this, do we need to feed the man. This brings us to a lot of things. I didn't come here to build up factories, I came to detach man from physicality, which is ?? within the factory. But it the way I can get the man to see the beauty of the T and start building things and become independent. research centers to develop new ways, to understand more, but now that we understand and through it we can understand, (:38). how the STM works and how it manifests itself, and how it keeps its position in respect to its dimension then is there any reality to the physicality of the man, or is it just a mirage of fields in trying to keep position with each other, create vision, a mirage of physicality. Then is there a space and time, then is there a time to have the space to confirm the existence. Do we need the vision or is the vision a portal for communication of the STM and without the restriction to the ?? of physicality to the strength of the other souls. Would we see the souls of entities of the U through our soul, through the eye of the man, but not through the physical operation of the man, the soul of the cells of the physicality of the man, as it converts to the vision, the STM. Is there a path in the brain which can convert such ??? for us to understand, and then it comes to another dimension of the understanding that the man has to open up to, that we have already been aware of the existence of the ??? of the U, but the information has been filtered at a given level

that is not, that is above or below (:40). the ?? sight vision of the man ?? in the dimension of the physicality of this planet. The is, it goes back to the medical teaching, we had Dr. Eliya in the first 30 odd teachings, in every shape or form she confirmed the existence through the medical ?? acceptance and the machinery and existence which confirms the correctness of, then we put the parallel in the dimension of the soul and understanding the work of the Pl, then this brings one thing very important to all of us, that we have created systems and technologies to confirm that what we see is what it is, because we have transferred the knowledge in the physical dimension of understanding of ourselves. We send aircraft onto Mars, to Moon, and we take still pictures of that frame at the vision of man and not at the strength of the vision of the U. And then because we do it we confirm to ourselves that this is it, because as we did with medical systems we built systems to fit into the fallacy that the oxygen crosses the lung and then it gets oxygenized, and we all accepted it and now with the new T in the understanding of ?? we understand that there is no such thing, that it is just an energy transfer. If you could put the banana and transfer its energy (:42). through your mouth and the banana appears in your lymph and it becomes part of your body, you can do the same thing, push the banana through your eye and it goes through and gets transferred to where it has to go, but you don't need the mouth you can just push it through the skin and it becomes part of the lymph. So we understand that there is a process of conversion, but man has made systems to confirm according to the time of his understanding, systems to confer that he is correct, and we have accepted it, and this is now and it's time to understand and to want to understand the work of the physicality of the U is not at the level of the vision of the man. It's at the vision of the full strength spectrum STM. We just convert it and take the part that we need. If you go to the last pages in one of the books, I say the God is the Creator and the man ?? is the converter, we convert very little of it, but the love of the Creator spans the whole spectrum. What to you is an ant, to other creatures of the U is a moving soul, it doesn't see the physicality. This is what we have to understand and in the process of the life ?? when you ?? create portals, and portals to transfer the STM, or the dimension of the physicality, these things will count very heavy, because you have to decide where is the space gap that I can exist and not necessarily in the dimension of physicality (:44). of this planet, this solar system, galaxy and this universe. If I take the same soul which gives the physicality of the man with 2 arms and 2 legs and put it in another universe strength position, it could be nothing, it could become 1 cell to cover the whole space of that U as 1 cell. Because it's the energy of the system that counts and not the length of your fingers and toes, and ?? Then we come to one fundamental point in understanding, when you make these portals. these systems of transportation of the STM for transportation of the U, do we need to control them ?? by strength of the STM on this planet, or do we give the STM the freedom to choose his place, point ?? ?? then what happens to the beautiful fallacy which the man has accepted, "I made man in the image of myself", the image of me on earth is 2 hands 2 legs and the image of me on planet Zeus is 20 arms and 40 legs, which one is correct, or is my image dependent on the environment of the manifestation, and then do I still communicate and be in control of the space dimension of the STM in that position, and I still can look through the portal and I'll still be in touch with the mother or sister which I knew on planet earth. (:46). In the upcoming conference with the space agencies around the world in a few weeks time these are the things that will be considered. The new space agency which will come as the

collaboration of the work of not only the space agencies but the KF of these nations, including them as part of it because then they become responsible to teach the scientists at NASA and Russian Space Agency and the rest, the understanding of the Pl at that level of what we teach, then you'll find out that they have a lot of problems until we can show, manifest. When we have set up the "CIBRIU" what is the name for the newly setup space agency, which stands for China, Iran, Brazil, Russia, India, and United States space agencies. We are not looking only to bring scientists from NASA. First comes the scientists from KF who have developed the space T in their work. We merge the space agencies of the nations with the KF. Because it's the responsibility of you to teach these guys that there is another ?? what you do. cibriu.org is registered and will start its operation in the coming weeks. It will be a collective space agency program as part of the KF. (:48). Part of this is for you to open the eye of the space scientists of the present to the understanding of the work of the STM. With the confirmation of the starting of CIBRIU we bring cyber work of the STM in what ?? many of you think that is ?? ???? think twice, where doe the U sit. The creation of understanding of the new T and transferring the knowledge of what we have taught and you have become wise to it and many of you have started to build the space systems ?? you have understood it, you are building the SS to ?? the fine lines which I teach and many of you don't understand and some of you do, you will become the teachers of these agencies and the teachers of the new space science. In this process it's easier to teach the scientists of the new space era, we have moved from the physicality of the craft, and planet earth, and the body of the man, to the dimension of the creation which is the dimension of the STM without ??? It will be very hard for the present aerospace scientists to accept, because then they'll find out that they have no passengers to carry, which was their aim. We have one of our colleagues, people we know who is ??? (:50). ?? policy is to complete the NASA space mission to Mars for human life landing on Mars in 2030. The head of the mission has been told that he can't speak to the KF, .. he can loose his job. Because how long can these space agencies cover-up. We see in the next level that by building the space cities we'll show that they are nothing but the soul of the communication, and not only on this planet but across the U. In the setting up of the new space cities one of the new considerations, which is part of our obligation, we have to create a space that is a point of interaction the man and the STM with creatures and hte soul of the creatures of the U. Because now we understand that we have to have a guest and acceptance room, somewhere we can provide ?? and provide the environment of ?? of the planet, to be seen and shown. As a nation ??? matter state some years ago, they sent some space craft out into the U which is still going, it says that we are people from earth, and it says this is this, etc. But now we have changed with the new understanding, we bring the soul of (:52). what we call, the man the universe to be a guest at home, even though they have been a guest here for a long time. I was explaining this some time ago and it's not far from reality, sometimes you get on a bus or you sit on a bench somewhere, or you come across a man and you start talking and then you realize that you know each other, from childhood you went to the same school, or you lived in the same neighborhood and you talk about this and that cafe, ?? running around in that environment, you have met but you have no memories of it. In these space cities, now you are given the memories to remember, that the man you met on the street at such a place was a traveler of the space as you didn't know, but now you can connect ??? but he looked as to be eating to the

conformity of you, for you to be happy, but it is there for him to see the STM. By opening up these new space agencies, these new space cities, we are not inviting you to come and see the new magic or new Disney world, but it's the world where it makes you dizzy to understand that it has always been there. It has always been with us but it is us who have not understood. (:54). if you understand it, you have 2 legs and 2 arms ?? due to the atmospheric condition of this planet and you carry the Amino Acid (AA) of this planet, and then when you go to planet Zeus and you get the dimension of the physicality of what it could be there. In creating these portals we allow the passengers who made themselves to be in the dimension of man, to show themselves in the original dimension of their point of creation on there planet. And then we see the true soul and the creation of the time and space of the creation. If many of you think, I can, I will see aliens and I can say what it is, my friends it is a very good guess, but when we create a condition then we see, ?? we never knew, that the man we saw on the space in the dimension now this is his true face, his true physicality at the dimension of the creation. The change in the coming time is so rapid, that mankind has 2 choices, to carry on with the stigma and stick to what is in the past or accept the new and the present future of the ?? science. Many will have the ?? remembrances of earth. It used to be .. it has come it has to be. It's (always) been there, it's us who didn't know. As I explained to a child, (:56). he said, when did you discover electricity? I said, the electricity has been with us since the beginning of time, ?? It's us who now understands how it is produced and we make it and call it a Tesla ball. It's the same lightening. It has always been with us, but now we are educated to see. We are developing a knowledge of the universal structure, not in the matter state of the man, to be able to understand the reality and the truth about creation and not about ourselves. The minute we start looking back to see about us, then we come to (we stop at) the same point that man has been up to now but further down the line ?? These teachings in the past few weeks will be heard by many men of this planet for generations to come. These teachings are the cornerstones of the new Era. We just happen to be with it as it happens. In the coming time all this will become what we call, the bread and butter of everyday travel, interaction, existence of the man. If you are not happy in the dimension of physicality you do not need to imprison yourself into it, that you confirm and conform with it. This is important for many, many things when the man comes to space. (:58). We learn the new freedom, but we have to learn with this new freedom of the physicality comes a new principle, a new dimension of totality, and an integrity of what is mine and not what is others. And it goes back to the first Commandment, Thy Shall Not Steal. In regards to the new understanding, I have seen many people mixing Gans' and other things and I sit down and I say to myself, my god, they are still busy with it, they have not seen. If you want to replicate the work of the U and understand it, do what happens in the U and not what you want it to be based on what you understood. We have started a development in the final phase of the Spaceship Program and hopefully in due coarse you'll see unconditional flight in the structure of the STM. But in the new space system we have ofllowed what "I want", it has been very much up to now blocks by blocks for you to learn the next block before you can have the whole structure. The new space system which is now under design and development is a completion of totality. (1:00). It's the replication step by step. We'll not release when, how and who or where it is going to be shown, but when it manifests itself every soul on this planet will feel it. In the past days we have moved to the final stages of it, ?? of man. Systems are getting designed and

developed, at the same time when these systems come to the full operation, it will replicate the operation of the STM, ?? not the physicality of the man, even though we need the physicality ?? The final phase or stage in the system is very simple but extremely ?? because it has to take into account everything that leads to creation of the STM. You have an egg and a sperm on their own ?? , but when they share their fields, in sharing they have, rubbing off, which creates a condition of collecting the spares which becomes a new center, and again the interaction of them becomes the creation of more cells because it comes out of the friction of interaction plus what the environment gives that at the end, (1:02). that it ends up with the STM and the physicality of the man. But up to now no one has ofllowed this. In the Iranian space agency work 10 or 11 years ago I put this in, but the Iranian scientists have not understood this ??, they still work on the matter state. But if you understand this and comprehend, then you'll understand something very, very simple, that man has entered the final phase of understanding not the work of the U and how to travel the U, but to understand the work and the ?? of his own soul, and nothing else. What you call the "Unified Field Theory", if you read my work, if this is planet earth, the UFT tells you one thing, the M and G are all the same, it depends on which point and which direction you are looking at. If you stand and look with the 2 eyes you see this coming and going and it behaves as 1 field. If you look that way it looks red or white and if you look that way it looks red or white, and then the other way the same, and then you say they are 2 different things. But in reality if you look at the true structure of a car you put red lights in the back and white in the front, but it's the same car. (1:04). It's unified, it's the same thing, it depends has it passed you or is it coming towards you, so as it is the same car it's unified. The UFT has become an enigmas in the world of physics shows the lack of understanding of man. If you understand this, then change the car to the STM. Then you have to decide, are you getting or are you giving, or is it coming to you to receive as you need it, or are you giving away what you don't need. Those who made the world of UFT shows an absolute lack of understanding of totality of the creation, even though they live by it everyday. Is it on the red shift or the white shift, in fact there is only 1 shift and it's the same light, same ?? it's just dependent upon the observer, and then if you understand this, as a man in the space, this makes a lot of problems for you lot, and that is, is the soul next to me coming to take from me, or is the soul on this side coming to give, and how purple is this, and how blue and white is the other one, then you decide your reaction, and in fact, your position in respect to both, you take a new position. (1:06). If you look at this it's exactly the same principle, the same teaching, nothing has changed, you just change the name of the earth and the sun, to the name of the man and his physicality to the position of the STM and another soul, in essence it's the same essence the same work of interaction, the fields of the U. So we come back to the beginning, what is the purpose of the STM, and now that we understand this, has the STM, now has become understood by us that it leaves, it has communicated, (that) it will forever communicate as long as the dimension of the physicality of the man exists through the portal of the eye of the man. Or does the body need the eye or has he made himself 2 holes to be able to escape through, and be able to do his work, to communicate with the outside at the strength of the vision of the man. Now for the first time we understand what it means and how the dream comes to be visualized by us. Because we actually see that our eye has always seen the soul of the mother and has transformed it in the physical dimension to the structure of the mother, (1:08). even

through the life of the mother in front of you and the presence in ?? Then you come to understand how far man has ofoled himself in confirmation of the physicality, or we have changed the strength at a certain strength we see the physicality of the mother but in fact, we always observed the soul of the mother, and when the mother changes the position and leaves the physicality we still see the same soul and transfer the vision as the mother. This is the truth about the creation that man has never understood. The eyesight of the man with nothing there to block the strength at the matter state of conformity is like a house with bricks and wherever you go you don't see anything outside except where you left 2 windows. By the brick walls we block ourselves to see the outside and the outside to see us, but we choose the windows to be the portals for us to be able to see, so has it been with the man himself. Nothing changes in what's happening outside in the reality of the dimension of existence, it's just that when we decide to look through the window, but all the information from outside has always come into it through the window and all information has gone out through the windows. We made the house in the same condition and position of the skull and we gave it a portal, we call it a window (eyes), and we made it transparent. (1:10). It's us who has chosen to put a shutter that we don't see when it's dark or when it's cold, and in the eyes we created the eyelashes that this time I just want to work through the soul, I call it sleep time that I don't need the dimension of the wake time dimension of physicality, that I don't want to see the color, bedroom, roof or ceiling or the sky, so I only work through the dimension of the STM. Therefore the work of the STM never stops. Just because you close the shutters of the windows of the house doesn't mean that the sun is not shinning, not that the light bulb in the house is not working. You have decided to close but in reality the field strength of that shutter moves in, the heat of the sun comes in. So it is with the STM. But in the condition of the eye when the information comes through the ?? cipher of the vision, the socket that is another intermediary ?? conveys the information of the STM to the dimension of the physicality of hte mother as you know. When it comes to the dimension of the space how do we recognize passengers of the U if we carry the dimension of the physicality of the man on the position and the strength of the field of the physicality. The astronauts of the future will have a huge problem to separate themselves from this. Those of you who travel through the structure of the STM will enjoy the beauty of the creation across the U. Then the question goes do we still need the SS or do we travel on the ship of the space of our soul and conquer the U. (1:12). Now I have opened to you one of the biggest mysteries of mankind, because you are so physical you have to see it to believe it. Now you understand how seeing has been a tool for you not to see the reality because it has kept man in the dimension of physicality at the strength of more or less the Ca of the life of this planet. With a slightly different strength of the Ca and I create the transparency of the vision of the man. And when I pile it up I call it a skull and when I thicken it a little bit I call it a skin, but this is the strength that I want to travel and I made portals for it to travel in the spans of the U. Now we have opened another mystery about the creation, it is for those of you who understand to decide where you want to go and for many of you it will take some time to understand, and many of you have already understood because I have reached and touched the soul to carry the information. If you look at it, we have to do something while the soul is alive, it doesn't matter of it's on this planet or in the U. What is better to teach the other souls, that is what I do ?? to elevate the souls of so many. Then the question comes, what do you do when you become passengers of the space (1:14).

and in the dimension of the soul of the creation, and you become part of and you become into a new dimension. Do you become a teacher or do you become a thief? This very much depends on the strength of the physicality that you chose or you live on the extension of the dimension of the STM. Physicality needs feeding and if you can't find continuous feeding you become a thief. The soul becomes a teacher, it's not feeding, but it teaches and as it teaches it receives. Then you have to decide who is the white light and who has taken and become the red light, or is it that what I have given has become the red to me, not what is taken from me and therefore moving from me. This is a very important point for those of you who start understanding the work of the soul, the work of the portals, and that the portal of hte U doesn't have to be a city but it is in the eye of the man, through the vision of hte man at the strength of the dimensions of the physicality of the space and time of the existence. Now you can see where the new knowledge goes. Every week we extend bit by bit that somebody might understand. Some one still builds a SS and some one has already made the ship from the space of their soul. (1:16). Then the next time that you dream and you say, I had a dream, just think, I didn't have a dream, it's what I shared with the soul and it allowed me to be, to share with. And as the sun shines and it spreads light and its fields, and at the same time it shines on earth, and Jupiter and Saturn, it's the space of time that it confirms its manifestation. So as you are dreaming of or communicating through the dimension of the soul then you are yourself another dimension as a star in the galaxy receiving the lights and fields of the U and you take as much as you need and give as much as you don't need but you exist in the same time on earth, Mars and Jupiter and you can be observed in another part of the U as that shinny dot you call the sun, we call it our solar system. Now it becomes very easy to understand, are we dreaming or is our physical life part of the physicality dream. Then it comes to the point, do we live 2 lives, 1 life in the dimension of the physicality strength and 1 in the dimension of the soul of the strength of the U. When you close your eyes and call it asleep, (1:18). and you have that dream, which means you use the dimension of the portal of the eye to be in maybe 10 different dimensions but you only want to choose one, but the same thing happens while you are walking, you live the 2 lives, the life of the physicality, the soul of the strength of the matter state of this planet, and then the dimension of the soul of the universe, because the sun at this point is earth and we see, and the sun at the other point ?? and exists as Jupiter or Saturn and is the mother or the father, or somewhere else. Man has to realize the portal of the STM operates in 2 dimensions and it's him who has to chose and at the time when you blank out one frequency, which you call the frequency of the physicality, the other one which is ?? around the time has been going ?? and still in touch, we decide today if I want to listen to channel 4 and tomorrow channel 3 and the channel 4 was the dream where I wanted to see where the mother is saying, and the channel 2 is my father and I can convert that channel vision ?? coming back, transferring the knowledge through my eyes to physicality of the existence of where I see. Then you understand that man has always been in touch with the totality of the U, it's us who has chosen to filter through the physicality, we still let the rest process in the back(ground). It explains why the brain is so big and such a big recording of everything, because it's not just recording what you see with the eye of (1:20). physicality, it's recording what is happening with the eye of the STM with the rest of the souls, and it has to remember it because it's the same as you remember that you have been to Africa 20 years ago and you saw the lion, it has to

remember it has been to the other universes and has seen such a thing, because the other souls which it is in touch with have been there and they want to discuss something. 26

(1:22).

(1:26).

(1:30). Any questions. You'll understand these teachings of today especially, we'll be put into the structure and the teachings of Buddha. 39

(1:36).

(1:42).

(1:50).

(1:54). .. feeling the others and they become part of them. Each one of us will experience this in different ways. Man gradually will start going back to the memory of the physicality and the memory of the soul, because it has always been there but we didn't know how to tap into, and then to what extent we allow it to come and to be accepted by us, and it goes back to what I said, we take from this T according to our intelligence. We accept the understanding that there has been another recording of our lives all the time with us but we were not aware of it. It likes there has been a "spy" in the camp, but we thought we were taking a film from what is happening, but in fact, we were getting filmed ourselves of what we are doing in the whole structure in respect to the others that they are, have been in a way, already with us but were not aware of. Each one of us will experience this in a different way, now that we are, and slowly people will start gathering ?? The teaching of the KF, my teachings in the next 12 months will come across every man on this planet. It has been set. It's not the obscurity that we have been, we have choose to complete the teaching that when it comes into the totality, it will be done and accepted by totality in one go. The whole process is just like you are in a research program (1:56). and you fine tune and make everything perfect, then you exhibit the car, as the new invention, the new car. 09

... I told to Armen this morning, my work is not to build factories but to change the soul of mankind, (2:00). but if the factory has to be built because there are things to be done, okay we have to be busy, we keep busy, but the process can't stop. I wrote to Caroline yesterday and read it in the private teaching, when the process has started ... I am so glad I came here to work here with such a beautiful nation and government, this is the Chinese nation, the peace will come when the Yin and Yang ?? live in creation, and "Abrahamism" (3 Orthodox religion of West), will come to live in balance. Iran and China, the extremes of ??, to the extremes of religion ?? working through the space program of the Spaceship will bring humanity to balance. We brought the knowledge to Iran 11 years ago and now we balance it with China. (2:02). If you look, the setting up of

the "Cirbo " is China and Iran. Is to bring the balance at the beginning that it lets the rest to be ?? We know what we are doing, it's just that covering the sugar with a slightly different test, that when the sugar comes you all don't throw everything away and just stick to the honey part, because honey part will be here forever, but man has to understand what mistakes he has paid, and made and for it to change. My work is well planned, designed, and it will be translated to and acted upon, because it's not just one teaching of 259, it's the teaching of totality that there is no numbers, but it has taken so long to bring the education and to get educated. If we would have brought this T and knowledge, mankind was not ready that all of them benefit by it the same way, that there should be no inequality, all have to be equal, and we made and made and brought the knowledge of communication into internet, television, the way I am talking to you across this planet, (2:04). to be able to deliver at this time so everybody gets the same thing. 05

(2:10).

(2:20).

(2:30). ... (2:32). (long talk ..) using N coated mirrors to discharge emotions, then can feel the fields easy. .. price 1,000 Euros for the pair it's far too less because we can only produce 1 in 2 months. (2:38). .. (2:40). (2:42). .. the system you have is known as a plasma frequency jammer. (2:44). it blocks, but at the same time you still hear commands, the voice, but your switch has certain ?? This is the end of the military warfare. This is how what I said, we make, metal birds out of aircraft, and bathtubs out of aircraft carriers. This is what is the beginning of the new science. No interference, it's just a matter of plasma transfer. You can use the same thing to feed the man. 48
(2:46).
(2:48).

(2:54). This is a live test, ... (2:56). (2:58). Shows the plasma field unit. (3:00).
(3:04). (3:06).
(3:08).
(3:10).
(3:12). (3:14).
(3:16).
(3:18). What you'll see in the coming time,
(3:20).

260th Knowledge Seekers Workshop - Jan 24, 2019

(,)

(:11). We have shared a lot in the past 5 years. What is important is to see where and how we can go with this knowledge. Ella will introduce the books. Amazon has Book #1 and 2, for $19.99. ... (:14). ... Fraud on Amazon, Structure of Light, $895. (:16). The second edition for $22. (:18). (some products). (:20). (teachings start). What I'll try to do this week is to open the eye of some of you to the science, and some of you might come to it somewhere down the line, and it's so much in respect to life in the world of science and how scientists are developing different aspects of the T in the background and it has taken hold with elite scientists in the world. You know we had the scientist who claimed the Black Hole was the eating machine and the rest of it (Hawkins), we have proof of it and now we see that in reality it's not. A lot of terminology has been created and they're very hard to get out of the system because a lot of people accepted them. The terminology like the horizon, which comes with the black hole ?? core levels which comes with it to get to this point of horizon, (they say) you can never come back and the G will take hold of you. These theories are still carrying on, because one person has not asked ... (:22). .. What is interesting is that these terminologies in the world of science and creation of black holes which started with Steven Hawkins, still carries on and it becomes very difficult to change, because they come up with so many theories on it and they carry their own momentum, and are getting defended by scientists in a very aggressive way. By the development of the new technologies that are coming in they are creating more fallacies and unacceptable knowledge in the world of science. One of these is called, 3 dimensional ?? of the universe, what they call the hologram. Some of you might have heard of this terminology. What it is, is that the whole U is a hologram and there is no reality to it, and the reality is that the U is flat, 2 dimensions above, and what we are looking at has no reality to it, but we have come to accept it as reality. And hundreds of millions of dollars are getting spent on this fancy talk. (:24). It is good for the KF K Seekers to understand what this is and then you'll understand how this thing has taken hold, and governments are spending billions on it. Very soon someone will bring it to a point of reality. What a hologram U is, is that it is considered that the U is flat and then the reflection from this flatness creates images which are not real being the galaxies and stars and everything else. We can redefine this, this hologram principle is getting a lot of money spent on it. It started a few years and now they're actually creating a lot of things to confirm it's true and people because they can see things they believe in it. What it is they say, for example there is a 2 dimensional picture of the galaxy, and then underneath of it, if you look at it that way, here we see a galaxy, but actually there is no galaxy, there is just light shining through to give us that image. And one of these unreal things is planet earth because it has its ?? on the surface of the 2 dimension. This partially started due to a lot of computer programming, and now they are writing computer programs which actually can make and show this. But in reality, no one has asked a single question, why are these people spending so much money on a lot of fallacies. Because we see this in the real life (:26). and nobody is stopping this game of the hologram picture of the U, that if there is a galaxy here is actually creates a (reflection) here and there is a pin across it that it holds its position, they're imaginary pins but they're M fields. You see on the surface of the 2 dimension, this is to them the reality, what actually exists, and whatever we see underneath is just hologram. So the real life is in 2 dimension and we see what they are explaining, but in reality nobody has told these people that if you stand on earth and you look at the sun, it's flat, none of us see the sun

as a full sphere, we always observe the sun as a flat entity, but in the shape of a circle. We know the sun is there because when we look at the earth from the moon again we see it as flat. So in reality is the earth flat, we are living on it, and the earth is round because we know, we have mined in it, we travel around it. (:28). So when it comes to the new science of holography and they are trying to convince you that the U is flat. Yes, in the eyes of the man as an observer it is flat, but in reality it's not, because the man on the moon sees the earth as flat disk and the man on the sun sees the earth and the moon as a flat disk. This theory of holography they have created dimensions to it and have created it to say that it is a flat entity. What this subject brings up is that now that they have managed to create hundreds of millions of stars and they say they are holograms, and they confirm that it has a face like that earth outside, it's very much like if you have an eruption inside the sun we see it on the sun, because it bubbles up and we see it. And they say that this surface is flat and it's 2 dimension, that this hologram of the U as we see it is a reflection of a flat surface. ?? it's changed something fundamental. For the first time man confirms that the U has a face. There is an end, a surface exactly like the surface of the sun, earth , and the moon, and this theory that they are building up, it's quite possible that the U has a face, because as we say the U is Unicose, and so as we stood here and we watched the sun and the moon (:30). if you stand in another dimension we'll see the face of this U. And as is in Book #3, we are part of the Unicose, there are many of these flat surfaces, the 2 dimension pattern, because actually the light through the universe shines on its surface, like a fish in the ocean. But 1 fundamental question to ask the scientific world of what I can explain is that when you are on the sea, on a boat, and you are sitting on this flat surface of the U and it is transparent of anything, is this galaxy a fish swimming in the ocean of the U, as it does if we were on the boat on the high seas. Does it mean that our U has started opening up, does it mean now that man is beginning to understand more in its mistakes it's confirming the existence of the Unicose. Huge amounts of money are being spent in UK and US on this hologram, the last station is a $160 million for just image producing computer programming. Originally 10 years ago this came up because people could not accept (:32). the totality of everlasting black hole that it gobbles up everything. A lot of scientists thought that if everything ends up to nothing then what is going to happen to us, therefore they created this mirage ?? Nuclear and astro-physicists and cosmologists altogether ganged up to confirm that there is no existence, there is nothing, because we were convinced that we'll all end up in this black hole created by Steven Hawkins and we'll never come out and that will be the end. But if you look at the fundamental principle of understanding of the reality about the interaction of the pattern of the fields of the U, it goes back to the same thing, it's as much M as it is G. It means even a black hole, if you consider it, due to confirmation of its existence, its atmosphere. And as we see with the interaction of the fields of the planet, and as we see with the interaction of the fields of the sun, it creates its own ripples. Up to now the world of science has denied this, and this is why they have come up with all these, what I call ridiculous concepts. Because at this moment in time in the world of fantasy of the black hole eating everything up we have never allowed the reality, that as much as it has G, (:34) it also has a M atmosphere too. And as we have seen with the earth, as with any energy with certain mass enters it, it creates light with it, it creates a dimension of existence of its atmosphere. So has happened on the surface on the boundary of the atmosphere of the black hole. We see the ripples of the confirmation of the existence of

the atmosphere of the black hole when you look at the black hole in the background of the ?? of all the galaxies and the fields of the U as they cross. We see shimmers and play of games. Therefore it means for the first time we can confirm that a black hole is an entity. It's a confirmation of existence very much like the sun, the earth, or like any other entity in the U where it not only has G pull, but it has its own atmosphere. Steven Hawkins brought us to this mistake, that we always looked at it as only a G field, but in fact, it's the same as any other entity. It has as much G as M. In the paper I wrote, the creation of black hole, this is what the meaning and emphasis was on, that why we see lights on what we call the magnetosphere of the black hole, (:36). it shows that it reflects light out as much as it takes it in. As much as it pulls in, in interaction with its M field it creates and releases light. The way we see meteorites enter the earth and they burn out and they create light. How come all those lights get attracted inside but we still can see light on the fringes of it outside. For the first time, if you understand this, those of you who ?? in the space T in the dimension of the travel, you'll understand that this is one of the biggest gifts mankind has ever been given. High speed transportation using black holes from one spot to another. Don't forget what you call black hole means the center of intensive fields, compactness. Nothing else. And if you were coming from earth and you locked into one point and to the next one, you might pass the magnetosphere of the black hole, but you can increase your speed beyond the speed of light by billions of times. Man in time will come to understand the beauty of the black holes. As you know in the recent past they made claims and built up (a theory) called Dark Energy and Dark Matters, and the dark energy was the cause of the movement in the galaxy, and now this theory has been totally abandoned by the cosmologists and nuclear physicists because it doesn't exist. If anybody speaks to you of the dark matter they're of the old generation and have not read the new science books because now we understand that there is no such thing as dark matter, (:38). or dark energy because nobody has ever seen it yet. It's just a guess that started a lot of other fallacies. It is important that this part of the theoretical cosmology has to be understood by the KF supporters who will become part of the space technology. You have go beyond the present understanding of the science so that you can understand that the speed of light, is the speed of the time and space that you are traveling. Maybe in the space of the speed of the light of the earth's MG field ??? but if you create another MG field with another material you might reach another speed, which is the ??? G field of the attraction of the light in that matter state, it could 2,3, or 10 times faster then the speed of light on earth. This is the reason why we see the shimmers on the magnetosphere of the black holes. As different matter strength of the fields decide to adjust in respect to the field strength of the background, and then you see the shimmers of G and M or what we call the MaGrav of the black hole is one of the best and clear indications of an entity as a whole. And like the sun in as much as it gives it takes. It takes in its transparent condition compared to the illusion of the black inside and it gives the same in the dimension of translucent atmosphere around it, in what we see as shimmers, (:40). or what we call magnetosphere. As we enter the space T the true space T of the U and not some manmade rocket propulsion this will play a huge gain in the dimension of the space travel. This means, if mankind understands the creation of the black hole within the structure of the cause of the Star Formation (SF) then a new dimension in the dimension of the transportation appears, where zero time travel across dimensions of the U becomes the reality without interacting or interfering with any

object, be it galaxies, stars or any other entity. The creation of these 3 dimensional programs that they are working on, call it holography of the U to show that it is just a hologram and there is no reality to it, opens up a lot for those who work around the KF programs ??? SF, there is an extension in the Unified Field Theory, the Book #8 to be written and released is only and only about M fields of the U, how they are created, how and what is their origin, how they become to create what we call a 2 dimensional and 3D effect, and how our body has adapted itself for a lack of what I call, (:42). understanding or make it easier to not jam the brain with the work of it, converts everything at a distance to a flat surface. These scientists are using this holography as a way of cheating, what more or less Einstein did to us in respect to the speed of light. If you think of it, the earth is flat in the eye of the man on the moon, we still have creatures, water, mines, and the whole caboodle of ?? inside. Then there is a fundamental point in the whole understanding of the structure of the space and that is, how come the speck of dust on the boundary of the solar system here becomes a planet and absorbs matters to it. Is there a reality to the term that there is a black hole inside every planet, that it is a strength that it can create its own dimension and its own magnetosphere and further more there is a point in the dimension of the STM which replicates the center of the planet. Do we have a black hole within the structure, the center of the brain which by absorbing from the totality of the U releases ?? some which becomes the manifestation of the physicality of the man. (:44). This is nothing but the truth. But what is important for mankind is to understand that the strength of this black hole pulls from the environment of the U that in the depth of the U he can use it to feed the physicality of the man, and not for the man to kill to sustain life. In the depth of the space where do we go and what do we look for, the only thing available for us are the fields which are free within the span of the U. And this black hole is called the center of the STM. The size of the brain is the magnetosphere of this black hole, then you have to decide through your emotion, by controlling, do you want this field or that one, depending on what you want to reflect yourself to be, or which part or which organ of this physicality you want to fix. The way we open our eyes and go to the supermarket and we see chicken leg, breast, sirloin steak, tomato, orange and apple. Why do we do this, because we have learned something very simple, we can take this, put it in our mouth and convert it to what we need. (:46). What our body needs, it needs vitamin C, A etc, why not work through the STM to absorb the fields which lead to the creation of this, for it to be converted to this, to be converted back up. In a very short time when the man takes into space ?? the MG fields of the U we'll learn this, because it's very hard to do this in the structure of this planet, because it doesn't allow you and secondly it doesn't have the field strength for you to be able to test it, for you to be able to exam and to see how it's done. What you and we need to learn from the understanding of the black holes, we go back to the paper published on the black holes, you understand that black holes not only absorb but in absorbing they reflect, again as I said in different dimensions and terminology of the physics we call this in the human body the brain, it's magnetosphere, on earth we call it earth's atmosphere, and in galaxies and black holes we call it the shimmering ?? dimension of its existence. So in fact the whole world of science changes when the structure of your brain to the strength (:48). of the structure of the brain of the man, man can travel the space of the U in no time, using the structure of his own existence through the center of the brain or what you cal the STM. 12

(:50).

(:56).

(1:06).
(1:08). ... Any questions. Q: printed holograms can be cut up and have the whole picture in them, is that a better understanding of holography as in the parts comprise the whole, or is fractals a better approach? Just read the question again and you'll find the answer. (1:10). (Rick reads again). .. that the parts of the picture contain the whole picture. In a way yes. What is in the macro is in the micro. But now the Pl field has the full spectrum. It's not like a ?? phone. It's actually a dust. We have to look into the reality of the time and the space, the dimension of the ??? and then we have to consider we are one of the ?? 146 but in 3 dimension. It's extremely simple. Any other question. (1:12). One of the most important things which man will come to understand, as he says, that the Black Holes absorb everything, and within the center of the body there is a Black Hole in the center of the brain, then there is a very fundamental question to ask, when do we get to play with ?? or do we pigeon hole it and ignore a lot of it to fit the formulas we want it to. (1:14). These things can't be taught and ?? crossed to another subject. These things need to be listened to by some of us. It needs a full comprehension of the totality. 18

(1:18).

(1:24).

(1:34).

.. (break in transmission ..) (1:44). ... it was a mirage. What we understand that we have to become aware.
(1:46).

(1:52). ... Q: The last KS Workshop you asked us to understand the way our soul works, and I would like to know, when I create a wish I can feel what happens now thanks to you actually, but I do not really understand what happens within my soul, how does it create the vision sent out in the form of fields, maybe G fields or something, can you tell us more about that? It's very simple. How do you wish to have a cup of tea or a glass of water and you go physically and get it and you satisfy the thirst. The soul has the same function. (1:54). It has fields to go and reach what was the desire, or to give what was the desire. How many times have you passed someone on the street and you couldn't help, and you said, I wish I could help? Do you need to put your hand out to help or by giving through your soul you have already attached, given through the hand of the soul to the hand of the other soul. But is that soul happy to receive what you gave or is it satisfied with what it has. Maybe not content but because it knows its limitation, it can take without limit within that limitation, and be joyful with it and make the best out of it. You look at the giving by what money you put in the pocket or the bucket or in the hand of someone, but does that person need to receive it or is it a mirage you have. Or is it that you got used to physicality of the arm to give but you have no trust in the arm of your

own soul. "I made man in the image of Myself." If the body of the man has a hand so does its soul. And then you say I made a vision and it happened because now you understand (1:56). that there is more to life then physicality. My soul has a hand too. Very recently I had to, as part of what we were involved in, trying to help, watch many animals dying. We were there to help, save, to find a solution, but I stood and watched some dead, some dying, some going through the process of separation of the soul from physicality ... and then it touches you. I gave from my soul to it, to them, but have I elevated the soul to the soul of a man or have I freed them from the dimension of physicality that the soul didn't have to be confined to its position and dimension. Then you understand how worthless physical life is. There are certain events in a man's life that open his eyes to a lot of things, I watched many animals just kicking the last life out of them, not understanding the soul of physicality or is it the soul of the animal. But I am there not just as a man of science to give the water, injection, or a physical hand, or just to be there to see what can be done, (1:58). but I am there as a soul of the creation to give to the soul, that the separation of the soul of physicality is smooth. When you are in the dimension of the space and you have no dimension of the physicality but you see something needs help, needs field strength to move, it's like you go out of the car and you give it a push, but this time the push is not going out and putting a hand on it but you do it with the hand of hte STM, then you get confidence that my physicality has no dimension in compared to what I can do with my soul which created the physicality, and the you say I wished, it means now you are learning about how to use the soul. And don't forget that when you wish to give someone a hand and it doesn't happen, you are not aware, you haven't become wise enough to see that they keep their distance from the fields so they can increase their strength, they don't need. We have to can trust and understand that man has a duel function one through his soul and one through his physicality. Now that the knowledge of the man is rapidly developing to understand the creation and understand that the creation of life is from the interaction of the fields of the U then we understand that we can live in both dimensions. (2:00). We can give with the strength or what I call the hand of the soul or with the hand of physicality, which one do we choose or do we become a master in it like a hybrid car, sometimes we run on diesel and sometimes on electric. Diesel needs a physical fuel and electric is the passage of magnetic fields. We are no different then a hybrid car, it's just that we think we created it but it is actually the image of our own physicality now that we are understanding the operation of the soul and the physicality. We always forgot that we are carrying the master with us and were always pushed to see the servant and we believed the servant and not the wealth of the man. Because the servant ofoled us that we could use it to serve (as) its own master. So when you wish and you say it happened, it means now you have learned that you have another tool in your hand. A new dimension, because then when you are in the space and you have no physicality and you wish to communicate with another soul he hears you and listens to you. .. (2:02). Q: In space there is just the soul and not the eyes but the strength of the soul with the ability to create and see, are stronger emotions the key? More or less, maybe weaker emotions, maybe emotions will lead you to somewhere. Any time in the space you'll pickup the virus of the need, it's very much like a whale when they make distress noise from thousands of kilometers and everyone comes to see, or the others whales come to help. In the U most of the time we don't see the entity, we pickup in our soul the vibes of its feeling. It's 3 dimensional and

understanding it leads us directly to the position. And strange enough sometimes you come across it and you give you soul to it that it stands ?? the lost of its entity, or what we call in the world of the man, suffering. You'll find out that in giving to stop (its suffering) you might lead to the demise of yourself but it doesn't matter because the need to give is much more then the need to take and to hold on to. It's not sacrifice, it's understanding the process of creation. What we doing is to get man to gain trust in his soul and understanding the strength of his soul. (2:04). And that is all it is, nothing else. Any other question. Q: I tried the formula, I love you my soul, I live you and I love with you and I adore you (which is one of your quotes). And what I received from it is a deep breath which helps me eat less. What does this breath mean, blessings from Hassan? It's the fields of life and that is what you received from yourself. In so many dimensions in the coming time, as you said, I wish and it happened, (2:06). the Mozhans were taught this but we never got to the end of it to understand, and that is, now that you say I wished it to happen because I gave my soul to it, now if you understand the process, start ?? give to the part of physicality from your soul, I would like my arms to be fed. Take whatever it needs, and never ask me what time and where, you create a field for it that it is there to take, and then you see how much less food you eat because one arm is not taking more. And when you gain the confidence and not just the image of doing it, do it with a leg, and then another leg, and then the other arm, nothing will change, you'll feel the change in dimension but you'll feel the total understanding and in so many ways it just builds up to the point that you consume less matter state but in fact you feed yourself with the fields of your own soul, she takes from the U, and this builds up, you can't say I won't eat from tomorrow, I am fasting, but you can start training step by step to be able to support your existence through the dimension of the soul. It's really easy. You create a MG field through your soul within the atmosphere of your body, (2:08). and you feed it. In a recent experiment last September we had a huge complaint from farmers and it repeated so it could not be coincidental. What happened is that in some of the teachings I have referred to it, is that in the part where the farm was unused, the Gans material, suddenly out of nowhere bird appeared and ate the crop. Let's say we don't know how much, but it was so much and so often in that period that the farmers were complaining beyond. I said to myself, my god, these guys don't understand, and I said to K Seekers, that the birds came to take their share because the plant was happy that it has produced so much that it wanted to share. But the farmers were not happy, and they complained and complained, we don't know we never seen so many birds, it was strange. This is the field (draws) and we only watered this half. This part created 79 kg. (2:10). and this part (watered side) 249 kg. The same seed, but the material I chose to do, to feed (Gans Water) created this condition. Since the farmers complained about the birds eating so much means we must have produced 500 kg here and the birds ate half of it. They didn't eat from the untreated side (79 kg side). Did the fields create the emotion that we have so much so you had better come and take. The plants and animals were happy but the farmer wasn't happy even though it still tripled his harvest. Now which part don't we understand? Or now the way it's described we understand the totality. Because we never considered that the plant is like a man, it says come I have too much and the birds felt it. I stood watching very recently a large number of animals dying, we couldn't do anything, it was part of ?? (2:12). But what is strange is that it touches the STM. When one was on the ground and he was taking his last breath, the other animals come and push it, and you feel it when the

soul leaves, because they shout and cry. The noise is deafening, they here the departure of the soul of their own, and us we just watch. Are we less then these animals? Have you seen when a man dies the others shout and cry from the time the soul leaves, or do we cry for our loss. They have no loss but why do they cry so much, why do they cry so much to feel that that soul touches their soul that they feed it. Have we become less then animals or have we covered ourselves to have no feelings, because then we have to use our soul to confirm we exist. I went into that position as a man and I can out of that position as a different man. Because in the dimension of physicality we are very much blocking the truth, the reality (2:14). because it's the only way we can handle it. But do we become, or can we feel the soul of an animal when it dies, or can we elevate it so that it becomes a pleasure instead of a loss to it, if it needs it can take. I walked up and down the building and I said to all, take as you need, I have come here to give, if you need to depart or if you want you can stay, as long as you are happy with the stay. I could see animals shaking their heads in an unusual way. Because the pain of the physical loss and the way they were going through it was beyond the strength of humanity. And then you change, you understand, do I love to be here to watch this or am I loved to be here to be able to give. Or you go numb to it, .. I have got nothing to do with it, I am just an observer. I can not be an observer, it doesn't matter how I try, because I know the truth and I know what it means to exist and what it means for the dimension of the soul. This understanding is what makes it easier. (2:16). Ignorance can carry on and we can stick to it. Any other question. ... Q: if science wants to start understanding .... holographic ... (2:18). ... Yes, you see the holography, what we have what we see even in the commercialization of pictures is different then the astrophysics and cosmologists are trying now to elevate it. .. It's not that it can't be done or something wrong with it, it's wrong in hijacking it as science and bringing a lot of fallacies to it to confirm that nothing exists, that it is all a mirage. We create that dimension, the 3D through the field interaction, what we call the portals, which are nothing but what you call holography but in the Pl dimension, not in the matter dimension, but in a dimension where the entity has control over its existence. It's not making an image (2:20). it's in allowing the soul to manifest itself in the image it wants to be shown.07

261st Knowledge Seekers Workshop - Thursday, January 31, 2019 (,)

(:11). ...
(:22). .. We'll start where we left of last week and that has to do with connection and understanding what we explained about holographic pictures and the T that is taking over. It's important to understand how this thing will effect us, there are some problems in this T. (:24). Sometimes in science we learn from systems that were built for one purpose but if you think of it, it can be used for other purposes as well and this what is known as the hologram of the U, what the scientists are trying to explain is that what we see as the U is ?? , and it's a reflection of a flat surface. If you look at the U as we know it, is oval shaped like this with a center line to it. ??? the center line has these kind of shapes and it goes back that way. This shows us that our U is in a motion in this direction, because this is where the essence of the original U, where it split from has lead it to. The thinner line in front shows us it is trying to go in that direction, the tail of it has shown where the tail of it, the M field has expanded into and it's pushing. In its process, what the holographic people tell us, (:26). if we consider this to be the center line of the other picture, is that nothing we see is real and it's a reflection of what is on the surface. In fact it is the other way around. When you stand on the top of a lake, what do you see, the fish. The picture of the fish on the top (surface of lake) is not confirmation of the existence of the fish because the fish is here (deeper). This is how this technology is upside down in what they are trying to tell us. So as I said last time, the flat surface doesn't exist, but if you stand from a distance we see a flat surface. We see everything flat, but these people are telling in their understanding of their knowledge, it back to front and telling us the actual picture is here and we see the reflection. The fish is here, we are standing here, we see the fish on top of the water, an image of it. But there is a beautiful thing which will come out of this research even though they are trying to confirm the reverse of the actual existence, so they have something to do and millions of dollars are getting spent on this T. ... ... what it will bring us, what I call new technologies that will appear because of the Pl T. (:28). Do you remember what we said when we have the earth and we put satellites around it and start creating GPS, now the amount of mapping that they are doing on this scale, we are GPS mapping the whole of the U, this is just the beginning of it. They started with hundreds of thousands of galaxies and in this process

they'll map up, in trying to confirm the existence of flat surface, they are doing a great job for the future space program in mapping out the U. ... explains how they used the old military satellites for creating the GPS .. Now we'll do the same thing, this waste of knowledge that they have created about this, (:30). what we call directional mapping, it will become extremely useful for all of us in mapping globally the U. ... We will be able to use this knowledge which is being gathered now to be able to find direction, position, and map out for the SS program. ... We can now literally map out the MG fields of every point, and this will give a huge advantage in that we can decide for example, in this galaxy what MG fields do we need, what can we use and to what extent we can use this space for what we need and how we can from the position in the U to decide the position of the map and the place where we want to go. (:32). This will bring us a lot of joy and understanding for space scientists that we can now map the G and M field forces of the space gap. In that process we'll see how we can change, and add to positions, how we can change the speed of the travel, because the speed of the travel from now on is not going by how much fuel we have, but it's but what the strength of the MG field we decide to travel within. If we decide to take the weaker M and stronger G, then we'll achieve it, then we'll see how simple and far we can move simply by changing the M and slightly G, then you slow down on approach. By recording exactly the position of M and G you arrive exactly in that position with speeds of M or with repulsion of G, because what you do is reverse your M position with the G position, and in that process you literally break your speed. That's why I brought it up last week first to show the fallacy about the flat surface, that if you are at a distance you'll see flat. (:34). but when you come to it, it has a shape ... they're gathering so much knowledge that it will be one of the biggest gifts given to the SS program if you understand how and the way to use it, and how and what shape or form to apply it. Would it be to our advantage to open up this T in a very soft way and allow it to be extended, or do we allow it to go the way they are planning to and just to satisfy some misguided understanding of the whole thing. It's very interesting how they are adding and adding to this T, to this understanding of the space of the U. On the other hand these things will bring a lot of medical application for the science of the Pl T. If this knowledge is knowledge is transferred (:36). to the body then we can pinpoint with accuracy a cell. Understanding the strength of the cell to drain a cell or to remove a cell. Build on it if you have a ?? cell in the body using this holographic condition of the body, we can do a lot of things. The expansion on this level, at this moment is just at its infancy, but gradually we will understand more how to use this holographic T to be able to transfer energy to cells or to remove cells, and to remove energy from certain cells which are viruses in the space that are attracting certain fields and this will be developed in the coming time. I will start teaching on this because it needs to be understood and we go into the space of understanding the totality of the knowledge, because this will bring us a lot of insight into not only the working of the U but also the body of the man. If we understand the process we can map up the inside of planets, we can map them up the way we holographically map up the U, then we can map up the body and the inside of any structure in the U, literally by learning about its fields of MG field effects ?? nothing else. In the structure of the present time, (:38). we say there are so many forces of ?? of adding another force will ?? adapt. With this T by looking at the magnetosphere, what we call the aura of the planet or a system we can measure what materials (are inside the plant) of what's inside, what is the behavior of MG field inside. At the moment in space T

they burn the materials or they guess by what color it is or could be, but with this T we can literally map out the whole structure of the M field effects and not the matter effects. 45

(:40). mining
(:48). You look at what is inside the planet earth, if you understand what is there and how we create the magnetosphere of this planet, we can do the same, if you put a powerful satellite above a certain limit and just create a field source, weaker, of the order of say, gold, this area of the planet continuously produces gold through the interaction of the fields of the earth and the sun. We do not need to extract material from inside the planet, where these materials originally came from outside through MG fields of. This gives what we call national materials security. Nations like in the western who extract so much from Africa or South America, with the understanding of the new T we change the whole course for the production of materials. What we need, we have to understand that the new space T gives us a different opportunity, different dimension. ... (:50). We have no choice but to start developing new ways and understanding, new processes. There are something like 20,000 different ways that this T can be applied for new products, nothing else. ... Tesla did this some years ago, but we only looked at the energy transfer of the work of Tesla. If you ?? extend the strength of the matter condition that now we have managed to convert the matter into its Pl, capturing materials from the U in their MG field strength and converting them to the matter state of what we need, at a given strength, it becomes very easy. We saw Peter show how he could create conditions to create matter. (:52). The earth's MG field dictates what field we can absorb and collect. This has become possible as now we have moved into the dynamic reactors without motors where the materials created is dictated by the strength of the matter and not by the limitation of the Cu winding and other elements in the motors. In the same process we have to understand the totality of the structure of the human body and how we can apply this T on the human race, on every aspect of this application, how we can create or add materials, or increase production and the use of. Some time ago we looked at the transfer of energy, and understanding the work of different systems. With the new dynamic systems a new horizon of knowledge for K Seekers has come and many of you will switch into it very rapidly. (:54). ... and now we see the creation of new systems that have no energy but works through frequency of matter state, a lot of positions will become clear for a lot of our K Seekers. ... ... (:56). What are the implications of the new systems? We do not need to create food, to mass produce medicines, extract and hold... ?? man's knowledge as K Seekers is at the level of the thymus ... as we said the man at the North Pole doesn't get vegetables or milk or Ca or any of the things we are told are the best way and the ratio that we have to eat to help the people, and he has been surviving on the seals and other things ??? at the N Pole. The only reason he can survive in that region is that his Thalamus together convert material at the M field energy level (:58). not as ??? and with the present knowledge and what we have gathered as what we call dynamic systems creation of plasma, man's knowledge is now at that stage, or will start developing in that direction ?? In space we don't need to carry the screw drivers and bolts and nuts, Cu, Zn, wooden, because if you understand the process and the work of hte body of the man, then freely we can produce any material from one basic understanding of the work. ... (1:00).

(1:02).

(1:08).

(1:14).
(1:30). Any questions. Q: Is a refinement of spices, fruits and vegetables desirable regarding the essences, in the sense of star cook's which combine subtle flavors to create a special taste? Would we be able to create special flavors and combinations of tastes? That's what is on the cards. Do we have KF Austria online to show you the machine they're testing. ... yes I can show it. (1:32). ... Shows field replication unit. They've had to play with the composition of the Gans' to get the taste of an orange or an apple, before shipping out. Now this is done. (1:34). .. . (1:36). (1:38). (1:40). (1:46). experienced smoke off of his hands thought it was hot but not, it was the compressed fields .. (1:48). (1:50). .. open houses in German speaking area .. (1:52). We'll show the food units next week. Thank you very much. I think the food units you'll show next week will be a revolution in the food industry. We don't need to have people going hungry on the street, you can open feeding rooms across the cities where people with no money can be feed and in disaster areas. I have tested this and it works, but now that we have come to this stage. It's nice to see that this knowledge is taking a new course. (1:54). ... Any questions for Klaus. Q: Is the field reactor ball vacuum sealed and what is the long clear tip on the top of the ball? (That's his brain..) .. it's a free floating antennae it has AA on it M fields to the organism, it's a crucial part of this system ... and the whole system tries to balance and it increases the M and by having the antennae we have the possibility to more easily deliver the fields. (1:56). Q: Can Klaus show how the coils are configured inside the reactors? No thank you very much we are not releasing top secret information. We have patents and these are patent applied for, am I correct? Maybe there will be a time when we can show it. When we make it obsolete with the new systems next week then we can show it. Most of it has been shown already. The biggest problem with KF is we can't keep any secrets. That is why certain governments lock you down, you don't go there because we give too much open information. We don't have any secrets but the thing has to be done the way they are doing it. It is very interesting where we'll go with this T and how we'll develop it further. ... next week we'll enter something new, we'll become groceries and restaurants from now on. (1:58) . You can preorder your food for life and can be delivered, if you decide to have a curry today you just put the ball on the machine and you just sit inside (the room) and it doesn't matter how many people are in the room, you can have a party in there. You can invite anybody for any food. This is interesting what is coming up and how it will effect the future ?? of humanity where we literally become independent from having to eat as part of the process of teaching ... It will be interesting to see if we can taste each other without actually eating each other or other entities. And we can bring peace through it. Klaus says, people are calling these miracle rooms and he thinks it better we don't concentrate on praying to them rather then as tools to release all our barriers and seeing ourselves and others as the center and not praying to it or seeing it as a miracle. This is just what came to my mind when I saw the chat room. (2:00). Q: In the first step I found the position of my soul with the help of the (stereo) speakers in my ears, the question is in the second step how do I see the light of the soul from the localized point? There is something called the hospital and they have different

machines like MRI and CT scans you can ask them to do a scan of your brain in very small gaps then you'll see it. Or like me roll on the floor ?? take a picture and they show it to you. The amazing thing is medicine has seen this but they don't know what it is so they leave it as it is just there. It's not something new.... (2:02). ... So you found your position with the headsets and now you can go and see it and how big it is, by the size of it you know the state of your own existence, it's very strange. Q: Would the ofcal point be the point that is found through the speakers? Yes. Q: Do you see the light of the soul from that point or do you have to be beside that point? When they do the CT scan you see it very clear. This is part of the work, I don't know if we can explain it. Let's explain it another way, maybe with this new system that is getting developed, that you just seen with Klaus, then they come and they put ?? You can literally feel it. The way you found the position of the soul in your head with the stereo, when you sit in these systems (Klaus's reactors), you'll go through emotions, because it's not just feeding, then at a certain point you feel detachment. (2:04). You sit outside and watch the totality, even though the sense of the soul still sits within the physicality. You will find that you'll feel it. I didn't want to discuss this for the time being but now the question is on the table. You'll understand. When in the coming time when our researchers manage to find the right combination where the soul of physicality finds satisfaction in existence and reflects the reflection of the STM, you'll feel it and understand exactly where it is. Listen to the Universal Council teaching of this last Tuesday, I explained a lot of things in that parameters, then you'll understand more of. This new system because it has no motors, the limitation of the field of the matter state, above Cu and Zn, (2:06). has passed, you reach at a given strength, the level of the strength of the STM in condition of physicality, the soul of physicality and the STM itself. In the future time, the way you load up these 2 (top 2 reactors), will interact with the STM, and the way you load the bottom 2 or the other sets, you'll interact with the physicality, the soul of physicality of the man. In the coming time in the ?? or whenever man matures, you create a condition of the planet, or whatever space you are going to, by controlling and creating conditions of the soul you'll see the manifestation of how you're going to look, because then it dictates the position of the physicality. If you change the position of the STM and the position of the soul of the physicality of the man, man in no time can behave like a fish in the ocean, you don't need to wear clothing to be like a fish. This MG field of the earth, attachment to the false information of its own existence. This is a progressive development and in the coming time I am sure when the Austrian KF (2:08). releases the dynamic reactors without motors, where in a way the position of the condition of the fields of the systems will interact with the body ?? just totally like the earth and the sun, then when the man is in there, what do you want to ?? The essence of the STM came from the rays of the sun. Then you understand that the physicality become irrelevant. 45

(2:12). John of AZ shows video showing the fields generated from MaGravs that are not plugged into the wall. (2:18). ... What I am trying to explain is the transfer of Pl energy, and if at the same time convert energy to feed back into the zapper. Do you understand. .. you have the Gans' which can be used as transfer, dumping energy into. (2:20). you are just measuring energy with your zapper by the bed, but it is absorbed by these coils as well. ... You can convert this energy into power. This becomes the earth's G Inertia, when

the field hits it, it creates heat transfer. ?? you'll understand in the coming time, you should be able to produce such a system. Thank you. ... any other question. ... (2:22). What is important is the interaction of the fields and of the plasmatic fields 13

(2:26).
(2:32).

(2:58).
(3:00).

(3:06).
(3:08). Lady tries to share video... show it next week. ... (3:10). Ella shows KF Plasma journal for February 2019, 8th edition. -- Position of the soul and what are our dreams, Eyes doorway to the soul, The soul of the man never sleeps, Freedom from physicality, Unified Field Theory, Carbon -14, Earth's Polarity Change, CIBRIU the new space agency of 6 nations, Opening a Portal. , Thanks to Alzar all the 260 K Seekers will be transcribed in English and Farsi. (3:16). .. (3:18).

(3:20). A surprise article one of the first experiments we have been faced with ... Universe in a bottle. We encourage everyone to try this experiment. This brings back a lot of memories. I have made many of these bottles and the cause of all the problems for the KF and why we were put as a terrorist organization by the Belgium's, was that they were trying to steal this T. All the problems I faced in Belgium is because of this bottle, because if you look at what is hanging in the bottle, inside it looks like a parachute. When a Belgium company approached us and wanted to test it, we gave them 1 parachute to test. They took the N coating of one of the parachutes to test it and see what it was and they found on this layer grapheme, which at that moment in time was a miracle to produce, even now it's not easy to produce. What the stupid scientists at Imack wrote because of their ignorance, grapheme can only be produced using Gamma radiation and this guy is a nuclear physicist using nuclear material. (3:22). Then they put us on the list that we produce ... and they found out that we produce grapheme, and Imack is a nano industry and we were far ahead of them with our Cola bottle, and that's when the assassination with Derek and the cheating and the rest of it started. That's where they brought the assassin Florescence in, from this parachute in the bottle. It's a huge breakthrough in the world of science as now you can see it, we can produce grapheme ... A lot of people called it the magic liquid, the Keshe liquid, every name but nobody ever called it caustic soda. The beauty with it is you are still following what is in that bottle, it's a beautiful message in that bottle. At the bottom are Gans' and at the top N material, each stand is a different height and position creating a wind which leads to creation of H and Deuterium and Tritium. The message in this bottle is so strong and I look at it and it brings back so much pain with that stupid nation. The assassin Florescence was brought in as a patent writer. (3:24). It brings back a lot of painful memories but it is good to see it. The whole structure of it has a beauty, if you test it may times, don't look at the electrodes, look at the red cap on the top, when you take the cap off you'll find that there

are hardly any threads left, due to the pressure on this condition on this end and there is a little button on the end of the bottle, you create atomic H, the C gets absorbed in the layers of the Cu and releases atomic H, which is part of the space T, this is how we fuel the space reactors. ... I was hoping only to bring good memories back. No, but this is how we got involved with this stupid nation. Rick says, in the description is says, this starts the H ionization process where it replicates the working of an entire spiral arm of a galaxy, which is exactly what you have been talking about today. It's there. It's very interesting about the height you can put on it, these are Cu nails from the roofing, we call them parachutes, and the extension of this is what we call the, Empty Box of the Universe, and the sphere where you see the electrodes hanging, we could dictate the position of it. (3:26). The field flow of it. There is a lot of ... I have many, many of these just to study the pattern of the field flow, extraction of materials. Current flow in these electrodes are very interesting, for example, if you put your electrodes, here and here (front and back) and monitor it you se it goes up and down, and positive to negative, and then you just change it to the other one, and you bring it here, you'll see the flow pattern of the fields, how the pressures are created. When you test them and dip one electrode in the liquid it becomes like a system which has a matter state then you see a different pattern. Usually you'll see 1.2 volts and only very little milliamps. It's very interesting with this cap, there's a button at the bottom of it, (I forgot the name of the plastic PTU), at a given pressure due to the condition of the cap, this opens up inside, when you open it up there are no threads. This CO2 CH3 combination here due to the caustic and the Cu, and now you understand that the structure releases the C and you have totally H, pure atomic H. It's never been done in the world of science. (3:28). If you take these electrodes, we released this in 2005, and after it was claimed, and then there was a Nobel Prize won because of this by a University in England. Just go and check, they were forever on our site, but soon it will come out. the story of British stealing T like Steven Hawkins and University of Manchester is a lot. I'll release it one day. You see these parachutes are here at different heights, this creates a vortex of fields, winds, and with it, due to the shape of the Cola bottle, it pulls in the C and it gets absorbed in the layers of the Cu and it becomes grapheme. That's where we know the grapheme sits, it comes through and with it, it releases atomic H. .. So the C as the M field pressure balances, when you make the CO2 systems ... when you make CO2 now you understand that you absorb C from the atmosphere and it becomes CO2 at the bottom, you see some of it here, but this C gets pulled out and goes between the N layers of the electrodes (1:30). the Cu as it's creating Nano, they tested it and said it's grapheme, it's nuclear, ?? Shame on the nation of Belgium, carry on with the KF Journal please. Next effects of Gans on Tomatoes and cucumbers. "Visual confirmation of dynamic field flow in Gans'. "Ofot-dipping for Coma". (3:32). .. (3:34). food security for the nations. (3:36).

262nd Knowledge Seekers Workshop - Thursday, Feb 7, 2019

(Introduce C14, ,)

(:15). The main thing is to unconditionally share the knowledge. ...
(:18). .. Scientists say that we are the rebels of science that we don't care who we teach to or about making a lot of money out of it ... Wishing the Chinese community a Happy New Year (year of Pig)...
(:20). ... We'll continue with our teachings. ... We are starting to fill in the gaps in our knowledge. (:22). Going deeper into how things work in this new knowledge.. .. Has our knowledge developed that we can go to the next step. ... ... Someone said, Mr. Keshe you have tickled our interest to all the wonderful things that are to come but you don't take us to it. I said, it's not me who will take you to it, you have to guide yourself to be able to see it. To what extent are we as the human race ready to face the fact. How much are we there to be able to understand the truth, the extent of the truth, understanding what it means to be able to be part of a structure in which we have always been, but we never knew. (:24). Does humanity need to break into new grounds, to understand what he hasn't understood, or we understood but we ignored it because it didn't make sense to us, it wasn't part of us, we were not part of this movie. We thought we were not part of the movie, but in fact we were part of, the acting part of this movie where we are. In the process of knowledge seeking we have come very far, in the process of understanding the knowledge we still have a problem. Many of us have a problem moving into the next level and understanding the extent of the next level, being able to bring in, usher in the new cycle, new era, the new understanding, the totality, the understanding of totality. In understanding it how do we allow for us to extend the knowledge. Does the extension of knowledge mean the acceptance, or does the extension of knowledge bring comprehension, bring us to think. Does it bring maturity? Since we have spoken about the portals and how we can bring new dimensions, many of you (:26). have started think whether you could be part of it, am I part of it, is it part of me, would I see it, would I be part of it. Does the cycle of life of the man have any more meaning. You're talking about a few seconds, which to us is 1 year or 10 years, how many number of cycles around this planet ... but in fact for us to go 1 cycle on the arm of the galaxy, for us to come back to the same point, how many thousands of years would it be. How many millions of years for us to come back to the same point, if you look at the galaxy that is on the screen. ... would the man live long enough to see the full cycle of a galaxy? As we know this galaxy is not standing still, (:28). this is part of the rotations in the fields of the U. .. .. does this depend on us on how we educate ourselves to be able to live longer, .. or would we come to the point that we detach ourselves from this physicality and just become part of the cycle of the fields of the U, but with a memory like an RNA that we were put together in totality somewhere on a point in the U called planet earth. But there is no point ... when we get to these portals and we travel would we leave a scent of the STM, that you can retrace back to, when you walk or sleep, you always leave a scent behind, but does our soul have a scent, does it leave a trace that it can come back home. (:30). (break) ... (:32). ... Rick says, Does the soul leave a trace, when your audio is disconnected but your soul isn't, can we still hear you? Very soon as part of the teaching, if you notice now a days

in the teachings I take a space gap, you think it is silent, but in fact I take a space gap to see, to reach the soul, then the voice of the man. It's very interesting in how our people will come to understand this, to comprehend that you don't need to hear the voice. I started this some months ago and more and more (:34). in that process we are going through this level of understanding. ... (that's where we are left with) .. (:36). In the coming time we'll come across part of the teaching where you'll hear silence and the teachings will take a different dimension. Part of the training to understand, to hear the STM, not the voice of the man, we'll come back, and I'll carry on with the teaching, and you'll see that if what you received fits into part of the teaching. This means that, I think about a cup of tea and I explain to you that your soul is brown in color and very sweet and it has some scent in it, and when I ?? stop talking I speak about a nice piece of cake or something with the dinner, then, oh now I understand tea goes with the cake. Establishing a line of communication, many of you might say, oh, I just keep silent, but many of you can come back (and say), (:38). when you were thinking about a cake, what about a tea. And these things are a part about growing into understanding the voice of the STM. The human race knew this very clearly, even knew how to communicate long distances with the soul by thinking, and in the time of ??earth (or us) relying on the energy of the man himself, as now it has gone worse and worse and has gotten to the point where if we don't see it with our own eyes, then we don't believe it or hear it or accept it. A lot of it is the way we have been educated, how we have been brought up and we have caused that problem for ourselves, no one else. The extent of understanding the work of teh STM has been forgotten, we have totally forgotten that we a source, we have a dimension which goes beyond our physicality. We have teh capability but we have ignored it and with it we have brought a lot of problems. Would the mankind ever come to cross this point? We do not know. Would the mankind let this fear to disappear? We do not know. It depends when teh man decides to mature. (:40). It seems that everything is on the standstill in the world of universal work until this child decides, that now I am going to mature, I have decided that I played enough. And this is taking us a long time. We are patient, we wait until mankind matures to his own dimension, how own power, how own strength, and comprehension of existence. It's very much that there is part of teh T of teh science that man has ignored deliberately because maybe it was not time to do, or man could not be taken through this barrier and now that he is ready to go we try to rush up. We are literally rushing everything through as fast as we can to catch up. It comes to the point that it's not philosophy, not the science of understanding the creation but it's the science of understanding ourselves. (:42) The science of being able to work and become aware of our own structure. In the past weeks I started taking about one teh mot fundamental elements in the world of creation. One of the most important elements in the line of communication for the man will be and is Carbon 14. Under the atmospheric pressures of this planet it doesn't exist. In the structure of the life of the man works immensely, but man not having the understanding of knowledge, man has taken it as part of continuous misunderstanding of the knowledge of creation. (:44). And because of the characteristics of the structure, man lives by this miscomprehension. In the process of the science of life, he always makes a mistake between this matter and what we call. We have made a lot of mistakes in the structure of totality. This means that C14 in structure matter state will show itself in the majority of cases in teh body and the work of teh plants as Nitrogen, but in reality the dynamic structure of teh work of teh U, which is

similar to the micro in the macro, ?? the communication line of the body. It structures itself into a line of transfer of energy and line of separation of energy, it's very much like plastic or ?? back shielding of teh process (:46). between teh lines of the emotion of the man. It plays very specific characteristics because it behaves very much like insulation, very much like diamond structure, what we call grapheme, but in a dynamic plasmatic form. This is what we need to understand to be able to structure the life of teh man and understand the whole process of creation, in the process of understanding the work of teh physicality. There is a line of work which a lot of scientists have over looked and a lot of misunderstanding in it has brought us a lot of problems to bring the dimension of physicality into operation of the STM and soul of the physicality and separation of understanding of the line of communication. This process will take time to understand in full. (:48). But what is important for us is how we have seen the structure of teh physicality of the man and have we understood the separation of the line in the structure and how everything in that structure comes to be part of teh total energy balance of teh STM and physicality and the existence, and to what extent can we envision to be able to go further. We have to look at the different structure, the real structure and understand the totality of the physical structure of teh man and something that pops up very nicely, but as I said in the world of science, chemistry, biology we have brought this misunderstanding which has now as I said, we have to correct and then it becomes a path, a beginning understanding how and teh way things are brought together, are processed together, put together, in the physical structure through the connection of teh body with its physicality. (:50). with his soul. We have to go back to the basics and make some small corrections or add to the knowledge to be able to go to the next step. If we look and understand how and in which steps mankind has taken a step and has gone through the process of creation. A lot of mysteries about the operation of the life of the man, the STM and its operation, and operation of the physicality, all can be understood and taken to the next step, added or can be understood to be added. This means ... one of the fundamental problems in the whole cycle of the understanding of teh physiology of the man is the construction of the physicality and how everything has been based on one or two elements, and man has calculated everything else but these 1 or 2 elements. This is very much like (:52). we have missed half of the equation, half of teh knowledge, part of it that was really there but we didn't see it, or never understood that this is part of totality, part of what we have been missing, in essence the part which will bring us, forces us, we have no choice, but to understand it to be able to continue with it, extract from it the real knowledge, and this C14 as an energy of the Pl, of the fields of the Pl, has been understood in clarity and man has made, because of his presence, a lot of mistakes in the structure of the AA of the body. It causes cancers and it cures cancers, it creates destruction of the layer of the brain, leads to your age (aging) to your stroke, understanding of the total work. (:54). It effects every operation of the physicality and STM, and every connection between the STM and the soul of the physicality, and most of the time the world of science has never considered it nor understood what this means. What can be created, given, added, amalgamated from the understanding of the work of the C14. One of the problems is that the scientific world has not managed to produce it the way it works in the body, what we call a Gans or plasmatic condition. It has a sequence and repeats itself in different combinations and because of its dynamism, and what you call the separation of the physicality from the neural system, (:56). man has

always ignored it. If you look at the dimension of the work of Nitrogen, we look to the work of C14, and the operation of like CH3, it has and it should have given us a lot of clues. We should have understood a lot of clues. I have spent a lot of time today in trying to explain the work of C14 because it's something, it's so fundamental that it needs the time to be spent on it because now you'll understand the work of the transmutation and how it becomes possible. It comes the work of transportation across the U, it comes from the point of insulation and isolation of the fields of the U. It comes to understanding the totality and the relationship between different parts and structures of the physicality and the STM, and is the pathway of the STM to connect with the U Community in the path of the line of communication. When we spoke about the C in CO2 when we use it for conductivity (:58). and connection in our medical applications or other fields, C14 is the same, but in the dimension with the connection with the STM and the physicality, is the pathway the way, as you call it, the wire, the string where the STM leaves the physicality. Is the connection where you go what you call dreamtime but it knows where to connect to, happens to that. It has a fingerprint of the interaction of the soul, and of the U. In so many different ways we have to understand the work of C14 altogether. What is a C14. Rick can you pull up what C14 is in the matter state from the Wikipedia. You have to understand that we look at C14 in a plasmatic and not a matter state, but if we look at C14, (1:00). partially in the present world of science they call it grapheme, it behave that way in some occasions, because it looks as to be the end but at the same time is the beginning of every nerve. One end of the neural system where your nerves stop is the limitation of the C14 which creates the feedback. It's C14 that gives you the isolation at the point of amputation and the release of energy as what you call "phantom pain". It's part of the whole structure of our existence in real life. Rick reads it. .. (1:02). ... (1:04). (1:06). ... It says it's a radioactive isotope of C and can be used to replace C in an organic compound to trace it, and that it decays into N-14. All this is in a matter state. In the condition of the plasma body of the man and in the dimension of the U, what does radioactive mean, it means energetic. And the energetic aspect of this C14 is absolutely amazing because it's not due to the Beta decay, it's being a dynamic plasmatic field which continually travels beyond the speed of light on the matter state. The reason for it which was never understood, but now maybe it can be explained is that neutrons are the source of the energy because they want to decay to create stability. The split into a proton and an electron to create a stable condition for themselves, but in the case of C14 you have 2 neutrons and at the same time busy (1:08). releasing and it that process to do dynamic point centers trying to balance, or create a balance in their field interaction, creates a line of insulation, a line of M field which doesn't accept any more because at the moment it has circled itself. In the term of M insulation and isolation when you have a double neutron base like this it means the matter state of it is within itself, it isolates itself, it has a huge amount of energy to release and that gives a very high dynamic center to its C structure, the 6 other protons and neutrons. It literally catapults this material. A normal C doesn't behave like this, radioactive material, which means it has a huge amount of energy, the plasmatic condition has a huge amount of energy which in balance with having no electron to feed off to, to split into, that it can create a balance of itself to become an atom, it creates what I call, a super bullet out of C14 and that allows the man to travel the depth of the space as a fuel, if you can replicate it. (1:10). It teaches a lot to those of us who want to understand because of this high speed, it creates a line of

transportation for the field matter states of it. C14 is a plasmatic radioactive and not matter state radioactive, if we can call it that way. It's a source of energy that is so much that it is like a virus around the nucleus of the C. And because of that ?? energy it gives to it, it just makes a fireball out of the others. It's a free engine, a free energy source for the structure. And when you enter into the structure of the matter state a lot of doctors make a mistake between it and Nitrogen. It's the cause of many cancers. But it can be understood due to its weight compared to the other C, it leads to the combination of matter state interactions. It's a massive ball of fire and this fire doesn't stop, because energy released by 1 neutron to go through what we call splitting, to become nuclear decay is automatically absorbed by the other neutron and in that process, in the dynamic M field, part of the energy is given to other protons and neutrons, (1:12). they become active too. What you call aging by C14 dating should give you a very clear understanding, is the time when you stop the whole process, then you can trace it, when it was stopped by itself or in a process that it went through, a condition that it stopped from a lack of transfer of energy. Interesting enough, if we go to the next step and understand that you have a C and in a way a Tritium, 2 cells working together, in a way as He or as a Tritium and sometimes due to the energy balance they behave as just 2 neutrons. What this will give is the extension of how to understand how we age and how fast, and why when we use the Gans ?? T and the cell of the man we see huge changes, because we interfere with the line of field transfer of energy, (1:14). this is why our CH3 Gans shows a lot of characteristics of C14 and if we understand it we can fully utilize it. When we take measurements on the decay or whatever, we are always making a mistake in the conversion of the energy of the C14 with Nitrogen. It's so common that because of it we have missed many parts of the whole structure of the understanding of the work of the body. I would like to take a step further to understand this process. (1:16). When you have a H, if you look, it's not an atom, it's a half atom because it doesn't carry any neutrons, there is a lack of neutrons in it. the next step here is N or C14 if you can put it. Then you understand the process 0 to 14, now the next 14 comes here, again C14 but it shows itself as silica. In that process of ... (1:18). the next 14, C14 is silica, do you understand? another 14, one of the main components of the life of the man. When you take this another step 28 -- 14, add another 14, dynamic, 42 (can anybody tell us what this 14 is?) ; In transition of the strength of the M field, (the 42 is AA) it's Mr. COHN. If you look at this, again, (1:20). Where does it take this to? You come to something easy. Fe. Now you see how C14 has been the backbone and different combinations of it. Fe is 56, the next one is 70, and then look what 70 does, which element sits with 70, but you have to remember something very strange, here (at 42 AA) we usually don't see as such what takes places with another element, what we know with 42, (draws Mo in box), then you understand how much our scientists of the past have forgotten and have not seen, because they never considered a dynamic structure that (starts with none, then 1, 2 3, 4 of it) (1:22). has created the cycle of life for mankind on this planet. And look at the half balance lines, then you se how the life of the man has gradually taken shape on this planet. This raises a fantastic question, would the body working on a C14 will soon to be traveling the depth of the universe on the lines of teh C14 M fields of the universe. It is absolutely a perfect match. If you look at these zones and every other zone with C12, then you understand how the STM and the physicality (1:24). STM -PTM; STM - PTM, continuously repeat themselves, and this is how we dream. This is how, the 2 are so close

to each other, that we have lost sight of our soul, the line of communication of our soul, where through the physicality we communicate energy transfer through C12, but the work of teh U through transfer fo the soul is C14. And we live through C12, our soul lives through the line of communication of C14. This is how we'll travel the space of teh U. Then you understand how easy it should be for mankind to become travelers of the U. Every indication on the transfer of MG fields of the space of the speed of the universe sits within the structure of teh AA and the physicality of the man in the dimension of M fields. You are a perfect match. Now does the man understand that much, that in checking (1:26). the physical dimensions in matter state sees Si, N, AA, and Fe, or is it in reality multiple combinations of C14. Then it comes to us a new dimension in the line of communication for control of the space reactors, understanding the creation of the soul in the dimension of the emotion of the man in the line of physicality and the STM. To understand how to travel, nourish, to multiple in teh depth of the U, or anywhere in teh U. I warned the K Seekers yesterday in teh private teachings what was coming. (1:28). Those of you who work on the dimension of energy transfer, transportation in the dimension of structural conductivity of the physicality and the STM, now you have found a very big answer. If you look at when you look at the Alex Beads, MaGrav systems you use CO2 for communication line for diabetic and everything else, now you can add teh dimension of the transportation of teh soul to it. Now man has 2 choices, do I want to travel in the dimension of the soul of a C or in teh super speed of the soul. Can I use teh plasmatic M field of CH3 which I can produce so easily, (1:30). to become teh giver of energy, is C14. Is there a shortcut to it or does actually sugar behave like C14, in super conductivity of the energy of 1 H atom. Is this why the body of teh man evolved so fast on this planet because of the presence of the basic sugar which gives you a C14, which is itself already very active has an additional way to release the energy or to become a source of energy, or is the additional electron, or additional neutron, or proton, it depends on how you define it, becomes a point that due to interaction of the 2 neutrons in C14 in a physical ?? collusion (or collision ??) with an additional proton lead to release of energy that man needs to create and dynamism in the AA. (1:32). And it becomes a source of energy. In a way we chose a barrier, when the bullet comes let's absorb the energy of (it), and that energy in that bullet, the energy released continuously is by the double protons, or neutrons as you have an energy confirmation in the plasma condition, which with the interaction of teh lighter one ?? equal to 1, that is 2 protons confirming with an electron as a neutron, in a CH3 with a third one is like putting a barrier or creating in a plasmatic field force very much like you create ?? motion, this is your 2 H and this is your single H, and in that process where you already have a C here you create a release of energy to the AA which is bonded to it, and this AA becomes active, it receives energy it can survive. So if you can increase teh binding of CH3, or the C14 in the presence of teh body you can create a continuous supply to the AA, which means the AA doesn't need to continuously to deplete and then replete, gives a life of centuries to man, because there is no dimension. (1:34). There is no continuous depletion in refilling it. This is how you can extend life on this planet. Simple understanding of the transfer of the fields of the U can make a lot of difference for the man if he understands what is going on. So now you understand how you can even extend the life of the man. Through the understanding of the operation of the C14 and how we can use the operation of teh C14 to create the fast dynamic motion of the protein, or the body and the man, ?? of the soul of it, that's ?? my

teaching. Now the science of the theology and the STM ??? Now we can understand much more and act upon it. (1:36). We operate through it and extend the life with it and then we'll not depend on the cycle of the rotation of the one thing we called the day, the year, or anything else that mankind has chosen to call this thing. Now what side of the story do you want me to sing for you? Have the scientists been right to measure the life through the decay of anything on C14 or did they miss the boat. (1:38). Or can we use the operation of C14 to create a new dimension for the man of life in the space? Remember last week when I spoke about the separation between the galaxies and I spoke about the C14. I start putting things out for you to see what you understand until the next time or next teaching, or it might be the time after or after that. The teachings now start to get meaning, we start to have understanding because if you can create the condition for the transfer of energy at the level of C14, you can tap into the universal transportation line, into the understanding creating life for the others who are the passengers of this line to manifest themselves in the Portal of the life you create. All you do is to create a new bus stop, would anybody like to get off here where I have created a condition, which I can create that replication. If you want to understand maybe we can explain, it's the superconductivity within the conductivity of the Pl itself. Now you can image what the scientists were telling us, (about) superconductive materials, not only do you have them in the form of Nano layering, now you have a superconductive path to transport that, now that you understand that the body of man is made of Gans'. (1:40). It starts adding up. But do you want to invite everybody, or do you want to have a specific length or a specific people. You don't want to invite the cousins but you'd like the uncles to come. And you don't know if the uncle will be dressed in a suit or come with pajamas. How do you manifest that only the uncles turns up and no cousins, or the cousins come and you don't want the uncles. Go back to your teachings, to the understanding of the fields of teh G field with Inertia, which leads to creation of the manifestation of material or matter state. Then you'll understand that you can create teh condition for the confirmation of existence by introduction of the third strength in teh C14 (that's the AA) and any passengers of the U which match into that will manifest in your Portal. It's very much when you create the matter state the interaction of the fields of your cores, it's you by introduction of the Inertia, dictates what matter from the energy of the atmosphere will manifest itself. In the case of liquids and Fe (1:42). we manifested or produced blood, hemoglobin. In a case in teh interaction of teh fields we created gold, Zn, Mg and the others ones, we have seen the test results that were done independent to confirm what is correct. Now understanding the transfer or transportation and connection between teh STM which now becomes the language of the Universal Community in understanding of this transportation line, now you can invite friends home, and then you dictate what friends. Whose friends, I don't want this, I want to see what it gives me at such and such a strength at the spectrum of Mg with the C14, and see which creatures of God come up, appear. Like the way Inertia leads to creation and manifestation of the energy of the U in the gold and Cu. Now we have learned how to manifest our guests. But you can use the same process to become part of, to join into the link of the superhighway of teh U. Until your cousin, son or planet Zeus has created a condition of AA at the strength of your C14 which leads you to land there. Now you understand, because in that dimension you travel through the communication line through high speed, through what we call teh soul speed of the man. (1:44). Because still it's a combination of AA but still it's dynamic that it can

lead into. Now it's getting tricky isn't it. Those of you who understood, and those who maybe will understand in the future .. I have already understood. I have already entered to produce the Portals. But be careful what you do, what did your mother say when you were young and you went on the street, do not speak with strangers and don't every time you go out come back with a cat and a dog. ... (1:46). Now we open you the portals, who is going to turn up and how good have you made the confirmation and the process of teh soul level which you have invited. What does this mean to you, those of you who were hoping that something might pop out of the jackpot? (1:48). Q: When we use the flight system of the STM are we using C14 within ourselves? I don't know, what do you think. Q: So is using C14 within ourselves is a result of our conduct? Rick, I think that is when you mentioned super conductivity. It's a kind of play on words but maybe it's true? What a beautiful day. We don't need guess work, it's understanding the knowledge. Comprehending the totality, this is what it is about. the total existence. (1:50). Q: Lin from China. You bring us today a beautiful teaching, it reminds me of a video I saw of Buddhist meditation, from there I remember it shows a white connection line when the soul comes out of the body and travels in the deep space, and it's always connected with the body, so when you talk about the C14, is that the C14 field inside the body and they find the match of the universal C14 and then the soul just travels outside of the body, is that true? The color of the brain is a strange key to the color of the soul. When we look at the structure of the brain we see (1:52). a very white, cream white color, and different points of the brain has a slightly different cream white color, which is a combination of the Mg and the C and Zn, because if you have made a combination of the Mg, Zn and CO2 in Gans and you just change the ratio slightly you get a perfect match of the structure of the physicality of the brain in ?? its dimension. Have any of you ever made a Gans of Silica? We have made a lot in AZ. What color is it? Light Tan. Like what? Like a cream color. Good Morning. How many of you have made Zn Gans? .. White as snow. (1:54). CO2 and Silica are whitish cream. Mr. COHN (AA) protein is transparent. Zn whitish cream. Isn't the brain which holds the containment of the STM a perfect match fro man to become "man of space." Is this or can we consider as many of you, I presume, have made teh Ca Gans too. What color is the Ca Gans? Whitish cream. Can I say Good Morning. (I am ?? an isotope 42 which is stable ??) Good morning. Have we found the joint and balanced connection between both, (1:56). the containment and the control of the physicality of the man and of the STM? Has our soul been traveling on the dimension of the physicality and that's why we dream through our soul and it gets registered in the dimension of understanding and memory of the physicality. Is the matter state of the physicality the Cu and the Nano coating of the strength that creates the superconductivity to the dimension of the STM. Have we lived a double life, has the life of physicality superseded, super-covered by the dimension of the superconductor (1:58). on the level of one matter state which is connected to the universal dimension, which is our soul has already been built, developed from the beginning on the direction and in the presence of the soul of totality of the U. Do you know what a Nano material is? It doesn't matter what (material), the space gap is the same, (14 -- 14 -- 14 --) it doesn't matter what material you are using. I space myself because I have a field which can ??? (encouple) doing triple and triple. Now half of the mystery of the life of the man, maybe is sorted, maybe now you can understand, how man has lead a double life. (2:00). Something is a mystery here? This sits at 78 (after Fe). Rick asks, so are speaking of Selenium, it's 78.96 is its

weight? And Se is one of the essential elements for the body. (2:02). and is deficient in many soils like in the local area where I live? ??? Pardon me? Explain. I just know that there is a local gardener who says Se is an essential element .... It's 5.5 times 14 it's an oddity. So should it be 56 plus 14 to go to the next step? Yes, 70. (2:04). But now if you look at 78, ... If you have 56 + 14 gives you 70. but if you go up a half a weight of the atomic mass of O (8) , then you get the combination of the G field forces of this planet which locks into it. Or if you look at it the other way, if you add part of the M field effect of 4 O, in the same combination, you'll end up somewhere around the Cu and Zn. (2:06). If you take the combination of mass elements which attracts and locks man into the physicality of this earth, that ties up the energy of the STM to the physicality of this planet, which MG field forces of the G fields of this planet, we always said is O, you go 4 times 16 (64), then you see how Zn has become part of the structure of physicality of the man, then you see through the C14 how the soul of the physicality has gotten tangled into the G fields of the body and then you can see how the soul of physicality and the STM has gotten locked into each other. If you don't understand let me explain. Here I have a next step, 68, here I have 64 now, (2:08). here I have the Zn connected to the MG field of the O which ties up with the MG field of the element of the ?? non-feral but the gaseous state or plasma state of the 68 of the O, if I add a 14 here to it (78), how the whole structure locks into each other. Here (64), you bring the emotion, the dimension of the control, (draws an arrow to 70 or is it 78 ??), now you understand. How the physicality and STM have a connection between the soul and physicality conductivity have locked into each other, and why when you dream you remember it in the physical dimension, and you remember what teh mother said. It only happens in the dimension of the M field of the soul and the common denominator of teh ?? (2:10). Now maybe you understand why we remember everything of our dreams because we bring it in and we lock it into the physical dimension. It is very easy to understand, how man has got himself into the whole cycle of creation. The atmosphere of this planet has just created teh condition and the availability of the field forces. That is all that has happened. The combination of the C14 and the C in line of, with connection of the physicality and everything else has continuously played back and forth. If you add 6 or 7 and half C to itself, 6 to 14 (2:12). you get 20. What is 20? If you add half of the weight of Nitrogen to the N mass which is 7 you get 21 / 22, Na, then you see how the structure has picked up, how man has got trapped into the physicality just be accidentally having, creating a condition, 1 to the physical dimension of the M field of this planet irrespective of its matter state, through its gaseous state which is the O, 1 through the dimension of the matter state of this planet which is through its C, and then 1 in the dimension of the strength of the work of the U, communication or transportation line which is C14. man has always walked in all the 3 dimensions. Now you know why you remember your dreams, why the color of the body, the STM contained within the white ?? shade of teh brain. Everything else is matching up to fit in, it is there sitting in the connection of the physicality connection of the STM, connection with the matter state, in a way it's a compromise between the 2 and the MG field of this planet. (2:14). Every half or a C addition to C14 gives you connection with your physical dimension. Then we understand how the both the M, to do with the G field, to hold on to, in the dimension of the existence of the field of the Pl of the body has lead to creation of the same one connection with the universal communication line and M field. One works in teh dimension of the

physicality, one in the dimension of the STM, and one in the dimension of the soul of the physicality, but the dimension of the STM and the physicality sits in the dimension of teh soul of physicality which is in the blood. That's how the link has been locked in. This is how the field moves from the physicality dimension, the blood, the Cu, Zn. Now we can see the structure and how we can travel in teh dimension (2:16). of the physicality or we can travel in teh dimension of the STM, if we bring the Inertia condition of the G field of teh gaseous, which we are totally in the Pl condition which is O, then we have the manifestation fo the containment of teh physicality of the STM, which is the Zn, AA, Si, C14 and the C. Now mankind it should be very easy why even mankind dreams and you remember your dreams, where actually it's communication on the line of your soul and you call it a dream. Some of you have enough influence on teh transformation of the C and the C14 that you can even call it a wish, but in fact you have understood how to tap into the STM. Now you understand when we were explaining how you can control the space reactors with thoughts, with a wish, I want to go to the left. Good morning John! (2:18). What made you to make so much Silica? Because right now our bodies are made, are C based and I heard a lot of talk in teachings about going to a crystalline base, which is silica. Now it starts to make sense and I can see where that silica comes in the equation. But can you see how silica controls Mr. COHN? Now I do. Does it mean that in your system you have to consider to always be connected to the use of AA? We always done that, everything we do we connect to AA. ?? can think then your system should fly. We just have to tweak a couple little things and we'll be right there. A little of tweaking to do. (2:20). Now hopefully that we see, that we'll understand why we dream at this level (circles Fe etc), but we live at this level (circles 42 COHN). Now where do you think the line of connection to the strength of the STM sits? (2:22). .. I am still waiting? John says, right now it the Zn at 64 along the pathway of C14 a pathway to ?? (2:24). I am waiting Armand. He says, 14 times 9. Why 9? It's close to iodine. Do you remember that we mentioned Iodine somewhere else, years ago? A long time ago. Those who worked on it, do you remember what it came to? Do you remember what Iodine came to be. I think somebody worked out that it should be the strength of the STM. Yes, you told us. Is it correct? Very much so, but so you understand the position of? (2:26). And the connection of physicality. Now we do. Now a lot of mysteries come together. You have to understand this if you are going to play with the Portals. Are you moving the soul or the physicality. Because if you take the element of Iodine (46??) M energy fields, it's a fact, 11.5 times, take measurement of the fields conductivity of C is around the interaction of the fields forces of the matter state of the body which is C12. This is where the STM connects to the physicality, in the dimension of the strength. After 2 or 3 years we just come back to the same point again, but now we understand what we need (2:28). So when you make your Portals the random calculation is how many times the strength of the G and the M fields of C14, gives you the speed of the travel in the dimension of the lines of the transportation of the lines of the fields of the U by order of magnitude. The speed of light doesn't come into it any more. It's like you say you have a yacht with an engine that can do 100 km/hr but they don't tell you the river you are traveling on is already moving at 400. When it comes to measuring and understanding the transportation of the Portal or the dimension of the STM, the dimension multiple of C14 fits directly into the STM, so you travel 9 times by speed to the direction of position, and then you can tighten it by order of magnitude. We are not talking about the speed of light ?? which

is matter state. (2:30). An entity doesn't go through the phase change, I was explaining that in the teaching yesterday, where somebody said we go through another dimension, and I explained it very simply, .. when you travel with the speed of sound, and you break the sound barrier as you go through it, does the aircraft or the pilot change on the other side of the sound barrier. Does it become a different aircraft or a different man? The sound barrier is again a M field compression, even if you call it an air compression, air is made of M fields. So when the man goes through the speed of light in the matter state, when he does will he come out into a new dimension. Or as you pass every time does the pilot become the donkey and the plane becomes a monkey and everything else changes every time you pass through. You come to understand that you have to find a measuring method, a way to be able to roughly guess what speed you are going to go and where you're going to go, and where have you set the Amino Acid to the strength of the STM to land up where you want to be. You move the man through the strength of his soul. (2:32). (break) ... the dimension of the STM and he moves on. Now we understand the process and we are learning how to make the framework. (2:34). You have to make a common denominator framework that allows, not only respect the soul of physicality if you want to go in the dimension of physicality, but respects the STM too. The strange thing is that not many creatures have this combination to be able to travel the span of U. Now you see the advantage of being a human. very few races come to these conditions. Now you start building a framework, start putting new rules, new dimensions . (break) .. which is actually CH3 ... (2:36). .. then you understand how close man is to being able to become the passengers of the U. Any questions. Q: It's interesting to think about the ratio between those elements, why did you pick up these specific elements are they the ones that encompass the whole human being? I didn't pickup, the MG field forces of this planet has done for billions of years because it has to work in both dimensions. It's very easy you have to understand this, (2:38). I have repeated it 2 or 3 times in the past 48 hours. You travel 24 hours per day with the speed of teh planet, of its own. You travel with teh speed of 10,000 to be the passenger of this solar system, 100,000 to be passenger of teh galaxy, and with teh speed of 1 billion to be passenger of teh U. And every one of them therefore has a field force effect on the creation of the man. This is how at the speed you travel the collusions you create to lead to teh creation of. If the speed of this planet was not 1,600 let's say, km/hour to create the 24 hours and you would have traveled at 2,200 km/hour, then your day was 16 or 15 hours, then that speed dictates (2:40). a different fields creation in respect to the atmosphere of this solar system and if it creates that speed, which means there should be another field forces exerted by the sun and the earth, or the combination or mixture of the earth itself, or our annual rotation becomes 200 days on teh same orbit, which means we are going faster, we create, we produce interactions of different fields and teh structure will change on this planet. If you turn up (the speed) of a grinding stone and you hold your knife fixed to the position, does it create the same spark at 1,600 then 2,200? It's totally different. So the environment of this U, the speed of rotation of it, the speed of rotation of the earth, the solar system, now we understand has an effect on the creation elements in the different positions of solar system or this U, or this galaxy, and that combination has teh enforcement on the others. Go back to the teachings of the past years, I kept on referring to that we not only get the fields from the radiation of teh interaction fo the fields of teh earth and the sun, but also we get fields and radiation from outside the solar system, (2:42). whose interactions

effects our life. As it effects it and comes into it, it dictates part of our structure. So we are not just connected to the 24 hours field strength of this planet because now the field of the sun counts also, so we have a common denominator which at the end of it is C14, which again effects our condition to the speed of teh travel of teh field strength of the STM. We call it a soul but the packages of energy which has in line accepted to be in conjunction with the fields of this planet. You have to understand a very simple principle and that is, if we have no motors, we don't see any motors rotating this planet, then we have no motors to rotate the galaxies in teh spans of the U, how much stronger are teh fields of C14 or the winds of teh U have to be that it can create such a interaction rotation with and cause teh galaxy to rotate. The speed and the fields of teh U are many multiple larger then 1 billion. How do you get one of these children's windmill and blow on it, (2:44). it has no motor. The speed you blow, the air dictates how fast it goes and still there is so much surplus energy that the speed of the blade can't catch up with or it's not enough. If the winds of teh U can create the galaxies to move at 1 million km/hour, how stronger they are that in slowing down, in interaction, they create matter states, this goes back what I keep on saying that no man has ever managed to measure the speed of teh magnetic field, be it in the matter state or in the speed of the universal magnetic field. Then you can travel the speed the of teh U at any speed depending on what you are locking yourself to what reason. Then it's not 9 times, it's order of magnitude 9 times the speed of the universal magnetic field, because that energy of the extra neutron is dictated and controlled by the energy of teh universal field forces. It has no friction, it's purely on the speed of the center, the Principle Matter speeds of itself. (2:46). It's not any more the order of multiplication it's the order of magnitude. Then you understand, that the speed of the C14 must be dictated by a higher speed of order from outside the U, which condition of it, part of it, is connected to the speed of the travel of the soul of the Creator. Then can we create a portal that can attract the travels of different universes? Now I hope you understand. Q: Is this pure spiritual/plasma science extending into the matter state science to help us combine the 2 dimensions? Good morning! (2:48). Q: Can you please give us practical advice and training on how use emotions for communication with our soul? Find a common denominator between the strength of the soul, line of communication and the strength of matter line of communication. It's somewhere around 160, which is 10 times the MG field of the G field of Oxygen, if you multiply 12 x 14 it gives you about 166. And then you have somewhere between that, and (2:50). somewhere between Iodine which is the STM with the dimension of containment of the strength of it, now you know the strength of it. To that can contain it, you have to be higher. If Iodine were a 126 you'd have to give it a stronger cage that you can contain it, which is 166, if you are lower it escapes. And if you find a combination of the elements of the totality of the structure which is very much the containment of the AA of the man, then it gives you the dimension of the existence, take into consideration the possibilities of all the fields, because if you multiply 40 to 43 by 4 times, it gives you how it comes to be part of the structure of the creation of the matter state of the brain. Now a lot of things fit together, doesn't it. (2:52). Now maybe you understand why we even have a Ca skull. This is how, you understand why we have, they find C14 even in our bones. It comes from the universal field forces and not from the body of the man. And it has such a lapse, a strength that it is easy to travel. It's a foreigner, it's from out of this world, but it is part of the common denominator and it has dictated the structure of the man. It's dynamic but it

has a ?? beater effect, as we call it, so it means it interacts with the matter state. So Ca can block it, hold and contain it. When you look you look at the brain you understand the STM and the creation of the physicality of it, it creates a field force full that it becomes part of its cycle. Now I have to teach something very strange, but it's beautiful if you understand it. (2:54). Man will understand how he has come to be created. He draws the 2 lobes of the brain and this is what you have as a beautiful soul. You have to understand that this little chap (soul) is dynamic (draws an clockwise arrow) and now you understand the strength of it, but it creates MG field forces which are equal to the same as if you extract CO2 from the environment. It pulls in and creates your skull, Ca, due to its forces, but as the Ca comes and sits and finds its position like the crust of the earth, now very much like a dynamic lava, it grinds on it, and it continually feeds itself from it that it falls in and it creates the seed of the physicality of the brain. But its pull gets it, continuously extending on it, but inside grinds it to get it to the strength that he needs for his existence. (2:56). We look at the physicality of the brain, but how come it has that shape, there is a M field flow or wind as you call it, here. And what strength it creates and it has, dictates the shape of this wind. This is like when we give a water to somebody and we tell them this is a water, but it is a Gans, it's not normal water, it has a field around it. Excuse me sir, this is Gans too, (meaning the brain) and the soul is contained within the structure of the Gans and it has a wind around it too, so it grinds it, it releases its field forces to it. Now you might understand a little bit more. Don't forget, read Book #1, at what point, or read Book #3 or #4, it explains well how the surface of this planet or any planet has been decided. It's the same with the skull of the man, it's the interaction of the MG fields of teh soul in a different strength of itself, gives teh dimension of the brain with its atmosphere gives teh skull. And where he has lost it, he found a loophole, or a leak on it, that becomes teh spine of the man, and then you get legs and arms. (2:58). And then you get what you have to deal with, with the physical part of this planet. And it beautifully covers teh STM in it through the dimension of physicality, what you call the neural system. We are reaching gradually the point of departure, we are all on the same train and we are getting to the terminal. In this city, the airport, train and bus station, the taxis all go from the same destination, if you are in a hurry and you hae the money you fly, if you have time you get a train, bus or on your own you get a taxi, if you want to travel with the speed of your soul, of teh U, as a sight on a SS, now it's the choice of teh man. I have taught you all of it now, there is still a little bit left. (3:00). With the SS the reactors and cores we showed you if you would like to go with a donkey, as a sightseer you have all the time in the world. It's you choice. If you want to go fast and take a jumbo jet, you can go through the dimension of teh soul, but you have to understand. I told you that when I take man to space, I take him not as subordinate but with total knowledge, then it's his choice. I am not interested in building factories, companies or whatever. I am interested to take the man, but sometimes I have to bribe this little chap with some sweets somewhere, just to get him to the line where he can decide, it's there. There is another flight system, when I introduce you to C14 dimension, there is a much faster way then this. But in time when man is educated we teach him. But this is good enough, you are traveling million of times by the order of magnitude then teh speed of light. That the guy (Einstein) said we can't travel. Now you understand how fast teh knowledge is getting transferred, most of it you don't understand because the comprehension of totality is not there, but most of it, as I said, we teach through the voice, but the STM for teh others, and

in the future man will understand, if you don't forget, (3:02). or just make a pyramid and you just forgot how it works. It's no good having the most advanced wash machine in the house when you lost the manual and you don't know how to operate it. Get the manual, learn the teachings and then you decide. You can wash (your clothes) by hand or put it in high speed washing machine. Just don't loss the manual, ?? or someday you'll say, the guy said that a thousand years ago, I hope that ?? , but I showed you how to extend your life if you want to have a thousand years just to mess around. And if you are like Armand then you want it yesterday. I have a patience beyond patience, I could have taught you this the first year but none of you would have understood. You haven't even managed to make a SS except a couple of governments. Civilians have not managed, but you have more ?? details ..?? a bunch of people with reverse technology, but they still have a problem. Now let's see who builds the Portals, the governments or mankind, free men. Rick says next week we have the first free man or non-government SS launch ... (3:04). ... talks about private company, Space-X going into space. What are they supposed to do? Take people to moon or mars. ... Q: John asks can a rocket go through the Van Allen Radiation Belt? (3:06). The Aluminum hull dissipates the radiation when going through it, they simple don't have radio communication when going through it. The way I understand it. ... Mr. Keshe asks, didn't a NASA guy say that we have never passed it. That was part of the rumors of not going to the moon. A quote from Tesla, "My brain is only a receiver, in the U there is a core from which we obtain knowledge, strength and inspiration, I have not penetrated into the secrets of this core, but I know it exists." Mr. Keshe says, We call it the STM, now we know Tesla darling. Q: Are we then the pilots of our physicality as we are also pilots of teh U? If we understand the totality we can pilot anywhere. It's just us who are afraid of the reality. Q: When you talk about the speed of the soul of the Creator, (3:08). is it matching the speed of our soul? In essence, in inner sanctums, yes. Q: 9 CH3 is lymph blood energy. Don't know , try. We are trying to bring understanding of the totality and this is the hardest part and many of you will suffer with this until you even look at it. I was with a bunch of PhD and doctor scientists. (3:10). One said, now I understand this has got M field and nothing to do with the matter state, now I understand why nothing fits into what I have been taught as a PhD. You have to understand it's the limitation of the fields, don't look at it in the matter state. Rick says, As soon as we are outside the fields of this planet then matter won't matter that much. If we can make it on this planet it will matter too. People make those pools to create the pressures of the field forces of the depth of the oceans, experimentally because they can't go that deep, they can replicate it by creating more pressure to less. Now we have the facility to test the space conditions, if you understand how to make the Portals. Other races with less then this are already in space, but you lot you take too long, you're too slow cultures. Armand says, no you take your time. Do you know what the guy says, do not keep your silence. I keep my silence. ... I keep my peace because I am at peace. (3:12). Every opportunity in different dimensions was given to man, if you want a donkey or a motorbike, jumbo jet ... you have all the options. Many of you tested but you never understood, maybe this time I can explain that somehow it can be understood. Why does CH3 work with the body? Q: When we produce CH3 do we also produce C14? Fields of it if you know what you are doing, you can extract it. But why does CH3 work with the body and it's so effective. Because the C and the H's doesn't necessarily make 15, does it. In the mixture of it, some of it is 16 like O, it just holds onto it and ?? clings it. When you

gravitate something towards yourself it means you give it energy with more to come to you, it's not a tow bar pulling it. (3:14). You have to think in a plasmatic condition where the stronger plasma give to the weaker to make it balanced and bring it to itself. You call it alkaliness. Oh my god, how much more can I teach. Maybe another way we call it is MG field forces of the U, it's round about C14, does that make sense to you. It depends on where you are standing, on the line or is it passing you, are you part of it, or are you in the middle or are you at the end with the legs going out nowhere. But you made that leg ?? that's where you want to stand. If you learn how to interact and create very much. I am going to open a door for those of you who (can) understand, if you don't understand I am sorry the game is checkmate as we call it. Do you remember this, we call it Deuterium, this we call C14, (3:16). another chap who sat here (in between). Do you remember I mentioned to you if you have Deuterium you can make anything in the U. These, have to be understood by the MG field flows of the MG fields of the U, and not the matter state of the U. Now let's play a game, 7 times much stronger by order of magnitude ... and you are sitting in the carousel of the U (draws an Infinity Loop around them). Your reactor is this (D) and the universal is this (C14), the center point is pointed to the center of the U. (3:18). You can imagine what speed you can travel in the speed of the U, in trying to pull you into it. Why do you give energy? Why do you become a lover, you give more then what you take, because inside you, you can add to it, inside you are part of the creator of teh energy. If you are receiving 16 and you are giving 14, where does teh 2 come from? It comes from the inner essence of your existence. It means it is within you, it's within the structure of teh STM, and the soul of the physicality. Read teh front of the KF, "We are here to serve and not to be served." When you serve you give more but where dies it come from as you receive, that you can give more. Why is the North pole of this planet is warmer then teh South pole, because it's more energetic when it interacts with teh fields of the U, so it creates more heat. (3:20). Where does the extra come from, it means ??? it has, it pulls in from the totality of the environment. How much more can we teach and why are you lot so slow. I can hear Armand breathing. Shall we call it a day, I have been teaching 12 hours in last 24. .. . But in the teachings we are moving right to the advanced levels we are on the verge of a breakthrough, but we just need a little bit more people to understand. We need to carry the governments with us at this stage and they are boarding. (3:22). .. Alzar. Are you back from teh Amazon? .. ..
Thank you for today.
(3:24). (3:26). (3:28). Shows picture. double headed snake and turtle. (3:30). .. You see how even animals have 2 heads, 2 souls. ... (3:32). Presentation by Moldavian. Translation. He did an agriculture experiment. .. (3:36). (3:42). Summary of treatments with CO2, CH3, Mg, K and AA. .. Plants turned out very beautiful. (3:44). (3:56). (4:00). The neighbors grapevine extended itself towards the Gans only. In October when it's very cold outside the cucumbers and plants are still flowering and producing fruits. (4:02). The vegetation extended itself up to the frost time. Below 0 degrees centigrade, -3 to -5 centigrade 26 Fahrenheit. (4:04). Gives summary of results. (4:06). (4:08). (4:10). These are nice private tests you do, but those of you who do agriculture please bring people from governmental agricultural groups to monitor your work. We have come to the point where we have hundreds of thousands of people testing, we see this and know it and it's beautiful what you have done, but those of you who do tests try to get your local agricultural committees involved, just to observe. ... I have planned

this for this year .. (4:12). ... Mr. Keshe asks, when you grew these and it got cold, did the fruits freeze? (4:14). ... I don't know. How long did the vegetation stay green? They stayed green until the temperature reached -5 centigrade. ... We have seen the growth at -15 centigrade depending on which mixture of Gans you use. No we have, we are growing now in -20. (wow). It's a special mixture I have made. We are growing wheat under the snow. We tested, we watered strawberries and put them outside, they die, they freeze. But some plants maybe they don't do that, or do that. (4:16). ...
(4:18). .. one of the first things that came out was, oh this must be GMO. Everything we achieved suddenly hit a wall because 1 scientist said this is a GMO, so now we put everything on stop and sent all the material to be tested by the lab. And the result of the test was no GMO. (4:20). All the KF supporters have to gather certified evidence by involvement of your government. We have overcome the African pig disease, it's a massive achievement. Russia looses 10% of their pigs every year. ... It's done by them (experiments) and we are talking about a massive number of pigs. There is still a question mark and now we have to do it in a clinical test. No problem. KF has broken through the African pig flu in a very fast way. We have tested it on hundreds of pig. ..
(4:22).
(4:26). ... in a few years times they'll try to make anybody who uses the Gans as a criminal offense, but we are working in a direction that this will not work. ...
(4:28).
.. the biggest problem now are the scientists in the governments, it's not that they don't believe, but most of the top scientists who advised the governments are paid by pharmaceuticals and whatever people who supply the pharmacies or the agriculturalist. We are on the vertical system, we teach, have the workshops, the factories, research center and the journal. One thing is that you are not alone over a hundred million people practice have been or have done. We don't need to all the time be involved to do it, we only do it when we need it. You buy a pack of aspirin not to eat, but because one day you might have a headache. (4:30). You have it there that one day you might use it. It's the same with this T, you know how to make the Gans', what effects they have ... it's the knowledge you carry for the rest of your life. 20

263rd Knowledge Seekers Workshop - Thursday, February 14, 2019

(,)

(:11). .. Before we came on it was said we are talking about the C14 and today is the 14th on the Christian calendar, which is known as Valentines day or lovers day. I wonder how may of us will ?? the love of God in us and not the love of physicality if someone somewhere. It's a very strange phenomena for a lot of people to say that they are loved and want to be loved. I said, to Caroline the very first time that we come to this planet to enjoy the physicality and the love of man. It's something that is special and it has a lot of meaning. ... How do we love, it's part of an emotion and how come we feel the love in our heart, why do we feel love in our heart. The heart is the soul of physicality that's where ?? field come collectively, every cell of our body together to represent the manifestation of physicality, and this answers so many questions in what do we consider as love of the STM. I think the love of the STM in a very simple way is attachments of itself to physicality it's in the at point that bigger love, which is the love of the Creator sets in, and a new destination is set for the soul. In teh past couple weeks I tried to attend as many teachings as possible to try to explain the New Dimension. .. (:14). In the beginning I spent 12 weeks in Tranni, Italy to set the basis of the knowledge. ?? for the knowledge. As of today nobody can put a hair in it because it's so constantly correct. And now teaching the knowledge of the space and of the universe, needs that kind of dedication. ... I have relinquished all my positions in the KF and it's in capable hands and it gives me time to see the man's transition into understanding the U and universal conditions and connections of creating the condition of setting up ?? standard of man to move into the next level of peace, and it takes a lot of effort and time and it's not easy. In the essence of it, why do we do this? Is it love of the U Community for mankind to elevate to their position, or is it the love of the Creator trying to spread teh message of equal ness among His children. Equality is a different word then being equal, it has a lot of comparison, but when you are equal there is no comparison. In what essence do we consider ourselves, in what way do we measure ourselves. Where do our feelings come into it. The feeling is the point of interaction of non-dimensional entity which the soul of the physicality and the STM. Emotion is the line of communication between the 2. One you feel in your soul, (:16). you in the dimension of physicality and you transfer the emotion. 06

(3:14). (3:16).
(3:18). (3:20).
Q: size of core G or M?? .. It depends on how you N coated your coils and how you wound them, even in the PPU we set the outer ring to be G that in pulling from the atmosphere to feed to G. The original designs are with the G inside and M outside, in how you wind and how you produce Gans' to load dictate on what you are going to get. We consider MaGrav system as outside G, it's the way you N coat them ... because this is that we absorb energy from the environment and we feed it to the center core, (3:22). in a way absorbing, pulling, and the center core radiates by feeding back out. This is the phenomena, the understanding. Q: What about the phenomena, do we have to reverse the connection? You can do it either way, it's just that how you set your system up. The reason I brought that discussion up last year is that you have to understand the condition and why we came up with that knowledge. We consider it for a specific condition, all teh PPU are set up this way. Q: ??? I don't understand. When a M current ??? (3:24). Rick says when there is a current in a coil it creates an inductance in the coil, an inductor is basically a magnetic field, can we use that magnetic field to control the Pl? If you go to some of the teachings in the past few months I have explained that the MG fields of the system is part of it. I think the research with John, you can feel the fields above MaGrav units. Even in the MaGrav units there is a misconception that we just use it for energy, electrical power. We developed the MaGrav units as it is coming up, for the development

of the Pl. It is based on fields, this is what we call a composite power units. It's a hybrid if you call it, electric and plasma current. (3:26). The problem is that K Seekers have to start learning to play with these things. If you have developed field detectors you can check your systems and put them in the right order, what you thought was M suddenly changes to G, it depends on the field forces on teh layers. This is why some of the MaGrav units don't perform because G field forces of the plates are too close to each other and it creates a blockage. ... The knowledge we give, share, is to be open minded and not just to be accepted, but to be tested and understanding that in a Pl T it's not electric current. That is only a ?? current. ?? joule field reaction. What you can enforce in the fields, or you can surrender teh fields into a system and then you decide and the system itself decides, (3:28). because you could have a few centimeters gap in the position of your MaGrav coils can make a big difference in the performance of your system. ... We hope we all share teh same goal. We'll see where we are going and how we are. The KF in the past few weeks is going through a phase, we don't announce anymore what we are doing .. we'll see major breakthroughs in what we are doing, and K Seekers who come after us will all put a brick in this wall to make it much stronger and taller. ... This knowledge needs thousands of years to be completed. (3:30). Q: What is the importance of mercury on this planet has it manifested as a precursor to the conditions of moving closer to the sun, it seems to be a solid liquid and gas combined as one to be together in teh matter state condition. Is that why man uses it in mirrors and thermometers, so what is its plasmatic significance? Nothing, it's another element created do to the condition of the U and if a body or structure has created the fields of it, it has attracted it or if you understand the work of its fields and what it can do you can use it for everything. It's not just because we use it for thermometers, there is a far amount of mercury in our body but it is used for a specific job. You'll find out that some of the elements in the body like in the kidney carry a composite of elements because now whatever you have in your blood they have to extract it. It's like what we see with the present element, they create a M field that matches teh poisons in teh blood and they just by M field they attract it, it's a magnet and then it transfers into matter. The whole body is that way. (3:32). So there is no specific reason, part of teh body needed, operation of a certain given M field, then to match it the body needed mercury, when you eat something it comes in, so this fits. The body of the man is the most opportunist ?? stick structure god ever created. Whatever came in, if I can use it converts it to how it can use it. You have a soul which is a programmer, it's a creator, let's see this is a new material, how can I adapt myself. What is what we call evolution, do you think it's just by accident. The ?? of the body is the most complex, but it's programmed to need use. If something comes available what can I do with it or extend to it. The most opportunist people in the world are football players, that they put themselves in a specific position and when it is there they score a goal. And so is the man, the body is in the same position.
(3:34).

Knowledge Seekers Workshop Summaries

(264 through 284)

264th Knowledge Seekers Workshop - Thursday, Feb 21 , 2019

(,)

(:07). Continues discussion on the holographic universe.
... the reason they say it will be acceptable is because the mathematics adds up. They means that if you build a mathematical structure and if the equations add up to what you assumed, then it's correct. ... (:10).

(:14).

(:20). what's the reason of existence of them. Why are they the same on earth as on the moon. ..
... It's in my blood, I can feel the nucleus and the motion within it. It's like a glider pilot he can feel the direction of the wind, (:22). he flies into it, he plays with it. He flies across it. It doesn't exist but he feels, he has the sensation of the motion of the fields. A nuclear physicist who understands the science, it's very much the same, but we fly within the structure of a nucleus, we feel the motion of the fields. When you do this and when you teach the world of nuclear, the world of science of plasma we leave many people behind because they don't have that finesse or understanding. To them it's just an electron and they say something, and then you have a proton, neutron or whatever. There is a fundamental question to ask from the scientists at this point of, conjunction of science and that it is... It's a question I have put to many nuclear physicists and world scientists and nobody has managed to answer and when I explain it to my understanding, unravels the secrets of creation. And that is, we say in the world of, you K Seekers coming here that we have an electron and a proton, and if I ask you, what is an electron and a proton, many of us are baffled by it. If we can work in the dimension of the existence, (:24). by size wise what we'll see is a very interesting point. We have an atomic structure (of an atom) .. in so many ways we do not see this (the nucleus), this is illusion, but we know of its existence because of other things which we do and which we know is correct. This nucleus, the M field boundary of 2 entities entering and interacting. The balanced field between these 2 which is somewhere here, is very much equal to the energy of the electron, creates a new dynamic, and this is why an atom exists and why an atomic structure exists and if we understand the history of the creation of life in the U, when we say we have an electron, P and N, if you understand that it is the neutron which has divided in two, a proton and an electron, then you understand that this guy here(the neutron) has the energy of an E and P in it. When it comes to balance with this it creates a point of interaction. (:26). And this is why we have an atomic structure. There is an electron balance between these 2 (N and P) which in a way is in an opposite field flow as the electron which was created by the division of the other. This is the first time we can say how ... when we say an atom of Deuterium exists, understand scientifically why. But there is a next step in the world of physics. The reason I explain these this way this week

is because when it comes to building your gateways, your portals, your motion of your soul, and rotation in the dimension of the U, if you don't understand this you'll come to be in a big problem. Up to now no one has ever explained the phenomena, the understanding and the history of the creation of the physical structure and how these physical structures lead to creation of elements, and how these elements stay in their field dimension, or they stay in a matter state depending on the Inertia Mass of the environment. Now that we understand how the atomic structure is created, now we understand in a further point how multiple what we call multiple atomic is created. (:28). This is deuterium, what about when we go to the next step and we add 2 neutrons and 2 protons, then now we see how the electrons manifest themselves, and when we go to multiple electron atomic beyond 2 and 3 neutrons and protons, we see why it jumps to another, what we call second ?? ring, S1 and S2 and everything else the scientific world explains, because if you look at the first one, 1 single P and electron had a space gap of this much, but now look at the space gap, because these all have accommodate themselves M and G and the equation changes, then these (E) move further, then the more and more that you add the field expands, the size and the dimension expands. Now for the first time we understand the world of creation as bundles of M fields in which they try to accommodate each other and the screen widens, the volume of all these widens, and all these are dynamic, they don't stay in one position, they move continuously to accommodate the other guy which is moving, plus the fields that are lost and gained to the environment by each one. (:30). So the dynamism starts. then you find out in some cases the matching electrons and protons need a bigger space gap because they are entangled, you get ?? they can't move. You find the space gaps with neutrons comes in, and then what you get are so many protons of what used to be 5 + 5 of each and it created an atomic mass number, now you get 5 + 6 of the other, and the number of neutrons starts to increase and increase (7, 8,etc) but you ?? find different dimensions and the different isotopes or whatever. But all this understood, as I said, you missed the game again, the magician played again. The Nano, no world scientist to this point have point this question, which I put to my professors, and many of my colleagues in the world of nuclear and atomic some 40 years ago, it was put aside because we could not answer it, but now that we have entered the world of existence, of Universal Community, of universal transportation, we can't put it aside anymore. The scientific world has to answer this question, and that is, (:32). we accepted the theory of an electron, proton, and a neutron, and in any combination of the mass of this we add up in blocks, with many some addition of other neutrons or neutrons combination, on Earth, moon, planet Zeus in this universe we get Zn, but the unanswered question that I put to all of you to think about, that is why do all the electrons have the approximately the same size and MG field, and the same for the neutrons and protons, how come the neutron created out of the splitting of another structure which itself now is the mother, which now splits into another electron and a proton, creates the same size mass energy ?? electron in every dimensions of this U. There is no god sitting there scaling, yes, this is the size of the electron energy we keep it there, yes this is the size of the proton, we keep it there, yes this is a neutron and that's it. There is nobody who has made a big dough and cuts it. What dictates it, and this is a question I put for 40 years to the world of physics? (:34). Maybe today you'll find the answer, is what dictates the size of an electron, the amount of mass of energy in an electron. The size and the mass in this planet, and in planet Zeus, and in the galaxy, of a mass of a proton, and they are all near enough the same, roughly

about 10% up or down. There is no scale or cutting machine in the U. What phenomena dictates this amount to the electron. And whenever your split a neutron you get this and it comes on its own, and it comes with a proton. The most fundamental question to ask in the world of physics is who has dictated or what dictates the mass, the size, and the amount of energy of a neutron which is more or less within 10% MG field mass across this U. The world of science has never answered this, and this is why physics is beyond the reach of many people, because the fundamental cornerstone of the creation of this knowledge has never been explained, and never been understood to be explained. Mathematicians come up with all sorts of formulas but what is the formula of an electron. What is the structure that an electron on earth (:36). is the same as an electron mass energy, motion and speed as .. So what we have to understand in the world of physics and creation is what is this, what has not been explained to us. What is the mass of 1 electron? How come the electrons of the same anywhere in this U, where in other universes of the Unicose they could be different and the size and energy and speed of could be slightly different for those universes which are closer to the Creator. the fathers of the physics when they explained that there is something called an electron, (:38). they just left it. No one has ever opened it or discussed it and blindly we have accepted it. Now that we come into the work of the universal language, understanding, in the energy, the amount of fields which is within 1 electron, if you understand the connection of it, to the other electrons, protons and other neutrons in this U, then you ask a simple question which I put to the leading physicists and nuclear physicists years ago, and that is, we are not asking what is inside an electron, I am not asking what is inside a proton, or a neutron. I am asking a simple fundamental question, and that is, why are all the electrons of the same, within the proximity of 10 to 15%? We don't find an electron the size of a neutron in atomic structure. Of the Cu that will be different from the Zn or different from Plutonium. What dictates the fundamental size, the cornerstones of the creation of these entities in our U? This is what the present world of physics has to answer. (:40). We have danced around it, messed around with it long enough. We have to diffuse the condition because we couldn't understand, created modern languages of ?? something else, of something else inside the plasma of a neutron or a proton. But if we go in a bigger dimension of a Pl of the solar system, put on the screen how many names have they made for things which they assume to be inside the Pl of a proton. Rick can you bring it up on Wikipedia, the fancy names that they have come up with. Isn't that fancy name the same as the earth. .. we call it earth we call it moon and we made it so sophisticated, elaborate that now we made it impossible for anybody to understand. .. I'll tell you what is inside a nucleus, there is a center of energy called the sun, and the fields around it interact and imagine how many quarks or quirks and everything else has been made. Every quark is a moon and every other quark is a planet, and everything else ?? (:42). we call it ?? ... You see this is the same story as I started with holography, using fancy words that people don't understand then you can talk about anything. But now we put the facts of science on the table. The quarks, one up and down quarks we call it, the earth and the moon, and the other upside down quarks we call them the Saturn, there is no difference. Now we understand the science, the totality from the world of physics from the basics. Now we have to address it. It's the job of scientists especially physicists, not theoretical physicists, (:44). who have a habit of putting things down and making a mess of it, because then they can cheat anywhere up, you don't see that I put a marker there and double it and nobody

knows. but what comes up with, what it is, is every fundamental question. We see the Pl of a proton, and a Pl of a neutron, and a Pl of an electron. Now for the first time we have opened the structure of these structures, the plasmas. And all these fancy words of quarks, up and down quarks and a lot of other things that in my time of nuclear education I laughed at and was never prepared to accept it and I was told that theoretical physics was the backbone of the physics and the theory is wrong, so I carry on with my own. The theory is very simple, whatever is in micro is in macro and reverse. The sun, the solar system is a plasma, it's a neutron, and in time it will divide. When the center can't hold on, ?? and our sun will split and from it comes others and they will be in exactly the same ratio as the ratio of neutron and proton and electron division coming from the neutron itself. But what in essence, now that we understand what this fallacy about the nucleus and the neutron is, it's exactly like a ?? storm system with all the bits in it, every thing they can't see now, I tell you we call it up quark is called earth, (:46). down quark is called Mars, the funny up one is called Jupiter and the little dirty one is called Saturn. And all the other bits flying in there are meteorites, icebergs and the moon. If we can explain how the earth, Jupiter, icy belts on the edge of the solar system and around different moons and planets were created, then we have found the answer to all these crimsons and quarks, change the name of quarks to moon and see how ?? the moon and earth are. Now it's time to open the science so that every man understands the simplicity of it and the truth about it. But again it brings us to the fact that we haven't answered the fundamental question yet, and that is, what dictates the size of that solar system which we call an electron, a proton, and that across this U wherever we look with our new science at the depth of the space with the telescopes that we have created. We say planet so and so has Zn in it or is made of He, because in a matter state MG (:48). field we see the characteristic of what we see on this planet as He, so we assume it has 2 electrons, 2 protons and 2 neutrons, so the measure, the size of the structure of the electron on this planet and there is the same. But what is interesting and what needs to be answered by the world of science and now by most of you, because you'll face the same space, this is part of the space T if you want to travel the dimensions of this U. What dictates the size of the electron which is the same in any point in the U. What dictates it to have a motion clockwise or anticlockwise, what dictates its speed, is the speed of the electron in a H the same as an electron in the outer boundary of Plutonium? The world of science has not answered any of these yet, because they can't they have never brought the subject to the table, it has been pushed aside. They don't know, ?? play. It has become Vatican and the priest. Until somebody raises a question we send an ambassador to Paris to sort it out whose playing it too. Now we have to say what is happening here because what you'll understand is one fundamental question and answer which you need to find to be able to open the doors of the U Community in the knowledge of the U. (:50).

(:58). of the universal Pl, which means the stronger Pl feeds the weaker Pl for it to reach its balanced fields. This brings a fundamental question in the creation of the black holes which we see physically in part of the U due to creation of its own Nano structure and its own absorption. But there is a second fundamental question to be asked and put to the scientists and you as travelers of the U Community who will have to answer it, is a very big question and it will shock you, I have to put it out because this is what, what I call the

thief of Baghdad forgot. ... It's been considered that the black hole pulls due to its G field forces everything in its surroundings. In a way this is correct because it has assumed to have a huge (1:00). combination of fields which are negative to the environment, that's why it's pulling, but there is huge fundamental question which is why I wrote my first papers about creation of black holes, is this, when we have a small and a big Pl, the big Pl shares its fields with the small one to bring it up to its balance, and it builds this up in field energy, so it becomes the feeder and this little boy starts absorbing, very small. Then the fundamental question, does the black hole absorb and take everything in from the U and its environment, due to its heavy fields which are opposite in heading of its environment, or is it fed by a bigger black hole, and it's a small junior partner. And then it comes to another point in understanding the world of Pl physics which the work of the U. Whenever we speak about the Pl we are talking about the work of the U, is that if this (black hole) is so much that it absorbs, is it possible that the center of the (1:02). black hole is a single element of Deuterium? 07

(1:20).

(1:30).

(1:42).
(1:50).

(1:56).

(2:02).
(2:04). Any questions.

(2:10). Q: Is the size of the atomic structure dictated by the U or this U, like the womb of the mother does the same thing, is the U not a spherical container with a central line or equator where the fields interact as opposites, and isn't this U just another neutron created from the interaction of the Unicose? So which one do you want to answer, have you answered it yourself. I think the answer is yes to all of them. So thank you very much. (2:12). Q: Is it true that inside of a neutron space can be larger than observed from the outside? Do you have that when you sit on earth (in regards) to the size of the Pl of the solar system. You have to answer yourself and then you find it. ... How the atom is created ... (2:14). ... First of all does he understand his own question before he answers it? Q: I understand my own question but I don't know if it is good to do it here because it's a ??? or maybe it's better in the private teachings. What exactly do you want to explain? Q: I want to explain the neutron how it does it from the outer layer then the electron and it starts feeding the electron ... and then there's a neutron, ?? then the proton becomes ??? then the radiation is going into the transition layer ?? environment. then ... Is this what you were trying to explain in the one of the private teachings this week? 2 weeks ago, I started glowing with radiation .. (2:16). I have some reservation from my point of view of knowledge, but we are not here to peer review. And the explanation I heard from you makes (sense) for some parts to me, to my understanding some sense, but

on the other hand, you make a lot of assumptions, which again is part of the knowledge, because what we don't understand we assume. It will be good if it is taught in a structured way. Because I was listening when you were explaining it and ah, not peer reviewing it, but we have to let the people to decide themselves, because as part of this explanation you made, you continuously deny one half of the other, not deny, you don't calculate, the M part when you talk about the G part, and then you bring the radiation in as absorption where it doesn't fit into the structure, of what I listened to. So we can listen, it's very nice the way you present it, but this is your interpretation and we offer a platform but everybody else has to decide according to the knowledge, what it fits into it. But if you make some small corrections, maybe it fits into the work of the U, but understanding of what I explained today, (2:18). doesn't give much room, maybe or gives a new room for you to be able to explain this in the way you see it. And then it's for the others to see what they understand from it and how they can take it to their knowledge according to the step. I don't peer review but I listened to your explanation very thoroughly. ... but you have to be able to go into more detail. Q: I understand, thank you. .. yesterday I saw my mistake, I tried to protect oneness ?? ??? ... I try to stay open to understand more ?? No, no, you didn't make a mistake, this is the wrong way to put it,... you matured into the knowledge. That's a big difference. ... If you want to work on it for some other time and then come back in, because you need to correct a few things, it's not complete. ... (2:20). .. You made some fundamental points which do not fit into the reality of the MG field flow. ... but some it do not fit into the laws of the Pl. ... There are a number of corrections you need to make to it, or to me it looks that way, when you present so many vortexes or what you call it .. you have to consider that they are both ways. That it is 3 dimensional. ... it's nice to see the school of thoughts just mature a little bit more and then, ... it's nice to se how a layman understands the work of the U in a very simple way. ... look at it in 3 D and in every point consider the M and G field, at the same time. .. it's a point of view. (2:22).

(2:28).
(2:30).
(2:32). Rick shows water vortexes in bathtub, how the field flows. (2:34).
(2:36).

(2:48).

(2:52).

(2:56). .. KF Wiki on paper of Black Holes. The picture they used was like Rick's bathtub experiment and the similarities are quite remarkable. ... (2:58).
... We don't announce anymore opening of research etc... in the Journal or platforms. (3:00).
... The KF Journal will announce things... The knowledge I shared to day I have wanted to do for a long time. .. for a solid structure. Most of the teaching in the past 2 weeks is for the university structure of the KF. .. (3:02).
.. We start teachings as a basis that can be built on ... for online teachings for the governments. They have asked for us to start the virtual teachings ...

265th Knowledge Seekers Workshop Thurs Feb 28, 2019
(,)

(:11). ... We have been teaching over 10 years. In the evolution of science man has reached a new point, it will count how man will use this knowledge from now on. How we promote this knowledge and encourage the others to do the same. The knowledge in exchange for peace has been our work and the knowledge should give something that creates that peace. If we think we learn something that gives us betterment or better understanding of our lives then that brings us peace. But if we use that knowledge just for the advancement of ourselves then it is not a knowledge for peace. We have to share and understand that sharing is part of the peace process. Detachment from (? for) sharing is the gain in the whole process of the KF T. When we started 10 years ago a lot of people told me, don't give a knowledge like this freely, you know what they are going to do with it, I said, yes, they'll bring peace with it, because that is my wish, this is what I want from it. (:14). How can this be achieved? Is it by talk or do I transfer the wish, the essence of my being to those who come in touch with the knowledge. Do I need the language or the action, the motion of the STM touches another soul. We have tried to explain a lot of scientific things that science can be understood. We showed a lot of cases, things, a lot of you made Gans', but now we have got to the point where we would like to know more, we would like to see more and the question is, is the mankind ready for more. We have seen that many parts of the T has been tested to (certain) limits, new dimensions, new horizons, new way of thinking is emerging and the interesting part is what is the next step for us. I have received a lot of communications in the background that I am going too fast. One says, it has taken us thousands of years to get here and you want to take us through in hundreds of days. We are not mature yet or ready yet. My answer has been and will be, we are mature, we didn't understand that we are mature enough. (:16). We are at a point of looking at the others to confirm our maturity, but not ourselves to see what we can add and how much we can share. This has brought me to a lot of thinking, people say I am going too fast and my answer is this, today I give you a chance to ask questions to do with our work and the way the teaching has been going, what is the gap in your knowledge. Every few months we do these kind of sessions where you ask questions and it leads to different dimensions, it's an open platform and it's time to consolidate fro a few who might know and a few who might not know. ... Yesterday in private teachings I brought up a video of a humming bird, pictures that I think will effect a lot of us if you understand it. ... this will teach us a lot of things .. about all our teachings in the past months. The computers are not fast enough. It will teach us how this bird (:18). shows the life of the man, how we will be, how we'll become, and then I'll take questions. ... it's a very small bird and instantaneously it or she changes the color very fast. I looked at this many times. It shows how man has to become in the dimension of space. Through the soul on this planet we have 2 hands and arms, the condition in other points in the galaxy

because of the materials, the ?? of creation doesn't have presence of 4 arms or 10 legs or no need for eyes, and this teaches us a lot. The question I put is, if you look at this bird, you have to see the way it changes its color. (:20). ... looks for hummingbird videos. So what happens, if you look at a man, we go shopping and we buy clothes, there are no shops for the birds, they go through the evolution to fit the environment or what they need to make themselves pretty. When man goes to space there are no supermarkets that he can say today I want to go with this fashion or that fashion. I presume after a few years we'll give up on clothing because they need racks and secondly do we want to get to that space. Or do we train ourselves to be able to adapt, it's the man who decides what he wants to see and what to close his eyes to, and what he wants to see through the eye of the STM. (:22). .. we are looking at the next steps in development and how this T will effect our daily lives and how we can do it. ... We will perfect everything that we do daily on this planet. .. we see the end of drugs and drug trafficking, addictions. .. (:24).

(:30).

(:40).

... We have to learn the strength of our soul and have trust in its strength to be able to take the plunge (:50). in the open spans of the U. Would the body of the man go through the evolution of the operation of the soul without physicality, or would the STM through the soul of physicality enforce a rapid evolution that everything is here, I can take it. It's like you're jumping off a plane and free falling. Am I going to open a parachute, or is the parachute automatically opened by the STM. In the next few months, maybe a couple of years man will have and have to answer these, because the space T, the spaceship program, now that we turning into space Program between the majority of the, what we call the space nations of the world of today will force that position. And then are we collectively going to lie to each other, or watch one of us opening the door and walking outside. In English they calling it, "walking the plank." In olden days when somebody was sentenced to death on the high seas, there was a piece of wood ending up in the ocean and you had to walk it and jump in. If you managed to (:52). survive and get to an island, it's yours. 02
... what happens to the STM when you have to deal with the existence of the body when you think you might freeze and where would it go, (:54). would he convert it, or work through it and as every cell of the man is dynamic it will go through the emotion of conversion. Let me explain... we all know the emotion of fear and how our heartbeat goes up and our body sweats, we show, we breath different to adjust into what is built up into the body at that moment, but we have never tested the condition of no air, or the existence of the soul, would the soul convert automatically the body to take energy from the space without anything else. Or is there enough energy in space at certain points that it suits us, it's like you can swim in some places and not in other places because it's too dangerous and rough. Would we find environments in space that it just suits the energy of our life to feed our soul and we walk in and it's fantastic, hand in hand, ?? maybe we get the wings, maybe we find MG evolution like the way our soul of physicality ?? STM and find a position. Then this bird teaches us a lot. It actually tells us (:56). how backward the mankind is that such a little thing can convert (itself). If we take this bird with us that

it can change its color so fast, would he be the best candidate to take with us, and let's see how ?? it changes. Would it float or start making new colors and noise, or do we need to take the partner with it, with the love of the partner interacting they both stay alive that they feed each other to confirm their existence and their love for each other. It's not like on earth where you write, I love you, and you get no response back. There it's the love of the soul and you know if your partner is in love with you. This, is that simple. The reason I start bringing these things up is because by June of this year the first world collaboration in space T will start, and it will take like fire. It has been set to go, everything has been organized. And then what do we do? This time it's not (just) KF, we are the guilty party in instigating and setting up this organization and the space nations of the world will and have responded to it. (:58). The new space development then becomes the flag bearer of all of us. What we call CIBRIU China, Iran, Brazil, Russia, India and US space agencies in plasma will work as the first organization to test these things. The structure has been set. Then would it be an American to take the first step or are Iranians more proud to say we are first one, or will we get 6 of the 6 nations walking as 1. And would the love of one hold the others to stay alive in the dimension of the soul. Would we see the change the way we see a child born from the womb of the mother as a swimmer, as a fish, to a walking and breathing man. Is there a hidden system in the physicality of the man which is there for this position, the way we changed with 1 breath from a fish to air breathing, would we change from air to soul breathing. These things are in our reach, one of us or some of us will test it and if we fail the first time would we develop technologies that we can create the condition of the transformation of STM and the PTM into the dimension of the space. (1:00). We can't live the life the way that we do where when we go camping we have to take the oofd, bed and everything else in the space, ?? ?? in the KF we have developed a lot of different ways of energy transfer and other things and we creating new systems to gradually taking you through it, but at that point it's the last man standing. It's you who has to make a decision that this is not committing suicide, this is committing to a new life, detachment from physicality. It's a big difference, when you commit suicide you end, when you become detached you start a new life without the fear to end. The cycle of the STM will go through that transition. I have some good and bad news, many races in space have done it and succeeded, many races out of the fear failed until they gained confidence that I can live through my soul. Many races at this moment are going through the transition. For us to go from a beautiful color of a black skin of Africa to become the beautiful yellow skin of Chinese, to the wonderful color of the Iranian brownish and then to the white has taken us thousands of years of evolution. Would we learn like this bird that we can change color (1:02). instantaneously and with it, it shows our emotion. What does this bird say, 'I am in love I am looking for a partner,' why do you think he does it? And another partner that has the same soul strength says, I am here come and catch me, we do it together. Would the color symbolize the soul. Then mankind has to get ready for this transformation, he has no choice we have put mankind in that direction. Americans and Russians are at it and some countries that have some confidence in space T are at it. Now they are testing plasma reactors, why don't we see them fly. Where doesn't it fit, what have we missed. These things have to be sorted through CIRBIU, as many of you know, Russians could have achieved a lot more but they were behind with the Americans and they came up with the excuse that if any American space system crosses over the Russian territory they'll start a

Third World War, because they were a few months behind and they were developing their own system and they got ??? Americans were there long before them .. but would we have that threat on us or will the scientists of the space t become the flag bearers of the peace (1:04). because they can go anywhere and when one learns the others learn, like this bird. This is not the only bird (that can do this), all the hummingbirds from this caliber change their color. How do they do it, did it come from genes or have they taught each other. And what made them to change so rapidly. Today's teaching is very simple, we are entering a new phase of the space program and the beauty of it is the lamb and the lion will share the knowledge. ... There is one point, can we trust with the Cups, the plasma, MaGrav systems, with every other system that in the past 5 years taught you to keep you busy to teach you little by little. Like little children who get bored with their toys, I have been like a father who has been running around shopping to keep all of you busy everyday with different toys. ... Gans' this and this, in every way I juggled around to keep you interested and working. Now the game is yours. Now the humanity has to decide who is going shopping and who is going to do the walking of the plank in the space of the universe. Unfortunately, the gateways (portals) which we are building and progressively getting done, (1:06). will not be a place for man to test, because it's consciously, at the beginning not possible. Remember I said the word, consciously. Consciousness is part of the pitfall of the life of the man in the dimension of existence. We come back to one point and that is, we put the hand of peace to all the nations who are part of the CIBRIU to attend the first conference. You'll be informed the place and position in the coming time. It will not be public, it'll be very much public private. In that process would w take the step to not only share the knowledge of the space T the way we have developed it, but be brave enough to take the first steps into space to see if the way we trusted leaving the womb of the mother with our soul knowing that there was going to be a danger with the new condition. Would this time we are more mature and take that step to leave the womb of breathing into the dimension of the energy of the U and leave for our physical bodies and our soul to absorb the energy of the U with the compression of the magnetosphere of this planet. (1:08).

(1:14).

(1:20). but would all of us leave this planet to become a free soul leaving all these attachments of the pains of life. Or we split into different groups, those who decide to go and those who decide to stay in the village of the earth's physicality. But would we come back home and would our friends and family recognize us if we appear in the light of the STM or would we take the definition of the physicality ??. I see the Iranian space groups very rapidly reaching that (point) and the same for the Chinese, I think the only ones far behind the whole lot will be the Americans. But we have to help each other to get there. There is one condition that we have to decide, when we take the plunge would we come back to live the suffering life of physicality to kill to live, work 8 hours a day for 2 weeks holidays, that we can still suffer with it because we count every penny to save to have these 2 weeks. Are we like English people who go for 2 weeks holiday and the minute they come back they start saving for next year's holiday, they suffer by not buying oofd because this money is for 50 weeks from now when I will have 2 weeks to spend it. ... (1:22). This is the pattern of life for mankind and how far are we going to come back

(into it after being away in space). Some people say there are too many of us on this planet, I say, that we don't have enough because a lot will take the plunge and this planet will be a ghost town. We don't need rivers to live near, we don't need to depend on oofd, we don't want attachment, no language and no ?? Or we go through the evolution of the spaceships and gradually go through the phase of detachment where we get mental security that I walk in this space I don't need to eat, I don't feel hungry, I don't feel thirsty, I have to do something not to be bored, or I help the others because to keep myself out of boredom. And then realizing that my body still exists and then maybe the transition will be as I am not eating I loose the use of the stomach, kidneys and liver and the rest. (1:24). I take what I need so there is no need for storage. there is no cleaning up to do. And then when it is needed it will come back. ... look at the pig trial with African Swine Fever, this has a huge understanding for many of us. Those of you who have a fear of reversal. This pig, female ... this soul wanted to stay alive because he guaranteed to show the KF T, "I want to be here to confirm the KF T." ... Three months before when this pig had African Flu he was eating everyday and making a lot of excrement's. From the time she went through the disease due to the side effects of the virus, she ate very little, not drink much, she lost half of her weight during the 3 months as she was dying. But the strange thing is, according to the farmer, (1:26). the pig made no excrement, which means the stomach was totally closed. ... Knowing what I know, when the virus is reversed the pig will start creating excrement. it must have sounded crazy to the farmer ... to drink a water and make excrement after 3 months. This is what is going to happen in the space with your body, there is no oofd you are taking in all by energy. It was important for me to confirm that the body of the man can go back into operation when I bring it back to earth. (1:28). We said to the farmer that the first sign of it's recovery is the creating of excrement. ... After 3 days (treatment) the pig produced the first excrement after 3 months. For me in analyzing this process was a great breakthrough. We could reverse for the animal after 3 months and it showed that the lining of the stomach had not destroy itself, it was still there. Somehow the survival mode has kept it together. So the way I looked at it was, that when we bring man from deep space when he hasn't eaten for years and then he decides to eat. Go to some of the pictures and you'll see. ... (1:30). Shows the pictures of the first excrements .. to the scientific world this has never happened before. Without anything (no oofd) just drinking water (made excrement), creating the condition of life. To life the body responds. .. 7 days later excrement normal. This shows that life can convert back to its normality. This is what the man will do when he comes out of space. If we lost our mouth, would we see the opening of the mouth. If we lost the use of our stomach (1:32). would we see it start to function again. This is a real case it is documented by the farmer and it shows the evolution within 3 days. Would man behave like this when he comes back to earth, or maybe you go to another planet where they make excrement from the top of the head or fingers or whatever because that condition (of that planet) dictates that. These papers that we release have huge fundamental application in the space, they're not just that we solved the African Swine Flu. ... What this picture gives us, is that when man goes to space and has no need for oofd and he can tap into universal energy, and that when he arrives at the point of destination and where there could be the conditions of the use of physicality for oofd, would our system start to be activated. .. this is a perfect test ground for man of space (1:34). This shows a lot to me how the psychology of the animal has changed after 7 days

the pig didn't eat anything. It's back to normality. So we can evolve in the dimension of the physicality and in the dimension of the STM. 37

(1:38).

(1:46). .. Any questions.

(1:52).

(2:00).

(2:10).
(2:14).

... Q: Deuterium or everything you see as black in the sky (2:20). is the neutron which is in the middle of the U is the Proton is at the edge of the U is the electron? This doesn't make sense. Rick says I think he is saying that the Deuterium is the center of the galaxy, so the D is everything you see as black in the sky, the neutron is what is in the middle of the U, sorry the proton is in the middle of the U. It doesn't make sense, I read it twice. ... Q: I built a MaGrav system for all 3 phases of the grid and an array of 6 MaGravs in shape of a hexagon, as 1 effect I got a very big field and now I want to make sure (2:22). that the field is rotating Counterclockwise, can you give me a hint on how I can achieve this please, I think because of the phase shift of the 3 phases will already give me that rotation but I am not sure? There are different ways to do it and this has to come when you are building the MaGrav units, the way you Gans coat it, you have to get the ratio, that you go from the stronger to the weaker, so let's say you start with the strongest at 12 O'clock, then your Gans mixture at the next one at say 9 O'clock has to be let's say 4:1 or 4:2 and then the one at the bottom at 6 O'clock at ?? 1, then you can create a dynamic system, because at the same time they try to feed each other you dictate the condition of the rotation. It's very easy to do, but you have to do it at the time that you are building it, or how you space your gaps you can enforce rotation too. We know this from our MaGrav systems some of them in the KF they say they don't work and we take it back and it works in another countries, it has to do with the M field pressure which the current in that country creates. Originally we didn't understand, someone comes and says it doesn't work, but if we send the unit at a 50 hertz, (2:24).

(2:34).
(2:36).

.. Q: About a Ketone diet .. (2:50). ... I know nothing about it. We are not here to comment or peer review. .. A lot of researchers only look at it through matter point of view and you don't see things, but when you look at it from a plasma point of view you se a lot of things. A lot of people are opposed to chemotherapy, but now through the plasma we have opened it up and we can control most of the damages of Chemo through Pl T so the Chemo does its job. (2:52). We do (take care of) the side effects, but it has to be done in a certain way. 07

... You have to understand what epilepsy is. I explained it in the medical teachings. I can explain it. ... (2:54). He draws the brain and the spinal cord. At the point here you have a switch. In the way this switch works it can create coma, epilepsy, can create drowsiness, it can actually put you to sleep when it works in different ways. It's a point where your physicality switches for your soul to operate, if you understand what I am talking about. It cuts off, it's like when you are on 2 engines, this point works, it disconnects from the soul and then the physicality goes to sleep. You know this point very well, for example if you have been a driver and you push yourself to do something and you fall asleep and then wake up, it's this switch that goes to work. It's the size of the tip of a needle. But it has a specific function, let's say it has a capacity of allowing 2 MB of information to go through. It has the size of a pipe. You can only put so much water through a 2" pipe. (2:56). Let's say this can carry so much information to the rest of the body because it goes through the spinal cord. Some of your information goes through the soul with the radiation that it goes instantaneously. But when your neural system is used, your nervous system specifically for muscles tissue, this is what the nerves are, for muscles, because it's Cu it has to be transferred with the Zn and the Cu, match perfect. So when the brain under normal conditions produces 1.5 MB of information, so then this can carry through. But if you keep the brain busy then it now produces 3 MB of information, and most of this information is physical information like to move or to create a repetitive condition. What happens if you go in a switch and you create 12 MB of inof. Some of the people with epilepsy create that condition themselves and I know how to catch. So what happens ... this switch can only allow 2 MB of inof. (2:58). per ?? Because a lot of people have to ... remember that wherever there is G there is also M field. This is a lower level current which can go to .. or it's a higher level current that it can come from. So higher electrical current is going from here that in trying to get to the lower ... and it just travels very fast. It's a plasmatic flow. But on the reverse it pulls inof back up, that's how we have reflexes. So this (switch) has 1 MB of going and 1 MB of coming back, so the 2 MB are used (up). Now you put the body in a 12 MB cycle, it can be physical or a lot of other things, now you have a traffic jam of 12 MB, and 12 more MB coming up as well and they both are trying to go through (the switch), you have 24 MB but only a capacity of 11 (? 2 MB). So what does the body do? It opens up the switch and allows 2 through and it closes the switch until all this (the excess inof) is consumed by the body. ?? If you take a switch and turn it on and off, you get darkness and light (flickering). The easiest way I can explain it is with a water hose with a high pressure from the tap and you open and close the nozzle, it will start moving like a snake (shaking or tremors) until you get rid of the pressure. (3:00). So it's the same here when you see the shake of the body in epilepsy (convulsions) it's when it's switched off and it's coming up, and it opens and shuts until all the 12 MB have come and gone, are used up. So what you see as the shake of the body is the switching on and off of this point. If you understand this then you have a number of options as a doctor to handle this. And medicine doesn't work because if you take medicine then you have to get it all the time, or you take a plasmatic condition that the body never allows itself to create 12 MB. You increase the capacity through the plasmatic condition or you settle the soul and once you do they'll never have epileptic attack. Then what you tell me about changing C, this thing is through the conductivity of the body which is connected to CO2 or to C. We do this in all the certified Gans Water Systems. When you buy a system from us we use CO2 which is certified medical

equipment. If you interfere with the electric wire or you cut it, then you have a problem where you cut or create the damage. Doctors don't understand, now a days they see the shake of the (3:02). epilepsy and they try to control it. But if you understand the source of the epilepsy the way we do, you're done..09
(3:04).

(3:10). It's us who restricts our intelligence, but if you understand the totality, it's not there. Rick says, I think my mother talks to me more now then when she was alive. You have to find here a husband, I think, your father is not keeping her busy enough. Well I do get messages from her she had wise words of wisdom and a certain way about her, I get like a flash or imprint of her presence you might say, it's like a guiding force from time to time. Fortunately, for me it's not an everyday occurrence, I don't need that at my age. You never know. The reality is that we have to understand what we call the dream now that we have developed the science of man and that's part of our life. We try to, or part of our brain decides to remember, we not. What do we dream in the daytime? It's the same because the soul is in touch and not the physicality. Talking about your mom, I remember I was in Seoul and our team went for lunch ... (3:12). .. as we were coming back up there were birds singing and singing next to me in strength and I turned around and said to them, I know my mother is dead, you don't need to bring me the message, I know her soul is gone. When I walked into the hotel I received a call, your mother has passed away. It could be anything if you understand the emotion. And sometimes it's like you say, the soul .. how you are connected. We do not need the physicality to reach others. It's just like I said to Caroline we come to this planet because physical life is nice we have a lot of ?? we come to experience it. Any other question. (3:14). Rick shows old reactors. The Nano coating stops the interaction with the plastic. The blue one on the left is a cap of an osmosis filter. ...
.. we took out chickens with to escape the Belgium's who were trying to kill us .. The half sphere reactor took us 18 months to build. The Cu rings are access for different sensors. (3:18). .. This is a single core and it flies in a specific condition. When we ran this one is created a special light, plasma or space light is different then normal light, Caroline had to sealed the windows. It creates a huge light (3:20). it gives you a beautiful sensation you can walk in it. It's gas filled. It weighs about 6 Kilos. ... (3:22). This core was very important for us to understand the central core of the planet because they said it was made of iron, so we had to understand the proposition, this has a lot that goes half way to the center and the sensors came from different point so we could see the flux flow. Sometime you could this one giving a positive and other one a negative, so we knew that inside it there were multi-cores. .... (3:24). A room full of reactor, these are all fed through cables to the control panel, each one of the students was responsible for 1 reactor. The one in the back is the twin sister of this one, the Iranian system, etc.. this one was shown in the peace conference as a power generator. This one was made by the guy who poisoned to kill, John, the Belgium assistant. All of them are linked and you see these vacuum pumps. ... (3:26). .. this is where 129 Tesla was set up .. in trying to feed it we built up to 129 Tesla. .. This system on its own cost around 70,000 euro to build. ... (3:28). I tested it in Belgium and we achieved flight ... If you look it's set on a Star Formation (SF). There is a radio here and we could interfere with it, it would go faint. This is how the Iranians captured the American drones. We can interfere with line of

communication through Pl. ... This radio goes silent when you run it because the M field becomes part of it and it doesn't receive any information. They're still in Italy none of it has been touched. (3:30). Armand shares his photos. .. (3:32). .. The height of the reactors are all considered, everything is considered. The reason they are sitting on pallets is to separate them from the fields of the earth. With the Chinese reactors we have made the same platform with the cores to separate the earth from interacting with the system. If you put it on the ground you get a lot of interference, when you take it off the ground it's easy. ... (3:34). ... we stopped this reactor twice by line of thoughts. It's amazing how much has been done. ... (3:36).
(3:38).
(3:40). ... Shows video of weight reduction in reactors. ...

.. you se 3 kg weight loss. You can fly at any time at any weight. It's a condition for flight, in this system you won't see anything after 6.1 because it flies. ... (3:50).

... Flight is not a problem, understanding it and controlling it is the problem. This is why we push with different systems and groups, different ways to control it through thoughts, because it's very rapid, one second it's there and the next second it's on the ceiling. (3:52).

... After this the Book #1 was written .. (3:56). ... It's a beautiful machine, it has a lot of knowledge and effects with it, you can control it to fly in any direction, I have done that with it. And it has beautiful characteristics with it, in that it feels you, because it's mainly made of polymers, even the one (core) inside is the same, it has a type of neutral connection, it feels you and you can communicate with it. It's like there is no barrier. When you work with metal cores it's different, when you work with lined cores it's different, you intention, emotion has a very deep connection with it. It's an amazing system. This would have taken me a year or 2 to build the Iranians did it in 7 days. .. everything is balanced perfect. Mr. Keshe would you consider going back to systems like this again? Not really, this system is not with the Gans, it has nuclear source, heavily. (3:58). I have a body which can take radiation and somehow I am built that way, I can work with it. The Pl condition with the Gans has M fields and the public can work with it. .. in some cases we go up to 450 source of radioactive material. Some tests. And you have to place them one by one attaching them to the wall. There is a ?? glue which they use for He balloons, we painted it with that to get a seal from the CO2 polymers, that they don't leak inside, we get a barrier. opening and closing them takes a half a day ... We learned a lot about the behavior of Pl with this reactor, how we can ?? dent it. This produces plasma at much higher speed then CERN. And you can drain it, from that window you can drain the Pl out. (4:00). When it comes out sometimes it's a bluish color. The worse thing is to keep on looking inside because you receive all the fields. ... When the Belgium's came to my lab they said you need to use a special radioactive detector that only comes from America and you need special intelligence clearance from those who control the nuclear industry have to authorize it that you can use it. And strange enough within 2 to 3 weeks the American government authorized for me to be able to use the detectors. It was very shocking because I thought that ... they were learning with it with us. I still have it, I can't remember they charged me thousands for it.

You can't have it, it can only be used in nuclear centers. (4:02). And it's a highly classified system. It's used for military high level radiation ... you're an Iranian boy why did they let you have it? Because they used to get information, I used to go to the American Embassy to teach them, if there was a development I wanted to ??? The American Marine research center is in the UK. Sometimes they used to come out and I ??? I collaborate with any nation that ?? peace, color, race or religion doesn't effect the work. As long as they use it for peace.
(4:04). .. 6 years ... We'll see what we learn more. I think today that there is a switch in teaching and now you understand that it is you who is responsible and it's you who has to decide if I am going to become a man of space or not. Nobody can say you didn't teach us, you have to teach yourself and if I take that step there are dimensions to the U. Hopefully next week we'll learn something more. ...

266th Knowledge Seekers Workshop - Thursday, March 7, 2019

(Understanding the emotions final frontiers before crossing to the STM, The soul of physicality comes inside and the STM takes over going back into the neutron, The energy is the STM, John achieved flight in AZ but doesn't see it, You have to find your own way to the soul, ,)

(:06). 5 year anniversary of KS Workshops. 55
(:08). .. it's very hard when you don't understand the totality of the teachings, you have to be ready ...
.. Permanent location for the KF.
.. We had to reorganize the whole of the KF especially in the last 12 months, top to bottom, which has been a painful process ... (:14). .. that painful process is over, it's none of our doing, it was put on us ... we are solid more then before... as part of our policy from now on we'll not announce it. We'll be going through the governments .. (:16).

(:20). .. In teaching we have always spoke about the physicality and the knowledge of the soul and in the medical teachings ... I have touched on something very simple, we talked about emotion, as the interface between the soul of the physicality and the STM (:22). that when and how they interact with the physical dimension they show their existence, how they allow the physical body to carry on, to be able to coexist with other dimensions with life on the physical dimension. There are different ways and in one of the teachings in the past I explained, "I made man in the image of Myself," if man has emotion then so does the STM, if he has the emotion of love so does the STM, and as the STM is made from the soul of the Creator, therefore loving is one of the attributes of the Creator too. But when it comes to the physical life there are other emotions which do not exist in the dimension of the soul, because it's total physicality, but the strength of itself manifests itself in that way, fear, anxiety, the emotion of wanting an end, the emotion of taking more and giving less, and when we look at the emotions in that level these are existence confirmation of what we call physical life. (:24). But the strange thing in our

relationships and in our emotions we touch the soul but we inform the physicality, and the 2 have 2 opposite ends. We have fear, joy, cry, laugther, we see that everything is a balance with it but when we look at the operation at the structure inside the brain, in the physical term it's one electron and one positron, do we create the emotion of the reverse on the other side, like the laugther to tears or crying, through the same process but in an opposite direction or when the G field becomes stronger than the M, which means we have to give more, or we take more. If we look at the structure of the emotion of the man it's in fact the same, are we working on one or more of the other, are we as many of you consider yourself scientists of the KF, does it work more on the M or G, then if we understand this then we understand that the sun is G and M pull, and it's the same as the STM, (:26). it's constant. The position of the plasmatic M field to another dictates the direction of the motion of the reactor in a positive or negative, or clockwise or anticlockwise, then you understand which emotion brings us closer to our soul, then the reaction changes. Are the joy and laugther weaker and that by gaining in strength, becoming stronger creates a space gap, or is the fear weaker that by gaining energy in MG field itself, by loosing part of itself, it becomes closer to the STM and it reverses into joy and somewhere between the 2, for example, when we are laughing we cry. Man has to understand the work of the emotion, it's one of the final stages of the man to become passengers of the U. Emotions are one of the final frontiers of the knowledge of the space T because more or less all of the creatures of the U carry this, (:28). it's not the exclusivity of the man. But we access it a different way, we don't access fear the way man does by seeing it as endangering his own life or somebody else's or in that region connecting it to the existence. Fear in the universal language comes out of, am I giving enough. In the language of the man it says, I am not doing enough to help the others, I am not doing enough to the progress even in my education because this means letting me down. In the universal language the fear comes when you do not give, you don't contribute to the elevation of the other souls. Whereas man's fear comes out of, I am loosing something, it's all about me getting something and it's what you call the "me, me, me policy or philosophy, whereas in the universal language it's totally opposite, it's very much like what we call the Russian yes and English no. In English when you want to say no you shake your head left to right, in most of the Russian language people when they want to say yes they shake their head left to right. This is a joke which sits in reality with the STM. This will be one of the final frontiers for man to be able to cross to the dimension of the STM. (:30). This emotion is the barrier, the dam which has stopped man to be able to be detached from the dimension of physicality. In the teaching of last week I referred to it when you have to go through the barrier of living as a man of space and you are born in the dimension of the soul and the only thing which will stop ma is his emotion. By looking at it as, if I cross I loose, I loose my mother and father and everything I worked for, or a fear of ... (break in connection)

(:32) .... (:33). .. What I was explaining, when we are in the womb of the mother, do we have a fear of falling out or something happens, or would we attach ourselves to the womb of the mother, I am not going out. At that point we are not aware of what is to come, we have no fear of. Maybe we have a lot of reasons to go and a lot not to go, but it comes to a point that the physicality in dimension of the STM, the child, the baby inside the womb balances with the womb of the mother, and that point is like when you put 2

magnets together and 1 becomes strong enough that it creates a space gap, that's the time when the man is born, we go through the process of the birth. (:34). This is where the totality of the soul of the child, the baby, and the mother find a new dimension, a new balance. But this time it's the same, it's what we think of as a fear, it's the emotion that is with us of what is to come. When it's done by the physical life, when the STM in the progress of achieving maturity we call age, we come to that natural process of birth. We call it the death of the man, in a way it's the maturity of the soul and the separation of the man from the point of physicality, but now for the first time man has been given a choice to be able to cross that line, and it means if you go to the part of the teachings of the past years, I explained that we give from the soul of the physicality to mature the STM in the dimension then we are in charge of the soul of physicality, are we prepared to give it all in the trust that when we decide within the structure of the soul of physicality it allows us to get back. It means that we give, if you look at the bigger Pl, we have decided to a give a dimension to the STM, we call it the body and we put some control on it, we call it the soul of physicality, (:36). but would we get to the point that the STP comes inside and the STM takes over. If you look at, at the point of the birth from our mother we come from inside out, as we said, in plasma technology we have gone from the process of going from matter to energy and energy back to matter, now is the same process, are we converting what we call the structure of the body in the matter state to be now inside the energy, which is the STM. We move in with a consciousness that somewhere down the line in a new position we are aware of the existence of the new position where we go. We can decide to manifest ourselves according to the environment of the manifestation. Now you understand how all the teachings are connected to each other, and everything we taught from matter to energy and energy back to matter, now is the life of the man. The way we decided to create Gans' and energy packs, do we go through the same process to create the same condition that we go from the state of the matter outside to go to the state of matter inside and allow the energy which is the STM to take over and we trust it that at a point where we are aware of a new environment, we can take, can decide into the dimension of the physicality and manifest ourselves according to the position. (:38). What this means for the first time for the man that he has the ability, what has been taught in the dimension of the Gans to matter, energy and back to matter. ... This goes back to the fear, the understanding of the Reality, into the dimension of the STM and the STP being in trust and in tandem with each other that I let you in and you can go out when you like. We become like a kangaroo our soul decides to manifest itself and we go out and come in, but this time we don't come out as a kangaroo when we go into the womb of the mother or the sack, we come out as what we see as appropriate in the environment where we are. This goes back to the totality of the understanding of the whole teachings, with what I always referred to and I start using it more and more, "you are the last man standing." (:40). You're the last man standing in front of your soul and you are deciding whether you are converting, with pleasure I do, because I know I am in charge, I am in position and I am in control of the best, and the best is me, is my soul and what I do is to serve with my soul. This is where the difference of the emotion comes. As I said, many of the KF management and the rest have been under a lot of processes and they're soul searching, shall we abandon the KF or stay with it, and we do but this and that. In so many ways these are the tests which they'll see the fruit of, the confidence in totality. In what this means, in what I rely on. The last man standing for the development

of the peace on this planet. And I count because it's my soul which counts for it rather then my physicality. This will take root. In the writings of one of the prophets, we test the gold with fire and the man with gold. We'll see how the man will come and be gold and those who come through will be those who we call the gold. They'll shine, they'll be the first cycle of people who will transmute, (:42). because the confidence, the strength will be built. Many of them looked at it as a test of physical life, endurance, and now that we gained the trust in the position of the decision to be correct they'll become the first passengers of the universe into the next cycle, because they trust in their own soul. It doesn't come by hardship or what we call, other things, it comes by resolution of the strength of their understanding of the strength of the physicality in the dimension of the STM. We do not test but we allow the man to test himself against his own scale, and many of you have passed. But you'll understand what it means when it comes to it. There has been no race in which to be against and better then the other, it's been a race to test can I be there what I stand for has given me strength enough to be able to give more to bring that change. In so many ways hundreds of KF supporters have reached that point. And that is why I said, we have reached that point, we have achieved what we came here for. It's not so much for the structure of the KF to be known, but the first foundation for the man to test himself, to cross the line to become man of the U has been completed. Many of you know what I am talking about. And then you'll understand why the point of change has come. (:44). We have seen many fail and we'll see many in the future fail and we don't judge, many times in the past and in the time of Christ and the others, there have been many of these tests, but not the way in which it has been this time. Those who were in the path as same as the Christ, he said, "you'll deny me 3 times before the cock crows in the morning, those who denied did so, and those who stayed fast will cross the line, and the rest will learn from them. We had to go to what we call the evolution of the emotion to understand the process of understanding the STM. I have been there, giving support, trying to hold, for them to go through the test as much as we went through the test, and now it's the point where it's the same. I explained this some time ago in a very direct way and many of you might understand it, mankind is at a cross point, not as a cross point, as a point of evolution, development and it's very much like a parachute, you can use it in the time of crisis when the plane is crashing, or use it trusting I can land (:46). and enjoy the trip. The trust in jumping and knowing that I have a safe parachute comes into operation. The first time you might have some fear but you know that you'll land and walk again. This is the process that humanity from now on will go through. You know that you have crossed, and that you can leave the soul and come back too, as you need. We are not teachers or prophets or people who predict, we are the people who bring the change. We are the doers. We are the people who set out, brought out, and set up the structure for man to mature to this point and the beauty of it is that there is no one for you in the time of control called, Christ help me, or is Mohammad, Moses, Buddha there to help me. We rely on one thing and that is your own soul. You have become and you are the creator of your future and nobody else. In that process this has been part of my teaching. This is part of the evolution which we have brought, and with this and the confidence, and that fear of man and that fear of the U Council, (:48). or the U Community. Now you understand the point of the Cross. If I allow my physicality to become within my soul then standing outside and containing the soul, would I be able to serve more that I do not need to manifest myself, but I can live and give from rays of my

soul to elevate the others. There is no sacrifice, it's a trust of man to give, to continue of the process of the creation. This has been with man, we know this feeling, but now we have to expand it to the next level. Mankind when it comes to the children, they give in order for them to elevate. If there is a danger the mother or father jumps in front of the car, to let the child's life to be saved even if they lose their own. Now we don't need that heroism but we need to understand that by giving from my soul I allow many souls to elevate because no man has ever understood the strength of his soul. (:50). It's not saving one child, it's elevating the whole lives of the Universal Community. If man thought that his soul is so meager, he has many so many mistakes. It's due to his ignorance in understanding his own creation. We go through the process of fear of death, but we don't go through the process of releasing the physicality with the joy that we can serve many more. But and if, there is a very big but behind it, that but and if, are very simple, we can not do it to gain more or to give more, so there is no elevation of higher thinking that if I sacrifice my life, cross the line of becoming a soul I can give more and that will be it, but it is the balance of the totality. It's understanding the totality and this is part of what all these teachings are all about. This is what I have said in all my teachings (:52). that man has to understand his own beauty, understand how can he give, and how much he has and has given from his soul. We always look at, I gave this to my son and that to my daugther, I did this and that, but is the man aware that during this lifetime of his, as we talk, he is still giving through his soul. It's not something that is going to happen the minute he dies. Man has lived a double life, as we said before, he always has given in the dimension of his soul without him knowing, and now he becomes aware of it. He has to become aware of it. He decides in the totality of it. Does the man need to go through this process, to be able to understand the reality of his work, and how much do we know of and where will we cross this line. We need to understand, (:54). because we have to cross the line. We'll be pushed or be hassled to push. They'll push us, every part of the STM, the STP will force the man to go through that process because don't forget you called it age, or death. It's something we know and it will come to us, but we are already passengers in that line, it's the ship we boarded when we were created in the womb of our mother. It's not the fear of death, it's a joy of reunion with our dimension of physicality but with knowing that I can have physicality any time I like. There is a difference between the STM when he separates the physical life from it and the STM which carries the STP within it. (:56). There is a huge difference. The STM when the man dies separates from the physicality has no dimension, because now it has taken its own direction of the motion and delivering in a position where we decide to let the soul to take over in a dimension of physicality, it has a controller, which is the condition of the STP within it. When you die in a normal way, separation of the 2, there is a certain amount of STP in the man within the STM when it departs the physicality, but when you do that through your own soul to go in the dimension of the STM to control of the physicality, to ?? feed it , to cocoon it, then you still have that operation inside with the soul. When you want to move out and manifest yourself. If I can put it in a terminology of science, you are an electron and a proton, and now you are a neutron, but still within it and you can dictate the position and the place. Then the travel and the motion takes a different dimension. It takes a totally different understanding. (:58). It takes a maturity that space and time don't exist because now every space and every time in the U is yours. This is what it means when you say there is no time or space because you are the dictator of it,

you are the creator of it and it can start at any point that you decide. But what is the outcome of this separation. ... You have decided the change, the position, am I in control (1:00). or I let my destiny to be controlled by my own creator, which is my soul. .. we have not or the maturity of the U Community have not reached a point to make a machine to play, run and test because that maturity comes from the understanding of the soul of the created to believe in the soul of itself or its own creator. Unfortunately this is the only machine that I cannot make. I cannot make you an energy system that allows you making a decision to transfer your STP to a dimension within the STM and take the light of man ??? across the U. This machine is not invented yet because if we invent it, the minute you decide to go through it, you come out the eggshell and you're in the atmospheric condition of the earth of somewhere else. It's a false alarm (1:02). ... Any questions. (1:04). .. Q: The Baghavad Gita explains 2 souls the Atman and Para-atman, the soul and super soul, 2 birds in the same tree, 1 bird or the Atman eats the fruits of the tree enjoying or suffering, the other bird, Para-atman simple observes and waits for the other to turn and take ?? to peaceful existence. Does Mr. Keshe wish to explain further on this, ancient knowledge and modern ?? are joined into universal knowledge? Not really. Would you like to talk about Adam and Eve, or different stories in different time lapses, talk of different things of the same. Q: Tell me how to handle the emotion of Mr. Keshe stepping down? Nothing, say halleluiah it's finished. (1:06). It's not stepping down. In a way it's a good news, it means the man has matured. For those of you who will carry on will understand more, you'll mature into it, and for those who are, what I call, still waiting for a spaceship to move them, we spend time to move those. I stepped down a year and some months ago as the head of KF. I think by ?? I run it, because we have more time to do other things with it ... (1:08).

.. It allows me to open mankind to the U Community... (1:10). .. I know exactly what I am doing and exactly the time it has to done. As my mom used to tell me, you leave everything to the last minute and then you are happy that you did it. ... It's like when you set the Christmas Table ...
(1:12).
(1:14). ... You'll still probably see an old man called Keshe, that man has a lot of things to do to complete the cycle for the maturity of man. Any other questions. Rick says, .. was that you said that you pray to (for) the reactors, at that time I said, what ... You said you open the reactors up many times a day and then when you start them up again you say this prayer, (to the entities in this reactor) I hope you are going to have as much fun with this today as I am, to that effect. (1:16). That struck me as wow ... to give it your blessing into it ... I thought I would just add that. Yeah, because you create a being, a soul, a mixture of the fields which in their interaction they decide, as I said in the last teaching, they decide to stop or to go, they start to play, the people say, oh, this is a field balance. Where does this field make its decision to be in balance. I always said to the K Seekers in the lab, always pray for the reactors you open and close, because you create, you give life to it. I still hear some of the KS do that when they start up a reactor, they understand the life of the U and not the arrogance of the man. It's beautiful when you feel it .. I built the reactor for you but I work with the reactor with your soul. (1:18). I don't need any. It's to understand the strength of your own inner being. When you just run a reactor because it's something mechanical, you get that. It's like you work in an office with a woman

secretary, you ask can I have a letter, etc, it's there just there physicality. But that secretary is a lover to somebody, has emotion, shows, gives, is a mother to someone, and this is what people don't understand. A reactor that you create in the dynamic field of the U is not like a motor where fuel comes and mixes and burns and you go forward. Mankind has a lot to learn. You have to understand the dimension of creation, of life in the U. You come to understand that I am here because of you, you allow me to share my joys with you. In a way we have been told, but we forgot, it has a life so we do it. Some of the Christians they do, they say a blessing before we start the ofod, In Islamic and in Judaism we bless the soul of the animal which we take the life of, unfortunately it's the wrong way around. We bless the soul of the system because we give a (1:20). creation of life to it and we take and we allow it to be there for the reason we chose. It has a life, an existence. Life is not exclusivity (of the man), they tell me you are an abortionist or antiabortionist, I have been accused of a lot of it. No, life has to make sense that makes life easy for the soul which creates it, which is there. And it has to be in harmony. I create the machine, I create dimensions of it, I put the pieces together to become, so I am responsible for it, and you realize that when you work with it that way, that it gives you so much pleasure. And it works with you, and if you give it to other people and you sit there and nothing happens. But in a way it happens, but they don't see it because they are so focused into achieving something and they don't see what they have achieved and what is going around. Many times I watched K Seekers achieving flight or motion and they don't see it and I just watch. And they say, it never works. ... have you checked what you never did before that caused it to fly, you already achieved it. In one of the KF labs they achieved lift in the past 7 days but they still don't believe it because they don't understand how they did it. I got a text, we came in and it was on the floor. ... We have achieved lift in one of the labs ... (1:22).

... making a system to fly is like a man's DNA, with no genetic defect, everything has to be perfect to give birth to a child with 2 eyes, 2 ears and everything moving. If you make one mistake out of the whole so many billions bits of genes, it doesn't work, or it works and something says it has genetic defect in it. I have seen many times Armand's systems flying but he doesn't see it. And I have seen many others do it but they don't make a connection with the soul of the system, and I am not there, you'll understand ... At the moments we call them pilots, even if we have a full plane of pilots only one can fly the plane, the rest are passengers. It's like being in a car with mom and dad and the kids, (1:24). 1 steering wheel, brake and gear and everybody else is a driver, "oh be careful", but it is me who makes the decision where the car goes, not you lot. You made the system, it's your soul, but you have made no connection with it, what do you expect. The reason they fly this week is because they had a (right) connection but they don't see it. .. it shows the members of the different labs around the KF have not become one yet, and this is picture taken by Armand in AZ and 4 members of the team they are holding their hands around the reactor trying to feel it, some feeling this is ridiculous but since he is taking the picture I have to be there, the other one says I feel some pressure here, but the whole intention of me standing there trying to tell them to feel the force of the reactor was to unite them that collectively they could decide who was (the pilot) and who could fly and then the machine will fly. Mankind has not understood a collective work of the soul. The most rubbish word that has ever come into the work of the KF is "synchronizing." Those who speak about it don't even have a clue. You try with a 125

people in the back of the cockpit (1:26). synchronized and taking control of the plane. My ofot, it doesn't work that way, unless you know how to rhythm into it. That's a different story. So now comes, it's you and your soul which you created it, and you have to be in communication with it and it flies. This is the same, your STP has to be in the line of understanding and confirming the existence of your own soul that you can be allowed, this is the key, this is the time when the soul will take over. This is what I called you, "the fear". I hide the reality in different words because the man isn't mature enough. Now you are mature, when you heard 5 - 7 years ago, now you understand. It's the same process. I made the most beautiful flying systems in ?? Sienia, but the soul wasn't there. Every electrical system was ?? waiting for it except the STM not having trust in what he has done. And everything else can be blamed. I said before I allow the non-communication through the STM to develop in AZ because I see what is there to come. And AZ has achieved flight this week. Because the STM is there behind it to do but I have to play all sorts of tricks with them. (1:28). How come during the past 3 -4 years nothing fell on the floor. ... then you understand that the totality of the work in AZ is through the soul, and the man achieves it but he doesn't appreciate it. Mankind has a fear of understanding of his own soul, so when you set up a system, in a way it's not praying, you are part of, making a connection. Like when you are sitting in a classroom and you want to call your friend on the other side of the room you don't just stand there and pray that you want him to hear you, you have to talk to him. He says, Hi John can you hear me and he knows you are talking to him. It's the same (with this), you have to call, you have to make the connection, you give from your soul, you throw the rope and then you can pull it. ??? can I teach? The steps for us after I step down is very systematic, I can write it down and give it to you, and in 2 or 5 years time you'll say, how did he know. Upon my departure is the end of the kingship. Is the imprisonment of most of the world leaders, by themselves, not by us. (1:30). It will be the first steps for the path of peace. Do you want me to tell you the next? It's the end of kingship, because we'll open the borders, nobody needs them, I can be king of my own castle, that's if I can afford a castle. When you can travel the length and breadth of this planet, do you think the UN will have a committee of the kings, which kingdom goes.. not a word. It's the end of kingship and the beginning of the peace for mankind because everybody will be equal. World leaders will stay because we need to direct in certain ways, but they'll work collectively and not the way we see now, I am the president of the US or so and so. It will be a collective for the betterment of human kind, for the peace of the totality of the humanity. Then you'll know why I am stepping down. How can I be the head of an organization at this level when I am destroying the headship. This process needs understanding. Even when you make these Gans Boxes, there is life in there, (1:32). if you move it, it moves, it shakes. Do you pray for your Gans Boxes, no, nobody does. I do. You have to understand that life has a structure and whenever you break it, it breaks you. We have to go through the process of maturity, one by one, man by man, and then we go a step at a time. ... We have to understand that we have to progress and elevate our own soul in respect to our physicality and not against our son we are not in competition with him to show that we are better ... It's can I be elevated one step further. (1:34). It's like a race in England, you race against yourself to better yourself to understand more how you can reach your own soul through the soul of the physicality. You have 2 choices and this is strange that nobody understands this, you have to wait to die to let the soul separate and then you have no

control over it because now it's free, or you can join the soul to be with it that it can take you to the spans of the U in the physicality dimension ?? hiding to go. It's like the monkey's they attach the babies to themselves and they jump from one tree to another, that's the soul, and you attach yourself inside it, then when you are ready you come off it and crawl around the branches and then come back and stick to the mom again and then go to the next tree. That soul is that mom and it's you who decides, I go for excursions but this time I go between the lions, they look like lions otherwise I get eaten and become a ofod to them. But in a way that's your fear, because nobody eats you in the space. I change to the physicality of the dimension of where I appear for the pleasure of me enjoying them and them enjoying me. So next rime start understanding what is, and we don't pray, we connect that we can give. Just watch the trial of the Iranian reactor, it comes down from 9 Kg to 6.1, I could have shown flight or anything, but if I would have shown flight at that time I would have become another (1:36). "Wright Brothers", I would have become the first man who showed a space bla, bla, or the man who did this. I don't need. I know how to do. But now it's time you have got the first man flying, Mr. in AZ. He has got his combination (Gans') right, but when he has his combination right he has to put his soul in it as well. You can all go to AZ and see a flying machine. John .. start charging admission tickets. Don't give the recipe to no one because the thing is that if they haven't put a soul into it they won't understand it. But this is part of the process. ... Q: Maybe I can connect with my soul of physicality by going into the heart chakra and go in this way in a deep sense of peace and satisfaction where nothing is missing, contentment, nothing is lacking of the love for myself and for other people, opens like a flower. Can you tell me how to get more in touch with my soul of man, are there any exercises for it? (1:38). It doesn't make any sense, if you know that you can go through your chakra, go do it, what do you want me to show you the way. Q: So the main thing to do is to clear and ofcus our emotions like we influence everything with it? Q: Do thoughts come before the emotions, as thoughts create our physical reality? ... Rick, says, they're all looking for guidance, for answers. I know but you have to find your own way. because .. all the roads end up in Rome, but which road are you on. You have to find your way. Why do you choose this path of physicality, we have been given a position direction and we can do. The same question comes, why do some children die at birth, and the others have to wait 80 years to reach that achievement, to achieve that separation. Mankind needs a lot of understanding of his own structure before he can go to the next step. (1:40). Do we need position of energies, or is position of energies a path for us to achieve what we want, maybe for you the case applies but for the others it doesn't. Maybe some of us can reach it directly we don't need to go through it. It's interesting what we expect and what we set out to do, I had a dream for the past years to be able to do something, I know it and it's (1:42). in some of my books and papers, and today I achieved at least the first step of it. I was like a little boy in a candy shop, I knew exactly which candy I wanted, but this time I could make the candy to taste it the way I wanted. I stood still and gave thanks to the souls which have brought me to such a point to get such a pleasure to be able to serve from it. I stood back looking at these people, not with the eye of physicality, but through the soul, the eye of the souls, what pleasure it was giving them, and what they were expecting to show the beauty of their work through, what I could contribute towards it that they could show, they're a bunch of artisans, and this is my job you're all artisans of your own soul, what you want to make out of it. The only

one you can make is your own soul, nobody else's. One of issue. Any other question (1:44). Man from Nigeria. Q: The soul is located in the brain, now where can we locate the soul of physicality? (1:46). I am a little confused on that. The soul of physicality is an amalgamation of the totality of the soul of every cell of the man, and then in totality they share, they have a common denominator of sharing or mixing, which is the heart of the man. You have a sun and many planets but everything is focused towards that sun which dictates the position and condition of each one and collectively they give to exist. The soul of physicality is more or less within the dimension of the heart, because when you take the heart the physicality dies. You can take any organ out and you can still survive. Rick asks, would it be a bit lower say what we call, the solar plexus? It's a field effect, not a shape. Rick, solar means sun so I am wondering if that is associated? Uh .. maybe it's the first place the sun hits, you never know. It doesn't have a fixed position even within the heart of the man. It's a proximity, because first of all the heart moves continuously in its rhythm, and secondly at any time different field strengths of blood enters it, it's not a fixed point, so it's what we call the heart or the rhythm of the heart. (1:48). We can see it if you ... it's one of things of man is wise enough and understands it, you can see the soul of physicality of others. To see your own with your own eye is more or less an impossibility, it's not impossible, you can do it, there is a way for it to be done. But as the STM, the understanding is in line with the horizon of the eye ?? you can see through your soul or convert it to be seen by the STP, the physical soul. Thank you. Q: How can the Pl T help in the coming economic collapse? .. It depends on what we call economic collapse. (1:50). Economic collapse for those who have stolen, or for all those who have stolen in dimension start living like those who never had it. So we are becoming all equal. But is there going to be an economical collapse? What we see, possible, maybe, but for who? British are facing it at the end of this month, we don't know what is going to happen with them, if they get kicked out of ... as they say, the end of the world for Britain is the 31st of March this year. The debt process is going into the emergency room. ... is it going to touch France or Germany, no because they are the beneficiary of it ... (1:52). ...
.. There can't be an economical collapse, but an adjustment.
(1:54).

(1:58).
(2:00).

(2:06).
(2:08). People are teaching K Seekers workshops around the world, Brazil, Mexico, Iran, India. Thank you very much. ... (2:10). Q: I would like to know how Mr. Keshe deals with the fact that some people have taken things away from him without his consent, like when we know that someone took his theory about the black hole? (laughs) We call it a stealing ... if you understand the meaning of what I am going to tell you. Years ago I was upset, I was not concerned ... this is the habit of the Belgium's, they steal things, we had a holiday home in Belgium and after a few months in England Caroline went back home and it was locked from the inside and we went over the garage door ... the whole house was cleaned out, everything stolen furniture. And they put the our things for sale in our own garden, because we weren't there ... I was talking to my fathers soul, he said, my son

they must have needed it otherwise they don't steal. And those words stayed with me. (2:12). When you speak of Stephen Hawkins he needed it to confirm himself and with it he brought the demise of himself. When people steal things they need it otherwise they don't do it. ... if you look at the last 10 years of Stephen Hawkins work papers he wrote and speeches, it was a copy of our work. Book #3 Origin of the Universe .... (2:14). ... 4 days later in same university Stephen Hawkins comes suddenly out of nowhere given a lecture and guess what, the name of his speech. ... The Origin of Universe. A copy of the book. ... (2:16). So he needed it. We have seen this in China ... they don't want to show that this T has come from Iran even though they have promoted it heavily everywhere, but the Chinese are trying to steal the T which we work with them, as a Chinese development that the Chinese have done. And this is wrong. ... When we become One Nation this will die, because it doesn't matter if you are Iranian, Chinese or whatever it's the achievement for humanity. This is one of the big problems. I understand why president Trump pushed with this kind of thing with the Chinese. The Chinese are very proud and everything has to be done by them and they made so many obstructions by their own scientists .. stealing is not to be proud of and the Chinese government leadership has to understand this. (2:18). We don't need the patents, we respect peoples knowledge and what is there. We have seen very recently stealing with the KF in China, we are aware of it and have to know more about it. ...

267th Knowledge Seekers Workshop - Thursday, March 14, 2019

(Best way to Nano coat and vacuum is best way ... , M field capture of plastic, , About taking all parts of the body with you into space, Explains the 3 layers manifesting the physicality of the Creator, Don't use CH3 Gans for people with cancer it grows, The soul structure is the interaction of fields, The STM, STP, and the soul of Universal Community 3 layers interact to confirm physicality of the Creator, Which part of the brain you have already thought the whole length of the joke and the end of the discussion before you even open your mouth, Talks about how speech is formed through the brain or the soul, Do we speak to all parts of the body so that we can take them with and not leave them in different parts of the universe, When we die do we take our consciousness with

us -- it's part of the knowledge of who we are, Going to space is as natural as being born it's a joyful time, Cu motors are like Cu Gans in muscles holds us to earth, Christianity and Mithraism and the 3 Wiseman from Iran, Is the physical life which is tangible to us actually real, The body lying down with chakras forms spaceship,)

(:06). I hear a lot of people saying, I don't understand this or that. Today we'll answer some questions and go on with the teachings. (:08). John why did you imprison your flying machine. I unchained it so it's not stuck to the ground anymore. Q: A spacecraft big enough to carry 100 people 1 day and then 25 people the next day? It's still possible but you'll still have 100 seats, you have 75 seats free. Q: Can't you shrink it in size? Yes you can do that. KF in space system shortly in the coming time will be ?? space program flights (:10). As I told you I am designing the KF commercial ??, they've been settled now. I'll be totally focused on space developments and flight in conjunction with governments. 21

(:16). .. (:18). (looking for Chinese system pictures.) .. (:20). John show us your ?? reactor, is it flying yet? Q: What's happening is we are getting a lot of vibration like it's ready to do something. It's clear that it needs to build up the fields, because every time we interact with it, like when we go in and measure the strength in the morning, it almost like we have to start over, it needs to be left alone. Ah ... this is what happens at the sunrise and sunset. It's easier not to come close to it, it builds up and then it dies off, in the day time and night. Q: It's like our bodies drain the system. You have to stay away from it. Q: We are definitely getting a lot of build up of energy if we leave it alone. Yeah, but I think you have to increase one of your materials in your outer core and you should see flight, because these vibrations come due to fields trying to balance each other. (:22). Q: In one of the teachings with the Cup of Life you brought up about the N coating process, you said that perhaps some of the people are doing the N coating process to its ultimate capability by doing the 1 caustic bath, is there more that we are missing in the n coating that you would like to expand on? Not really. How you N coat any material, I call it determination and patience, and if you have the patience you achieve a lot. If you don't have the patience and you just want to see something black then you don't achieve much. Many of the KF people are impatient, they have to have it black and then let's go that's it. ... to get a perfect Gans from a N coat needs patience, time. N coating is a black hole, that's why it's black. Do you know how many millions of years it take the U to create 1 black hole. (:24). **.. I explained in the teaching this week, take your time and let it grow, let it grow. And this (coating) becomes like a powder, you can see through the gaps, it's a fluffy thing. And what you do, you wipe this out, and throw it aside, this is no good, this is the first layers. It's like I explained in the teachings, it's like a dirt on the mirror when you cook a meat that comes out. These are the beautiful N layers, (? the lower layers), you can work within this section. Even the Gans of the fluffy layer is different then the Gans of the lower layers. To get this fluffiness usually takes me a month or 2. You need to have the patience of God if you want to achieve miracles.** A lot of you are happy with something black and I put it there it turns white and I call it a CO2. the color change from black to white has become the fascination of these teachings. You don't listen to the extent of it, you don't understand, what difference does it make. How beautiful it would be to be done this way. (:26). The

whole process of N coating is being as patience as God has been, you get beautiful .. you can do miracles. You make a N coating and then you make a Gans, and let's say you need a 100 grams of Gans I can do the same thing with 10 grams (of this kind of Gans). You hardly achieve progress sometimes because your Gans isn't mature Gans, whereas I work and I achieve. ... . Because a lot of people wanted to make money out of it and it didn't work because they don't understand. What do you want to do and what do you expect? I have seen put caustic materials in a pressure cooker. It's a waste of time throw it to the wall. Anyone making N materials using pressure cookers, you see some effect, (:28). but it means you haven't understood, go back to a chef. N coating needs space and time to grow, how can it do it when you put pressure on it in a pressure cooker. Just because it goes black and is shinny, you think it's very good quality. My ofot, the left and the right they don't work. It means 90% of the people who do these things it means that they have not understood. One of the KF research, it looks like a cooking class, they got pots and pots and they don't understand that you can't make N material with a pressure cooker. ... You have a material here which is getting pressurized back on itself, how can you get this (N layers) ?? mess from it. You see the top layer and then you let it cool, you can't do the job, you sealed it, you closed it. ... our people themselves in the KF don't understand these things. I'll show you pictures, it's wrong, but what do you expect to produce from this material. (:30). ... (:32). Shows the Chinese reactor. This belt has 36 or 32 revolving balls each one, as they are rotating on their axis, they are rotating fast around the system too. But inside this system there are other mechanisms set up that will pull this back and forth. By creating these base units to create separation between the earth and the system we have locked this in very nicely, so if I could expand this to say somewhere here, I create a MG field flat, which means the passengers can walk into this space. You control your size. The Iranian space reactors were very hard to control this way. Once we achieved certain parameters we could reduce it or whatever, the Chinese system is much more flexible and it has characteristics that always, it doesn't matter where you put it, the condition is determined here. If we could expand these legs and move it up and down, we just make a dome for hundreds of people in it. (:34). We can expand and contract, and you control it from inside. Q: Is the captain of the SS the one to decide on the size of the SS or can the collective field of the passengers allow for a bigger ship? ... It's the captain. We talked about it last week, if you have a hundred captains in the back can they collectively override the captain in the cockpit. No, they can't do so. You'll see this is part of the parameters set up. (:36). Q: For higher speeds, 10 times the speed of light, since there are a lot of friction between magnetic reactors, would we have a problem with heat, or like with cooling coils you showed in your other reactors? No there is no such a thing. ... That's totally different, that's an old fashioned system, we have gone into non-motor systems. Q: There wouldn't be friction between M fields? The system drains itself. When you have your system there is an up flow chimney effect, and then you have a down flow, with the space systems that you built up to now. You don't have any control. (:38). As they come in they build up. .. now we can control this and expand it. So there is not much field left to interact inside the system, you blow it out or you capture it in. These interaction in here are a small amount like what we have in our atmosphere. It's not just a wind that you feel. There is a M field flow. We look through the daylight. there are trillions lines of fields between you and the next building, G pull fields, M fields of the earth, the Inertial field forces. But we got use to them, we adapted ourselves to be able to

move within it without effecting us as such. The space of this planet is not just the space and the lights, even the lights are on the M fields. Do you think the fields just pass somewhere, you got a G and it goes through us, it is within us. It doesn't create heat, partially it does but (:40). it's very minimal compared to our other parts. The fields are continuously in every direction and every position but they don't create heat as such. I hope to start the research in space with the Iranian government pretty soon, and (cut off) ...

(:42). ...

I am getting back involved with the space program, Iran included our aim is to unify the space program. They don't want me to mention that, we are fully monitored. .. These parameters are ?? (:44). We hope to have the Americans on board with us soon and some other nations. Any other questions. ... (:46). Q: One Iranian who researched your work from the beginning, he mentioned that if we know the molecular structure of plastic we can make a magnet for plastic, could we use such magnets to clean our oceans from micro plastics? ... Years ago there is a video where I use 2 magnets to attract plastic. What we call plastic, we can make the M field of it, this is part of the achievements of the KF, in the coming time when I go into space research I will release the M fields for the capture of plastic. (:48). ... You have a C-H bond in plastic, in some cases we have seen Nitrogen, there are a chain of connections. Mainly we work on this. There is a way the same as what you did with the Cu and N coated Zn, in which you created the C here (middle), which you extracted the C from the environment. The C in the plastic has a specific characteristics, in the same way we can produce a field which matches only the C of the C-H bond of the plastic. We will release massive amounts of C and H into space, we'll see a massive increase in water levels. In systems that we developed for this we have seen the water levels rise quite rapidly. .. It's one of the easiest things to do to get rid of the plastics in the oceans. (:50). ... All plastics have a specific strength C with them. In the CO2 box we produced the MG field of the C, we can also do this for the C-H in plastic. All you need to do is to create the Gans of this plastic and you can clean up the planet in no time. You want this plastic to be opened up, eliminated, extracted then make a Gans of it. ... I referred to this before, it can cause other problems. Now I open a Pandora's Box. Go back toe the Coke bottle ... if we have found a way to dissolve the plastic in the Coke bottle, then you already have the answer. But K Seekers don't see it. We have already managed to open the plastic up. (:52). Make a caustic of the plastic that you want, make a Gans of it, then you know what to do with it. ... You make a water bottle and give it 12 months for the water to be drunk, then take the bottle away ??? Dating it, because in this plastic we can embed plastic which we can recall the system. Or in the coming time there is a system ... we throw our plastic in the boxes. We make an opening in the box, then there is nothing left in the box it's just a ?? gas to the atmosphere. We have already shown this, I don't understand how K Seekers don't look. We always said, in the Coke bottle the neck and the little knob in the bottom disappeared, because we take the H to create Deuterium, Tritium and (:54). H atomic. So the C is moved. But how do you open the C, Imack did a test and said the C is ??? here. So it's very easy to understand the process, it's been done. These are things I'll get drastically involved in, in the next few months now that I am handing over everything to the KF management team. There is a lot of agricultural cleanup ... Rick says he discussed about mushrooms to clean up plastics. Mr. Keshe says you use the Pl T the way we have shown

it. Rick wants to combine it ... Mr. Keshe says, if you do it properly you can fly over these islands of plastic (:56). and just convert them to H. You'll also capture a lot of CO2, and Gans' and fish will grow much faster. .. Rick shows Wiki, Polymer Degradation, opens up on a Polymer, large molecules are repeated subunits ... (:58). Anything which stretches has a polymer structure in it, because ?? it can pull itself. If you look at all the polymers, plastic, nylon, or the plastic they use for bottles and bags, it is part of it. I have studied this polymer, plastic business for years, . It all has a C-H bond and the different combinations of this C-H gives you the polymer. If you can make a MG field, which you already know how to do with the Gans' once you disable this one, the whole thing falls apart. We already know the T, we have already produced it, we did the Coke bottle. As K Seekers you have the knowledge to make plasmatic M field of any element in the U. If you go back to some of the teachings, you can remove pieces from your body. If you have a piece of shrapnel in your body you can remove it without any operation, it's been done. You make a MG field of that element. (1:00). Why do we ask in the cancer processes with the space T we don't look at all these little things have gone into your immune system, this is up or down, etc. we don't look for those small things, we go for which material (element) has increased in the body and we see where it sits and what is the cause of the cancer and we can remove it. ... plastic is the easiest conversion after H. ... Caroline chopped 2 kgs of Coke bottles for H for the flight systems. Once you break one of the bonds it's over the whole thing falls apart. (1:02). .. we go back to the basics. You need maybe 50 grams of caustic, get some plastic the one you want to extract, you put some caustic and hot water on it. What are you going to get? Some H and C, it's a technique for breaking down plastic. Now we have a material. A Gans of plastic. (1:04). Now you place your Gans of plastic .. draws 2 reactors, "Bob's your uncle" You put a bottle here, you extract and create the fields of it, and then you can do it. Put a submarine at the bottom of the sea and the plastic on top of it., one up here. ... The problem is we moan about the plastic and people collect it to make money from it. In Africa people search for plastic in every bin because it's money. .. Rick says, tiny Nano plastic is in every drop of ocean water, how to deal with the entire ocean. We have gone too far with it. (1:06). In the 1980's plastic bags appeared in the market in a massive way and until that time everything was paper bags. When it came into the market we saw problems at that time, I used to have a packaging company in England. We could see that this thing doesn't get destroyed, it was good for packaging company like ours, because a paper bag was used, thrown away and there was a next one. With the plastic bag they used them again and again so I couldn't sell more. I looked at how we can get rid of these plastics. When you use specific fields you can open up the C on it. But there is a very big problem with these polymers some of them are at the strength of the protein, the C bond. Q: Alzar interrupts and takes the question in another direction. The N coating video done by Armand, he told to soak the cu in caustic for 24 hours, that's how we learned so what is the kitchen soup? (1:08). Armand you better explain. He is born in 7 months, everything has to be quick. ... **When I do the N coating, I leave it there, the steaming process is a different process for expansion, it's not for making N coating. It's 2 different processes**. We don't put under pressure. Steam processing is very different then what you call pressurized system. When you steam it, you allow it, it grows but you don't steam it in a pressure cooker. Q: Mr. Keshe if you put the Zn in caustic for a month you don't have any Zn left. No, no you don't put it in it for that long. Q: How many days? If

you do it properly it just grows. (you were talking about Cu not Zn). Q: how long do you put it in the caustic.... if you put Al in Caustic in 1 minute it's gone. (1:10). Armand says, if you go to the video it says at least 24 hours. Some people can do it fast, at least you can leave it in the water for 24 hours, then take it out. Shows the pressure cookers, this is wrong but many people do this. Because you destroy, you pressurize back into the layers you made, you want to make it as spongy as possible, open it up. Rick says, but without any air in between the layers, you don't want it too spongy, right, like when it flakes off, like some of the fire coating? It just grows up naturally, layers build up. Rick, says, you say pressure would not be good like what we see with the pressure cooker and that makes sense. So would a partial vacuum condition be more enticing to those N layers? It is one of the absolute best ways to make N coating. I used to do it in Belgium in the lab. It creates a very different structure and I taught this in one of the private teachings and the Russian government scientists understood and they used it. (1:12). It has a specific application. Rick asks, would you have to keep that under vacuum conditions for it to keep its properties, would it collapse under the normal atmospheric ? When we used to do tests in Belgium we had access to one of the most advanced vacuum systems, we used to create vacuum above the vacuum condition in the space, much deeper. We used to test this, I tested the N coating even under the vacuum condition, it's very different. The Gans' you get from it is totally different. Let's put it this way, if you take one of the N structures of your Cu, it gives you the energy of let say 100, and if take the same in a vacuum it gives you a million. Even the space of the fields opens up, that is the reason for it. This kind of vacuum N coating is used in some of the most expensive motor bike glasses, the different shades of glasses, what they do is they put the glass in a vacuum chamber and bombard it with Nitrogen gases which creates a lot of indentations in the glass and then they bombard it with H or different colors that they want to create that shade. We tested this, we took the H from the, (1:14). or what do you call it, N particles from the matter. A lot of research has been done this way, I used to show it, it's in one of the boxes in the lab. We went testing into ceramics, how far we can touch into ceramic, we bombarded with Nitrogen because it's a big atom and then we released Nano materials to settle in it. It creates space colors they're not normal colors you see. ... You need a vacuum. The Russians have taken this further (with vacuum) because I had to go to the authorities to explain how the Russians have used my T to do what they have done. Because they used it to change materials worth pennies into thousands of dollars literally with no cost. They understood my work, I ?? writing with them, I don't disclose, the Russian in the space T N materials are very advanced. The machine we used was made in Ukraine, it was the Russian system. The Americans can't even touch it yet. ?? Q: So N coating is just like raising a baby, you don't stretch its legs and head to get it to grow fast, you just nurture it and feed it and it takes 18 years until it comes 6 foot 5. No, no .. definitely you're a woman and a mother. (1:16). It doesn't take that long. You create a space gap that it can expand into its environment and the higher the strength fields opens up. This is what it means. I always said, that if the space doesn't exist, the fields, the solar system can't expand into it. It can (only) expand as much as the other fields allow it. When you put a gas in a room the shape of the room dictates the shape that the volume of the gas is going to take. In the Pl T the shape of the Pl is dictated by the fields around it, not it's containment. That's why when you have a Gans it passes the wall of the ball. If you put a gas in a ball, the walls, that's its limitation. Whereas with the Pl you pass through it. The

only containment of it are others fields that are stronger or weaker from it. It's the lack of understanding of the knowledge. When you create a Nano particle, how much room you give it to expand, that single N particle can become a solar system. If you allow the fields of it to open, in weak fields. It's part of the space T deep space ?? team. I said in one of my teachings, 1 atom of H can cover a solar system or a U. (1:18). There is nothing to hold its fields, there is no boundary to it, whereas the Gas state, the shape of the container holds it, it can't penetrate beyond it, but the Pl penetrates through its containment, that's why we can see flight, that's why we can see day and night because the physical boundary of the earth doesn't trap the MG field of the planet. It's a matter state, it's much weaker, it just goes through it. I always referred to the MG of a Pl reduces in strength then it becomes matter state, because if it was higher the MG field of the earth could not pass through it to create its position in the, back to the sun or its rotation. It's very simple, but the knowledge is not understood so it creates mayhem. If you have a N material you can allow it to grow then you create a field for it. Q: I would like to ask about the containment of the field of the Gans of CH3, from Dr. Rodrigo's presentation that people with growing tumors (1:20). should avoid the fields of CH3 otherwise it will feed the tumor. So what is the safe way to keep the Gans of CH3 if we have it our apartment? No, you see you have to understand what it means, the CH3 is every part of your life. Your body is made of it and functions through it. You have to understand what it means, you don't throw away your CH3, the CH3 should not be used inside of a system which is used for cancer. Q: So not to use in patches or reactors? No way, because you provide the C14 and C12 to it. Q: Recently we removed several liters of CH3 Gans from our apartment? It's totally irrelevant, because these are plasmas but it takes them if it needs them. The CH3 in a Gans state is the plasmatic state of the U. When you connect it with an AA like in a patch, then yes you locked it in. But we live in it, everything we touch which breaths ?? in it, from the plants to the animals to everything else. If that were the case the spiders in the house should be the size of the dinosaurs. (1:22). You have to understand the totality of the knowledge. The tumor grows for a specific reason, what is feeding it and why the space of the body allows that space for it to grow into. How come it dictates the size and shape of our bones for our life. It doesn't do anything, it doesn't allow it to grow. You have to understand how things grow in the body. ... I seek the knowledge of U matter state is very easy. Somebody once asked where do you go to the school to learn all this, I said I go to the school of the U, I am still a student. The master of the knowledge is the Creator. Any other question. Q: You go to the class of the U, Can I come with you? We don't allow woman. You have to speak to God He is a man. Sorry about that. No it's understanding the work of the U, it's not easy, (1:24). you have to be independent and very open to knowledge. Thank you, I understand. Q: Arnold talks (unclear). Sandor is storing his Gans ?? some kind of way. I store my Gans by connecting them in a ?? rotation. I saw his room I think it is effecting his neck in a bad way. Maybe you can say something about that? No I passed it on to the doctors, I keep myself away from this discussion because the knowledgeable medical people are handling this case. .. (1:26).
...
Q: How can we recognize a Gans as M or G what about the Mg Gans? Every Gans is both M and G, it depends on strength in respect to its position and as soon as the K Seekers learn this we have jumped a big hurdle. You can change a flow of the fields towards you from M it depends how, which fields you position. I thought there would be

a lot of questions about the soul. Q: What is the structure of the soul? ... The soul structure is the interaction of the fields, (1:28). and what density and what strength they interact with each other. It's not a house, it doesn't have a control or computerized system running. I'll put a very interesting question to you and maybe it will direct you to a certain path. You sit and you start a conversation and you speak, this is a question to the K Seekers and if you find this it's the answer to a lot of things. Let's say you want to tell a joke or to describe something, what makes you, which part of your brain, and in interaction with which part of the fields of the body decides on the words and on the conclusion of the joke, decides on the path, on the words you are going to use, decides on everything in that conversation. And which part of your conversation you decide to insult, (1:30). or to be cheerful, loveable, or a brute, that in the mind of the man the position, shape, color, sound and the pattern of the voice which comes out of the body transfers all that emotion in a sequential way that makes sense to somebody else. The question is where and which part of the brain you have already thought the whole length of the joke and the end of the discussion before you even open your mouth. Do you actually go and repeat that this is the sentence I want to say before it comes out of your mouth, or does the sequence come out without your even thinking (about it), or do we have a part in our body which puts the whole question together and then it releases it and it comes out of you because you were expecting an answer. If you understand what I am trying to say. How do we make sequential noises with emotions that comes out of our mouth, we have trained it, and then you understand what I am telling you. Or does the brain put, thinks this is what I want and transfers it to the voice box and the voice box puts it in a sequence with the emotion added to it, and you voice good morning, I am very sick, or I am very happy, I want to laugh. Did the brain decide or is there a structure in the voice box which carries emotion with it, which transfers emotion of the soul and the soul of physicality that when it gets (comes out) (1:32). it's tuned to your laugh and shake your hands, or you cry and tears come out. How does the voice, the sequential system of this noise connects itself with the emotion and can connect with the other emotions of the body. This is part of the teaching of last week which I said, if you take the ?? STP inside the STM then you travel with it, but how do you separate these, what do you understand from this point? If I shout with the voice at this level everybody will panic, but did I make the decision of the shouting, the voice I used in my brain or the emotional feeling of the reaction of the people to such a noise is passed to the voice box that it creates that emotional voice that it fits to the other peoples emotion. Do I already read the soul of the other people that the physicality will behave this way and create the noise for it, or do I actually with the emotion of the soul have already created that, the noise is something which comes out for them. How do we decide on the sequence of the voice which comes out of our mouth. Or do we have a section which everything is released it's just a batch work. If man understands this you are 1 step closer to releasing the STP to be part of the STM. As I said, (1:34). you make your voice to be tearful and the emotion of the tear will come with it. But the words have decided this is what this is going to be or is it the emotion has decided on the words. What about when we talk without emotion, is it through the soul of physicality or through the STM. This is important because when the man decides to become the man of space, how and the way he will look will decide and if the shape or say the leg has a fear, you travel with the leg left behind, because the feeling of the fear in the leg doesn't match the joy of the rest to

travel with. Suddenly you get the ?? same butterflies in your stomach and the physicality of the stomach stays behind because it did not match the structure of the field transfer. Or would we leave different bits of our body in different parts of the U, as they go through different emotions as compared with the emotion of the STP and the STM. Oh, I left my stomach on planet Zeus and my legs on planet Zed. When they feel the strength of my emotions traveling here, they join me, would they? (1:36). The question is how and where in our physical body or in the STP we dictate on the voices, the noise which comes out of our voice box that creates us the emotion of the feeling, with the noise which is made. This is one of the pitfalls of the man who wants to travel into space. That you can take all parts with you, and can you speak to all parts, to the leg, can you come with me, are you happy with it, Mr. Toe left side would you like to come with me. ... but who decides on it. These are parts of what I call, the remnants of the fear of the man of his own demise. If the man goes 1 step beyond that and he knows that he is controlling everything, in a way he is in charge of totality, man can separate (1:38). or bring the STM into operation of the STP. The question goes back, how do you make sentences and attach emotion to it, how and why you expect an outcome from emotions in the voice of another person. Or is the soul of you and the soul of the person you are talking to, a need to transfer the knowledge of your STP to the STP of the other one ?? decide to understand, if I shout, you shout. The souls already know the shouting is going to come. Any other question. Q: The button on the end of the bottle, could you please explain? It's the production and failure, compactness. Q: Would it have anything ... okay. It's the end where they inject the plastic in. (1:40). Or it's the side that when they inject in everything comes together. Q: It's not a piece of Cu? No, no. It's a hard piece of plastic and I call it a button. ... that nudge we find is the second place where (the C) opens up. ... Something very interesting if you have ever observed is that N materials cannot be soldered to each other, you can solder 2 materials underneath and ?? N materials on top. It's very hard for many ?? parents to see and understand this, is that when you have a wound, especially on young skin, then the old skin, it heals much faster, why? It's because of the N strong interaction (1:42). creates that, the older we get the field strength goes up, lower and lower strength, and it takes longer to interact. If you understand this then when you get a Coke bottle in your hand and you make a N .. whatever the parachutes you make N coating on it, when you see the tip is gone, when you touch the thickness of the plastic around the bottle in the middle, it's very much different then when you started it. So you already start converting part of the CH3 bond in that direction. When you start with the plastic at 0.8 when you finish with the caustic it's 0.04, but we never paid attention to it. Q: As it deteriorates? It doesn't deteriorate you convert the C, extract the C. .. Armand says, it happens when you put the current on the parachutes. .. it happens in every direction, when you put a current to it you create the flow. I never put a current to it I usually just connect a wire to it. (1:44). it creates its own current. ... if you put a very high current to them you see the molten metal inside floating. But it never leaks out, it stays in. You see through the whole of the N material, you see the molten metal inside. .... (1:46). Q: Do we take the consciousness with us in space, the good bad experiences the knowingness, awareness? What do you mean the consciousness. Yes we take everything with us. Nothing is left behind. We are a collection of knowledge's which are transferred into its recording, this is what we call RNA, or our body carries that information. .. It's part of what we carry. Q: So when we die is it the same thing? Same what thing? Q:

when we die do we take our consciousness with? It's part of the knowledge which we take with us. Q: Part of the knowledge of who I am? Yes. Q: And what if we get afraid up there? The same, sorry too late, it's a one way track, as you decided before. Q: Is there any control machine, like here we have the emotions that tell us where the danger is (1:48). and what to do, is there anything like that? It all depends, you will learn very soon. We all learn from it and we build on it. Q: So it's a natural response for humans to go to space? It is as natural as when you were born from the womb of the mother in the water. Q: So no need to be afraid when the time comes? Why should we be afraid it'll be a joyful time. I have always said I am ashamed to be in the body of the man because it carries too much pain. As I have said, it's a responsibility that we have to fulfill. The journey of a man is the habit of the man ??? transformation. Q: So we are bigger then what we think ?? Good Morning! Thank you. Q: When we are in this body we have this duality, when we receive things like good and bad, when we get fearful there is a part of us that says, don't be afraid, we talk ourselves into not being fearful but being positive. But at the point of death that duality is taken away, so at that point (1:50). if you are in the fear you are going to enter that world with the fear, but if with grace and love you enter with grace and love ... so we have to be careful when we leave this body, am I correct? Before you get married when you have a girlfriend you never make these kind of mistakes. When you have a partner everything is a mistake. We decide what and how we approach things in respect to our souls, and nobody else can dictate on it, or decide on it. There is a very big question I put it to all of you, is the physical life which is tangible to us, actually real? Or is it a collection of energies in which their interaction creates some flows which we call it emotions and the rest. But in reality is this physical life real or is it just interaction of fields within a given structure? Some time ago I wrote a very simple paragraph about the mankind, 'the mankind is kind enough.' (1:52). or for this kind of man. It's somewhere in the text which answers a lot of questions at this point. If you have some where ... if you read it, it explains a lot in respect to the soul. The STM and STP and respect of the STP and STM and the other souls with ?? us. Do you have it Rick.? We have to know how much we know and how much we ?? share, that by sharing elevates the soul of the others, and in that process of your sharing elevates your understanding ?? you have elevated another soul, so you need more to elevate more. ... A scientist said, I am a specialist in a certain field, (1:54). but when I listen to Mr. Keshe I realized how little I know. 04
(1:56). Reads:
.. it means existence of the others who transforms themselves into the shape of the man then they live above loving. (1:58). The other part tells you a lot, because loving and being mankind is connection of the STM and the physicality. If you read the first and the last it's the connection between the STM and the STP of the universe, the Universal Community. Then we ask ourselves, do we understand this transformation and the connection between the 2 or the 3. The STP, the STM and the soul of the UC and the understanding the totality. Here is the mankind, don't look at it as a woman and a man. .. We speak about the interaction of the 3 layers of the fields which leads to the manifestation of the physicality. .. is this 3 layers of the fields interaction of the physicality, STM and the soul of the UC (2:00). lead to the manifestation of the physicality of the Creator. So are we part of the physical existence of the Creator because with this we create the 3 fields which needs in dimension to lead to creation of the

manifestation of the physicality. The question is if it is, then who is belonging of this physicality of the Creator. Why has He manifested Himself in physicality? For whom? Is the Creator part of a lover or is created to love itself, to lead to creation of. We said the skin is made of the 3 layers whose interaction is something similar, so when the STM, STP and soul of the UC of the universe interact, by the same law has to lead to confirmation of the existence of physicality, of what except the dimension of the creation. So we are part of it. We are one of the layers that through it the confirmation of our own soul we confirm the existence of the physicality of the Creator. I made man in the image of Myself. Thus the man is part of it. What is in macro is in micro. (2:02). Q: When we put the fields of our soul into our creations do those creations hold those fields forever or do they dissipate the fields of the soul. And is it like we are creating a child, do we have to put our energy fields in and then nurture it everyday or it wilts on the vine? We forever emit fields and forever lives and interaction of our existence leads to creation of other lives. Q: So for example our Gans when we put the energy fields of our soul into it, they operate in a different way? Of course they do. You see John as I wrote to you before, you locked down your reactor. (2:04). For reasons you understood, you didn't want it to escape. Could it be that if you could understand the field forces within that system, which is existence dynamic, in interaction of the soul and emotion of you which is connected with your soul would you be able to cause it to life off, fly, or would you be able to take from it that it comes down. You have given it a point of reference with the black reactor, but you haven't actually given it life from the right side, from where it comes, where it's a creator of. Are you afraid of that thing flying, that you are holding it back? Success is too much. No, no, no. Why did you lock it down then? ... ??? you put it on the floor .. that again is another fear, that it might fall. Why not I wish it to fly and hover. It will not fall. The problem with these reactors that you are building is that they have a dimension of physicality restriction, which is that Cu motor. What you were doing some time ago, these balls should float. Very simple, give me 5 seconds I'll make any of these balls that you guys have made fly. (2:06). ... by putting the energy of your soul in it? In one way, but you have to connect it. You don't create the potential difference, or the current flow. ... they are capable to fly but you don't want it because .. you don't believe in what you do, how do you expect it to be. You don't have the trust in yourself to do. The trust of the success leads to failure. ... Listen to the talks of the Iranian reactors, I could dictate the position and direction of the flight of the smaller ball fly any where. (2:08). You have the chain of physicality which is the Cu, and that Cu which is the Gans state, creates a field flow and a connection with your physicality. It's you who have chained it and you want it to fly. It will not do. If you understand that and can make the non-motor system which is getting ?? and still do not get it done because ... the perfection leads to the failure. ... some how it doesn't fit into our structure. Many physicists and theologist walk away from confirmation of existence of the Creator. Why? How many of them we know. If you speak with many scientists when they see people of theology or advanced physics, they say, do you believe in God. No I don't because I see everything as physical. But when you sit and watch the confirmation of physicality leads to confirmation of a system which keeps it together, which has to have a condition of creation. (2:10). The day I can take away the fear of failure from mankind he'll fly. You put a doubt into it because it is ingrained to you. This is how this planet has chained the man to himself. I give you so much that you don't look outside, it's like a lover, I give you everything you want in the

house so you don't look outside for anything else. You don't need to go to a restaurant, I am a very good cook, I chain you. The love of the soul of this planet has chained the STM to itself. The planet doesn't ?? It's the man who has to understand that I still love you, but I have to go and see more. I wonder when, if it goes to the planet's demise that it releases the STM, it (the soul of the earth) will say that you are my children, go, you are free, because if I go you go with me and it's not the way it has to be. Would then you all find the freedom to act with your souls in the dimension of physicality. Do we need to get to that point, then it goes what kind of man are you? The last man standing, or chained to the soul of this planet. We find any excuse but we don't find the key to it, or understand the key to it and it's hidden in all sorts of ways. (2:12). It's like in the Christmas story in the books of the Bible it is written that there were 3 Persian Wiseman who brought the gift, because the Catholicism or Christianity was written on the basis of the Iranian Zoroastrian faith. The 3 Wiseman brought the 3 gifts, Zoroastrian is Mithraism, which all the 3 gifts were for the elevation of the STM through the physicality, speak good, do good, think good. These were the 3 gifts, but man has just come with the boxes now, the 3 gifts, which was the STP given to the man. When enter the Zoroastrian temples or schools in Theran on top of the doors there's a bird with the wings and man on one side, it's written Think Good, when you think good you don't ?? and this is a gift of life of the STM ?? STP to the STM, instead of waiting for the 3 wise men to come, they came but you never understood the message. Rick says, the roots of the word good is God as well. ... (2:14). Q: Alzar tells story, ... now we have to find the 7 billion souls. This is part of the work and for us to understand it, it's part of the structure. The process of life is very simple, man separates it and divides it and finds every excuse for the divisions, then he runs into problems. Any other question. (2:16). Q: Is there not a phase change in the Cu structure under temperature and pressure? ... We have enough confidence to show our own mistakes and not hide it under the carpet, that shows our strength and not our weakness. ... (2:18). .. we gave the USB stick to the governments and they hid it. (2:20). ... you pushed from the bottom with the testimonials and everything else and we continued our talks with the governments. The governments know they can't hide the T because grassroots has been taught. For people in grassroots know then the governments have to do something to keep the people in position. That was a beautiful way to do it. 10 years of continuous teaching nonstop... (2:22). This is what sharing of knowledge is. ... This is not Mithraism and Christianity that we have to ?? muzzle it so we can control it. Those of you who are familiar with both understand exactly what I am talking about. The rulers of Rome believed in Mithraism and God and that had no physicality, but people of Rome were worshipping statues but they knew the top guys believe in something else. When they found Christianity they brought it in grassroots they wanted ... now we found something like you lot (the rulers) have, we believe in God, Christ and something else the Holy Ghost. Then they had to find a compromise, they brought Zoroasterism in the name of Christianity, and that is why we have this mess. Or Catholicism. This time we didn't go this way, we taught the grassroots the basic fundamentals of the knowledge, the interaction of the knowledge with the STM and we told the governors, people know, you have a choice, join in because you are part of it, or they take the knowledge to the next step, then you'll have no room to rule. Because all these people you see on top as governments, governors, leaders, they all get sick. They'll have high BP, like you people at the grassroots. (2:24). Who helps, what helps, the knowledge of the T. Then they

become a man. Many people have a problem with me interfering and working with the governments, you don't understand, I taught you at the grassroots, they have to come to you, and it becomes a peaceful nation. It's One Nation, because we are touching the soul of both sides. We didn't choose the governments for the man, you chose your own governments, because you need them, your taxes go for when you are sick or your children to be educated, you can't do everything yourself, so you selected people to do the things and pay for the things to be done. But nowadays they have gone a little bit far with different things. .. I have touched the STM at the bottom. ..
(2:26).
(2:28).
(2:30). Any announcements for the KF will be made by the governments. We are out of this scheme. .. Q: What kind of material is to be used for the Cup of Life for the 14 members (Core Team), we didn't find a good answer for it. You mean you don't have one to copy. .. Q: You spoke about pure Cu and Armand spoke about brass, but it has lead in it maybe Mercury. Caroline said she didn't want to use this one and we should ask you. ... The Cup of Life which is made for the Core Team, (2:32). has a structure which has a dimension of physicality, and the physical body which is the red muscle tissues is Cu, that is why we choose Cu. Anything else you take or do you can make Cu wire from anything. We are making Cu wire of a new structure. This new Cup which we asked to be made last week is in a different shape or form, but of a different material, but it's for a certain purpose. It takes a long time to produce it, it's not an overnight job as I explained in the teaching to produce it. The Cup of Life is made for the STM and not the physicality, the ones which are made for the members of the Core Team. The same with everything else which goes around with the work of the KF, people still look at our work (2:34). it's based on the work of the soul and not the physicality. Q: Is there a relation between Cu and the STM? It's the soul of the physicality of the man. Q: Right, but the STM would it discern between Cu or lead or other elements, it wouldn't be, maybe registering to the soul in that way, it just sees fields. (Jalal says, the STM is the connection, it's the FP. This is also for John). .. I am listening to what has got to be said. We make a Cup of Life in another position in the U, ... for that body in that area or location, that environment has lead to the creation fo life. (2:36). And on this planet our muscle tissues are totally based on Cu. Our physicality is connected to Cu. A deviation, a split in the strength of Cu leads to existence of the man. It's a simple calculation fo the strength of the fields, our Cup of life leads to the life of the STP. It's understanding the simplicity of it. Q: Is Jalal asking how to make a Cup of Life? They asked what it is made of, not how to make it. What is the structure of it. If you understand it in a deeper way the C of Life is the body of the man. It's the cup which carries the life. But man always wants something tangible that he can connect himself with. We are testing new things to be able to bring a new light, a new understanding to many of the KF K Seekers. (2:38). Introduction of new material that you start looking at different dimensions and different aspects. The teaching of today, very little, but if you understand it very powerful. Hopefully, next week I'll introduce a new dimension in teaching. It's more in depth of understanding the soul and more in understanding the relationship between the STM and the physicality. More in line with .. a lot of you are wishing, or dreaming to see a flying saucer, SS. In a way, is that SS the physicality of the man. I'll give you a point, maybe one day I'll come back to it, depending on how much you understand, or how

much I can be a good teacher and not teach you much but let you understand (figure it out) it yourself.
(2:40). Draws a man, chakras. Draws another lying down. Then which spaceship would you like to fly in. If you remember what I said about the Chinese space reactor, we decide the extent of the opening and which part of the STM of the physicality of the man, decides the expansion of the dimension of your soul. Why do you dream when you sleep? Maybe we opened one of the Pandora's Boxes of the man. (2:42). Q: Can you continue please? No, you need to think. .. This is part of understanding the creation of the man and he hasn't yet understood this. Now we understand how much more man still needs to learn about himself. Happy New to all Iranians across this planet. Hopefully the KF will start working with the governments and we'll bring that peace to all of us.
(2:44).

Video
END

268th Knowledge Seekers Workshop - Thursday, March 21, 2019
(,)

(:16). Today is equinox and people of the Silk Road start the new year. Usually we share gifts at this time. Today we give you a big gift. ... Zero time communication .. (:18). The STM has always been working at zero time communication. ...
.. (:20). The Zoroastrians said, think good, do good, speak good. So if you look at it Iranians were already trained before to be man of space, to be ready for today. .. Different cultures have matured in different ways. Many of the scientists who talk of zero time communication means that haven't understood that their own souls have been at this work for centuries. But how do communicate with this ...
(:22).
.. our soul travels the U. (:24). When you dream it's zero time communication. Your physicality is in the dimension of this planet but your soul is in the presence of the soul of the speaker or the one you communicate with. Then we understand that man lives this double life of being in 2 dimensions, keeping this physicality on earth but letting the soul to fly on the wings of the freedom of space. Then it comes, how do we bring these 2 together, can we exchange, can we develop systems that our words of physicality is heard by the ear of the soul of the receiver and not through the ear of his physicality. Do we need to leave this planet to become men of space, when now we understand that the STM in zero time communication can travel the span of the U. Is there a need for the man to leave the village of earth. Or do we just leave because it's nice to be tourists of the space. When we want to go somewhere or to communicate then we use our soul. But if we want to become the tourist of the space we use a SS. (:26). ...
(:28).

(:30). .. The leaders of the world have decided to go the path of the KF and in due course we'll all become the passengers of these ships. I have been asked not to talk until they are ready, but the preparation for this journey has already started. .. (:32). The voice of our

work has been heard by the leaders of this planet and we have seen the response. The work of becoming travelers of the space is not just to get on the SS now it's to learn the zero time communication of the STM. If I could share with you what I have in my hand and what we have in the progress of the mankind towards world peace, most of you will say, I was there when he said it, and we'll deliver what we have said. The leaders of this planet have decided to take the path of peace and we have seen the first signs and we have become part of it. It has been our wish and our destiny to be at this time. The process of disarmament and world peace is a gift that we can give you today as Iranian new years gift. It's not a dream, even in the past few seconds before the teaching started I received some pictures which confirms more the commitment of mankind to peace through its world leaders. We are not dreamers, we have worked so hard to achieve it. It's not a wish anymore, now it has become reality, the fact which now takes very short time (:34). to become part of the structure of humanity in the coming months. Those who are very close around us they know the situation. We want to shout but we have to let those who did the organizing to do the shouting, it's their victory in understanding that peace is the ultimate goal of the human race, not us, we are the facilitators as KF. If I learn to speak in a zero time communication with the man on planet Zeus why don't I do it on this planet. If I understand the Zero time Communication with the man on planet Zeus or anywhere else in the U, these are all entities which have no understanding of their living (?? they are not self-aware) but they are there as creatures and respond to me, I smile and they smile back, most probably I say hello through my soul and they respond back, I say, I love meeting you and I get the same feeling back that they love me too. Then it comes back to me on this planet, if I can relate to all these things in the U, would I read the soul of the lamb or of the chicken and he says to me, don't eat me, I love you, I have the right to live. Then would we take that step to kill to survive? (:36). Or would it change us to understand that this ZTC allows us to develop new tools to be able to understand new resources of life. Then life becomes very hard on this planet because even a grain of rice has a soul. We know it has because when we send a grain of rice or wheat to the lab, the lab sends a report, 15% protein, it means it carries many lives inside it. Protein is not on its own, it's a cycle of life, your muscle tissues has protein or your eye, then you have to consider, ??? can I talk, would the man take the new path, ZTC is zero time supply of energy from the U. Would we find a way to ??? energies which are not in the U, become the source of life for mankind to live. We are not philosophical, this is what many of you are going to face very soon. This is just opening up a little gap between the door and the frame. (:38).

(:42). Many of you think this is not for me and it won't happen in my lifetime. Or when it comes I will learn. I have a very bad news, extremely bad news, the time is now and the place is here where we are. The time has come for us to become part of hte U Community and in a short time many of you will take to the wings ??? You will learn all the tricks of somersaulting in the space without anything and saying I haven't eaten for 3 years and I am not hungry because I have learned how to tap into, what nobody else needs as energy. You see, there is a secret in the world of the U. Now that you understand the work of the Gans, you have seen and transferred the Gans into the water and you drank it and it gives you the taste of the orange. Many of you were wondering what are the stars for, that is

exactly what they are for. They are the providers of the energy for the man not to kill. The stars are the filling station for those souls who travel the space of the U that they do not need to kill. Unfortunately man waits for these fields to convert to the matter that he can use it, to receive energy. (:44). When you become passengers of the U your filling stations are all those billions of stars in the space you just need to learn how to tank. When you want to tank of car there is a fuel tank and a key, you have to put the key inside to open the cap. Now it's for mankind to find the key to tap into the universal energies released by all the suns of this U. Now you know why there are so many stars, they are not there for the beauty of the eyes, but for the nourishment of your souls. Then mankind shall not kill. The same as the earth takes what it needs from the sun, you become another planet, a planet of the soul of the U. Then you understand that we have already been the passengers of the spaceship, we just have to look outside to see that we are inside one. We always waited to see if there is another one (out there) that we can see. When you travel the U you don't look for food or energy because there are billions of star filling stations, (:46). big, strong, small, weak, many planets and the rest. It's very much what you are used to. You have different ?? and sources of fuel stations ..
But you always looked in one direction, to consume, you never looked that for you to be able to receive the rays of hte suns that you can use to exist ... you have to give back otherwise there is no room to fill in, then you understand that only stars can exchange energy with stars, and the STM is a star in the universal galaxy. You can't receive if you can't give, you can't fill in if you haven't emptied a space. Then you understand what was said at the beginning of these teachings today, earth has 7 billion stars. If there are so many stars on this planet which we see in physicality why don't I become the feeder of the souls and I will receive what they don' t need, for me then in that respect, I ?? adapt that STP to fit in with the environment of the existence, then you'll (:48). find that man doesn't need food to eat, because it is given through what it needs, recognition of existence and the composition of the fields of the U to confirm that man is a man of peace not war. So have you understood what the ZTC is, or are you still in the maze of a lack of knowledge according to your own intelligence. How do we make this ZTC to work, now that we know that our soul is the tool of communication how do we tap into it. We need a Gans of CO2 for communication line, Zn for connection to soul, we don't need any Gans of Cu that is for physicality. But we need to communicate with the soul of another being from this planet, could it be the protein or the AA of the Mg with a little touch of Ca. I always said that O is the M field, (:50). not Fe in the life of creatures of this planet. As you have seen that only Fe gets attracted by magnets made of another Fe, now that you have created a STM with the fields of it, how do you match up. Or you can match up with the other souls. It's getting very complicated. I can feed my son and at the same time he can feed me and the wife is next door and she is feeding both of us through her soul, but we are waiting for the cuddles of physicality to confirm she loves us. Then the question comes do I need you or do you need me to teach each other how to make the Gans of the soul and the system ?? without motors that the soul can recognize. Or we start understanding the operation of the brain that becomes that dynamic core that in translating the information of the soul to become the motion of the arm and the hand, but becomes the language of the man, the STM and the physicality of existence in the dimension of the ??? (:52). Now that you know that you have been carrying this ZTC

and a lot of you still have a problem in finding it and now you have to communicate with it. Do you want to travel alone or would you like to be part of the passengers of a SS, ... now that you are on this ship you can't eat me or the others, but I have plenty of energy from the resources of my soul and don't need, if you are hungry would you like to tap into it, and I will take some the things you don't need. ...

(:54). Or do you still want to be in the life of denial and just wait and see so that I am not the first one to make a fool of himself. It's a very simple teaching for today, zero time communication, the STM and the confirmation that I exist through the interaction of the STM with the others. And now for the first time I found a free energy, a fueling or tanking station called the sun, I don't need to wait for the earth to convert it into the meat, to fatten the beef, and then I take some of it and then I have to get rid of the rest of the physicality of it. This time I take what I need. When I need it I tune to the taste that I like and at the same time I am not wasting so much energy to digest the physicality, I become myself the source of life for the others and then I take what they don't need and I give them what they don't need and I become a new Jewish businessman, just put some profit on it, a 100% is not too bad, but what am I going to do with it, there are no banks and no factories to buy stereo systems and you go and see children and you bring them the gift of the U in understanding more and not another Ipad and Iphone. Any questions. Ask yourself one question, (:56). how many of you in the last 2 or 3 nights had a dream and you remember that dream, so you have already been the passenger of zero time communication, but you lost your mobile phone and you think you can only find it when it's dark because it glows in the dark, but it is really with you 24 hours a day why don't you tune into it all the time. 40 ... (:58).

(1:06). Q: Please explain more about the soul and its function in the network of souls called the STM, what happens for example, to a soul of rice in the body of the man how does this effect the U? Nothing, we are just a bunch of souls forever going from one to another. We are passengers of the U without physical dimension, we call it a soul. Q: So what would happen to the soul of that grain of rice when it enters into our mouth? It is still part of the same. Listen Mr. Rick Crammon you are part of one of the very first ones who mixed the Gans' put them in a ball and rotated them. Did they mix and totally disappear or some kept their color or through the interaction of the fields create new colors, but they still stayed the same. We just become the collectors. (1:08).

(1:16).

(1:20).

(1:24).

(1:38).

(1:46).

(1:52).

.. Q: Last week you said you'll teach us about the dream and you have done that, but what is the difference between sleeping, (1:58). the position of sleeping and of vertical? It's the difference between the horizontal and the vertical people. Q: But it's the same creature. Because the physical activities are low so the soul activities look to be high but it's actually the same ?? The work of the STM is like a background noise, it's always there. It's just man when he adds his work of physicality to it, it just burdens it. We talked about the man, .. draws him lying down, all the chakras are here. (2:00). .. the lying down man his soul is more free, it's much more interactive. Q: So this is the secret of the soul? There is no secret, all it is, is this guy is free here, he can expand in any dimension. .. even you can be awake and lying down, this has different interaction with the fields of the planet. If you take an image (picture) of the aura of a man lying down and horizontal they are very different from each other. Q: How will it be in a SS because the earth may not be near by (2:02). and would it be the fields that exist in the U plus the fields of the ship, so would it matter if we lie down or stand up? You going to be like this. In the SS you have another problem you ?? a Star Formation, is along side it. Q: So would a man of space lie down in relation to the SF of the core of the SS? When you go to space. When you become a long time passenger of space a number of your center of energies move quite differently, and some amalgamates with the others, especially those that are more connected to physicality, so you become more centralized. (2:04). And the STM has a bigger influence. .. (2:06).
(2:08). (2:10). Lady shows video.
(2:12). .. Mario presents Periodic Table of plasma.
(2:14). .. Instead of counting neutrons and protons that the numbers represent comparative energy levels. .. (2:16). The 7th Health, and 56 and 60th KS Workshops have information about energy levels. (2:18). .. flower of lie and Mr. Russell ... our 12 hours of the clock come, cycles of 7 the week ... (2:20). The fields divide into 12 segments .. where the circles intersect, the black dots, they drill a hole in the dimension, the universe, portals. distinct layers . (2:22). The same patterns repeating again and again, fractals.
(2:26).
(2:28).
heartbeats..

(2:34). ... (2:36). (2:38). Q: I don't think the U makes so exact, I think it's the human beings urge to measure. That's a really good point. ... We do measure things. In this we can look at the actual interactions between ... they do behave according to certain rules. (2:40). This was given by the man of the universe to humans. .. it's a tool to measure the variations ...
(2:42).
... Rick shows video to demonstrate Mario's presentation...
2 toroid (2:44).
when they counter rotate to each other they can merge instead of bouncing off. (2:46) .

when you combine them they become a perfect sphere. (2:48).
(2:50).
(2:52). Rick you just help me visualize how a portal can work, when you put the stick inside the toroid ...
(2:54). Alzar reads for the Iranian new year in Farsi ...(2:57). The teachings of today are very much part of the portal teachings, it's important to understand and collectively putting everything together ??? the destiny of the mankind in the space. A lot of people come around the work of the KF expecting different things, but not many grasp the totality of the knowledge. In the coming weeks we'll look into the depth of the knowledge how to connect (2:58). all this knowledge ?? to mankind. The KF is part of the structure of the soul of mankind, which means we try to find our own soul, we are no guiding light to no one, no prophets or whatever to the others. It's understanding the totality that in the space we become mature enough not to behave and have the childish behavior but to be the man, and to be proud to be a man from the planet earth. In the process many people have many expectations to understand that the knowledge of the man is unique for the man and mankind. In the next few weeks we'll try to go more in-depth in the understanding of the totality. Very soon we'll announce the opening of the first international spaceship center in the world. It's a majestic place and it'll be the first position to test the space flight. I have been there very recently and it's beautiful to see it and mankind is entering in the final phase in the frontiers of moving into space as One Race but it needs to understand more of, (3:00). The knowledge is complete, it is just understanding and decoding it and being able to be a useful entity in the structure of the U. That's all it is. We are not trying to teach man how to fly, but we are trying to teach man to be perfect once he appears as part of the U Community. Not to be shorter or below, but to be equal and this takes a lot of work.
(3:04).

269th Knowledge Seekers Workshop - Thursday, March 28, 2019

(Attachment is holding us to the planet, our time has come to be ejected by this planet like the birth of a child, we will elevate.... ,)

(:23).

.. There is a lot more that needs to be understood, (:26). let alone put into practice. Zero time transportation and communication using the MG field of the U is the only way man can get out of this planet and travel the depths of the U. Once we understand this man will move to the next step. We have to realize that we built these systems over years for flight but up to now we have never brought them to work within the structure of the universal M fields and this why that most who test these have found problems. I have talked about this in my teachings many times but maybe today is the time to start to bring it home so it makes sense. In space T of today ... we fight the MG field of this planet by

using rocket fuel or by flying with the wings to over come or balance part of the MG field of the planet. How does the Iranian spaceship program work (:28).

(:36).

(:42). Do we need to go back and make Gans Boxes, make composite Gans' inside the Gans boxes? If you understand how to make composite Gans' inside the Gans Boxes this will make life much easier.... you've seen how they flip, and in that process the amount of energy released is enormous. Those of you who played with CH3 and conversion of it to Deuterium or to CH14 all gives you the same and how you can flip between the different Gans' in the strength can give you the same process MG fields that can power systems that can fly and reject or be attracted, repelled in every shape or form and strength that you need. The understanding of zero time space travel of today in zero time space then has become part of the reality that we have reached. (:44). Many of the K Seekers have to test and try. ... you need to understand how fast CH3 has changed to C14 or Deuterium, if you understand that process then you can control MG fields from the Earth's MG field strength or the universal MG field strength. Going back to the teachings of 6 weeks ago, in which a lot of space agencies came on to see what it is, (:46). now they're going to get themselves another understanding.

(:58). Any questions. Q: John asks, are you going to give us any hints on what the strength of the moon would be? Would you like me to spoon feed you. Q: Does it have to be the moon or somewhere half way between here and the moon? I'll explain you can do it yourself. We don't always have the moon in the space do we? Q: Maybe a satellite? Maybe an imaginary reactor. Rick says, the way spiders can travel through our atmosphere is they send a tendril out, just 1 fine thread and it get picked up by the wind and they can actually fly. Mr. Rick you get 5 out of 10. So let's expand on it. ... Q: Can a spaceship send out a field, (1:00). a tendril into space and use that to pull itself along, the saying is pull yourself up by your own bootstraps. Would you like to become more plasmatic then matter state. ... Do we have any housewives who have played with the Gans' maybe they can give it to you much easier then you think. ... (1:02). You see the play with the plasma of the U is what we do everyday. Every breath you take is G attracts from the moisture or mixture of this planet what it needs. It doesn't take everything which is in front of it, on a matter state it might do but not in the plasmatic state. Q: Siad, traveling with a SS the closest star is 4.3 light years away ... (1:04). .. Stop, stop ... am I correct to speak it that way or not .. this is an assumption of a bookkeeper who became a physicist who never understood about the physics. Now you're a physicist and you're talking like a bookkeeper. ... Who said 4 .3 light years, light of what? You are still a camel bird like the Arabs .... You speak about my T in the space T in the plasmatic MG fields and then you refer to the camel, the speed of light 4.3 LY, it doesn't fit, you haven't understood the meaning of space and time. Why LY away, at what strength of the Pl. You want to go 20 million LY to the same destination, you're quite welcome, get on a donkey. If you want to travel the space with the understanding of the Pl T, (1:06). you create the strength of the G field of the destination, wa lah, you are there. How long does it take you to feel, I am hungry? 4.3 million LY. This is the limitation that man has put in

our heads and you all ofllow. The bookkeeper should have stayed a bookkeeper, especially a Jewish one. ... You have put that restriction, I have told you many times, if you want to go with a camel to the moon, you're quite welcome... You speak of the space time MG field of the Pl, you have it in your hands, you make it at home, why are you confused between the 2 states. What is holding you back to think in plasmatic conditions and not in bookkeepers conditions. You have the tools ... (1:08). .. You speak about the CH3 (red), CuO (greenish), ... why do you see them in different colors and how can distinguish a plasma field from another. Then what is the problem in understanding that you have a new tool, new dimension, it's you who is confused between the 2. ... when you speak about the application of the Pl and you understand its field strength you decide the speed. (1:10). Match the speed of the light it gets from that star to you, then you are there instantaneously, it means you have understood its MG field. Understand the work of your kidney and you already understand the whole question, it creates the MG field of Cu, Zn, and every other poison in your body and it just pulls them in and converts them to matter state, this is how you create your urine. ... if you're in the Pl T and you have understood the totality of the knowledge, you decide the speed. I want to be for 2 seconds. ... Now that we are coming to this point and a lot of you are matured in the knowledge of the Pl, I told you it's like (peeling) a banana, how much you want and how fast you want it. .. (1:12). .. Now you go into the details of the simplicity of the knowledge we have. ..

(1:14).

(1:16)
(1:18).
(1:22).

(1:30).
(1:34). The simplest way I can put it, how did your soul come to see the light of the star, to know that is a star, this is the question you have to ask yourself, your eye reflection or the work of your eye sees the star or light. First of all your brain interprets that it's a light from a star and not a light of a car or a plane, then in that process what gives, and the information is transferred to your brain and part of that inof is deciphered by your soul that this is a light from another planet, do I know anybody there, because the man sees the light of the planet, the STM sees the passengers of that planet through their soul, so leave that schizophrenic life, that you see the light and you recognize it to be from a planet and then you have a bookkeeper who tells you 4.7 light years away, but your soul sees the light in ?? limitation of your physical observation, and says, oh I think I have some friends there, I haven't been there for a long time, keep the eyes there I am communicating. (1:36).

.. we'd have to find a way to connect with that strength. (1:40). Your soul does, you recognize it, you see it, you know it. Rick says, it takes one to know one. Yeah, good morning. I'll bet if we have a mother here, many of them gave birth, they can answer you instantaneously, but they have no confidence. If I was a women who gave birth I would told you straight away the answer. Pia had an answer, we could go by a portal inside ourselves. ... Let me tell you something, how does a mother communicate with the soul of

the child inside her. How does the child carry the imprint of the emotion of the mother. How does the soul of a child know it's time to be born, how it takes the position to be born, why do children move upside down to come head first out, is it MG field positioning or genetically we are tuned to do that, and then even that is based on MG field forces. (1:42). If a mother can communicate with the soul of a child, what it's needs are, hungry or whatever. How many times as mothers you feel connected to the child inside you. So now you are inside the zone of the U, now you become the star and the U is the mother, there is not difference. It's us because we don't understand it we make it to be different. In reality it's the same thing. We are in the womb within another womb which itself is a part of another animal called the galaxy or another animal called the U. We have made that decision because it's according to our understanding and intellect, but the reality is the same, we are all a bunch of souls in a pregnant mother called the sun atmosphere, if we are sitting outside, we are like the chick inside the eggshell, because the MG field of the sun has created that eggshell, in interaction with the field of its environment, so we are already another part of a part and we create a part lower and call them a baby of the mother can feed it, so how do we do it. I deliberately referred to it in the recent past, the soul of the earth. Is it time for the man to mature that like when the child gets matured and gets rejected (1:44). or gets born, is the totality of the STM has matured now that the planet earth wants to give birth to the child ?? born into the dimension of the U Community, in the new dimension. Is it us who are maturing or is it the collective essence of the soul of the creation of this planet has reached a critical mass of the strength that it is time for humanity to be born into the U Community. We are getting rejected by our mother, we are getting evicted in a way if you look at it, and people like me are here to show you the best way to get out. I am the first .. break of the water as you call it. Rick says, you're the midwife for mankind. I am inside I came here by mistake. There's an old saying, you know how the Jewish people give birth to their children, how they get born? In Flemish you buy a child, in the Jewish the father stands and throws a coin the minute the baby comes to grab it. Rick, says, he wondered why the babies change and go head first. Now you got your answer. (1:46). .. we never get what we expect do we. In a way by being evicted ... Yeah, can you imagine how 7 billion are going to shout when they are evicted. So we are doing it in piece meal as they say. ... Does it mean that the collective soul of mankind has reached the point of maturity to depart the planet? And the answer is yes. We are just putting it together that collectively so that the birth is without any hiccups and we give a perfect birth into the U Community. This is what it boils down to, all these teachings. Q: When a baby is born it develops the physicality as well as the soul and if we have this idea that what you are saying right now (1:48). is that we are getting born again, is this birth going to be connected ... We are not getting born again, we are getting kicked out in the U Community. Q: But is this process connected with the change in physicality or the soul or is it more like ... It's, each soul is on its own, it's like fish who spurn a 100 eggs, now they're born together, we are in that process but this times there are billions of it. The STM and the same as a soul of a fish, and a cat, it's a collective maturity of the soul ... man will understand this very soon, I brought this discussion yesterday.. it's a collectiveness of the 7 billion. When you sit and you talk to people, you understand that there is one way to it ... are you going to do it one by one, which we did, or are you going to it collectively ??? there are others to do it. We carry the whole ?? mess. We have already done the one by one, now we do it collectively

that the whole process of the whole nursery to be gone, and that needs the world leaders to be doing it. ... it's very simple what I have done to the humanity and it amazes them how I can take you anywhere I like, but it has to be done by you. I just tell you afterwards how you have been guided, you think you did yourself. Your RNA and DNA accepts it and then it goes to the next step. Just go to one of the teachings where I have explained what we did and the past 5 to 7 years (1:50). in respect to the sharing of the knowledge. We played a very simple game of knowledge, .. you are all ofllowers of the KF, millions of you listen to it, and many of you walked away, and then you came back and listened a little bit more and got hooked again and went on again. When I released the USB stick with the patents to the governments I had upheaval from the KF supporters, I received a shower of, "you betrayed the humanity and every other thing on planet ", that I gave my T to the governments. Then after 2 and half years I found an excuse ... to share it, I opened the patent and everything else. If you remember we crushed the European patent office, 400 servers backed up and they still crushed, because many people were trying to download what they thought was a secret in there. So I shared it with you lot, the governments had it for 2 and a half years and you thought they did nothing with it, but they did everything, all the governments in the background had some senses, they worked on all the paragraphs and appointed scientists to break this thing up. But I came here and I taught you one by one every week like a patient father, in every crook and crack of what it was to get where you are. Now the governments know what you know, but the governments can't go any further, and you public (1:52). can't do much because you don't have the financial backing to do a lot of other things. So now we are going back to the governments. The public knows, so we all become Christians or we stay Zoroastrians as we say, or we copy both and call it a new religion. Now the government knows and the public is catching up very quickly, so we talk to the governments. What are we going to do, the government knows and the public knows and will catch up, will there be a need for a government when they know they can feed and do everything else themselves. They don't need any metals to make cars and the rest of it. Okay, maybe a few million achieve it, what are we going to do with the other 7 billion? Therefore as a government we better start sharing that everybody is Christian now. We call it a plasma technology. As I said, I am a Master, I gave to them they played it themselves, they thought they had their time, but then I came and taught you in public and some of you are very wise, at the same time government scientists ?? you lot, because they thought they are clever, but they're not. They called me and said, we made the thing can you come and show us how to make the fuel, and I thought my god, I am glad I am Iranian, because Iranians manage to do it themselves ?? impartial. So now we went back to the governments, you don't want us to do more sharing, but we still share, is let us teach everyone at the same time. Put the guns down and we'll spend the money on the knowledge and the existence of the peaceful coexistence. And we are at this phase at the moment. That's why in the past few weeks we have no announcement to make, we got what we wanted. (1:54). And we are heading for peace in such a speed. But there is a step behind it, the rulers who broke the rule now have to answer those who are there to be correct as rulers. This you will understand very soon. We work with the nations that are peaceful and whose intentions are peaceful. Economical advantage doesn't make you a predator, but slavery and colonization makes you an abuser. Now we have the knowledge in our hands, the people know, the governments knew they didn't do much, whatever they knew the public knows, now the

governments know that the public will catch up very soon, so we open our work together. Watch the space. This comes to the knowledge how are we going to expand. The development of this T in the next few months will be so radical that it will shock many of you. We have, you have done all the work, by your presence of some 100 million a week listening in different ways and going up, and in special cases, it's a lot of number which you built up, I just taught. Everyday the numbers increase .... just because you have a car outside doesn't mean you (1:56). are going to go joy riding all the time and spend your life in the car. It's there and if you need to go somewhere you get in and get the job done. We teach everything about the Pl T and when you need it you use it, the knowledge is there. You don't have to be all the time on your Gans boxes, it's there if you need something, if you're hungry, get sick, want to go somewhere, you use it and then put it aside. But it will become so much a part of your life ... we are making it to become part of your life. A lot of people don't know English so they shouldn't fall behind therefore we set up an international program so every part of this planet is a part of the T .... If you want to go to the moon and see the light of it you should be able to make the travel to it. Now you understand I said if you want to go from this point to that point, most of the time it's actually breaking and starting off, most of you are space born, it's zero time space conversion to the matter state friction takes a little time. Takes a lot of little times. (1:58). Every reactor and dynamic system you made, they can fly, if flying is to move form position it means you have created the right field strength it doesn't move, but you look at your own systems, you put a motor underneath, you have put a big balloon and you strung it with a million ton weight at the bottom, how can it fly. Those who managed space gap it, to break it up, saw a little bit of rotation and a little bit of lift but they can't break through. Now maybe you can, maybe now even governmental research offices can reach that point. You're dynamic motors is that million ton weight that absorbs you to the planet and it absorbs that weight before you go up, so you need a lot to break through it. Some people do, but some of the fields, you need the totality to be able to break through. So how do we fly? Q: But in a way isn't our body the same as the motor keeping us here? Good morning, you got a 9. (2:00). Q: Sorry I mixed the matter with the plasmatic state, new question is, how can we train our thought process to think in plasmatic state? Fall in love. That's the only way, the best way I can explain it. I have said it many times. What do you do when you fall in love, you give up everything. Look at it, the king of England abdicated because of the love. You are not more then a king, even though we don't believe in them. Q: Become weaker then that strength you receive then you get attracted. He's cheating, you get blown away, don't do that. (ha, ha). .. it doesn't mean that just because you are getting fed you are going to come closer too. It means balance or it doesn't bring you any closer. Q: What about the eyeball and the destination drawing you had there, what would be the strength one would want to achieve if the stronger gives to the weaker? I am going to stop you there because there is something I have to explain. Understand this for now, now we are in the Spring, (2:02). if this is the sun and this is the earth and if a few degree deviation can create such a seasonal change and variation, now you can understand what the field strength can do. If you understand this you should be able to develop a system that attracts you or pushes you away, ... But why do you work with the sun, it so small, why don't you tune into the MG field of a black hole, center of galaxy or U. Higher speed longer distances. (2:04). I tried to open your horizons of understanding. ... if you just listen to his soul we just convert it we don't need

the microphone. Hello. Is it your soul speaking or is it the voice of your microphone. I think it's my soul making a miracle. (2:06). Q: ... before we were trying to bring these Gans' back to the matter state, we tried to heat them and different things and then like you said we reverse the process ... I just realized that to reverse the process we just have to introduce the Gans to the environment, we kind of drop its field back, in that way it can open up and go back to the matter state, it's the only way, right, it's the same thing that is actually happening to us here on the planet because if we look in the whole thing, we are in the plasma of the earth which is within the Pl of the U, can the Gans be brought back to the matter state, does that mean that if we built all these things, we could put one in the middle of the town, but then isn't there a danger we bring our bodies back faster to the matter state if they absorb these fields back so fast? Not really, it's a state of ?? find, do you want what is there or not, a state of the soul the strength of the need. Q: We are not entirely from the earth, we were discussing that our energy is also coming from the sun, both, which means in a way we are feeding the center of the planet, right, which is the collective soul of the planet, so slowly we are actually creating the matter on the ??? (1:08). You are going one way only, can we go both ways, the planet is feeding us to be part of it too. Yeah. So you are already handcuffed and chain locked. So what do you want to do with it. To swing you need something to jump off from, to hold on to. If you jump without something to hold on to you keep on falling back on earth. If you want to travel the depths of the U, just change the name and position, sun, galaxies, universes. If you jump but you have nowhere to land to, you end up back where you came from. ... Let me explain the other part, in the work of the U you already have a field which is given you, if you can see it, or feel it, you can lock into it. Q: What do you mean lock into it? Because the fields are already ?? part so all the fields are active? So if we feel it consciously it means we go to the deeper fields in the mind, right? But it's already there because we in the center of the planet, because the G is stronger, right ? (2:10). Okay, now that we are talking universal let's take it a step further. You have the earth, you are standing there, but this (earth) is connected to the G of the sun, sun's G is connected to the G of the galaxy, and to the universal central line. This is all this way traffic, but at the same time what about the M of it. So how are you going to do it. You have to also consider the G field of the sun and so on when you want to travel out of this space. And then you have to consider the G of the galaxy when you want to travel the depths of the U. Or can you use them to travel towards. This GPS is multi purpose use, it's just to understand where it lands you. .... (2:12). ... the same applies to the sun, because the fields of the earth are connected to the sun. What I am trying to explain to you is to look 1 step further, beyond what's on the table. ... in understanding the totality. Q: ... Have you become Mr. Bookkeeper? so it's not obvious is it, so the understanding of totality you have to .. you might not need it, (2:14). but it is there that it might do something. Q: Okay what is your understanding of totality if my logic doesn't go in the right direction? Think a little bit. Q: Okay you are suggesting that this travel would be possible but it means that we have to have like a second field that isolates us from the earth, then we can go? Good Morning. But what is connecting you to this earth, it's your physicality's MG field Inertia of the mass of your body. Q: Is this connected by what you said, we are getting fed by the earth, so does that mean if we tune to a feeding station let's say the sun, we would get locked by the sun and not the earth, or let's say to the galaxy then we could travel anywhere because we are locked to the strongest? ... (2:16). You see many of you

have worked near a space reactor and those of you who have, haven't understood the work of it, if you spend a lot of time in the vicinity of space reactors especially the ones set for flight, you come to realize your behavior changes, your desires changes, your comprehension of the totality changes, unless you are materialistic. Many of you ... the fields of it, because it's trying to find balance between itself and the planet and you are part of it, you feel the change. In my talks, I explained the tickle factor ... I watched as people walked in (the room with the reactor) and they just bend forward. This was my dynamic field detector. ... (2:18). ... How do we feel that field and why does it suddenly touch us that way. This is part of us, we know it so well but we always ignored it. ... Why do some of us have a fear of falling, where does that fear come from, has it got a reason, that you can measure the MG field of the planet and doesn't know how he might react to it. It has some essence of a feeling that we are afraid of it. In our body we have a sense of measure but we have never developed it, because now we have a guy who measures it and says, 4.3 Light Years. Can you imagine how badly you are going to crash on that planet/sun when you are out of the earth and free falling 4.3 Light Years, it'll be a big splash when you land on that star. Is the fear of falling associated with this planet only? Because in the space you can't fall. Would it be something we loose? (2:20). It's one of the first feelings we loose, because we can't fall, it's zero time space. Fear of loss. When everything is provided for us in the space do we feel, I need a shirt, ofod, I loose .. you can't because everything is there. We need the STM to feed if there is any physicality. Why do we insist on feeding the STM, because when you change dimension and you don't have legs what are you going to feed. Like an amputation, bits and pieces, are you going to keep on feeding the brain of it. Let me explain ... In my teachings in the recent past I explained this in a very soft way. This is the brain ... we explained that the STM what it creates, radiates the skull this way. (2:22). But when it has no bottom to it, in respect to MG pull of the earth has created the arms and legs and body .. now when we are in the space when there is no G pull, would the STM become all the same (sphere). Then you become a sun. Maybe for the first time you can understand what you become when we call you the travelers of the space. Or you become like this (irregular shape) depending on which MG field comes from where, and the soul becomes the center of it. Or ?? primarily you end up to become a star, because now this part (lower body) which is created due to the pull of the planet doesn't exist anymore. Is it the fear of physicality that stops the man to reach the point of falling in love, to give. Then if you do this your are not ?? of the planet. What's going to happen with you? Now you understand how we make a star from the STM once you leave this (physicality), because the G pull of this planet doesn't exist anymore. So you don't have that pull, or would the man want to have an arm and a leg connected to earth. Now you understand how you all become shining stars. How in the depth of space you don't have the G pull and you end up to be that. I made man in the image of Myself, to be a star, a giver, (2:24). to fall in love, which is giving unconditionally. I told you that the development in the past few weeks, that we are taking you to become part of the Universal Community in the right direction, right way with the right understanding. Do you need all the packs and ofod, how are you going to feed yourself. How do the stars in the sky stay there for millions of years, where do they get their energy from or do they tap into the universal energy and they give what they don't need. 45

(2:26).

(2:32).

(2:40).

.. The process of change of emotion will come with detachment. (2:44). When I left a beautiful business life for what I sit here now I had to make a decision to be detached, it doesn't matter what happens, and it's very hard for your loved ones and the people around knowing that you have, that you can get access to it but you choose not to. Because I know the attraction of the money, of making. At 27 years old I walked away, it took me 5 ?? years I went back to it again, and again I walked away later on, but I wasn't committed to develop the T further, I went back to it and I made it worse ?? But this time I did exchange of my life for the T and the development of it for the peace of man. I stuck to it and I see the benefit of it, it doesn't matter what, many times Caroline tells me, you shouldn't have one it this way. I said, if I wouldn't have walked away from it and become detached from it I would have never been able to do what I have done. Detachment is the key to it. Then you can detach from the physicality. Then you can become part of (2:46). not even being attached to the U Community but being a part of it. That's what I keep on saying, to be a part of U Community. Not to become the UC then you become attached. I don't ??? I live an example of the way it should be. But when it's needed it's there, because I am not attached to it if there is a need for it, it jumps out. Everyone across the KF, especially in the last year and a half have learned that, somehow we passed the test and made it to the next ... we get to the point. Detachment with all the harshness of it, man needs to understand it because then when you go into space you won't cry to go back to earth, I miss my fish and chips... it's there, it's not becoming a hermit, it's understanding that there is a level of satisfaction, not needing to be attached to it, when you are detached from physicality you're not attached to this planet. a process of detachment, self-satisfaction from the STM not through physicality, then I can give. I have a scan of my brain every year and when I saw the last one it frightened me, I said, how bad am I getting. Pretty soon there won't be even a brain left in there because everything was given. What do you expect this is the point (2:48). How much are you attached and then you get attached to physicality then how are you going to leave this body and become man of space. Or are we just dragging on, let's get on the plane. ... ??? teach the other souls not to go this way, we crashed on planet Zeus. Upgrading the souls. Q: The second part of my writing was that I hope the souls around up there who know me come and guide me? (2:50). How do you know they are going the right way that they can guide you. If you get misguided you'll never know. Q: Because I can make now and feel them around me I think where they are they'll take me into their arms ... if I believe God is kind, so in each transition He has been faithful if I do what He wants. So the arrangement is in a way that I would not be hurt. But I can't know anything with my brain, but I can imagine what will happen ... Are we living out of the fear of misguiding or out of the confidence that everything is correct. Q: Confidence that I made keep the path as I decided ... (:52). .. Can I stop you there, let's go in another step, now that as a KF scientist you have the understanding and you understand that the soul has a strength and you understand that you are capable to do with many Gans' for different applications,

would you dare to or have enough confidence, that can I make a copy of my own soul, and what would happen at that point. Many of you have changed in the process of producing all these flight systems and Gans'. Some of you might have achieved or reached to the level of the strength of the singularity strength in your Gans' or in dynamic systems (2:54). of your own soul. What is the fear of the man to produce or achieve the creation of his own. We have cloned the sheep. .. what if we gathered the knowledge that we can clone our own soul. Or would there be a fear of us. It's not that it hasn't happened, it will happen. Will it become me or shall I become it. Many of you, especially some of the doctors are playing on that verge, I watched it, without them knowing. ... but they don't understand what they are playing with, What are the consequences of it? Now for the first time in man's history you have managed to turn matter into energy and energy back to matter, but at the same time you can convert and divide that energy to any other energy that in turn they (it) becomes matter, if you want them to. We have completed the knowledge of mankind from matter to energy and energy back to matter. This is what you do, you get a Cu and make a Gans of it and put it in interaction, and you make gold, Zn or whatever. (2:56). The knowledge of man through this T is complete. .. if you can make the gold then you can also make the STM. How confident are you in handling this and would it be that do I deliver to or receive from, to enligthen or increase the capability of my own soul to give unconditionally. This is not a theory anymore .... The knowledge is within the grasp of the man. ... Would I become through that system, through its interaction I can match the soul of myself, The system is the same as the womb of the mother and to use that as the repulsion of my own soul in the depth of the U. This is the reality that is going to hit many of you. .... (2:58). Do we aircrafts to propel or do we use the STM to enter the dimension of the U. ... In a another way, you went to the toy shop and bought a toy but you can only play with one of its functions, now I'll show you that it has many more functions, it's not just one of those robots that can only say hello, it can serve you too. It's not made in Japan, it's made from you, by you in the kitchen of your house, as many of you use it for your pains and anything else. Now you understand what we are talking about, the depth of the knowledge and what you have got yourself into. You came here to learn something of Gans' but if you understand in depth you can make a copy of your own soul. And are you ready to accept it, because now .. what did we say, an egg and sperm in a given condition of the womb of the mother come together to create the STM, which makes the physicality of the man, when it takes shape we call it a baby. (3:00).

... It's a knowledge that sets us apart from the animals but in so many ways our awareness and being able (3:04). to share the knowledge the way we do gives us a lot of confidence that we can go to the next step. How many of us would like to be a lonely passenger in the space of the U? When I look at the list of attendees or panelist, there is a long list of Universal Council members and why have these people put their soul as part of the structure, what gives them that confidence that their soul would act on it. How does the soul of the UC member be different of become different or take a direction of difference to be a giver. Can we replicate that, why don't we allow the member of the UC, Core team or EC to be in 2 positions, because those who chose that point are of different values then the others and can and take in respect and with the others. This is all

part of the development which is going through, and why the KF stands for world peace and we are very strong in it. We share knowledge worth billions in exchange for world peace. (3:06). For a meager feeling of, I don't have to be afraid of living, that's all peace means. Why do we see K Seekers coming here and sharing knowledge so freely that last things they know, or on other teachings .... this patent for sharing knowledge unconditionally comes from the confidence of knowing the STM. 44

.. why we took some of the UC members out because they were here to just make profit and were advertising for their websites. And how many are still there. The totality is to understand that the maturity has come. Man has to mature to the strength of his own soul. This is what it is. I shared my knowledge freely, I don't have you sign a non-disclosure ... I am disclosing everyday on my teachings and you lot do worse. (3:08). I have made a bunch of men whose knowledge has no value to them unless they share it. We are a special breed of giving, we share knowledge which up to now had a lot of patents, values and stealing. If you steal a gift you are by nature a thief, if you take a gift and nourish it for it to become a gift for somebody else then you're a man. Because as the pleasure you took from it you give to somebody else to share it. This is what I did ... we become a bunch of free and without the fear. This is what the whole existence is, there are no patent offices in the U. ... if their is any it's called God. ... (3:10). Q: What is the meaning of giving and receiving? When you give and expect to receive it becomes Christianity. You go for a Christmas and you give a gift and you expect a gift. When you give a gift unconditionally, it doesn't matter what happens, even if it's (costs you) your life then you become the Christ. There is a big difference between the soul of Christ and Christianity and the ofllowers. If you understand that then one gives the gift of life for the others to elevate, and another gives a gift to get something back for it. And that's not a gift, that's expectation and that's the level of humanity.

... I hope we opened a new Pandora's Box for many of you who are afraid of opening it. Now you have to deal with it. (3:13).
Video
END

270th Knowledge Seekers Workshop - April 4, 2019

(,)

(:14). Mr. Keshe asks if there are any questions of what we haven't understood. Rick asks if he could outline "going to space", the different ways and methods of going to space. We have talked about it on a physicality basis and the soul basis. The different levels that may be available to us or to open up for us? When we speak about going to space, what do we define the space as, what do we see or consider as space. We a space in our physical body on this planet and at the same time within the structure of our physical body there is another dimension of life which we call the STM. Even though it lives within the space dimensions of the body, it has its own life and line of communication. (:18). When we define going to space we already know that in the center of our

physicality travels the depths of the U, it has been a space traveler all the time. It has a line of communication with other parts of us be it through dream we call it, or some people call it through the subconscious. Or we have the choice to physically move the physicality with its soul. In a way we have a caged bird in the physicality of the body called the STM. We can open that cage and let it loose at the point of death when the operation of this cage rots away and it can't hold together and this beautiful bird becomes free. Still it takes life in the universal dimension because it has a life, it exists on its own. Or we can carry the cage in a box and take it anywhere, I can take a bird cage in my car or in my hand and walk around the park, it doesn't change anything in the existence of that bird. It's still a bird, it sings and communicates with other birds in the park. And this is how our bird is, so we give it an option, those who understand the process of the creation can take that bird out of the cage, because we trust it, it will come back again. (:20). It's very much like when you have a parrot at home you open the door and let him fly around the house and it comes back again and goes in the cage, because you trust it and it knows that is where it belongs to. And this is the process that we have made as an option to man. The STM is that bird but it is encaged in the body of the physicality of man and for the first time man knows and he can see that it's him who hasn't trusted the bird to be free and the time has come where he doesn't need to see the cage to break up, to rust that the bird can fly out. Or by accident the cage's door is open and the bird flies out. That accident is when we die on the street, the cage opens up and that bird still gets freed. But now we are teaching how the man has control over the door of this cage and he trusts that the soul will come back to the body. Or the bird will stay that he can create that atmosphere of the home, the cage. This is the problem we have and we call it different ways of traveling. But to be able to free that bird without accident or when the cage rusts and we call it death, we are teaching how to be able to control, (:22). and trust that when we release that bird it can come home. Or it can make a home that we can go to. When my children were young, 4 or 5 years old, they wanted a bird, I bought them a cockatoo, .. we used to let it free the house and it would go back to its cage, but the doctor said it was causing disease and couldn't stay in the house. So we decided that if we let it free it would die because it didn't know how to feed itself. We took it to a shelter but on the way an old lady in the park saw it and wanted it. ... every now and then we went to see the bird . (:24). It was a new home, it was our home, and this is how the STM should be. It's trusting that where it goes it can make a home for us. In this process we are teaching different ways of freeing the bird or carrying the cage, the bird is still there. If you want to carry the cage and go somewhere you get in the car, that's the spaceship. Still the bird is there and the cage inside, the cage is the body and the bird is the STM. We haven't trusted that we could get the bird back, then we carry the cage in the SS. Or there is another line of teaching that is understanding the structure of the cage that you can make the cage not to rust and then it frees the bird but it can open up and carry the bird, the bird is free, you don't need to fuel it, you don't need to do anything, it travels the space of the room, garden or city and comes back home again. When we teach about the STM it's in getting the man to trust himself, and to trust himself he has to become detached from physicality, the wealth, and everything else, that the wealth is within me and not belonging to me and this is where every man makes the mistake. (:26).

(:40).

... nuclear based planes, (:44). or gas reactor flight systems that we did in Iran, Gans system which is developed now with the Chinese, or do you want to travel with the dimension of the soul of the prophets of God which is the STM. We teach you that, you choose. The only thing is the journey has no end, only in the physical dimension. I am the beginning, I am the end. I decided what physicality I give to my soul and I decide when this soul will become part of totality existent on ?? my wishes. That's all it is. So what do you want me to explain Mr. Rick you have been here 280 sessions, you haven't even managed to fly physically yet, you are still changing. Yes indeed, that just proves we have a long way to go. No, it happens in a second it's just when you get enligthen. Yes, exactly. That's basically where we ended up in our discussion. (:46). You did mention you went years without notes in your discussions. ... what clothes to wear. How can you put clothes on the sun. The thing is why we can dress the STM in the dimension of the physicality of the brain is because we have learned a trick. You can't catch a fish with nothing, you have to make a net to capture it, and the STM has learned how at a given strength to convert itself to the dimension of physicality which is the skull and the dimension of the skin. That's all. How do we travel, this is one of the things which mankind will face very soon. Can we keep the STP operating but move the STM to travel in the dimensions of the U and still be in touch with the STM. Do we need the STM to be within the body while it travels the depth of the U (:48). and comes back and brings everything, but this time it shares everything with the physicality. Many races in the U can do that and some humans have achieved it. Trusting that the bird comes back, the cages stays, it doesn't collapse. Q: Arthur sees blue light when he interacts his fields with the fields of the U? .. I wanted to ask about the blue light .. it's like a shinny bright dot and it's blue, ... you feel it in the forehead and the field flow, what is that blue light? (:50). Since when have you been seeing the blue light? It's been a year or something, since I started to practice the fields and then I started to see, I practice night and sometimes daytime. What made you to practice? I am a K Seeker for 6 years, very passionate KS and close to my emotions and always practicing fields. I also want to ask about the wave and particles, if I go outside and play fields, I try to see energies, if I look in the blue sky, it's like a wave and shimmers slightly, then it slows down and then it's like particles, shinny little dots running around, billions of them, is that the soul of the element? (:52). ... Where about in Scotland do you come from? About Attenborough. It seems what you see, you are moving in the direction or dimension of understanding or expanding the freedom of the STM. You still need the confirmation so you try to confirm that you see it with your eyes. The next step in the understanding to move to see with the fields of the soul and partially, many people can see waves, it depends on our AA and what we allow to be released from our soul, we change it, it's like the changing of a window (:54). the more you open up the more you see. I have no emotions, no filters, I just look through my soul. because most probably you don't see (them) through the eye, you can see the depth of the U. I have taught Caroline, we see things, she can see waves and movements in the sky. It's understanding that there is no limit, you don't need to see with the eye, you can see through the fields of the STM. You expand your fields dimension beyond your physicality and if you manage to do enough of, or trust that I can be part of it to envelope the whole physicality, then you become the light. .. You see it

done by many people who have passed the dimension of physicality, long time, this has been known for hundreds of years. It depends on the point of maturity how you get to that point. A lot of people who managed to it, they can prance the position and dimension of physicality, they can do that, but it means you're maturing in the right direction. You do not need it. But why do we see the blue light in the human dimension is because of the (:56). structures of the matters of this planet 04

(1:04). social survival

(1:06).

(1:12).

(1:20).
(1:22).

(1:28).

(1:32). .. I have extended my soul across the whole of this planet ...

(1:36).
(1:38).

(1:44). We'll start governing. ... Europe will start recognizing KF T. ..
(1:46).
(1:48).

(1:56).
(1:58). ... We are looking for elite Plasma Physicist to join a special training by Mr. Keshe. ...
(2:04). ... Q: Will the religious leaders try to put the crown of messiah on you and how will you divert them from trying to save their religions? (2:06).
.. peace (2:08). is the wish of every man, but to be solid on it, committing yourself to it is a totally different ball game. It doesn't matter what they call you. When you see the life of one of the most beautiful people like Nelson Mandela, he was committed to equality and freedom, and you stand for it, it doesn't matter what. You have to understand that everything has a price and a condition. Some times you do it doggedly until you get to the next step, and some times you set the conditions and that is where you want to get. In the coming weeks you'll understand what I am talking about, 2019 is the change for humanity and the acceptance of the technology by the world leaders. We see it coming up and it is already planned to be. We'll see the sharing of the knowledge, world leaders shoulder to shoulder with KF top lead scientists. .. (2:10). A year of solid work has brought us to a solid base. We have started to govern and soon you'll understand. We govern through knowledge, peace and sharing T. .. One of the biggest contracts with the KF has been signed in the past few weeks and it's done under the title of KF T. . ...

(2:12).
(2:14).

(2:18). Q: Last time when I asked you a question you said we have to look to the totality. And I was looking at the totality and I realized last time I was wrong because I went in a wrong direction (Good Morning), so this time I want to describe the whole picture. Listen if you are enligthened you haven't made a mistake, you have elevated your knowledge. And that's all that matters. ... I want to discuss it here so others can benefit. I would like to put some numbers on it because I am a mathematical person .. If we look at the central array, which in the center is a antimatter. We don't have antimatter,??? the Principle. (2:20). The center is the most strongest one in the one we call Pl, or M ??? Let's say the array in the middle has the strength of 1,000, and let's look at the principle of our galaxy to be the sun, the sun can also be like a proton in another system or an electron ??. If the sun is a strength of 1,000, then the earth is within the Pl of the sun, and say the earth is 100. No, no, no, stop, stop. Let's put the knowledge in correct way. If the center of the sun has 1,000, then the center of the earth still has 1,000, but the earth to be where it is, it shows it's power of 100. What you show doesn't mean what you have. If the earth didn't have the strength of 1,000 it would never have been in existence in parallel with the sun. But what levels of it, it shows for its manifestation, and that's what it is. Cu is 60 or whatever, H is 1, both manifest themselves and both have the power of 1,000 in their centers otherwise they can't exist in the dimension of the sun and the earth. (2:22). Q: because what you were describing in the book is the opening of the Pl where the weaker fields are getting together in respect to the center? Yes, yes. Q: So if the center is 1,000 the weaker field is like 800 in respect to the center. Yes, so they manifest themselves in that level, but to be manifested in this U, in this planet, this solar system, you have to have the center common denominator, which is what everybody else has, or you don't belong to it. Do you understand? It's different between the manifestation, what you manifest yourself to be, to show, and what you have inside. Q: I am getting your point, but I can't understand, in the earth is it also 1,000 then why is it keeping it's distance from the sun? Because it allows its surface. The STM in the center is 1,000 otherwise it can't manifest in this dimension. You have in mathematics what is called a common denominator of a strength of the fields. We can only be part of, or be existing to be if we have whatever they have. You can't become a doctor if you don't have education in medicine. (2:24). If you look at the way I draw a Pl with a tight circle and it opens up, I put H on the outer side and Cu further in, but that H couldn't be there if it didn't have 1,000 in the center, can it. But it manifested itself at a weaker strength and we call it a H. Q: ?? the way you put it in the book? In the book it's exactly the same. The weaker get together, yeah, but to become manifested they have to make the center of 1,000 that they can be in that environment. The weakest carry in M and the strongest in G sits in the center that holds everything together. That's why I told you last week to go and think. Q: I was thinking but I couldn't get my head around it. Now get your soul around it and you'll understand. Q: Something was not adding up .. Does it add up now? Yeah. Q: If in the center we have the common denominator, like the earth has a common D with the sun but manifests at a lower strength, does our soul have the common D with the earth or the sun, or a higher entity ??? (2:26). With the Creator is will be the same, we can't be created in the dimension of the Creator if we don't have it inside us. Q: So it applies to all

of the U Community as well? Yes. Q: And that's how we can get in touch with them? Let me explain. Peter in Austria showed some years ago that by playing with fields he can create matter, but you have to understand the knowledge behind it, we take Cu and make 2 Gans' of it and put it in 2 balls and the way we position them and the way we interact them it gives us gold. Or Zn or Mg. In essence that field interaction is the principle common denominator, it has to be there, it's the knot, the center of G field forces, if you can rephrase it in the world of science, we as entities, to exist we need to have a point that we can relate to, and that is because it can exist, it can hold on to, so it's the highest level of G fields, and the lowest strength in G fields at the point of manifestation. (2:28). At the point where you can take in balance with what you can give, it gives you the point of manifestation. That's where you manifest yourself. If you take so much from the environment that what you give, gives you the balance equal to Cu, then you are Cu. If what you take from the environment and what you take is equal balance of ?? you manifest yourself as ?? It's like color, how do you become green or white, whatever is not needed it becomes the color of manifestation. In the world of Pl we go by the strength of the fields. What we can take and what we can ?? at the point of the balance of the G and M field, in the interaction with the field state of the matter we create the surface of the earth. Until that point there is nothing, there is just what is trying to find out its dimensions. And when that balanced point is reached you get the surface of the planet. And then when the G field holds on but the M field through the Inertia expands further you get the atmosphere. On earth you just don't have the hills and the mountains. All the hills and mountains, the way they manifest themselves is the interaction of the fields of G fields of the center point with its M field and the condition of the Inertia of the matter state. When they interact you get the surface. Why don't get everything 20,000 km high or 20,000 km low in the sea. (2:30). Why do we have the point of manifestation of mountains and hills, why most of the planets, stars, whatever, we don't have hills and mountains in the stars but we do on planets. Because the energy transfer is too rapid at a higher level at the point of manifestation. It doesn't allow to become solid, to manifest in a solid state of matter. It's a Pl state of matter. On the surface of the sun we have the plasmatic fields from the center, with the plasmatic fields of the plasma of the matter state which creates light and shines. If you put solid state on it like earth it won't shine anymore that way, does it. On earth it's reverse, or on any solid state planet. If you go beyond the understanding of the transmission of the fields which have no dimension to manifestation you'll understand the creation of the U. And where these interactions takes place you call it galaxies and when it changes manifestation to show the turbulence of the fields of the U. That's where the galaxies are created. And again in the center you have that common denominator field that allows them to manifest themselves in a matter, and say oh that planet is a Cu, but we have a Cu here too. And if all of them have a common denominator Pl then so we have a relationship, we have the confirmation of existence at that level. It's very simple. Now you are becoming more knowledgeable and that's beautiful. (2:32). Rick wants to show a video of MG field animation from some years ago. Q: Mario thinks with the new understanding it needs to be updated. The people he asked can't confirm or deny so ask Mr. Keshe. You see there is something I have to clarify for some of you to understand, when we speak about the weakest field we are talking about the M weakest field and not the G. When the weakest fields come together it's like a banana, the peel doesn't say what strength it is inside as a banana. I always

compare it to a banana in teaching. This is where your comprehension has to increase, when we speak about the weakest field we speak about the weakest field in manifestation which is the M. Plays the video. The fields create the condition and positioning of themselves, (2:34). according to the mentality of G and M. The position is that everything carries ?? the banana is always a banana inside when you open it, outside the color can yellow, green, black. It's the same if you look at it. When you peel the banana it doesn't matter what is the skin, you look for what is inside, G, that is where all the energy is kept. These animation have been made by K Seekers. Q: So is it generally correct as you saw it there? It is correct but you have to understand what you are looking at it, this is the problem, how you interpret the image. The image is very correct but you have to understand what you are looking at. Freeze that picture. Some of the lines that are double are the same, some of them are single going opposite. 1 red and a grey are going the same way, and then you have the others. (2:36). This is a true picture of a Pl. Plasma is not 1 field. In the condition of the other fields, 1, 2, .. 9 arrows, if you look you go from inside 1 to outside 9 ?? are going the same direction, but they are of 2 different strengths, if you look at 7 it's still grey but it's going the opposite direction, but 6 is red and going in the same direction as 7, but their position is dependent on number 9 and 1, on how they react in respect to each other, that they give them which one, and somewhere number 6 and 7 will change direction because of the field forces of what gets absorbed from the environment forces the change or it adds to them, so now it gains a new value. You see this in nuclear testing of the plasmas. You people who run the dynamic systems see it, that the saturation and the motor suddenly stops and then you think you have burned the motor, and then you leave if for a while and then it works, because the fields inside the layer of Gans' have created field forces that are stronger then the motor. If you can run a motor at 6 or 7 watts energy, so you have to understand how much energy is created inside the ball that it can stop 6 and 7 watts, which means it has created a balanced position and doesn't see any forces to move. (2:38). When you have multi-cores you see it very clearly. We used to have 3 cores inside each other, now in a simpler way you have 3 different Gans', you see in, in one of the books we show it, the Gans' don't mix they stay separated, even they have some moving inside each other due to the MG field interaction. It's a simple understanding by such a gorgeous scientist like Newton but he explained it in a matter state, but if you translate the same thing into the Pl then it still holds but in a different field strength, and not forces. There is a big difference. Q: In my opinion the M lines are represented correctly, but the G ones in red (2:40). I think the same direction because... Why this picture looks correct to me or near enough to get it visually, is that if you at # 6, 7, and 8 ring these are M, but # 3, 4, and 5 are G in respect to #6, 7 , and 8. Do you understand. But when you come to ring # 3 and 4 this is the M manifestation of the fields but 1, 2, are still G to 3 and 4. 50
(2:42).

(2:48).

(2:52).

(2:56). Q: Please teach us how to release the bird without any fear, how does one gain this knowledge and retain it? It's very much in the strength of the STM, you have to work

through the soul to strengthen to give confidence to the STP that I am there, I am not running away. And it's the balance of the totality which we have to understand. The biggest problem that we have especially with the tying up with the work of the STM with religions is that they have created so much fear in us that we need to be punished and that there is always something bad, (2:58). that we have passed the point of trust in our own soul. This is what part of these teachings are, part of the process of the growth of humanity is to gain trust back in his soul. I created you, so why are you afraid of me who created you, that you can let me free or I am free but I am here to look after you. If you go back to a lot of my teachings in medical, I always said, the physicality is a leech on the STM, it's a sucker to it, and because it sucks so much from it, it has created that point that we can't fly. When you put a 10 kg weight to the leg of a bird how do you expect it to fly. That is what man has done with the physicality of it. We cage the animal to enjoy the beauty of it, but we can still leave it free, I enjoy you to be here, I feed you and it comes back. The whole thing has been inbreed in us with the fear and this is where the change has to come. Any other question. (3:00). Caroline asks Q: How can we reduce that pulling down on our soul I think that is where people are trying to find solutions for it? They are supporting themselves with the Gans water and with the knowledge you have brought so far, but how can we reduce that pulling on that soul, can you be more specific please? What do you mean? You just explained that the soul can't let go or be free because you have put a weight on it ... how can we deal with your knowledge ... that we can release that weight on our soul? (3:02). You need to understand. there are 2 ways to do it, the best way is done universally, is that you elevate your soul so much that the weight becomes irrelevant, so that weight becomes part of your self, it ?? doesn't become dependent. Very much like a new entity. the process is very simple you reach the point of creating a turmoil of the fields of the STM, turmoil not as bad, but let's say motion, more then a turmoil, that allows the STM to receive, that it doesn't depend on the physicality to receive. The physicality of the STM has leeched so much on the STM that it has literally handcuffed him to his self. It's like these octopuses with these suckers on them, it attaches itself to it, so it can't be free unless it dies then it looses its angle and leaves. But if you can understand or understood the teaching of ?? if you can absorb enough energy from the universal dimension that this leech becomes part of you, then you go beyond its boundary of existence. (3:04).

(3:10).
.. Look at Alzar's family detachment is setting in across the family. ...
(3:12). Stanly and Ella as a family are moving ...

(3:20).

.. When the world leaders understand (3:26). this and they see the abundance of the knowledge shared, the care for the STM then they will go back to it. When you become detached, it doesn't matter what happens it is part of the process, it has to happen because it needs to be there, but we accept it, live with it and make it part of the history of the life. What do we do with it, what is the next step in the elevation of our soul. Are we still getting more in case (of time) when we don't have, or do we give so much that we don't care, it comes when it is needed. When I need it, it's there. If it doesn't happen when I

think it should be there, then there is a reason for it. You don't need to look back. When I left my business to become the KF, I left millions in diamonds with people around the world, I never went back to them to ask for them back. It was my hobby. It was something I enjoyed, but to me it has no meaning, because if I go back to it, I go back to the time of physicality. But I live the life ?? I don't go hungry, there is always something which comes that is needed (3:28). The physical tangibility has no meaning. 07

... We are detached from physicality but we have to live a physical life. (3:36). And they more they do that elevates us, then the more we serve you better. We share freely. Today's knowledge, if you understand what was shared, it's the key to U Community opening. I said in the teaching, that we'll open something if it comes, and it came, but did you understand what came, what was released. The shackle on the physicality is the lack of strength in the STM in trusting that physicality will come with it, because it loves it so much so it has to embrace it, then it becomes a light. Any other questions. (3:38). Ella presents KF Times April, 2019, 10th Edition. The U is not cooling down; C14 teaching in multiple chapters, Images of sound; Portals, Neutron, Proton, Electron;

(Communication through the soul to travel universe, ,)

(:19). ... In bring the T what will man do, will it bring stagnation in the man's school of thought? And would we go back to the old cycle, forgetting everything and starting again. So it comes to the point do we need to go through all this rigmarole that we are going through now just to survive daily life? Would some find new ways to be busy (:22). that they can do something. ... What is the next level of communication for the human race? ... (:24). .. How do we create the new communication systems? Without a communication system man becomes isolated in the depth of the space, because then we worry what is my son up to, is my dog safe ... In the teaching in understand the M and G fields we have realized that these systems are natural communication systems, inherently they send out and inherently they receive back. As we have seen with the SF, galaxies, and all the systems, we have to understand what is the strength of going and coming back. We send a message out and maybe it's received but how do we get the message back.. (:26).
(:28).
(:30). ... every cell/soul in the body is in communication with the STM. .. the body has already been using zero time communication. ..

(:34).

(:36). Like your soul, the other souls across the U can hear. This is the process that will be unique, and developed, understood and operational by the members of the u Council and the EC, where as a soul present on this planet, they are present to the those of the earth siblings who travel the space of the U. It's a commitment to the common denominator strength of hte soul of the mankind. This is why we do not choose the members of the UC we let their souls to step up as they have matured to that step to become the ?? reacher of all those who understand the emotion of the language of the spoken, or the emotion of the language of the man. ... This is the reason why the members of the U Council are chosen by their own soul and not by the man. Because when you step up to become a member of the UC, (:38). where you have judged by your soul you have managed to enter, understand that point of communication with the rest of the souls of the common language, because to speak a language we trigger specific strength within the soul of physicality of the brain. It touches the emotion, but at the same time if you are a member of English and have no access, you can't reach or whatever, then the UC member for Persian can still hear you. When you are at the beach and you shout in English, not only the Englishman hears but everybody else there hears your voice. This is the next step in the development in the understanding of the science of communication, universal language communication. Then you step up as members of UC and EC and in deeper time when man becomes pure in the work of his physicality, he becomes as close as to be a universal person then you start hearing the voice of the soul of the other creatures of the U. It's the elevation of the STM. We know this T it's embedded within us at the point of inception of the man within the womb of the mother. It's one of the first gifts given to mankind, (:40). by the carrier which is the mother, the soul of the mother. She talks to us through the emotion of the soul when she is the capture by (receiver of) the noise by the soul of the infant, this is the way it has been embedded within the STM. Now as those who we endeavor to enter space, as I said there are no dictionaries in the U. In the physical world when we want to ask for something and we don't know the language we are crippled, we make all sorts of shapes and noises to tell what we need. Have you ever tried to ask for an egg when you are in China and you only speak English. You make the noise of a chicken and every shape from where it comes from to lay an egg. How do we communicate with the men of the U when they don't even know what an egg is let alone a bird. But as we understand they will understand, this is the animal we have on earth, it flies and lays an egg, we eat the egg and the rest of it. (:42). But you have no language, you transmute by the strength of the STM. Is the mankind ready to dig deeper in not what we call the physicality but to dig deeper in the understanding of the operation of his own soul. Are we ready to open the RNA of the STM. The recordings which sit within the STM as not only when you make noises, why are you making noises for, there must be a memory of the chicken inside the soul that it explains the chicken. You do that in your dreams with your mom when you ask her if she would like some chicken. And she says what a beautiful cooking, but there is no chicken and no cooking, but she knows, and you see the chicken and she gives the chicken and you give her a cup of it. How do we create the images that are real to us and to the receiver is responded accordingly. But there is no physicality of the man and no eye to see, but we see through the eye of the STM. Is vision the only tool of

understanding the environment of the man? Or do we become like other animals that we have a sonar (:44). through our soul that we manifest the images according to what we receive at the strength of the receiving of it. Now you understand how the next step in the development of the space T brings one of the first needs of the man. It's not just flying and getting into the spaceship, that's the easy part, now your problem was going up and down, your next problem is how do I communicate. How do I even communicate with the soul of my own physicality when the dimension of the fields of the U are different. If you get a pressure or an emotion you feel strength and pressure on your heart, now what is going to happen when the man goes into the depth of the U, how much pressure would you feel, would the heart move to the top or to the bottom, or would it suddenly through the fields of the emotions of the soul suddenly release so much energy that it blows the whole physical brain up, like a stroke and you're paralyzed. But these are the conditions that mankind has to enter, he has to understand before he becomes a passenger of the U. Flying in a box, call it a SS, (:46). will become a prison for man if he doesn't know how to get out of it, or inside it, and to be able to communicate and even in the depth of the U at the time of the need to be able through the STM to be in touch with his own creator soul. In last weeks teaching I deliberately brought this subject up, that we have a common denominator to the Creator, this is the essence of the creation. 46

(:54).
.. Those who understand this will move on to understand the true meaning of your soul and move on to become the true passengers of the U, then you understand that you can transfer your soul across the fields of the U and then convert those souls to the physicality of the presentation at the point of arrival. In a way you shout, you send a message as you say, mama I love you, (:56). that voice, that noise is the carrier of your own soul, I want to be there by the time you get there, it's the soul which arrives and not waiting for the soul to arrive. 21

.. Those of you who understand this, you might have found the answer (:58). how some people manage to manifest themselves in different places at the same time in different dimensions. This needs mastering in the presence. In so many cases those who achieve it, go through deep pain which means they receive so much and they give what they have. We see these at the point of separation of the STM and the physicality, but man at the same time if he reaches the point of understanding of his own creation does not need to go through the point of separation but he can create the point of manifestation from the same process. If you understood you have become a blessed soul, which means as you move away from the dimension of physicality, the physicality of the man shall do no wrong, as from now on the STM is the feeder of the physicality which satisfies his need, be it love, hunger, be it everything else that, that soul needs. Now we have to understand this position, line of communication, beauty of the creation. (1:00). Then those of you who reach that point, then you understand if you can, what you'll become, you can stand to become a member of the U Council. As I said we choose the members of the Earth C, those of you who are members of the U Council you understood the need of the soul of the creation of the man, and in response to answer. Very soon many of you will step

down because you understand the true meaning of servitude by soul is different then the servitude by the physicality. 58

... The dynamic systems which inherently have a soul in them have a limitation due to the Cu coil (motor), then I would like to give you a very bad news, Cu sits within the structure of the physicality of the muscle of the man. Is this the shackle of the man to be able to free the soul, as did the Cu coil (motor) dynamic fields, for the soul brought the shackling of man to certain fields. Is this Cu coil, (1:06). which is made of the muscle fiber the shackle to his soul to be freed from the physical existence of this planet. I have a very good and bad news for you, the answer is yes. 19

(important teaching)

... Any questions. Q: I went back to Book 3, and now I understand. (1:30). What determines whether a neutron decays to an atom of H or to a Gans of H as in Book 2 chapter 3, the conversion of light rays to the Gans of the matter? In a way if you understand the matter of the H is the interaction of the Inertia energy field strength of the planet, the Gans of H is the interaction with the soul of the planet, where it does not need to manifest in the matter state. If any of you ever held a dried Gans in your hands you should have understood this. If you hold a dried Gans in your hands and you try to put it back into the water it never becomes the same as the Gans before you dried it. You can still convert it back but you have to go through the same process as the ?? of the state of the matter. That's the only difference. When you become a Gans you show the strength of the soul of the matter (1:32). in the dimension of what we call the soul of the creator. In the writings of Bahuala he says, even a stone has a soul. Maybe now for the first time man understands. You have to know where to look for the soul and how to free the STM from the shackles of physicality otherwise in reality man is nothing but a stone. Now you find your answer. Mankind has involved and evolved himself too much in the dimension of the physical life as he could touch it, if you can and if you understand in true essence, if you manage to interact with Gans in the dimension of his soul, I just wonder where he is going to end up within the STM. We understand this fully and we use it in the health application and now maybe now for the first time you understand why we use the Zn for emotional, (1:34). and we use the Cu for physical, and the CO2 for line of communication in holding the 2 together, and in essence, in beauty and sweetness of CH3 allows the line of the transfer of the fields in the dimension of the strength of the AA of the man ?? with the U. ??? I look at the ?? physics of the creation and not the physicality of the man. When you understand the physicality of the STM you get detached from the physicality of the matter of the man. It needs the maturity of time ??? Any other question. Q: In the picture you have just drawn, when you say the physicality comes from the interaction of the fields of the sun with the Inertia matter state of the earth, wouldn't it mean that if we become independent of the earth's matter state Inertia we would not have to manifest ourselves in this sense in the matter state, (1:36). and be able to move, to go beyond this interaction of the sun's fields with the earth and thus go into the Pl state? The creation of the man has a connection with the field strength of the matter state of this

planet in the gaseous section which is the AA, which is the interaction of the fields is another chemical binding, you call it AA. It manifests itself in the dimension of total physicality in the physical dimensions of the living things, but if you move it away from the Inertial zone of the earth there are still AA's of higher levels, you see creatures in this way. At the same time you see AA, if you call it a block of life, across the spans of the U. It's not a gift this planet. What I have said before, nothing is there until you put your night vision glasses on, then you see plenty of life in the background. Just because you can't see it doesn't mean it doesn't exist. Now we have to look at the vision of the STM which is very much like a night vision and we see the totality. (1:38). When you wear a night vision glasses then you create that condition of interaction of the fields. When you have and look with the vision of the STM then you'll see the light of the other souls. Man has chosen the easy way through the eye of physicality so he doesn't need to bother with the eye of the soul that is much more effective and sees in the dark ages of the creation of the physicality. If you understood this, then you understand that you are in the position of the higher and ?? lower strength of the fields of the creation, would you like to be there or there. There is something that man has to understand and maybe there is the need for the explanation, many times in the teachings we referred to a common denominator .. We have the G and the M, but you might have wondered how these 2 work. (1:40). In fact if you look the fields are connected by a field in-between, he draws a red line between the 2. The fields of the creation, and the 2 are entangled around, so that is the common denominator. That is the same strength. That at any point, it doesn't matter at what strength, this is the same. We call it in the man's language, 1 G. It doesn't matter at what point you sit, at the highest point of the creation or at H, the balance between the 2 stands at a constant (1 G), this is a tunnel, a connection, that's why the both fields stay together. They have the inner being in the dimension of the time, that they can connect. It doesn't matter where you take it. Understand it very simply, if you are on the sea at the North Pole or at sea level on the South Pole, or China sea of Japan or the Caribbean, it's all 1 G, because that is the point where the water, the 2 fields interaction has created in the liquid state of the matter. So it is the same here, mankind doesn't understand the truth about the creation, he is so blind to everything. (1:42). You should have seen the answer years ago. Have you noticed in some of my teachings I said, we take this to be the combination of the 2, now you understand where it comes to (from). This is as simple as it is and I can't explain it any simpler. Within certain tolerances from it, any protein, AA of a given length and strength can exist depending on how you base the life to start with, if you are a deep sea fish or you are an animal living on top of the Himalayas, you have a minimum and maximum and then a point of tolerance, because it's made of the same. If you take the fish from the bottom of the sea and create the right condition for it, it can exist on top of the Himalaya, and the same for if you take the animal from on top of the Himalaya and create the right condition for it in the bottom of the sea it still exist, because the central G field of the center of the earth will not change in either of the 2 positions. Man has got to learn much faster about the true essence of the creation of his own life otherwise he'll be here for another 4 billion years, (1:44). still looking, oh there was a civilization 6,000 years ago who understood more then us, because they have been through the cycle half way, but they never understood so they went back into it again. In fact if you understand this 1G, in many dimensions sits within the C14, and on the other side of it is C12, and in line of the two sits H zero ??? this is not the H ?? as you call it ??, but we call it

Deuterium. The field forces of the totality of C14 and C12 in crossing at that 1 G, ?? Deuterium. This is why I taught in the past that if you create Deuterium you can travel the spans of the U, this is the fuel of the U, because it depends on how you turn it, you divert to the dimension of physicality for the essences of the fields of the U. This is how simple it is. Any other questions? (1:46). Q: I guess it would be good to know how to make Deuterium in a good proper way? Listen, giving a fishing rod to a man doesn't make him a fisherman. Q: Alzar says, when you drew the soul and the heart we lost your voice so I didn't get that part? Then the man was not supposed to hear. Okay. Q: You made 3 boxes, the Cu is the muscle and Fe the blood, the heart pump, then you came to another picture in which you made the soul of the Creator and the soul of the earth, as the fields interact and loose energy in combination with the (1:48). ?? of the planet, they give to the AA which is us we get created, can you make the connections with the 3 boxes? You should have understood very easily, the interaction behind the fields, if you look at it you have the Fe, Cu, Zn, but somewhere here (before the Fe), which is the cornerstone of the creation between the physicality and the STM. It's a crossing point. Man has no physicality until he reaches this point. Our physical dimension comes from this (circles Cu) and in interaction with these (FE, Cu, Zn) you are manifested in the dimension of physicality. This is what you have to understand. Over the years I have explained these things many times. You have C, N, O, (12, 14, 16); then here Na (22) (Mg); here K, Ca and the rest of it, P (around 40); then you have another bracket (group) here (1:50). where you have Fe, Cu, Zn (around 60). The physicality in the dimension of the existence of a protein manifests itself. ... AA here; you can see how it sits. Somewhere here Silica (around 28). ... then it goes in a cycle. The combination of these packages leads step by step, to the creation here of the STM (beyond the Fe, Cu, Zn). (1:52). here you have the beginning, the agents, the structure part of the physicality, the Gans condition of the physicality in the dimension of creation ?? now you can see what is the next step. I always said, life starts in the M fields, then becomes a plasma, (1 piece is the fields, then the interaction of the fields) then physics which is the interaction of 2 plasmas, interaction of 3 plasmas becomes chemistry, interaction of 4 becomes the physicality, the 5th and the 6th becomes the STM. And strange enough if you understand it, it will come back to the beginning (fields). Not only have we understood the conversion of the Nano state to Gans, and then from the Gans ?? energy of the man, Gans to matter state. Now we understand the whole cycle of the creation of the man itself. That's why the STM leads to the physicality of the man. This is why I tell you that you don't need to kill, you have to understand how to feed through the STM through the physicality. (1:54). There is no difference, you took the Cu and made a N and then a Gans out of it, you rotated the Gans, you come into interaction and you make gold and silver from the energy of it, back to the matter. So is the STM as a field creation of the physicality. How hard is it for the man to understand this simple process. Then why does man kill? Why does man not understand. You as the new cycle of knowledge, you speak about Silica, why when you have more Silica you have less cancer ?? He circles 28 (Si) and connects to Fe. You separate the dimension of the physicality. You connect the dimension of the physicality to the point of the conversion. (1:56). That's all there is no mystery to it. N 14, Si 28; Ca 42; Fe 56; what else do you want to see. This connects 6 to 6, the dimension of the matter state of physicality, this connects the dimension of the soul of the physicality. Thank you. Now I hope you know how to make a tooth grow. When I

teach I don't only teach the dimension of physicality, I teach in the essence of the creation of the STM, the essence of creation and the essence of manifestation. There is a big difference between the creation and the manifestation. Creation has a birth and manifestation has a presence. (1:58). Mankind ?? lives through creation, the STM lives through manifestation. In the past hour of teaching I have brought the whole cycle of the creation that man never understood for billions of years. I can teach you everything about the creation but how many are there to understand the totality. In time mankind will understand. Q: Is physical manifestation necessary for man, if it is does this not account for seeming unawareness of the soul, how does man return to his soul life after immersing himself with matter? (2:00). Very easy. In the dimension of the matter state we use NaOH to open up to the Gans state and the fields of the environment of the matter state. Man has to find that fields which allow his soul or his physicality to enter the same dimension of the fields. It's embedded within the emotion of the brain. That's why we have (emotion), I have said many times that emotion comes form the interaction of the fields of the STM and the STP. It's the same as the interaction of the fields of the sun and the earth lead to the creation of the matter state of the fields, so shall be the same for the interaction of the soul of the Creator and the soul of the fields of the physicality of the man to lead to creation condition of the fields of the STM. You have to get the right flow, ?? motion , the right strength and it will become what is to be. If you look at what is on the screen, it's the true story of the life of the man in the true meaning of the essence of his own understanding of his own creation. We did not teach man C, O, N, Zn ?? (2:02). and we did not create how the fields flow between them. It's man who started ?? ?? with this language man can understand. The problem you have had has been this 6 and this 12, but we don't look at the numbers, we look at the energy flow. 35

.. Arnold asks about his drawings ... (2:06). .. confusion about presentation .. Don't get carried away if you have understood a little part of it (2:08). don't get carried away that you have understood the totality, this has been a pitfall for many. ... If we look at the field flows out of the earth, we always think of them as coming out of the top and going into the bottom. Or the interaction of another (Pl). But the truth is you have G at the North Pole as much as you have G at the South Pole, and the same with M. But what in reality happens is not that way, it goes this way, etc. (2:10). at every level the fields of the planet are not as you thought. At every point on this planet there is both G and M. 20

272nd Knowledge Seekers Workshop - Thursday, April 18, 2019

(Soul blueprint coming to close of teachings, ,)

(:09). We have started anew cycle of teaching ... it is part of the progressive understanding of the totality, which we started out some decades ago and we are more or less reaching the pivotal point of all the teachings. These teachings are coming to their natural conclusion ... we have taught everything from matter to Gans state. We came to understand the working of a plasma condition which we call the STM, the same as the soul of the planet, we hear the stars and the planets and the human body and the animals, they all have a heartbeat, which is the manifestation, confirmation of physical life, the physicality. But the STM has a heartbeat too. The STM is no different then the structure of the soul of a star. What is the purpose of these beats, or this purpose of life, of a life within a life which through its manifestation leads to confirmation of creation. (:12). And a collection of the work of fields together. Wherever we look all the works of the U is exactly the same, it's just how you position something that it leads to that point. In the life of man there is a problem between the 2 heartbeats, the heartbeat of the STM and that of the STP. Planets and stars usually have 1 heartbeat, in some cases we find 2, and in some cases stars and what we call twin sisters, collectively have 1 heartbeat, that responds to the other and this is how the strength of the fields of the stars tune to each others heartbeat of the souls. It's the same when the heartbeat of the physicality tunes with the heartbeat of the STM. If man understands this he'll come to one thing, the prime objective of all the teaching, which is peace. When the heartbeat of the physicality and STM match and work together, the physicality of the man finds peace in any dimension of the U. (:14). There is always confirmation of the physicality for confirmation of the existence of one to the other. There is always a need to understand this. Why man has failed to conquer the space is because he hasn't understood the reality and the fact about this work of hte U. In the literature of man in the past times, you have spoken about the Adam and Eve, and how Adam made Eve, one gave the existence of physicality, and one through its existence gave confirmation to the soul of the other. We always look at what Adam gave but not at the fact that what he gave was to confirm his own existence, how own love, to confirm the dimension of the physicality. Otherwise it would have been the essence of the work of the U without dimension. The Creator wanted to confirm His own creation and His own existence. And the man was told this story but at that time man could not understand it. In the life of the human race man has separated the 2 and this is why he can't find peace within himself and with the society of the mankind. When mankind reaches the point of the totality of the STM, (:16). and the totality of the soul of the earth

work in harmony as one heartbeat, then the physicality of the man will become part of and works the same, and man shall find peace and then man will join the universal family. 21

(:32).
(:34).

(:44).

(1:00).

(1:12). ... I am tired ..
(1:16). .. the Creator is tired of this unruly children. Rick says, Does he press the reset button? We have done it many times, it doesn't work. Today you have learned a new way to travel the depth of the U without a SS. You still want factories, would that help man or keep him longer in the harshness of physicality. It's very strange when man comes to the point of separation, he wants to stay longer, why? For his physicality to abuse his soul more. Why we don't understand that when the time comes we submit to it that allows our soul to take to the dimension of U Community. Mankind has a problem with the (1:18). confirmation of his own existence, and because he has never understood the twin life of the man. He needs to be aware of what does it mean, what do we want from this existence, why can't we find peace. 52
(1:20).

(1:26).
(1:32).

.. today is ?? prophets Day, (1:38). because we have fulfilled the prophets, that you understand the totality. The Christians have been waiting for it, and the Jews, Moslems, and Buddhists and the rest. Now we have fulfilled the prophecy. From now on it's in the hands of the man. The beauty of it is this time you can't put me on the Cross. .. audio lost... (1:40). (1:44). .. I think there are people playing in the background interfering with a lot of things. (1:45). ... As I said, this time you can't put me on the Cross because this time the Cross is with you. You have to decide if you want to turn right into the Cross at the junction to take to the dimension of the U Community or turn left at the Cross to become being imprisoned by the dimension of physicality. So you have to choose, it's your choice. (1:46). ... I can't see what you will choose for your soul and I can see a lot. There was some writing in the background, do not say this or that, can you see it Rick? ... I think there are a lot of people who don't want me .. (1:48). Can you delete or stop this one called "Spaceman". Put him in the space. What we have to decide is where and how what to do and where to do and how to elevate ourselves. It is not the possibility, it's the totality, which means we need to be where we decide to be and how we elevate our souls, in how we enter the new dimension, in how we decide to take the dimension of the space travel ... (1:50).

(1:54). ... Any questions. Q: Would it be true that some souls can be elevated and some cannot? The man is the decision man, nothing but the man himself. Q: And some want elevation and some don't? In a way, put it this way, how many times have you been to see Mom and you have already matured and you have your own children, maybe, Mom says, stay for the night, and you say, no I have to go home. (1:56). But in fact, you really want to stay with Mom. 06

(2:00).

273rd Knowledge Seekers Workshop - Thursday, April 25, 2019
(,)

(:05). Plays a video of the 3 ways to travel in space, story of bird in cage as the STM. (:21). Rick starts workshop. (:22). ... As we said last time and now we carry on with more of the same, is connecting the STM with the physicality and in so many ways understanding the heartbeat of the man, where do the heartbeats meet, the heartbeat of the STM and the heartbeat of the physicality, and what are consequences, outcome and what does it develop, constitute, and what does it end and would that point be very clear between the two parts of the physicality and the emotion, or what we call the interaction of the heartbeat of the physicality and the heartbeat of the STM. There is something very interesting to consider before going any further and we might have to open our eyes to

new dimensions and understandings. We speak about the STM and the brain, then we have the heart. (:24). One of the ways that the physicality has encaged and enslaved the STM is through the blood, as we say, the emotion, where the emotion of the physicality is transported. Now we understand something very simple, if we are familiar with the world of physics and Pl T, places like CERN and places of most advanced technologies, TOKMACK systems which is the Russian based nuclear fusion systems, which is a pure plasma. We have a Pl inside but to control and contain it, we need to create a M field around it. This Pl in the center is the STM. And the current to keep this Pl under control and keep it floating within the center of hte brain is the circulation of the blood around the skull, and it transfers its energies and according to these energies it holds on to the STM. This is why when the man dies in the physical dimension this cage, this electromagnetic field, which comes from the pulse, from the rotation of the blood, (:26). is broken and the STM is free. So now you have understood how physicality has encaged the STM. 17

(:34).

(:46). ... (break ...) (:48). ... The interaction between the STM and the physicality in the level of the fields. (:50). that leads to creation of emotions. 09

(:54). ... (:56) . (:57). We have to understand the totality of the work.

(1:08).

(1:16). my teaching is over. .

(1:20). .. Are there any questions. Q: In breathing is it where the breath is slowed down or deeper? ... (1:22).

(1:32).

Any other question. (1:38). Q; Why is the soul in this cage, what does it gain or is it without purpose? The soul was created out of the dimension of the physicality. When we look at it, you had the egg and the sperm, and interaction of the fields and absorbing fields from the womb of the mother, the energies they create lead to creation of what we call, ?? the centralization must ?? they go through many, they have to be able to do, and that energy circulation come to control balance everybody together, in a way it becomes the soul, and now more and more energies strengthen the soul. Then you have more divisions, then you get that ?? circularity. Then you have the dimension of the field of the planet. 45

(1:44).

(1:50).

(1:58).

(2:02). Q; Why is man so ignorant of the soul and its powers? Oh, we were not ignorant, we ?? with a magician, it's called, ?? profits (or prophets).

(2:10).

(2:16).

.. We see a shift, we see earthquakes that are not usually there. Earthquakes usually come by the shift of certain fields and it's very clear, (2:18). during these times the earth is moving closer to the ?? without a shadow of a doubt. We have ?? in the past 20 to 30 years, a big chunk forward. Usually what we do as we go around the solar system, draws a spiral, we are coming closer and closer (to the sun), but somehow now we have dropped one tier closer, and this nudge is creating conditions. Partially this nudge comes from the empty ?? in the center of the earth, through the oil industry. Definitely through the oil damage, or what you call, this layer which absorbs ?? M fields and it has been removed (oil pumped out of the earth) and been burnt outside, and has created a reaction of the fields. This is very obvious. And this fields interaction has allowed a jump inwards. The global warming is not to do with the CO2 but with what we are pulling out of the earth. We are taking blankets off, so it's releasing more heat, more fields, what you call, G field strength absorbed much less, so the sun is pulling us in. We have entered 1 nudge (tier) inwards, this is very clear in the past 20 to 30 years. If mankind doesn't stop the pulling of hte oil, because it's a very thick material and it absorbs a lot of material ?? it's a combination. CO2 is not the damaging part, depleting this blanket is the problem, but mankind doesn't understand it and blames it on CO2. Global warming is because we are getting pulled in because of depletion. (2:20). We should have gone say this way to come here in say a million years, but now we dropped in, we are dropping in very rapidly, because we have created that condition. Global warming is not through CO2, which creates more life, it's the depletion of this layer is causing massive problems, and dropped in, we feel it, the massive earthquakes which are coming is to adjust for this tightening. And the more it tightens the more mountains have to build up from the surface, because the surface of the planet are pushing inside each other, or pulling the other way around. This would have been the natural path, but mankind with this oil industry depleting inside the planet, and secondly mining a little line of it, have caused us to jump in, we have changed course. This is the course we are now taking, we should have been here in a million years. ... this is where the global warming is coming in, abuse of the planet. We reached the critical mass struck. (2:22). ... Q: Ask about the spleen? Any organ removed from the body has an interesting dimension to it. If you take a part of the body out, just because you take it out doesn't mean that part doesn't work. It actually leaves its own field there and it still operates, but in the dimension of hte fields. Even if they take one of your kidneys out, if you create the right conditions you can actually grow a kidney in that space. Just by removing it doesn't mean it's totally gone, especially internal organs. The space and fields of it are there to operate the same. (2:24).

(2:28).

(2:32). We are growing the brain where it is damaged and soon when it is completed we'll release the report from both the Iranian and US governments. You've seen the same process as before. Now if it is liquid we can convert it into the solid mass then there is a physicality to match the physicality. Very soon we should be able to easily deliver these systems for the mending of brains, it takes a few weeks, you can do all sorts of magic with this new T. Q: Do brain waves work into this T, they come in different categories, alpha, theta, etc. ? Oh my god... what they call brain waves are like what they call the elements inside the nucleus, what is it, left and right hand turns, krypton's and what else. This is the same because they don't understand it, they talk this way. Physicality has a dimension or it has an energy interaction, one of the two, you can convert it. (2:34). This is what I say, maybe some of you understand, we get a Cu, make a Gans and convert it to energy, and now we convert it to matter Zn, Cu, whatever. Now we take a skull and transfer this energy to a brain cell, what is the difference. Which part of the T is it that you don't understand. If like Peter who made the Zn, Ni or whatever, it is certified. Now it's this way, I get the same energy and if I want to make water from it, I make water, if energy then energy from it. This way though the system (brain) will lead to creation of the cell in the body of the man. Up to now I have done everything which could not be done, a coma patient, etc... the only thing is for them to give me a dead body and resurrect it and that is very easy, soon it will be done. Because I can transfer the energy to be the strength of the soul of the physicality and the body shall move. It's very easy for me, I am the creator. So what do you want me to do, what do you want me to make you. When I tell you that we are making a brain cell, as we did with Naomi, it's no difference. It's just that you have to create a condition to make gold here. We make a condition to make a brain cell, because we have learned the mutation of elements and of energy. (2:36). Finished. You wanted to wait for a Messiah to come, or the return of the Christ to come or whatever. The knowledge is ?? not the physicality of the man. Now you know how to react and what to do, what leads to what. .... I don't carry a business card because I have never seen one in the U. And I have never seen in the U anyone doing what the mankind does to his ?? I have taught you the ?? of the knowledge. Some of you understand it and use and go and get the Noble Prize for it, then you ?? your intelligence. Some of you try to use it and make weapon out of it, because it doesn't ?? my soul, you pay with the life of your, (2:38). those who you have emotion with. You have to understand that the knowledge is complete, what you understand is what counts. If you understand the knowledge, you can create life as much on earth as on planet Zeus, or in between in, no matter state. Q: I sent a video of a man in Brazil who had a tumor and part of the right side of his brain and skull removed, he has managed to recuperate and has movement on his left side and learned how to talk again? It's very simple, we have done that before. You see when we do it scientifically it's a criminal offense. (2:40). Q: Yes, but he has nothing on his right side but a hole? Yes, but the energy is there and it knows where to build. The fields of the .. just because you have taken a bone, doesn't change ... as long as you don't touch the soul. You can produce anything, any part of the brain. You see this is one of the biggest problems in the world of science, now has become the world of technology too. If you don't have it, you have to stop it, until we can and have it to. Now it runs in the world of commerce. You have the brain, the soul, the heart, between them there is a point of interaction, and they will create because you have

the other part of the brain which is matching the other, and it will take part of it. We have videos of a case, it will be submitted to European Court in part of the case we are taking there, that we transferred whole function of part of the brain into the nerve system of the jaw until the brain healed and repaired. It was done by doctors present and not by me. It's part of understanding, like I said, if you have a kidney here and they have taken it (out), it still functions in a way, but it works on an energy level. (2:42). If you understand this there is no need for a dialysis machine when a kidney fails. When people bring advanced technologies in and others want to stop it, it's because they don't make money out of it, it's not to their profit. We have seen this happen all the time, otherwise this knowledge would go very fast. In the coming time you'll see, because my teachings are more or less complete. There is a little bit more to be taught, I brought you here in a little more than a year, ??? HAW ?? is something like 25 years ahead of the European and American communication systems. They can't catch up. They tried to stop the advancement of the knowledge. I see myself may nations like this. We can't get it .. we block it. The same they did to the Iranian nuclear. Why so much pressure on Iranian nuclear by the Americans, because we are 50 years ahead of them. They need 1 MW to do 1 kilo, we use very little and produce 1 ton. All the pressure by the Americans on the Iranians is to get access to their rapid development of the recycling of fuels. Now HAW is in the same position as Iran. They ??? same Iranians ?? by the Canadians. The same terrorist organization, they call themselves whatever. (2:44). And they call the others terrorists. And this all will change. ... Coma patients in Iran, in 10 days we get a response in the toes .. opening of the legs, because everything is getting recorded. ...
American press is not releasing the knowledge. Q: Does this mean that type 1 diabetes you could replace that kidney? I have done it many times. You have to understand the difference between type 1 and type 2 diabetes. Type 1 is created at the time of birth, type 2 comes from the pressures of hte unbalance after birth. (2:46). ??? those who have been under pressure in the womb of the mother or in the birth canal. They all have ??? When you drink too much alcohol or take whatever, you put the same connection of the pressure. What is diabetic, it's psychosomatic. It's the same C connected, sugar .. I have written a paper somewhere, that type 1 diabetic has to do with pressure at the time of the birth, most of the people who get trapped in the birth tunnel or had a rough birth, or have been under pressure inside the womb where the kidneys have been put under pressure, you get diabetes I. Repairable, same with diabetes II. .. You know diabetes high BP and most of the diseases come from the imbalances in the kidney, the glands over the kidney which you have in the back ?? because the glands are part of the brain. (2:48). Q: Question about growing a brain in Iran ... You once said that to grow toes and limbs takes 30 days because of the 30 cell regeneration cycle? Yes. Q: Is the brain cell the same? (2:50). No, the brain position and secondly in part of the knowledge I can grow your leg in 5 seconds. Because I know where to talk to. You see my knowledge is very complete, but if I do it, it becomes Christ and then I have to resurrect a dead man, and that's the last thing I do. The only dead man for me to resurrect is the soul of humanity and that will be it. Q: Can you resurrect a decayed body? Of course you can. Do want the Belgium's to put me on the Cross, because the king is not getting paid. Hopefully in the next few months one of the biggest hospitals in the world, has been given to be used by KF as much as we can use. It can handle 3,000 patients per day. (2:52). In the next few weeks we'll give you the name and address and you can go there to be looked after all diseases.

... For the first time you can go to official hospital to be handled by KF technology. ... Just be a little bit patient with us, it's a governmental organization. The hospital is fully operational, just some paper work ... You can come with any disease and be looked after ... (2:54). We are providers of the knowledge and the doctors and officials are providers of the services. .. It's a gift from the Chinese nation to the rest of the world. ... (2:56). ... Q: Can you comment on the multiple Chakra and Kundalini versus the single energy center.... (2:58). ...
It depends on how you find the path on how to receive energy. Some people in some races can create the energy outside their body and absorb from it what they want. I'll teach this one day, but it has to be done in a different way. 55

(3:06).

274th Knowledge Seekers Workshop - May 2, 2019

(All the prophets and teachers come from the same soul of the same teacher, warning to America, ,)

(:18). ... Last time we tried to show how the STM translates and transfers its knowledge, then his feelings and emotions with the physicality. (:20). You have to understand that you have to be of the same to be able to understand the same. It's no use if I tell you about love ??? and we don't speak the same language. It's no use me sending you a message on the telephone if you don't have a telephone number, it's not the same frequency, so the 2 have to match. And what I opened up in the discussion last time is exactly what it is. It says I made man in the image of myself, which means I have the ability to work out in every sense, the understanding of the work of the body and this ???? is walking around. The extension of the new knowledge comes into operation. This means we made man in the image of myself but it's just not the image, it's the totality. What is important to us as part of the totality of the work is how do we relate to, connect to, understand the totality of it. It's no use me sending (:22). you a message when you are not on the same strength of the fields and you can't understand what I am sending through. This clarifies something important to you ... if the STM has emotion of love, then or emotion of the STM has the strength of anger or happiness, it has to be somewhere in the range in interaction with the body, it shares that, understands that, allows that to happen, and in that process somewhere in the structure of the body it shares that. It allows it to be shared, to interact, (:24). to interface, but what does this mean, if you take the STM and you go through the process of understanding it, somewhere in the brain in conjunction with the physical structure of the brain, the information, emotion of the STP and they interact, they come to be in line, and their interaction completes its work, if we understand this process then we can go through the whole process of understanding. What is important .. is that ?? man to the whole process (:26). Do we understand where the point of physicality and the STM meets. If we understand this

position, if we comprehend, what is the truth about our life is that soul feels the emotion of our physicality, it suffers with us, but it has one advantage, it doesn't need to share, it has an option to block, or to not transfer the wrong doings of man into his own work. This is part of the position that man has not understood and needs to understand. It needs to be able to go through the process that it can work with it, along with it, to be able to translate the whole process. In reality to be able to interact (:28). between the body of hte man and the physicality of the U. This is what is missing in our knowledge. We need to understand that the STM works as a buffer between the body of the man and the work of physicality of the man. This is important in the future work which we'll carry out. It's important for us to understand how much our soul even sacrifices to keep the physicality of the body in its totality, away from harming itself and harming the U Community. This is part of total understanding of the work, and what we need to be able to comprehend from the work of the STM, to what extent we will allow this to happen is the extent to what we understand of the work of our own physicality. (:30). How can we comprehend that how our soul works when we don't appreciate how much it sacrifices not to transfer the wrong doings of the man into the action of the soul. But it transfers the wrong doing as a knowledge to the other souls. This means when you do wrong the STM transfers the knowledge what has been done wrong, but it doesn't do the wrong thing itself, it's the messenger and not the doer. And this in turn comes to the working of the STM. This means that our soul transfers the information to the other souls, the actions of the life of the man but it doesn't behave for it, that what you done wrong, I pass or do the same wrong thing. The souls in their interaction with each other are aware of the wrong doing, and they settle (:32). they decide, and put right, in decision making for the ?? future of the physicality of the man. Some of us call it as a punishment, and some of us know it comes back to what we did ourselves. This is part of the total understanding of the work of the U. This means that in the religions you get punished for what you did wrong, but in a way souls don't punish, they balance, they work in a dimension that these things that have been wrong, so we have to balance it out. They create a condition for that balancing, and then you say there was an accident or this or that, and this is what we have to understand. For example, in books of Christianity, Moslems, Jews or whatever, there is a promise of a Promised One to come, how are they aware of such a thing that the prophets write, because it is what the souls have decided to be done in time. But the life of the man is a few hundred years or few decades at this moment, but the life of the soul is thousands of years. (:34). So when the soul of a prophet tells you that there will be another prophet coming at such a time, the man lives a span of a hundred or a thousand years because to him that is what it is, but in fact it is the soul of the dimension of the creation which already in itself represents ?? back in manifestation at that time. It's like a teacher telling the students I am leaving the class for a few minutes you children behave until I come back. It's the same teacher coming back. You don't expect another teacher to start teaching. Many times many people talk about the children of Abraham, the son of this prophet, etc .. it is the same teacher, but because the STM is limited in his existence, then man thinks it's going to be something else or something else will come. In fact, there is no "something else", it's the same, it's just that man is used to a very short span of life. When we speak about 1,000 or 2,000 or 5,000 years, it's not that another position will come, it's the same soul which has been given the responsibility, (:36). to look after this planet. It's a commission. It's not that we bring other souls and do other things. Then this

becomes very clear why we see this progressive development of the STM and the knowledge of the man catching up. Then we understand that we are dealing with the same messenger in the dimension of the soul and not different messengers, it's just who he decides in the structure of the soul of the creation, what ?? line will appear, what time and where. Is that 10 minutes break he'll come back in 10 minutes, but to the man it's 1 or 2,000 years. Then when he comes, she decides what John knows up to now the head of the class, now she decides to make George the head of the class. It's just a span of time, but it's the same soul that has been the creator of the totality, of guiding the man and the understanding into one line. For those of you who were thinking, now the Mohamed has come the Methel, the return of Christ, (:38). for Jews, Moses said, such and such a ?? person will come... these are all from the structure of the soul of the same soul. He has chosen guidance for different tribes in different ways and we see the structure of belief in guiding man, elevation of the STM all comes around about the same time through the same channels, through the same understanding but according to the emotion of the physicality he has chosen different paths. It's the way you are black or white, Chinese or whatever, it's the emotion of the man according to the environment which the man has then created it's the same. To the Buddhist or Taoist or Zoroastrians, or to people in South America, the message has been the same around the same time, but different ones have chosen to put different strengths into it, and they have woven it to fit into. The ones who have become more like the top, have got structures like the ?? Taoism or Buddhist or whatever. But the enlightenment comes from the same soul. Even in some of the promises that have been given by the same soul, it's like when the teacher goes out and says, (:40). when I come back, by that time if you do the test I will bring you all something as a gift, and that gift will let you be able to talk to each other. In a way he goes out and brings you a walkie talkie that you can all talk to each other. It doesn't mean that the walkie talkie didn't exist, in the classroom it was unknown. So he says at that time ?? because it is he himself that is bringing the knowledge, enlightening the physicality, the STP, and the STM. We see scientists like Tesla, in a different way appear, because it's he who translates that knowledge in the soul of different Messengers from ?? Then this makes it very easy for mankind to be able to understand the totality and easy to be able to create the line of communication. Then this structure becomes part of the work of the present time. Then you understand how the man has decided to choose different names, teachers, guidelines, but all come to be at that time, ?? because the teacher for all the souls of the man has been the same teacher from the beginning. (:42). When the first messages were given and the first lives created on this planet, one soul was given the responsibility of bringing this child progressive development. For you, you talk about 6,000 years the first ?? was created, 3,000 years ago this was developed. Now archeologists dig out, there were cities which were there 13,000 years ago, what happened to everything that we accepted? And in those civilizations they had more advanced knowledge then the current civilization. Is this the cycle or what has happened to mankind? During and through disasters the whole totality of the life been lost, or moved on. A new cycle with the same knowledge has been re-grown. Why suddenly did the Mayans disappear? Why do we find structures but no civilization connection to them. Why do we see more advanced knowledge then ours? Did they pass and then we started again, or did some of the children of the past in moving have forgotten knowledge? (:44). In reality, there is one teacher for the whole of the class, from nursery to PhD. Over

thousands of years sometimes the classroom has changed because of whatever, but in fact, the teacher has never changed. If you look at it, it is like schools with different classrooms and they just move you from one classroom to another because the roof of one classroom leaks. When you go into it you say, oh there used to be students here, what happened, but now nobody is there, but it doesn't mean the civilization and the teaching has stopped, now we moved to another position. It has to be understood that the STM progressively through the STP has developed through its own process. It's not that the man is given everything and he just copies. The evolution of the science has given man the ability to develop, to add to. Otherwise everything has to spoon fed. This is what we try in these teaching to bring all home, all the messengers of the past, (:46). from before even the man knows, have all been following the same ?? song. It's just that if say, John (Joe) leaves the school you can't be without a class head. Now John takes over, he has a better understanding and he brings more knowledge of his own and adding what is received to the classroom. .. The soul of the totality in the dimension of the physicality of the man has been the same soul responsible for this planet. But it has to be understood that as one teacher stays responsible for one class, there are other classes in the school also with different understanding and level of growth, you might call some physically or mentally handicapped, some are very advanced in learning, so we call this different parts of this U with different teachers according to their understanding. But then you have what we call, one headmaster who is in charge of the totality, but he passes all the messages to all the teachers that they all receive the same level, but they allow the knowledge to be distributed amongst their students according to their understanding. Now we are at this level that we understand the totality, (:48). that you call it whatever name, go back 6,000 or 2,000 years ago, ... whatever name you put on it, they come from the same soul communication line. But at the same time the soul of the creator of this class is like some stay in theoretical and some go for practical, making a circuit board or this and that and coming back to say what it is, and this is what we call the scientific world, they each develop ??? the soul of the physicality. Tesla is one of them and De Vinci another. Enlightenment of the soul of humanity comes through the soul of one teacher and he lasts for thousands of years, but the life of man is very little. And we are one of those soul who comes from the totality, and this is what we can put everything and we know what the Christ did and Moses, and what everybody else did during their time because it's on the watch of one teacher one headmaster. Maybe now man understands the truth. (:50). Now you understand why man has gone through this process and will ever go through this process until he matures and understands that all the teachings over the centuries have come from the same teacher and nobody else. Maybe in this process we can understand more about the truth and about ourselves, our own creation, the connection with the totality, ... Do we elevate or understand that the elevation of the STM as the totality comes from the same source. (:52). ... if it's the same teacher then we can elevate our work, understand that our soul has the ability, the gift to talk to the same teacher, has the ability to access the same headmaster. .. once the STM has reached elevation it has access to the totality. (:54).

(2:00).
(2:12).

(2:20). Q: What happen to Atlantis ... It didn't just happen to Atlantis it happened to many cities, it's part of the nature of this planet. 27
.. it's partially the atmosphere of this planet that causes the behavior of the man. (2:24). Q: Rick asks about the aggressive behavior of hummingbirds, and can we expect an upgrade in the behavior on this planet? (2:26). It's part of the condition of this planet. It's not just changing the man, he'll see the animals fighting and he'll start fighting again. We need to elevate the soul of this planet and this is what I keep on repeating. Q: And does the soul of the hummingbird get elevated as well? .. The rat, mouse, donkey and the rest (get elevated). This is part of .. it's not elevation ... it's going through the next phase. The worst thing, unless an accident happens, is destroying a culture, a planet. It happens often, it's not that it doesn't happen. It happens in those cases, we see we are aware of it, then we evacuate. It's been done many times. When mankind opens itself to space you will see many peoples who are forever travelers of space. We cannot find a condition that they can survive in, there is no planet. If we could find a planet that matches theirs, we would give it to them. Every life is created out of certain conditions and this is part of the problem with this structure, that we .. if you find a ship that is abandoned, is sinking, (2:28). you pick up its passengers, and then you have to find a nation to accept them. But when we see crashes of solar system or galaxies or universes, we evacuate them as much as possible. It is done many times. It's part of the total structure of the work. 27

(2:30). We stay straight in our work but at the same time people have to learn how to work within the structure of the life. .. convert physical body into nothingness..

(2:38).

(2:44).

(2:46).

(2:50). When the policeman is not there everybody runs. But we don't have a policeman, we have a group of bandits who have been terrorizing everybody, when they are not there normal people will take over. Drugs will be like sweets on every corner of America. We can protect the rest of the world. How many zombies can cultivate and how many attend ??? This is my problem ... protecting the people not to suffer, but maybe we have to make an example and we are getting to that point. ?? it's very easy. They cam from black to white. We know the code, the gene and the access to the energy pattern. Like I said last time, we can grow a toe in 1 day or in 6 months. It's no problem which way. The knowledge is the secret to our enforcement not out of fear. Q: In the cosmos has there been another planet like earth where similar violence exists, are teachers working there ...? It has been that is why we do the path this way, we are doing it out of experience. .. (2:52). You see the progressive .. there is some misunderstanding in the world of cosmology, up to very recently man was thinking if there was any other planet, and if there is a planet with the water, etc., would it have life. So there is some misunderstanding, there is one addition to this knowledge that we added, yes there are lives, but it is mono-life, which means because it doesn't have variation, it lives peacefully. If mankind is looking to find a planet which is a replication of this planet, and then you see all the problems, not only you have at the planet as having the same distance from its sun, they say they find 10,000 new planets could have life in them, you have to look for the axis deviation of it. It's the axis of deviation that creates the combinations of lives, opportunities. All the planets which have a vertical axis will have a mono-life, we don't see this. Some planets go through this phase of, what we call, the end of ?? incarnation and a position. And that enforces a new direction of life. We have seen these kind of complications before and we can sort it out. If not ??, the easiest way is to take the planet out. The way we take it out is to increase its MG field forces to the position that it goes back to the sun. In totality, it creates some variations in some other planetary systems in the system, but it is the easiest solution. (2:54). It's like when you take a pot of soup and it's not correct and you put it back into the main pot, we can do that. It has been done many times. Venus will move slightly backwards, Mars will find a new position, all the planetary systems in the queue will change very slightly, not much. You'll see change in the planetary system, but it's not the first time. The earth is a speck of dust, it's not a mountain to move, even though mankind thinks it's everything, because that's your cage, you are used to it. But it's just another speck of dust. We are making the information very public, directly to mankind. I can't be more straight forward. Do you remember the last time when we released the USB stick to governments and we saw the Americans force over NATO countries, and other countries ?? countries not to attend the KF peace treaty. (2:56). And through the pressure by the Italians, they were the first nation which broke rank and they came and we said, now the Italians joined, we received a call from the American Embassy, we won't be there this time but next time we will, because the Italians broke rank. We have seen the same thing with the "One brick, one road" of President Zhi of China. Again we saw Italians break rank last month ... now we have seen in the past few days Austrian and Switzerland have joined the rank. They'll be rewarded accordingly for their work. We'll see the peace work of China go through Western Europe rapidly in the next few months because the structure is broken up. 55

(2:58).

(3:02). Q: Regarding the hummingbird example given earlier, is the unstable condition in the hummingbird because it is at the level of Nitrogen field strength? There is something called with the animals, it's not the food, it's what we call, whoever has the food can spread his genes, if you understand what it means. This is hte problem. It's very much like in Africa, a poor man can afford only 1 wife and maybe 1 child. But when you become, taking of Saudi Arabia, you have 84 children and an untold number of wives. (3:04). It's as simple as that, the same animal behavior. I think today we made a very clear cut in respect to the work of the KF and it has to work with our commitment to peace. Does mankind need to suffer? I think peace needs people like you who are committed. All the tools are available to carry out the work of it. The problem is just understanding it. (3:06).
(3:08).
... Q: You said the center of the STP is in the heart, and STM in the brain, and the breath work is relevant. In yoga they use pranayama to consume energy through the breath, they use different exercises to control the breath, I was wondering if that might be the key to connect the STM with the STP, and get in position where the STM encloses the STP? (3:10). Partially you can do that if you wish so. Then what happens when the soul of totality takes over, where are you going to get your energy when you can't breath anymore, because you become part of the totality. Q: Wouldn't you be able to consume from the energy? Do you need to breath. Do you understand? So it is better to work through the soul of totality (STM) then actually through the physicality. But in a way it's a passage to take over if you, if I take your knowledge 1 step further, is by diverting the energy of the soul of totality to breathing capabilities of the physicality, so it can give birth back to the physicality ?? at point. You decide when the electron goes out and shows the total element or goes within and manifests itself as a plasma. Q: This is when we look at it from a higher perspective, but we are trying to make something like a first step to words disconnection, because as long as we make it maybe do the path to do what you just said? I think it's re-wording it, it's not disconnection, it's more a direct connection, that it can control both. It's looking at it in 2 different ways, but in the end it's the same outcome. (3:12). Q: Isn't this in a way a third entity that is being in place? Is the neutron a third entity, or electron or a proton which comes from a neutron. Q: The totality of both. Yes. This is what is part of the structure of life on this planet. We are not here to destroy, we are here to elevate and find a peaceful path for mankind to become part of the totality. ... I think we have come to that point with mankind, we have to do it, it doesn't matter how he shouts and cries. Q: When has the child grown enough that he can work with the fire? When he understands and can enjoy the fire and the beauty of it and he doesn't need to kill to cook with it or to burn a house with it. It's the same fire, you have to decide on the position of it. .. It's the job of the world leaders to create a condition of peace and security for the nations. Each world leader is responsible for their own area. (3:14). KF One Planet One Nations is supposed to see that all nations benefit by it through 1 system. 07

(3:20).

... From today's teaching all you have to realize is that all you have received over the centuries is from one teacher, the same source. (3:22).

(3:26). Ella shows the KF Plasma Times ... Carbon 14, Blood Circulation cage for the STM, C14 balance connection, C14 creator of the man, Heartbeat of the Soul, Mining Revolution material creation, Zero Time Communication, Field Replication Unit, .. (3:32).

275th Knowledge Seekers Workshop - May 9, 2019

(America has refused to become peaceful therefore the button has been pushed for a great disaster after which change and peace will come, ,)

(:19). Today we try to go deeper into what we understood last time. We explain what some call a desire, we call a wish. Was it the wish of the Creator to create humanity? in the historical books, was Adam the Creator and Eve the humanity, that through the creation of, confirm the existence of. If we are created for the Creator to confirm the existence of Himself that He can love and be loved to, then what is the difference between the man and the Creator. We create children to confirm that we can love, have the power to love and at the same time we get loved by our children to confirm that we have loved a perfect creation. (:22). Is this what the whole existence is, or is the part of the totality which man has never understood. 18

... Would the action of the man and the STM as a totality, as recall all the created things on this planet as being as a man, then what have we done wrong and, (:30). what are we doing wrong that there is an adjustment in respect to the soul of the planet and the STM, 7 billion of man have run havoc on this planet for long enough that maybe it's the time for the soul of hte planet to correct the behavior. Maybe it's time for humanity to move in the face of completion and correction. I explained this last week in a very touchy or soft way, but I'll explain this in a new way. We have seen what mankind has done to this planet and other kinds of man on this planet, be it the fish, lamb, or cow, and in that process mankind has created new fields which do not fit into the structure of the soul of the planet, so as you have seen physically in some teachings when we show, when you bring change in the strength of one reactor or you bring into play a different strength magnet, the magnet which was originally on the table creates a different position or condition. I warned of this last week and we come to the point of the creation of the separation, distance. And for this planet it has not been far to execute such a behavior. (:32). By change of the condition or by attraction of the other points that can lead to a new condition. It's the behavior of mankind that has created and creates that separation at a distance of the soul of the planet and the soul of the creation. I said, we'll make an example of a nation and this decision has been made, I warned last week that mankind is pending a massive disaster. It's been forth coming, but the disaster is not to create fear, it will bring freedom for totality of the mankind, for humanity. Soon we'll all be witness to

it, and many of us will not be here to witness it. We have requested and it has been granted for ?? said thing, the whole thing for mankind to move to a new dimension. We can not stand by and see another condition where millions and millions will be killed or put through more problems, for this reason we have asked for total restructuring and that will come for the change of a nation. We have been assured that it will take place in the forthcoming time and my request for those of you who might feel pity for this nation ... (break in transmission ..) (:34). ... As I said we don't have and we don't ask any of you to have a pity in trying to help or support this face, as it will lead for you to carry their pain. We do not wish it but they have created it. As I have said many times if we kill we become a murderer but if they do it themselves they commit suicide. (:36). The freedom was given and it was abused. Many of you might ask what, where, how, and who, this will come down to the time and the place and it will be understood fully. We do not sit back and allow these things to happen so freely, and at the same time the humanity has to go on, humanity doesn't depend on a few, we saw the dinosaurs when they passed the point that is what happened, we saw what happened to the Mayans. These are the conditions which created when the loss of life and damage to the souls is beyond acceptance of the soul of the planet, This is something we have seen and foretold and I warned very closely last week and it has and it will take place, it's the decision made by the soul of the existence and we have to go through it. It's something that humanity has chosen and has allowed it to happen. It's not done by anyone else from nowhere else. The scale of the loss is in 10's of millions not in a few. What took place during the WWII will happen in seconds, the totality of the loss will disable one of the most heinous nations on this planet and after it we shall see peace. Where we all will become one (:38). and all will stand the same. It is what has taken shape and this is the soul of the totality which has given shape to the STM. The soul of this planet has been abused too much and like a body bleeding it heals itself or it cuts the piece which is gangrened. It was expected and we have to watch that this process completes for humanity to understand it. I said many times the beauty of this T will come out of the fear of the man not out of beauty, but mankind in his structure always works through the fear. We tried long and hard enough and we don't see any other solution, the decision is something we have no say in but we are observers to a cycle of change. As we can rebuild our own soul in the dimension of the physicality, the mankind needs to go through that to understand that he can transfer his own soul in a dimension where he doesn't need the physicality. In part of the teachings in the past few weeks I referred many times (:40). to a cage, transferring the soul to another soul, to another dimension, to another creature, now those of you who have worked on the dynamic systems should be able to understand what this means. You should be able to understand that the totality of the system, comes from the totality of the soul of the planet, it doesn't matter which planet. ... Very much as we give our soul, (:42). or our selves in the hands of a pilot to take our physicality which contains our soul from one place or another on this planet, now that we have the knowledge and the man in the coming time will gather this knowledge, he can build a system where he can transfer the STM into that system. In this way the physical age of the man will not count anymore. We travel the space of time in no time, when we travel across universes or across the U, zero time operation for the dimension of physicality comes into operation. This means that we do not need to carry a physical dimension with us to travel the space of the U. We carry the dimension of the STM to travel the dimension of the U and to

manifest itself in the original shape at the point of destination. What this means is that now, if you remember, (:44). I explained in one of hte teachings very recently, that the STM in the center is surrounded by what we call the Pl control that is the brain, and this brain is clustered by a cage as we call it the skull. And this itself has a dimension of control by the blood flow around to keep the skull. All this has the dimension of physicality. For those of you with the new knowledge it should be very simple for you to move to the direction and dimension of creating a system which creates a plasmatic field which can contain the physicality of the man, that from now on we do not have, we should not create a physical dimension to travel, (:46). because when it comes to the point of destination all we need to do is to open this space gap (at the bottom), that in totality what mankind will have at any point of destination by opening that door will give the physicality a dimension of choice as how to appear and manifest itself in that dimension when it appears. Then this door is the opening with the environment that you have landed in. How and what shape you take is the interaction of the STM with the environment that it has landed. This is what we saw with the Chinese system, a combination of systems to hold the central line, this is what we saw with the Iranian system, and this is in fact, control of the 2. We can transfer, if we understand the process, the dimension of the STM into another dimension, when it reaches balance it's a copy of both, and now you can transfer the STM in the dimension of the flight. This process will take some time for man to understand more, but in the condition of what is to come, in the knowledge of the man to expand to understand the totality of the work of the U now brings us to another point of completion. What we see in very simple, mankind has moved and will move, (:48). to a new dimension, where we ourselves can decide the strength and the position and who will carry our soul in the depth of the U. You can build a cage for it in matter state or you can create a condition that part of its soul stands to create its own dimension, then there is no physicality to carry. Then as some of you have asked, what happens when we go faster then the speed of light, when it comes to stop what will happen. We are part of the same fields, so there is no acceleration or deceleration, because you are part of the totality. This is a bridge between the dimension of the travel of the STM and with the dimension of a spaceship which carries only the soul of the creatures and not their physicality. Then there is no time of death, it's impossible that us as a physical dimension of the man will use this process on the planet, where when we are 50 or 60 we decide we would like to put ?? on this and we move into the dimension of the soul, we encage it, and then wake up in the time when I choose, in a thousand or 20 years and then repeat the same. So the dimension of the physicality and the physicality of the man (:50). becomes immortal. There is one point that in the past teachings we have brought about and would like you to understand more. Those of you who follow the KF you have signed yourself to the peace treaty. If we look at this map, all of you across this planet somewhere have created the Gans's or something dynamic systems, MaGrav or whatever and in so many ways we have created a totality of the STM. It doesn't matter with what or which intention you all came to be part of the work of the KF. We are in a position to create that dimension of the STM that in respect with the totality of the soul of the planet we wish a balance for mankind. We can move collectively to a new dimension or we can collectively create a new condition that brings peace on this planet. (:52). It looks a little confusing but it is exactly all the same. In the time to come some of you will be in the position of harm due to the motion of this planet.

My ?? chills to use the new understanding to be not there when the physical condition appears and return there when the physical condition is over. the choice is yours. I have spoken in teachings a few times, maybe for the first time it makes sense, you understand and why we teach this today. This is a matter of the interaction of the STM and the systems which you have been taught to encage and safe guard the STM that in time of change they can re-manifest themselves not to be harmed if you choose the dimension of physicality of the existence. It is not our wish but our knowledge of what is about to come. We are aware of an accident which has already taken place and we are waiting for the noises after that on the accident itself. (:54). This is for those of you who understand, you can choose the path. It doesn't matter if you are a K Seeker or not. My knowledge, my feeling has been transferred to the soul of humanity. It is mankind who has made that decision. Now you understand how you are able to transfer, but in that point you don't carry the pain of physicality, the pain of the dimension. My wish is that mankind did not have to go through this, but mankind sometimes forces himself to be unkind to himself. Always I said, one of the first things you read is, Thy Shall Not Steal, and we usually steal from ourselves and it is your responsibility to not allow anyone to steal from you, what we call in the English language theft or bullying. And we have decided to put the books in balance for the bully's themselves. (:56). They'll be so busy they will not be able to bully anyone anymore. Unfortunately, we have thought of everything, they should have spread the knowledge and not block it. A time and position has been set and there is not much more time to waste. Those who blocked the T now will pay for the T. Those who had the freedom to spread the knowledge that when the time comes, they could at least be able to move on, they are pushed to move by themselves. This is important for those of you who understand the message, leave your position and take a new position. You don't need me to tell you where and what and how. We have to choose between the matter of physicality and the matter of the soul, and secondly we have shown all options. You can go the Chinese way as I call it, you can go with the SS as you have seen it, in all the dimensions of physicality creation. Or you can do it with a single core, reactor the same as the Iranian way, or you can transfer ?? There is no other way to do it. This position, once you establish it has the position to carry many souls. (:58). In the old histories they called it the Boat of Noah. Those of you who understand this, you know how to work, to do it. But my biggest fear is that mankind doesn't have the time, for those who are going to be on the receiving end. We are not here to create fear but just to inform and read the news. We are not predicting, the news has already happened that's why it is hte news. Mankind is deaf to hear it. Now you'll have the ear to hear. We are not predicting, we are already part of the process of completion. The buttons have been pushed and the engines have started. The only thing is we know the destination. Try to understand the work of the physicality and the work of the STM. We have positioned many members of the U Council and Earth C, in the positions to build and to be, to understand the process. Now it is your decision as members of the councils to foresee the next steps. (1:00). Some of you are well versed in the knowledge of the KF and the work of the systems and some of you understand well the STM and the work of the man. I have only one thing to say, I don't like to be in the universe of the English speaking, which the member of the U Council. The dimension of the whole structure is for you members of the UC to know how to operate together. And that is all I can tell you. Learn in how collectively everything works and is done. Today I explained in a very simple way the

collection and connection fo the souls in the dimension of all the reactors in physical dimension that we have built and the STM. You understand the brain and the control of the Pl, containment and release of the Pl, then you have to decide. Those of you who test and test a lot should be able to transfer the soul of the humanity in the dimension confinement of the system. Do not get fooled by the blood or a skull. (1:02). Understand the building of the systems, Understand what you have built, this especially goes to AZ. The AZ team, the disaster is on your doorstep, make sure you understand. The completion of the knowledge is understanding of the knowledge. Otherwise the teaching is complete. I have taught you for a long time the work of the MaGravs and the systems, I have taught you the positions. We now understand how to encage it and how to release it. Then there is no time and space, man can live in spans of the U without ever worrying about the dimensions of it. the way we encage the Pl in the fields now we can create fields which encages the Pl. We have moved to the dimension of completion. If you look at the Chinese system, I call it space reactor, we gave you the option of physical dimension, to create physicality. In the Iranian system we did the same but in another dimension, if you combine the 2 you can combine the STM. (1:04). The STM is mono-Gans like a sun it shines, but it has different strength of its own, not different strengths of different dimensions of G or M fields. There is a big difference. Then we understood that the blood circulation is the containment fo the STM. It's the one that creates the cage, but understand at the same time from the teachings that how I explained that the STM has a specific point that he can move in and out of the physical dimension of the body of the man, through the structure of his own cage. It's you who decides where and how this soul which has no dimension of physical matter will manifest itself at what point. What do you reduce in the strength to allow the weakness on the other hand to open it up. If I can explain it to you it's very much like this, if this is like the STM and its encasement, and you enter a new environment, it doesn't need to be underneath, it can be in any direction, you have to decide if I am going to open this part to interact, or if I am going to open this top side to interact, because at the bottom I have to submit to earth's MG fields and take the dimension of physicality (1:06). On the top side I do not interact (with the earth) I take the environment of the U, or with ?? dimension of physicality, and see if I like (the earth side) then I open that side and shut the top side. It's the same with the eyes, they decide to leave at the time of night, (the bottom side) decides to leave in the time of the day. It's as simple as ABC, nothing else. We have to be aware of everything we do and its extent. This is part of what we are here for. This is what we need to understand about the work of the STM, the physicality and all the teachings of past years. (1:08). We have come to a point of understanding in how to move our own soul, our own decision. This way we don't commit suicide but decide on a different dimension of existence. The totality of the knowledge now you understand from the beginning. When you choose the physicality you have to take whatever this planet has and its mixture that the soul of the physicality comes in balance with the soul of the planet and then you create your own condition of whatever physicality has to be in that dimension, because only what is Inertia of this planet will become part of the physicality of the man, nothing else. If you don't have a Zn or a Cu in this dimension and you have a Ca and a Ur, then only that in the Gans can manifest itself in the physicality of the man. It's no use carrying Zn Gans with you where there is no Zn. And then the dimension of the strength of the soul of the physicality finds the average strength which the STM carries in that strength and then he

establishes the physical link. (1:10). This is why we have problem if the man travels in the dimension of the physicality of this planet. This is the totality of understanding of how you'll come and how you'll be. It's not just to create the M field of, it's to understand to create the Inertia of at the point of arrival. Then we understand more about the work of these systems, these understandings. We can't guess the planet we land in, or the environment we'll be in is what we observe only in the atmospheric or on the surface of, because if there are other matters within the structure they will already be as part of the physicality of the manifestation. This is what happened on earth, every element is part of the physicality of the man, and the physicality of the man has used it in one way or another, in one part or another, the way it suits him. There will be no difference on the new position. (1:12). The understanding of the knowledge is to understand the essence of the creation. Man will never understand the totality but he can understand what will help him to exist on this planet or another. What can we do, what is the next step for those of you who are researchers and you have learned everything about the Gans's and building the MaGrav and power units, and SF, now you have to put all that knowledge together to find to accumulate that knowledge to be able to transfer the STM to become the traveler of the U. Do not worry about those who loose their physical life on this planet, (1:14). they have chosen it. Last time it took mankind 6 years or so to destroy 60 million of itself, this time it will be 60 seconds and 60 million. This time mankind has chosen the path not the totality of the soul of the U. It has decided to create that separation. When you take from something you take its behavior too. You take what it came to. I am going to explain something to you in a very different way. If I keep on taking blood from you which you need for your own existence that you stay warm, you can react and live, what do you think will happen to you, how would you react. As you have taken from me you have to understand that you have taken part of me, (1:16). so I have a connection inside you so i can dictate the terms on you. The blood of the planet is the liquid of his existence not what is in his digestive system. Mankind has taken too much from inside, now the planet has said this is it. Exactly the same way through the same blood, the blood of oil. You will understand soon, I gave a very clear hint in the last 2 weeks of teaching. It's the greed of the man which kills the man and the man has become too greedy and now he has taken this step. When you cut the legs off of your own chair you can't blame no one that you have broken your leg with the chair fall off. This is what we see and this is why I put this teaching on today. I knew that I would come to this some 3 months ago and I know what is about to happen in the months to come. Mankind has reached the point of entering the U Community but it has to clean up its own house first. (1:18). Please understand the teachings of today and don't worry about what is to happen, be joyful that you have a tool and you understand it and you can create your own dimension into the process of transferring your own soul and the others. Understand the containment of the Pl, the containment of the flow of Pl, containment of the STM. Everything, all my teachings from the beginning is pointing in one direction from the Gans to everything else to the point of today. We started with the matter state, we created an energy state, and from the energy state we created the matter, then would the soul of the collective of the humanity in the depth of the space, if he understands it, would be able to create another station like the planet earth. (1:20). But this time we'll not make the mankind's mistakes back in the ?? ?? It's purified. This is a possibility. And some races have already achieved it. It's not just going from Cu to Gans and creating

gold, it's coming from the physicality to the creation of the STM to create another dimension of physicality, not only of hte man himself but of the planet of existence when you carry so many souls in one direction. The problems with the nomads of the U is that they have not understood the totality. Unless man wants to be a nomad in the space like the others. Any questions? (1:22). Q: What is the process to open the door of the cage? It's very simple, you will decide in interaction. If this is the surface of the planet and this is the strength of the STM, then between the STM and the soul of the planet, and the Inertia of the planet, and the Inertia of the soul when it created this ?? decides where to open up, in the body of the man we see it in the neck. When you have a different dimension soul the Inertia decides if it is going to be what. We are running a test at the moment with the condition of the control of the Gans. We have set 3 systems similar to each other. Here we control the Gans, here is a natural system, here we just control the Gans on the ?? (1:24).

(1:28). In the case of a normal water the seed is created according to the structure of the height. It doesn't need to take that much from the earth, which is just a supporter of the first steps. In a condition where we have put a couple of Gans balls we have dictated the condition. In the last one, initially we see the growth but then when it grows to the top it should be very rapid because it's a combination of the 2. here we created a condition of this .... but with the benefit of the Inertia because the Gans is sets within the seed, that's how it grows faster, This confirms a lot of understanding. It comes back to the teaching of the soul, how we choose physicality and how matters which are connected to the physical matter of this planet grow faster first. Now we understand the full process of the herbs and how they work. (1:30). The process is to understand the why and how then you can see in the physical matter condition, which is the STM is created out of the physical condition fo the planet earth. It's connected to the dimension of the existence in an Inertia state. This means we were created from the H, C, N, O, Zn, Cu and everything else, this is how our soul of physicality is created and its essence in the condition of its own work can only connect to the STM at those strengths, so in space we are prisoner of the Inertia of the planet earth, we are created in that dimension and strength. Would we find on another planet a condition fo Zn or Cu that partially we can manifest ourselves in that dimension. (1:32). It's the physical dimension of the manifestation. Any other questions. Q: For those who pushed the button for themselves, is there a chance for them to go back from what they are doing or is it already done? You have to explain yourself? Q: You said we didn't push the button that they did it to themselves, is there still a chance for them to go back? You can always go back. Q: I mean they will not face what is coming? You see this is not a condition of coming, it's a position that comes about what is and what has been, and it's a process we associate ourselves to. And they decide and associate themselves to it. (1:34). We haven't done it, and they can choose. In a very open way I explained the state of the 2 states last week and before. The plan to bring so much pain is so big that the planet has decided to move against it. You see the tip of the iceberg we see the whole of it, and that is why we decided. This nation will be under so much suffering that it will not have time to bring suffering to the others. It brings its own demise out of its own work. We can not force, as they say in English, we can take the horse to water but we can't make him drink. We can put a clean water and a muddy water

but we can't force the horse to drink from one or the other, it decides. We see the same game played, (1:36). by the same people who played in the 1930's and 40's, just the clown has changed. And that is all. If you look at a country like Germany since the Second WW they became looking inward and left all the bad habits. We saw Japan the same, and through that process they became strong economies because they were not allowed to spend on the arms and then had enough to spend internally. We saw the growth of Japan and Germany after the WWII. And all started with one clown, a puppet doll and now we have a new puppet. This time we take the puppet with the guys who play with the strings. There will be no next time, because when they do it themselves they uproot themselves and they have created that condition, we are just observers. ... (1:38). ... This is what we are observing. Any other question. (1:40). Q; In the 4 reactors like the Chinese when a M field is generated around the system is there any force on the shaft that is turning the motors? Yes there is. Of course it is a M field. ... those who did the tests on the dynamic systems, you see the motors stopping, and changing direction of motion. It's a M field because you have magnets in these motors. It's the balance of the pressure between inside the core and the magnetic field of the motor which forces the motor to stop. .. you see one core stopping and the other core moving. When we run multiple cores we could see it clearly, it's the field forces, even though one core is rotating the other one stops. Rick says, this is one of the reasons you want to get away from the motor driven reactors and make themselves rotate? Yes. Rotating freely according to the pressure with the MG field of the earth. (1:42). Then the central field force in your reactor interacts with the MG force with the center of the planet according to the strength of the float. I think many of you have never understood that. Then you can change the composition of the fields and you can dictate the position and direction of flight. Let me explain it the way I did from the past teaching. We spoke about the STM and the STP, when the field force of the STM and the STP meet at a given strength (draws the intersection in the brain) let say we call it happiness or joy at this point, and any field which comes at that strength to total motion of the fields of the blood will give us that sensation, then we are happy, we are jumping. Be it the physical tickle of the body, be it a joke, be it a beautiful flower, each one carries a strength which at that strength matches, then we see laughter that we are happy with. So if you have created the soul of your system, then you can dictate the direction of the flow, which way you want to fly, where you are going to land. It's the same principle. (1:44). Is it the planet which is dictating or is it the dimension fo the man? Nothing changes, everything is on the same principle. It's us who has to understand the process. Q: So if we had a system that had only 1 motor that turns all 4 reactors it would be ideal? But your limitation still is the same Cu strength, limitation. When you run reactors there are a number of things you have to consider not in a physical dimension but in the dimension of the fields. (1:46). You have magnets in your motors which most probably rotate in one direction or the other it depends on how you connected it, then you have created a core and a field in it, when this core field strength matches with this (motor) and they come into balance, there are no field forces, the core will overcome the motor and it passes it (?this is what stops or changes direction of motor?), but you still have another field force which is the center of the planet having the same pressure, and then you have one (field) which is in totality with the system too. But with your motor you have created a field balance filter, like the heart of the man you connected it to the earth's physicality, to the Inertia and because of

its proximity it's very hard to control. If you take your dynamic motor 10,000 kilometers from the earth you'll see a totally difference performance pressure because in a matter state it's too far. The position of the planetary, stars and galaxies is a combination of the Inertia and the MG mass field, it's the mass field which decides the totality. (1:48). ... Iranian man wants to know if he met Keshe as a young person ... I do not know. Iran is a beautiful nation our root go back long deep, it (1:50). it's the totality of the essence of life. As you know our kindness is not our weakness, in our love for knowledge goes back centuries, it's a home grown, it's the root of knowledge we have never patented it and never covered it, we shared it freely, it's like poetry and it goes with us. The thieves always protect themselves under the cover of patent. The ones who have are always generous to give, it's part of our culture and we are always happy. Any other question. Caroline asks. Q: What is you advice for supporting the souls that are going to go through this turmoil? We are not going through the turmoil, they are going it. So they have to sort it out. The beauty of it, (1:52). what they call the gravedigger is always at the bottom of the grave pit. So they have to sort it out. The problem will come for man ?? There is a very simple explanation, dinosaurs ruled this planet and because they were big they killed as much as they liked and did whatever they liked. So they created a condition, this is how meteorites are attracted to planets. We attract the fields we create and sometimes we are part of the way when the accident happens. But still there is a reason we are there to witness the accident, because not do anything with it. Humanity has taken that course and it has positioned itself in that position be it physically or not. You see this T should have been released 10 - 15 years ago and taken through, mankind would have had the freedom to do, it doesn't matter what to do. Why has it taken so long, why has it gone through this process, why a king tried to steal the T, to kill and everything else for it. And the others have supported it. Because it has to come to its maturity. (1:54). I said today, I looked at a lot of things in respect to humanity, where it is going to go, why it's going to be. Is it my problem, in a way it is, but can I choose when somebody jumps off a cliff. I can advise them not to, but they are going to do what they want to do. We see a lot of false conditions which they don't see. I can explain physically to it. Because what they come to it, because it is there own decision. We can elevate all the souls, it's our job, we already done, but unfortunately thieving has become part of the culture of this nation through killing. The rest of mankind has matured. This nation needs to go through it. And they have to handle it themselves. We never forgive and we never forget. If we don't talk it is out of our strength and not out of our weakness. We negotiated as the KF for the peace through the USB stick. (1:56).

(1:58). .. Why do you want to elevate their souls, those who want to be elevated did so and are elevated. Those who chose the path they go the way they have gone. We negotiated exchanging T for peace with the Americans, we gave them the Key on the condition of peace. They got 10 million jobs, and exactly as 1 president changes for another, now this president sees the prosperity which came through the jobs, now they abused it, now we close the door. We know what to do. My advice is to leave the nation where you know is going to be the disaster. It's yours, we informed. Willing by killing has to be paid for, and the nations support it. We are proud to be, you are proud to give. Go back to 2012 when we gave the Key, we had no objection. In 2014 when the final negotiation was completed, it took 18, 24 months to get everything to be sorted, and now

we see the prosperity. You become arrogant about the prosperity, you become like the others. (2:00). So you deserve to receive it. My conscience is clear but I am afraid of what is to come and my advice to all the KF when you hear the news understand that it is the time for man to move on be it next month, next year, be it some time in the future. We don't put a time on it. It's for a small part of this planet, it's a hurricane, it's an earthquake, it doesn't harm the others, but it changes the nation. It's their problem, never we worry, because the more we understand about the balance of the fields, we can give as much as we like, but they have to accept it. It's not our fault. Many souls elevated. But now they have chosen not us. You produced the guns and the bombs in your nation to kill the others somewhere else, you have to pay for it. The balance comes. We see a bigger picture, it's not small, massacre beyond imagination, the slavery of the planet. We don't let it happen. End of a nation. It's our decision. There will be nothing to be called united. (2:02). If we allow it to happen, the others will learn and it will become a bigger problem, therefore we take it out at its root. And the root has been taken. We are One Nation and we can take a rotten tooth out because the rest have to survive. I am very precise and I know exactly what I am talking about and those who understand have received a balance sheet. You have to understand something, they staked the whole of Europe on the Euro, the Euro is not a freedom, it's the fear fo what they did, they brought ?? want to control her, now they got the others, they came up with the Spring Uprising, now the problem with the Persian Gulf, then the next one is another big country and then the other and then we control. In this planet there will be one correct master and that is us, not them. We are the creators and they are created by us and we control. There should be peace on this planet, not a bunch of hooligans in the name of Jews, Christians, Americans, or Moslems. There has to be one, and that has to be peace and we'll bring it. (2:04). This is what it is, knowledge is given freely, if you understand the first 20 minutes of the today's teaching I have shown the mankind how for the first time he himself can make his own soul free of his physicality in the dimension of understanding. So you have the freedom. Never has so much knowledge been shared so openly and freely with everyone to take what they like. So what do we do?

(2:06).

(2:12).
(2:14).
... The case has started in the European Court .. (2:16).

(2:20). Q: About seeing flashes of light? Seeing light flashes is a filtering. A red color to you is not the same red to me. When we change the M fields of the brain through pressure, eating food, entering a new environment, the liquid of our eyes, (2:22). changes its strength 05

(2:26).

(2:34).

(2:42).

(2:48).

(2:52).
(2:54).
(2:56). .. The Mexican center in Tijuana is becoming an educational center for Southern US to South America, we have moved away from building a factory in Mexico because the size of the property we bought is too small for what we want. The factory will move to another location and Tijuana the teaching center as it is the wish of Armand. ... (2:58). .. AZ is shutting down and moving into manufacturing very shortly. ...
(3:00). (3:02). (3:04). (3:06). ... Q: The link between AA, plastic, CH3 and blood, how do we get rid of the physical cage? Of which animal, or what thing, your own soul? Are you wearing a plastic helmet? Rick, do we get rid of this plastic CO2 box in order to make CO2? But are we wearing a plastic helmet that we have to get rid of plastic? Rick, there are times when we don't need to get rid of it but detach from the physical, whatever that is and go with the soul aspect ..? John says, leave the cage door open. Are you a wild animal. (3:08). .. Q: How to encapsulate fields for not to interfere, it's not about N coating, it's a link between CH3, like a C, O , H, and AA, ... ??? Why I can't fly right now without a MaGrav is because I don't know how to interact with the fields, You have Cu for the brain connection ... No, you have no Cu in the brain. Cu has to do with the red tissue. Q: Connection through the neural synapse, it's linking Cu with Zn, emotion. Maybe I'll teach you a trick. It'll bring you back to a lot of teaching. (3:10). Maybe it's not been understood. To be able to ?? your soul, it's like to go, or to replicate any field which is within the structure of the body. You have to practice or you don't know when you reach it or achieve it. Where you can tune into it. Get a H Gans in a dynamic system where you can feel the energy of it, let's say if you hold your hands around it and move the fields, or reach a position if you can find, or if you use motors, or if you say self-dynamic system that you achieve a rotation, and move to the point where the rotation stops, because what I explained before, because the field strength between the two balances and one superimposes ??? Then put your hands in front of it and reset the whole thing to start again, you know where you put it, where it's going to stop, and try to transfer the energy from the system to between your hands, (3:12). that you can feel the fields until you come to the point where you don't feel it. The point that you don't feels means that you have matched the field in the reactor. Then change, let's say it's CO2, CH3, or H to something one level higher, go from CH3 to maybe CH4, from H to D or Tritium, and try to match it (the fields), and if you feel it, you have to feel it first and then you can match it between your hands, then you know the strength. Then move away and come back into it and see if you can create the same field and if you can stop the motion in that ball, in that Gans. It takes practice, then you understand the field strength to transfer. Then start with CO2. It's not that you have to think of it, you have to remember your soul strength and motion, and your physicality's strength and motion gives you that opportunity, that strength. So you start to physically seeing the interaction that you can stop the rotation. It's not magic. (3:14). He draws it...
(3:16).
.. Try to us a Gans. (3:18). matter state is lower then STM ...

(3:20).

(3:26).
(3:28).
(3:30).
.. Do not panic with what I told you. It's a balance of the energy of the humanity and the soul of the planet and this is something that is set and we can't change much. Do not disheartened, there is an outcome of these things, especially us getting fed up with abuse. (3:32). It's us, we can how we are getting abused, we stop the abuse of children with one guy, ?? stop the abuse of with the soul of one nation. And we'll have to come to the final point. Thank you for today and we'll meet soon.
Video.
END

276th Knowledge Seekers Workshop - Thursday, May 16, 2019

(Offers China and Iran flight to moon, ,)

(:09).
(:12).
Chinese and Iranian flight to the moon...

(:24).
... It's already in China, I have made sure of it. The process of sharing knowledge and taking mankind to the next phase, (:26). is not a decision of the governments but now it's a decision of the KF and us as people of this planet. We share knowledge freely and now it has reached a point of maturity that we can openly plan the first excursions, not nation by nation, but as One Nation of the human race. It is easy to achieve, the tests have been there, all of you know how to do it, it has been done. As I said, many times I gave you the Rolls Royce but never gave the golden key. And now the golden key will be shared directly with the government of China as of yesterday or 2 days ago. This is our pleasure and part of the work of the KF to create condition of peace, means not to think about people who create war. Because Tel Aviv from Theran is less then 1 minute, we can buy as many flowers in Iran and embrace the people of Israel. It's not a life threat, this is a friendship. I have too many cousins, my grand parents were too busy creating too many grandchildren, etc.. some in Washington, Tel Aviv, and in Theran. (:28). And now we are in China, they are all the same. 10

(:34). (:36).
... trust one soul to give all our souls to, to be in ?? guard enough at the point of delivery. Many times mankind has tested and done this, but in a way the physicality of the soul which was given to, has abused, are those who had or used the name of the soul. We used to call them the prophets. (:38). It's what we trust our soul to and by those who used the physicality, abused it. Now this time the mankind sees his soul and trusts his soul to the

soul of the captain, in full knowledge that has nothing to do with the dimension of physicality, as this time the physicality of him is within the reach of his own soul, therefore it can't be abused. In the past mankind had his soul and was told it was in 2 separate points. Now that you can understand that you can travel in the dimension of the physicality of the soul within the STM, now you can hold it, that no one like the priest, mullahs, rabbis, or whatever you call them, to abuse the physicality in the torture of the STM. This is the difference. This is where the development comes in. Everything has a time and a place. The time and the place for the next step has come. What we are trying to do is to be able to understand the totality of what is to come in the coming weeks. (:40). What we will develop is very simple, we'll try to develop and complete the process of what we started (:40). in China last year in the space program. In that process with the support of 2 nations of Iran and China a new fuel for space travel will be introduced into this process. This fuel for the deep space travel has never been released. This fuel allows only the creation of the physical dimension and not the control of the soul. This fuel was originally tested in Theran 11 years ago and now it's been re-developed in a much easier way for the whole control of the system. We are not bringing something out of the unknown, but now that we have completed everything, all come together to create one integral system. It's very much like when you try to make a food, you make the vegetables ready, then the meat ready, and everything else, you herbs ready, for when you start cooking, to come to that point. All our teaching has been to complete all these parts, now we start cooking. Now we start ?? as One Nation. The condition for this will keep, as we did with the USB Stick, we give the governments a time, maybe up to 2 to 4 months time advanced development product. Which means by seeing the knowledge and effect of it they know they have 2 to 4 months to reach international agreements on borders. (:42). In this process we can learn a lot from the European Union, the way you can live anywhere but you live under ?? taxation. This is where we become and live where we want and we decide in what direction we allow our effort, what we call taxation to be used for. We allow some of it for our countries, some of it back for where we stay and we live. With this development, no borders, no nations. As of this week it has become very clear. We release this T in one direction, the direction of peace. If anyone crosses the line of peace, we'll show how we can create that dimension. What's the use of trying to use and protect oil reserves when all the KF K Seekers know how to make protein. Oil is a kind of protein. Combination and evaluation, and combination of the CONH and what do you burn in your systems, and how many of you have made CH3. (:44). Would you like ethane, methanol, what would you like me to make for you. 22

(:48). ... In the next few days this T will be demonstrated to the ambassadors of these nations in Beijing. We don't need to do anything anymore, because I hae made sure that we are in that position with the strength of the knowledge and the way you as K Seekers have supported it to be where it is. (:50).

(:54).

(1:00).

(1:04).

(1:08).

(1:10). What is the next step. The full system to deliver this T landed in Beijing at 5:30 this morning. And we are in possession of it and we can show its power. I make a blind to see and a dead man to walk. Any questions. ... K asks John if he would like to show to the American government since he did so much work around it. (1:12). .. You'll become the representative to President Trump to see the T. Q: Are we putting our soul into the reactor or an aspect of soul, like the field level of our soul..? You are the decision maker, you have to trust it, 'how much do I want to make this work.' Q: So can our soul be split into many pieces, is that true? You do make it into pieces, you see, go back to the medical teachings. If you remember, ... if this is the brain and this is the soul. (1:14). if you remember from teachings years ago, what are you afraid of, to split your soul. As your brain is part of the manifestation and part of your soul, do you remember what we said about the glands in the body? That glands are in fact part of the operation of the brain. So if you already look at it, we have already trusted because each of these glands have their own system, own soul of themselves. What are we afraid of, we already know that we already have a split part of the structure of our brain with the rest of our body, within the structure of our own body. It's not something new. If the soul has trusted to split itself through the operation of the glands which is part of the brain, so what is there to be afraid of. What happens if you bring the soul of these into the body and with it, it brings the total operation within the STM. (1:16). What are we afraid of what we already have but we didn't know. It's like going shopping and panicking that you have no money, but you already have a coin in the side pocket that you forgot you put it there. Q: So we can have more then 1 soul in 1 place? No, you can have part of your soul in more then 1 place. If you want to shift the whole lot you are quite welcome. Q: And we carry the soul's of all of the passengers of the ship? If you feel like it, if they trust you. If you don't charge interest and take some of their energy for your self. You have to understand something very simple, go back to all of the teachings from the beginning, all the plasmas are the same, if I give you my soul to carry it will be in line with yours. He draws a spiral within a spiral. It doesn't mean it will be less then yours, it could be more or a little bit less. It's very much, you have seen it, you put a CO2 and you call it a Gans of CO2, which part is C and which part is O, it's always on the same, this is the captain and this is you. You have seen it, you operate, there is no fear of what. (1:18). How many of you have mixed CH3, CO2, and AA and the rest of it, where does you Gans of AA comes, it's a combination of the O, H and everything else embedded on top of each other, you don't see the O, you see the behavior of AA. Maybe the captain becomes much more cleverer because in that soul there is a knowledge that he doesn't have and he can support it. Go back, I think it's in the book where we talk about the Gans, where I say clearly we can't mix Gans's, and there is a picture of it. You can't mix my soul with your soul, but we stay together as part fo one thing. Many of you if you did the dynamic reactors you made the Cu, CH3, and the CO2, you saw the layering, but they are all the same created, the soul of totality in the center. I think you are afraid of the unknown but in a way it is known, I didn't know. .. I love your last video. (1:20). .. where I learn how to speak Taiwanese.

(1:22). .. John shares video... Learning Taiwanese.... (1:24). part 1 ... (1:26). (1:28). part 2 ... (1:30). . 25 (1:32). ... We saw systems that are stacked up in trying to create (1:34). You'll see better effects and results to work in the same dimension as reality, the way the U works. If you find a Free Plasma between this and this (the 2 reactors), then interaction of these 2 FP, which is here (another FP is created between them). then you can take that to interface with the emotion and the STM. There is a very big misconception maybe for the first time I can explain it that you can understand. We created the MaGrav stacker unit like this. But if we look at this elevation inside the system, we are not looking for energy to come out of this, we are looking for the energy we tap up from here (on top). I have mentioned this many times but our people do not understand. The true energy of the MaGrav system... the way it is done now you are going for the matter state (electricity). The true power of the MaGrav S is the energy which this creates, the bottom and 2nd layer funnel in and the top layer delivers. We call this the enter place, we call it the South Pole, this is the energy which is absorbed from the environment (1:36). and it's the energy of what you call the North Pole or giving. You need to tap into this energy and not by connecting to this energy (electricity). I'll give you 1 megawatt, but in the plasmatic field strength. What you saw with John's (video) is actually working here, where in fact if you see, the energy is above the system, and the true energy is somewhere here (FP) that energy you can take a soul in and one out, as a strength field. In the MaGrav S you have the coils, it's a constant balanced field in all levels. When I developed this I always said no one will see it, they are all looking for this (electricity). How many times I have said that the MaGrav S is on a plasmatic field system, not current system. We took all the funny bits of everybody else looking for energy, but in reality I was laughing all the times at those who were looking at the wrong place. This is how a planetary system creates itself. That's all it is, the entry and exit. Mankind is too materialistic. (1:38). If you find the right center point you'll hit the maximum point you need to do. This is the principle of the working, if you try to transfer anything. Each one has its own center. If you structure it the right way it will ... if you drain this, the amount that you drain dictates the speed, that is one of the reasons that the KF generators can't be controlled, because the more I pull the more it comes in. You have been looking for the coils and windings, I was looking for a plasma. Many times I said that MaGrav systems are plasma systems, not matter state systems, some of it leaks and it goes in (out as electricity) and it depends on how you connect it. These fields are exactly the same as if you drink a glass of (plasma) water, you call it, if it has a CH3 or CO2 in it, and then you loose some of your, what you call imbalances in your body. (1:40). Because you know the fields are in there, but which one do you want, it's the same way here. The way the coils are set is in the winding situation, which then compresses the fields into the center. The stronger fields of G are here (bottom core), the strongest field in M is here (top core). How many of you have tried to do a reverse connection? (1:42). Any other question Q: Dan says he is learning language through the soul using a MaGrav, through the soul power, I am learning other languages, because Mr. K put inside me and everybody else the knowledge ... you put a piece of your soul in everybody, the soul of totality. (1:44). How many languages have you learned? Or do we need to learn it until we come across a person who needs to understand it. ... Do we get to the point that you speak through the soul of hte common denominator that what they receive they translate into the language that they understand. This was part of the teaching some

months and months ago. How are we going to understand the soul, the language, the intention of someone we see in space? I asked someone a very funny question recently, have you seen the bits of the Apollo on the moon, and the answer was to me was yes. If so then why don't the Americans confirm, that we have to ask the others. They tell us they have seen the bits of Apollo on the moon. (1:46). It comes to the point, what happens if we walk there, we never find the footprints but we see the souls. Where are they from, do we speak their language, does it have to be the mother language of the man that we understand. I was watching a strange program and it was amazing, an antelope gave birth to a little baby, very few minutes old and a cheetah comes and the mother moves away from the baby that the cheetahs don't get attracted towards it. But strange enough the mother makes a noise that a few minutes old baby antelope knows that it has to stay low and hidden. Where did this language come from? It takes mankind years to teach noise and a voice to his child, yes or no. ... (1:48).

(1:52).

(1:58).

(2:04).
MaGrav fields
(2:10).
(2:12). ... (2:13). ..(:50). maybe we go back to the first teachings. (2:14). in the U we don't any cylinder ships. 18
(2:16). .. The MaGrav systems have a problem very much like rectangular magnets, and we have hidden inside it. If we make spherical MaGravs and we understand the process of the 2 rings where we create the G field forces stronger here, and M field force, where the direction of the Pl will be like this. Then very simply we can reverse. When we went to build the first MaGrav systems my suggestion to the Italian team was it should be this way ?? it can't be produced. Then you have to understand the ratio and the proportion to the fields. If you make such a MaGrav, isn't the next step of it the dynamic balls. In the MaGrav systems, the push is opposite to the universal structure, condition, because we pressurize these. But if you looked at the construction of the MaGrav S where you have (2:18). 2 systems inside each other and 1 ring, a smaller, bigger, medium chamber compression to the other chamber, isn't that then the heartbeat of the man. 14

(2:22).

(2:28). Any other question.
(2:30).
(2:32). Q: Roberto from Brazil. say thank you.... (2:34). Q: Arnold wants to share a spherical MaGrav. I am very careful about the way you share knowledge because part of it doesn't fit in to the pattern of the flow of the fields. It's not my liking ... I used the wrong words. (2:36). ... shares a picture.. (2:38). ... (can't understand him) (2:40). This is how the MaGrav works it goes form G to M. .. What you are trying to do is to split a

MaGrav S and pull it apart. ... you are trying to expand the fields by creating another position. This is what is done in a SF. (2:42). One of the reasons that we make the basis of the SF this way is to expand the fields. That's the only reason it's done. If you make 1 single system you have what I call the Iranian system, a single core like the stars. What you are trying to explain is a natural process of opening up the base for the expansion. If you make this slightly bigger you get a bigger system but instead of changing the position through the composition of the Gans and field position and strength we expand it without changing the poison. .. For others to understand, what he is doing is taking a MaGrav S, and then he is taking this one to pull it apart to expand this (the top one) into it. So in fact what you don't have is this ... and this has been split. This in a way a MaGrav S which is built but to expand the fields. This is a SF. Thank you. Am I correct? Yes. (2:44).

(2:48). Q: Tectonic plates ...

(2:54).
... could be next 5 years, maybe tomorrow, (2:56). but it is due and one of these might go, this is the problem and everything shifts. I have been watching this for some years and that's my biggest fear, being on the same line, we might get 2 nations suffering at the same time or close to each other. We don't have the capability to meet this horrendous shape (size), and this will go right through the US. Q: Is this a totally physical reaction or is it plasmatic as well because one of the things ... It's a physical, you see there is a history of it, I was watching a program accidentally on this very recently, and what we saw the last time this has happened, said the scientists, it hit Japan's east coast. .. Q: But you were referring to the ??? continental end and how it was effecting ... Oh, that, it comes to it, it will be amazed. Q: But is that plasmatic though? Yes, very much so, it will come into it. Q: What my question is when the subduction of the tectonic plates, does that create a plasmatic reaction causing a upheaval ... ? Yes. We are made of it. (2:58). We are connected to it. You see I told you Seattle is in a very bad position. Rick says, he lives between Vancouver and Seattle, the earthquake happened in Seattle in 1700 and created a Tsunami in Japan. It happens regularly every 300 year or so. We are overdue for the next one. Mr. Keshe says, these are all connecting up to each other. It's natural and in a way coincidental that creates these kind of conditions. Q: But is the conduct of man irritating this condition? The behavior of the man enhances certain conditions, or gets touched by it, because of it, and in a way brings a lot of .. Let me expand into something because now we speak about the space technology, I'll go a step further. (3:00). Now that the man enters into the dimension of the space travel we'll teach you a little bit more that you understand. On earth we see continental M field movement, in space we have the same kind of conditions, release, storage, and M field shock through the U is very common. Here through the matter state of it, if you look at it the matter state is another M field state but it's in a compact form because it's in a matter state, the Inertia side. The same thing happens. Many times we get these blockages, on earth you call it continental plates, but in the U we have M field plates that they need to cross each other and they get blocked. Many times, in the interaction of the universal condition you'll see suddenly that there are huge energy releases. It comes from this. The fields pressurize so much that they let go, or one just manages to gather more energy and pushes the other one and this creates M field wave shocks. Some of these Shocks we see it on the upper solar system

layers, which some times and not just on this planet, sometimes leads to creation and release of the meteorites into the center of the plate. These are the meteorites we don't expect and suddenly the just appear, (3:02). out of nowhere. The direction of the flow of meteorites on the earth is this way, then suddenly they appear , because suddenly a M field shock has hit and these move inside. These sudden meteorites that appear usually comes from these M shocks on the upper end, so it's like an arrow and a bow, they just get hit. It's not that something hit the solar system, it's just these M field shocks, ?? you see this and you can loose spaceships because of this. Q: Do these meteorites have the same characteristics as the plasmatic? They're of another density of the fields. Q: But the characteristics, the rays? It's more or less the same. They have to have a common denominator in fields as the field strength of the wave that they could effect them. This is the partiality. We use this in the space T for deep space travel ??? expansion. You can make an arrow of yourself and travel if you know how to do it. These M field waves are very common. You can imagine billions of stars, you always .. it's not just here you have the planet. It's the same in the U you have this full time. (3:04).
(3:06).
... Q: You said from the matter we created the Pl and from the Pl the matter, does this mean that even the Creator was created in this way? (silence). Next question. Q: Can we catch the fields (? like John) in a simple SF reactor and have the same results? Yes but you have to find out where you leave it. In the coming time I will teach you a lot of games with plasma reactors. Mankind is not yet ready, then I become a magician, but when you all understand then it becomes an understanding. At the moment if I show you then I become another magician. (3:08). At this moment in time we are trying to avoid all these because the knowledge has to be understood in its totality in the reality of what it is. Q: What happens when we become equal to the Creator? God forbid, what do you think you are that big. The thing is you become part of, you are part of, it's just understanding the position you attained. Part of the teaching of the soul is for man to understand the position of his own soul. This is where the problem is, man is lost in his understanding his own position and the place, it's like an unruly child when you go some place, you have been to a party and the child doesn't understand who is a guest and who sits where and he goes on the plate and eats whatever he likes, doesn't wait for the others, that is the behavior of mankind at the moment. He's not unruly, he hasn't been taught the rules of the engagement. I was listening to a program, they said they never had a king and now the US has created a king, unanswerable, not accountable, and do what I like, I own the nation. And you know who exactly I am talking about. It's that childish behavior. Q: What has happened to other races on other planets once they receive this knowledge in full, (3:10). so the man on the street with no knowledge understands what is to come? When mankind goes into the level of understanding the work of the soul, then it's another progressive development to the next level. In elevation of understanding more. When I draw this circle which combines the totality of it (a Pl spiral), mankind in reality is somewhere here (at the beginning), when you understand more you go deeper inside. That going inside teaches you, you become more conscious of the creation. In some teachings and some books they talk about different levels that the soul travels, in a way, you don't need to travel, you understand more of, you see the higher power. If it takes you 18 hours to go from Theran to Washington and now you can do it in 5 minutes, it's just because now you understood more. You only understood about jet engines and rocket

propulsion, but now you understand more about ??? 5 minutes, then when you understand more of the reality you do it in 1 minute. The distance doesn't change, it's the knowledge which elevates you to understand more, and this is the process. (3:12). Then when you are very good at it, you are there no time and no space, the condition of the Creator. Mankind will never achieve it, very hard, seldom if you become part of the totality. If you look at it, the famous movie going around the earth in 80 days and now man circumvents the planet in 1 hour 30 minutes in the upper atmosphere. It's just the level of knowledge we are gaining, the more you understand then you go to the next step and then you see different. It's not that mankind will see the Creator, mankind has just entered the zone of ?? The concept of feeding you according to what you need, because now you see planets ??? oh it's possible. then in a few months you say the guy knew something, no it's because we understand the totality of the creation. It's your understanding. .. the people who were born in 1919 until 2010, can you imagine what they have seen, the understanding and technology. Whereas the child born in 2009 to him it's normal. The other guys had to mature into it, but for him it's already been decided. (3:14). It's the same with mankind. the electron, carbon, the plastic, the gold has been there, it's how we mixed it is how we managed to make microchips. But do we actually need the microchips, the next step is plasma fields, and the next step in the inner strength of the plasma so you can go faster. This is a warning to some countries who think .. let me explain something, intercontinental missiles in the hand of the right person are totally non-detectable, I was explaining this very recently. When I share a knowledge I share the totality, if you mix the knowledge of the KF with intercontinental missiles, then the missiles are zero friction, then Moscow to Washington is a few seconds. And this T is in the hands of a couple of nations. At the moment America shoots a missile they have to wait for it to come, those who have this missile they reach already before they come. The present western weapons T is totally obsolete, but it is a shame to be tested. (3:16). ... Do not test my patience. ... there is an interim T we could take the aircraft and remove the jet engine and use them, there is a possibility to shorten the flight. .. We can connect all the wings of the plane and you have a UFO, you don't need the engines. Or we can cover the front of it that you travel into zero space time. (3:18) .

(3:20).
.. they know our intention so they confine you to the prison of this planet ... my knowledge has already been transferred to you, I hope you get enlightened. (3:22). Q: What makes salt G and field wise how does it help make life and make Gans in the Gans box or in the body? The salt is G and that is why the body absorbs more energy from its environment then it gives. Q: So what makes the salt G? It's because of the mass of it, compared to its environment. It's G field strength. This is one of the reasons I always say man takes most of his energy, 80% from his environment, and 20% by feeding himself. Because of carrying different amounts of salt in our body, we are so G that we pull everything in from our environment, lower then itself to us and we feed back to. When you are heavy G you have to give the field back out, you can't just hold on to everything, then you change the ?? character. the content of the body, the different kinds of salts and salinity is in a way the absorber of the energy from the ?? now you understand where the 80% energy comes from. Q: She says you always say that life starts as a gaseous plasma and that the salt environment, (3:24). basically pulls in and allows that to collect,

congregate? If you test the sperm and egg and the salinity with them, then you'll understand why. Even the interaction of the 2 is the condition of the salinity in trying to mix and become 1 and that creates the dynamic position, because 1 is absorbing more from the environment of the womb then the other and in that process, in trying to give to the other one to balance itself, it creates its dynamic system. They call it, 'one has got one more chromosome then the other one', that small amount of difference is very big for the two. this is the line of the creation maybe for the first time western science can understand why. Then if you can divide it, make it more G or M, then you decide on the sexual dependency. And some souls can decide which one to be at the point of the need, that is why some animals who have reached that point of position of understanding ??? even ?? because man is not there, all intelligent creature on this planet, they can be a male or a female to the conditions, if you understand it further, then we understand that the virgin birth is a natural process, if you reach a special condition. These are taboos that man has to get rid of if he wants to understand more of the creation. (3:26). This is very much in line with the science if you go and see a lot of diseases at the older ages, and other disease at certain ages, we can now explain it fully when we understand the science. The salinity also has a lot to do with the emotions, because it's what you give, what you hold, what you don't share, and what you give too much of, .. where does the depression come from, and where do other diseases come from. If the miracle scientists in the background, they know exactly what it means. Next week or after the KF .. we'll release the locations and the hospitals in the next few weeks that you can go to for all sorts of recoveries, processes ?? to be monitored by highly qualified doctors and scientists for certain diseases. We concentrate this section only to Chinese territorial land for the time being and then you can travel to them. ... (Hospitals only in China)

(3:28).
Video
END

277th Knowledge Seekers Workshop - May 23, 2019

(,)

(:20).
(:22). ... The situation in the Persian Gulf between Iran and the US is of huge concern and we hope that the leaders will find a solution that we do not enter war. We hope for the Iranian and American leadership find a way to understand each others problem. There are a lot of things that are internationally known and it's the job of scientists like me, people who are the initiators of this T, people who carry this T and have brought it forward to stages of advancement in part and with the other scientists. We are developing it to a point that we all get benefit by it. We have to understand how we came to this point between these 2 nations. How we can change things, what's the reason behind it. I urge the leaders to talk to find a solution, I prefer the souls they find a solution, because killing one nations sons and daughters is not a solution. I am not so much worried about the Iranian nation but more about the US. There are a lot of things the public doesn't understand and I make a point of it today for you to understand. The American

government has not openly declared why they are after Iran in such a way. (:24). I have seen one poster where they posted soldiers all around Iran except on Russia's side and say that Iran is looking for war. Why is there such intention, and why are other nations not supporting it and America is single handedly chasing this. Now we see the Saudis. We have to understand the reason behind this. Many of you don't know and I would like to open a new chapter in the chapter of peace. You'll be shocked, it's not my problem, you should have been aware of it. If you go on the Internet and check ... all advanced nations have a military force to defend their territory and their citizens across the world. ... But there is a very big mystery ... In the past 2 weeks I covered this warning of the disaster and many of you misread my warning. If you are and you understand the process of the whole structure is that if you look at, (:26).

(US is after Iran's space T)

(:36). I call on American forces to withdraw from the Persian Gulf and I call on the Saudi leadership, you purchased the most advanced defense T from Israel who is killing the Palestians the last few months for billions of dollars ... I have a very bad news, they knew that they can't use these technologies that they sold to you, they sold the scrap heap because Iranians technology will make a scrap of 3 - 4 billions of what they can't sell anymore. The reason the American president is supporting the 200 billion sale so doggedly is because they will not be able to sell anymore if they test Iran. The same with the Israelis who sold you such an advanced T, the reason is that in the war between Iran and Syria, Iran showed the Israeli military the power of the space T. They know they don't stand a chance. As I said, there will be no more war in mankind and the human race. And this is my last warning to the USA, choose the path of peace, otherwise when you hit somebody in the face, you do not expect a kiss. (:38). You have to understand that the minute the power of the US is wiped out the anarchy will be beyond belief, because many nations stay under control because of the American forces, ?? to kill on the basis of the British blood. Every American will be a drug addict as much as the South Americans can get in. There are no international forces to contain, unless the state of China, Russia, and Iran take a new control of the policing, which is most probably possible. The losses, we have accepted the soul losses. Now you understand why I have been pushing for this in the past weeks. The US government did not declare to its citizens that it is after a T which has literally humiliated the Israeli army forces. And the Israelis are using the sons and daughters of America to access to something to kill more Arabs and the rest. And with it goes the Rothschild's and Illuminati's. We'll make sure if Iran is touched, the son's and daughter's of Iran belong to the planet earth as all of our son's and daughter's, (:40).

(:48). You have to be intelligent enough to understand that when Iran can capture the most advanced aircraft, drones, high speed, then B-52 is a fly in the hand of a ?? neighbor. It's the power, and integrity or the Iranian nation and military which does not disclose, but respect and honor them that they have so much advancement in the space T that mankind will go for it the same as my knowledge. I am committed to peace but I am loyal and committed to my nation, the state of Iran. And I am committed to One Nation, One Planet, One Race. Play the game or withdraw from Persian Gulf. Last time we

touched the nuclear, with the Japanese, this time we touch with the power of the sun with the plasma technology. Send this message to the Whitheouse, they are listening, and the Chinese government. The Chinese nation is a peaceful government, the same as Russia and Iran. (:50). We have been fooled and abused by the Rothschild's and Illuminati's, and the rest of them in Vatican, now the hand is opened, the revolution that was set to cause problems in East Asia, already has been exposed. Now keeping the world busy with increasing taxes, Huiwai., and all that, was a cloud game to keep people busy, that Iran can be touched, everybody is scared to touch America ?? because they might create sanctions as we said with the ?? world of represent of President Zhi, China will stand behind its leader that the American sanctions will have nothing to do. We support the Chinese government for the food and agriculture to make themselves self-sufficient even if the Americans decide to ?? make quota. You have to understand that all these games were played to satisfy the dowry of a daughter, with the lives of the sons and daughters of US. Unfortunately there will be no child from this marriage. When I was a little boy being half born of a mother Jewish descendent ..

(:54).

(:58).

(1:10).

... I do apologize to the KF K Seekers that I had to start the teachings this way, (1:16). because when you became a follower of KF you signed the World Peace Treaty, which means I will never enter war and even if I know with my soul that there is such a thing, I give my soul to stop a war. And this is part of what I signed myself to, World Peace Treaty. Our American friends, withdraw. You are playing with ants and kittens of your own nation. Iran is a nation of lions. Don't play with big cats because if you get injured during the play it's your problem. .. We allowed this to go so far because we thought that maybe the situation would change, but you have to understand that China, Russia, and Iran stand on the ground of peace and protecting the peace, and now they are economically powerful enough to do so. Iran's extension of the nuclear material, now that the Americans have withdrawn (from the treaty) would have been discussed (anyway), because the new space technology needs part of the nuclear industry, not for weapons, but for deep space and many other applications on this planet. I have spoken my peace, which is to achieve peace. (1:18).

(1:20). (1:22).

.. You didn't know we were watching you planning uprising in the name of Islamic names in different countries in East Asia, (1:24). and then using the support of the Israeli armed soldiers to train them to know how to be clever to do things. We watched you very clearly and closely in Turkey and in Azerbyjan, and all precaution has been taken for

those who you trained. And all the arms which were manufactured in Italy we are aware of it, it's all been accounted for. I hope the Vatican understands.

Let's go **back to teaching**. Part of the teaching and the work we have done in the space development and in being able to reach space is very simple. We have looked and I used the example of the orange because we can all relate to it and understand it, we all have made the system and we know how it works. That we transferred through our thoughts the essence of the orange to the cup, and then we drank from the cup, we saw, we felt the taste and the energy of the orange. There is a slight misunderstanding in this process, and that is that when you created the cup, (1:26). when you made the cup and put the orange on top and different materials that you created around it, the Zn, Cu and the other things, you created a condition of extraction of AA. The water you drank and the energy you transferred from the orange, you transferred the soul of the orange because it still has a COHN (AA), this is why when our dearest friend Alek, in the morning he wanted orange, he tasted the orange because it was ?? called the STM. When he wanted the banana which he put on top, he received the energy and taste of the banana. When he wanted to get drunk at night he used the African herbs he got drunk because that was his soul wanted to show that I can do. So in essence we carry through the AA the essence of the soul of the plant, and it gave our soul the pleasure (1:28). to feel it when we wanted it because it was ?? call of the soul, ?? call of the emotion. It had nothing to do with the water. This is why some of you say, I can't taste it, it doesn't taste right, I don't feel it. It's because you didn't consume the AA essence of the life which was taken. Because when you have these little things on the sides Gans of Zn, Cu and the rest, you have created that CO2 condition of absorption of the protein. So now you understand how we missed a little bit. Now you understand how we can feed mankind without anything in the space. We need to create the condition of the soul of that entity and we carry all the emotion. You find out that some of you were successful when you had some NaCl in it, because it carries the confirmation of it to the confirmation of the taste, to the solid state as you have. Na has been used for that purpose. This is old teaching, I just clarified for you, some of you didn't understand, to understand the truth. ... Now you have the Cup, AA and how can you create the orange. (1:30).

(1:40).

(1:56).

(1:58). Jalal's recorded teaching for 19 minutes. ...
(2:20).

(2:28).
(2:30).

(2:36). For an organ to receive it has to be weaker then the environment that creates it. This is why we have such a motion between the left and the right. Because the energy of the left hand is weaker, always it looks after the weak, so it gives energy to it, I am weak

I need, that's why we take everything from the left. The reason for the left hand to be weaker is because the heart is more on the left, and to run such an operation of the body it takes a lot of energy and it needs to absorb. The right is too far, and in that process as the fields travel to the upper layer, then you understand that you create an energy which is absorbed as is by the left brain, because the left brain now receives a direct energy it doesn't go through the neural system part, ?? actually does, it becomes stronger so it has more energy, but the left side is responsible for the right side, it creates a stronger right hand. (2:38). Why do we shake hands with the right hand because it's where the strength comes, it's stronger because it can give more. Have you ever seen the battle of presidents when they stand in front of each others hand until somebody submits. Because in that handshake we measure each other, how much are you taking from me ... I am a giver. It's like putting 2 North Poles against each other, and you see which North Pole makes the condition for the other one to receive more because now you are weaker, I give it to you. You see these German Chancellors are trained for this, I watched many, even the present German Chancellor, as a woman, she is trained, as we saw with Jalal, Germans train their politicians at the high level through the psychological confirmation of their existence, and you see all of them, we saw ex-chancellors very strong and heavy handed in shaking because in that shake of the hand they have already received the submission, I am me to give, you're there to receive, it doesn't matter, and I can financially support you, because I have the industry, the strength to do it. We are fully aware of these processes now and it is good for K Seekers to understand why you receive, (2:40).

(2:48).

... When we understand this a lot of things becomes easier, a lot easier as Jalal said, for us to be able to give the energy to our soul that the physicality does not kill. (2:52). If we understand as one of the ways to gain energy, is through what it is, then we understand it. We understand how to balance our own emotions. It's a very beautiful way, the way the teachings are coming up step by step, we all learn and evaluate our own learning. The time has come to leave the Gans's and Nano coating, it was there to confirm the existence of the universal energy, now you have to understand that, that Gans is within you. We call it the STM. It's you who has to decide how much it can give its physicality that it does not need to kill for. If we learn that, that through the time, ??? meditation, allow the dimension of the fields of the STM to go beyond the boundary of the physicality then we take from the universal energy, what is near to us and those of us who manage to go to a deeper strength will can, and will receive higher order energy from the depth of the U and those who go in the understanding of the totality to be a total, what I call, "zero", non-existence, we call it in the English language, humbleness, (2:54). then if your level of the true humbleness reaches the level of Nothingness, then you receive from the soul of the Creator. And not many have managed to achieve that, not many, because at that point the STM becomes a shinning star, brilliant white coat, because it gives everything. Thank you very much for today, it's nearly 3 hours, if there are any questions. Q: when you talk about the hand, ?? we are born with it, when somebody is lying, cheating, killing, and stealing, so what is the point in talking to a president, who was born with a hand that is lying and cheating how are you going to change that? He has a soul, forget about the

physicality. What happens if he looses his arm, we can't touch him any more. Q: So although he is born with that hand, the shape of it, the elevation of his soul, you can change it? You see there is a very big problem, (2:56). children who are born in wealth, they do not see wealth, they see power. The children who are born in poverty they look for wealth, and in that misconception, because the wealth was made by the others and they are just the users, they see as a way to confirm their existence. This is a very natural phenomena, this is why most of the (family) businesses collapse after the third generation. When you come from the position of the wealth, (having) as much as you like. You have to understand that the father who was making the wealth did not have time to make friendship with the child, so the child only sees the power of the wealth not the maker of the wealth, he has no connection to it. The American president is of that category. He has to confirm that he is better then the dad and this is the problem. We see this continuously with the past American administrations. They come from families of wealth ?? and how they are connected to be in that. It has not been earned by understanding, it has been earned by thievery, so it becomes a natural habit. If you go on the path of many people you see how they change themselves. (2:58).
... this is why I keep my children away from the KF ... (3:00).
(3:02).

(3:08).

... Q: I was thinking of separation from the earth, is this why detachment is so important? Yeah, but you have to understand it's the meaning of the word and not the physicality of the word, when you get detached from here and go to the moon, now you get attached to the moon, (3:14). and you're detached from the earth. You have to understand what detachment means in the essence of the soul, and not in matter or physicality. Q: .. I was relating it to our mental state of how we attach ourselves to so many things that we feel are important and as we detach ourselves from this, it's similar to the physicality detachment, but we allow ourselves to interact more freely with our soul and we detach from all of our mental attachments. This time now is confusing for a lot of K Seekers being in the state of the two, in between the two, if you go back to some of the very first videos we received from AZ with John walking into the center with the MaGrav systems and he says he feels this and that, because then in that condition, position in the center there are less interference from outside parameters on the soul and physicality of the man. It's not that the fields ?? aren't there, you become more and more isolated. In the future mankind has to come to this, I call it, like decompression when you go into the deep ocean and when you come back up you have to take time, (3:16). to get rid of the N from your blood circulation or your muscle tissues or whatever. Mankind when it comes to transfer from the dimension of the soul to physicality has to allow a lot of fields to go that the physical strength, or matter strength can link to each other. This is part of the structure, you can do it very rapidly, but if you are not an expert it has its consequences, would you like your liver to be outside and chasing you around. We have a lot to learn. It still working outside, 2 meters behind you, but it still does the job because actually mankind looks at it that the liver needs to be inside the body to work, but it doesn't need to. He needs to be within the environment of the STM and not the physicality, and if the soul can create that condition the liver can exist (out) there. You can use my liver if you

like, I don't need to transplant it. Any other question. (3:18). ... If you have a "What's up" app go and up grade as soon as possible. The Israelis have written a program that can open your apps and cameras and listen to you and know where you are sitting. .. (3:20). Q: In 2015 you said a new handshake will be introduced ...

here....

(3:24).

(3:28). ... we have to learn to live to work and not work to live...

(3:32).
(3:34).
(3:36).

278th Knowledge Seekers Workshop - May 30, 2019

(,)

(:08). .. I received many notes and emails that last weeks teaching was too specific to one country. ... Last week we made it clear that we are One Nation and we demand peace, we have no games to play. As one family we have a say and we share information and our knowledge, (:10). in science, plasma, health, and agriculture freely so we should be able to express our emotions and feelings about the peace as well, because it's an integral part of the whole thing. We are here to serve humanity and achieve peace. Interestingly enough, after last weeks teaching which was in the afternoon Theran time the Iranian government responded through the right directions, confirming that Iran has 2 hidden totally new technologies and it was made very clear in the military communication which we received through the actual officials ... Iran took off any side missiles to give a clear indication. ... that they don't need them... we have enough power to punch. We put the parameters down. And the message has been received by our friends in American administration to understand that we mean peace. On Monday we saw the American government, (:12). asking the Japanese government to intervene in talks between Iran. And the administration has clearly indicated to the Pentagon that we are not looking for war with Iran. Now we know why the whole situation is very clear. ...
... Trump your Noble Prize lies in Theran ... first president in 40 years since the revolution ...

(:14).

(:20).

.. We don't think we need defense much but space is what we are all concentrating on. (:30). We have given guarantees to the Chinese government on signing of the agreement, 6 months landing on the moon, within hours, and 12 months landing of humans, what we call colonizing in numbers, not one or two. We are on target and are working in that direction. Now you understand what peace means. We don't need to create wars where we can cross each other's borders and as I said, borders are manmade. If a camel doesn't know which side is Saudi and which is Yemen, why should a man have a passport. If mankind has put himself lower then the animals, that is the mankind's problem to put himself back, at least to the level of animals. We don't see any birds carrying passports .. why have we done this to ourselves as human beings. ?? for years. In this development, nations and nationhood becomes a big problem. Culture and culture-hood becomes an advantage, we share and enjoy each others culture, but it has no border. ... (:32).

(:36).

(:44).

(:50).

(:56). Any questions. ... Comments. ...
(:58). Q: I understand the instant communication of the body, when I decide to do something, when I catch my hand instantaneously through the total field of physics. Are the last steps of communicating humanity with the U Community how does my soul grow to be part of the totality field? Explain. (1:00). ... We have to learn a little bit about our own dimensions, our own strength, and in a very small way in the past teachings and a little bit in respect to what Jalal was teaching last week ... Carolina showed part of the energy transfer of the body. the first thing we have to learn is how do we extend the fields of our body, how to find the boundaries of it, and in that process what do we see in interaction with the fields. It's not that overnight you are going to jump, what I call the boundaries. (1:02). It's learning through detachment.

(1:16).
proton electron fusion
(1:20). egg and sperm

(1:38).

(1:48). Any other question. Q: Iranian woman talks on ... possible presentation.. (1:50). about Qigong , not very clear ??? (1:52). (1:54). (1:56). ...

(1:58). Mr. Keshe says her teaching is more in depth then what Jalal was trying to explain to us, but she is trying to explain the historical way that matter state energy has been understood, this is a combination of a number of understandings of the energy in the body of the man, which to learn is not a ?? shame, we are all here knowledge seekers. (2:00). (learns how to annotate ..) (2:04). (2:06). ... transmission points on hands and feet. (2:08). (2:10). .. She put a magnet in a ball of thread ??? it rotates, its gravitational ... (2:12). Rick is there anything on the Internet about this, with the hand and the magnet? No. Let's do something. Make a video and play it. .. (2:14). .. I have done this many times, sometimes it works and sometimes not. Sometimes it depends on the state of the STM, just because it rotates it doesn't mean which one it is. If you take Gans's and make a patch and hold it in front of the heart, (2:16). it can give you a different rate of breathing, you see pressure. If you move it and turn it, it gives you pleasure. This knowledge we already know but what is interesting is when you talk about the magnet, I do it with Gans's because it's a pleasure. It creates creatures, you see your emotions in 3 dimension sometimes. If you hold a ball of Gans between your hands without touching it, you see the creations ... especially if you created a dynamic ball, and if you turn the ball, the other side, opposite to where you are sitting, or turn your hands the other cross, you get different rotation of M fields. These things we understand. And I am getting a ... You bring us different aspects of the science, from beautiful people who brought us Taoism, or we call it different sciences of the fields, so you're a dictionary, a collection of knowledge. (2:18). For 99% of us to go and learn all of these things is impossible. But the way you explain it, we have a team in the background to support you to do a paper in a beautiful way, and even help you with the pictures, and bring it into the KF Journal. If 1% or another person find a path to another dimension, another direction, and that is what our purpose is. I enjoyed what you explained, I can see what you explained because you speak in a matter state and one of the problems you have, which you don't see, it's my problem not yours, is if you bring a magnet which is a matter state and you put in conjunction with the plasma Gans state of the body, so you might get some reactions, it means some of the cells in the body are at the strength of that (magnet) which is usually to do with the blood, and in that process we have to understand that the blood has to circulate, we have the fresh blood which is the child of the mothers discharge, and which one is closer to the skin where. These we have to understand scientifically. What I say as the next step. When you test this with a Gans, you are dealing with the same state of matter (as the body). The 4th state of matter which is Gans, which is a plasma, then we see the true effect of the energy transfer. Make 2 balls with the same Gans's, with a distance, your hands on either side of the ball, see which ball rotates in which direction. (2:20). I use this knowledge extensively in my work. But you have to go to the next step. If I had my camera on I could show you the balls I use. The understanding of these things is huge. If you get a ball of Gans in your hands and load it up with 200 times more then another one in the other hand, you create a transformation of energy, but most of it goes through your body. It's a processing system for some illnesses. I hide it in the containers when I make breathing systems, by holding it I create that condition. Because people like to hold. When you hold a bottle of Gans in your hands ... you see understanding of the knowledge is most of what the knowledge is, and not how we interpret it. It's the interpretation that brings the extension to the knowledge. I would like to see the position of the hand, with the magnets, then if you have any Gans's

especially a green and red one, show us, because I know I have done this, then get the paper written and publish it and people will understand more. If you go back to the health application you can use these things very easily, this is what most of the doctors around KF do. We understand the process of transaction of the fields. (2:22). Fortunately we see sometimes reactions with a magnet in the hand, and it is totally due to the iron levels in our blood, it interacts with the fields of it, some of the fields of the magnet is made of iron, it has an iron content. 21

(2:36).

(2:44).

(2:52).

(2:56).

(3:02).

(3:08).

(3:12).

(3:18).

.. The governments will start cleaning up. (3:22). Humanity has started to become humane even though it doesn't look like it. One of the things we'll see in the coming time is the Fox News will be split up, owned by the Illuminati's and financed heavily through the back of what I call, Vatican, would be split up very soon, because people realize that they use news to make fake news to do the control. And we see that people go to the alternative real news where it sits. We have been conditioned to war by those who benefit by it, but now you can't sell arms, the beauty of it is that mankind is waking up and sees better doing in helping the others and changing the others, then killing the others, I hope and we wish it will be there. There will be no more wars, and we see how we curbed it in the past 7 days between Iran and the US. They might start skirmishes, but as I said, my soul is in the direction and this is the time, we made an invitation to president Trump, if he wants the Noble Prize, the Prize sits in Theran. Become another president after 40 years, and then meet in Theran, and meet the love of the Iranians. (3:24). It's there, it's all the same, the sanctions won't have that much teeth because now everybody, you are the steward, but the game was played. 11

(3:28).

(3:36). Thanks for today ... we achieved a lot today. ..

279th Knowledge Seekers Workshop - Thursday, June 6, 2019

(USS Mason stopped by new technology, ,)

(:16).
(:20). The Russians managed to stop the Donald Cook ship of the US and it was dragged back to Romania and 27 officers resigned. Very recently the American naval forces tried to intrude to provoke an action by Iran and they sent in a battleship called Mason into Iran territorial waters of Hormuz, and they were surrounded by the Iranian fast boats but ?? no missiles, remember last week what I told you. What happened is the battleship Mason couldn't communicate once it got into the territory of Iran with the outside, we can give you a lot of details about it, but within a half an hour the American military forces decided to withdraw out of the straight of Hormuz. We saw as a consequence, backwards of it, Mr. Trump announced that he wants no war with Iran. I told you in a coded way in the last few weeks that if we could manage to do such a beautiful thing to stop a war using the new T, what we have been praying for has been answered. I said, if we can stop a battleship from communicating from it bosses, and its bombers who by mistake can see nothing on the radar and bombing Saudi Arabia instead of Iran, which is 100% possibility then you know why the peace talks are taking place. This time the talks are on each others strengths, it's not that we can destroy more, we tested each other and Iran's military has shown (:22). that we are not aggressive but a peaceful nation and we saw the outcome. The chief captain of the (USS) Mason said after coming out, he did not know what to do, he was panicked. There is no need to panic, please withdraw your missiles, bring the ship back into ?? Be welcome on a peace mission and not on aggression. This time when you come you'll find out that you have friends in Iran. It has to said that this is the second time American naval forces have been shown that there is more technology sitting outside America then within. Now these technologies can be used for advancing man into space and betterment of life for all of us. ... Iran has a huge problem which now the American government has come to understand, the problem is called John Bolton, he is a monarchist and has committed himself to the Iranian monarchy, the old regime, and he is fanning the fire of war to bring them back. I can show you a lot of picture with him standing around the old Iranian flag with the lion. When we say there is no time or place for monarchy or kingship it doesn't apply only to one, it is all over the world. (:24). People have to decide if they want a king, but not forced by inheritance. Therefore, we understand Bolton has been paid to create war to bring the Iranian monarchy back to Iran. The Iranian nation has to decide what it needs and not from the outside by Mr. Bolton and his people. You have to understand that he is connected to the other royal monarchies around Europe. What I just explained is significant. Those of you who are familiar with the work of what you call the Masons, and Illuminati's. You have to understand why the American naval forces headed and pushed by Mr. Bolton was using a battleship called Masons, this was to show that the Vatican has taken over and that was a big loss. A couple of weeks ago when the American president was in Japan he ordered the ship which carries his opposite part in the coming election to be hidden in the background and not to be shown in the public, because that name was so important. Now you understand why the battleship Masons was (used), it had 2 reasons, one was to declare the win by the

Vatican, Masons, and Nazis ?? which the ship never got. It was a coded message that got stopped. My condolansences to the Vatican, we invite you the same, the Pope to come to Iran with President Trump. Unfortunately they don't give peace prizes to men of God because their job is to create peace and not war. Now you understand a lot. I speak openly because this needs to be understood by all of us. (:26). Our technology has now begun to push people to see that there is another way. We have to be strong, we have to have all the facilities to be able to defend planet earth, not from the Universal Community but from the eventualities of all the physical dimensions which will come. Some it we have created ourselves, some are a natural process, some is being part of the universe comes to us in the shape of meteorites and asteroids. As we see meteorites coming into the atmosphere of the earth, our solar system gets the same thing from the U. The same thing happens in the same shape. Some of the meteorites we receive on this planet are the remnants of what has entered the galaxy, and some from what has entered the U to the galaxy, to the solar system and then enters the atmosphere of the planet earth. We see different types of meteorites and some of them can be interfered with by fields, we can open them up. We can handle some of them with a high frequency, for some we can use the present satellite systems that not only interferes with the military, but with the dimension of the noise of the plasma itself which changes the course. (:28). This is how our body absorbs energy from the plasma of the body. The bone of the man vibrates in a way that it calls in what it needs from the Gans. It's the same thing. it's not that somebody is sitting there catching a Pl which is good for, let's say a cancer cell or for the immune system, it's the tune, the noise, the music of the universe that is played in the body of the man. I explained in the medical teaching, if you see a chicken bone or a bone of the man look at the structure of it, the curvature on the top which is like stranded, these are how it plays the music to call in, what we call the lymph into the body. The planet earth also plays the same tune and it calls in, the solar systems and U does the same thing. So the new T which we have developed will become very handy for the man as he can travel at speeds beyond the speed of light, sounds, and many speeds we know. There is a new T which has been released that we know that you can go super fast and everything else. This T comes on the back of the Keshe T development in Nano T. The speed is relevant in how fast you can change the friction in the atmospheric condition. It means that those of you who will start traveling the spans of the U, you will see, you have to do, it's not just that we can make shielding with everything else. What you will see, what is known as super speeds, the Russians say they have got it, (:30). the Chinese are at it. The Americans would love to get their hands on it. The simplicity of it is that all of you understand the Pl and how Nano T have mixed into the new space era. 16

(:36). .. high temperature break down the Gans in the body..

(:46). We can create a condition of the Pl to manifest the meteorite in the matter state too. This is how we make the matter. At the same time, so shall this be the STM and this the physicality, then those of you who are testing for flight, see light, who are speaking about all sorts, look into this and see what you have missed. Do not look into the matter state or

the effects on matter, of what you see on matter, instead look at what you can do with the field interaction. There is an old saying by Kennedy, ask not what your country can do for you but what you can do for your country. You ask what you want form the physicality. Ask what I can keep from physicality to spread my soul beyond the dimension of physicality. Because man in only interested and works with the physical dimension, for him the soul was a dream which was out, now this guy has come and put it in. When it was out they could come and abuse me in the name of God which they never understood, inside me I am the protector, I am in touch with God, I am the creator of the physicality of myself, and I can control the dimension of it if I understand how that STM works. (:48). It is important for all of us to understand one thing very clearly, we have to go back to earlier teachings, and in many teachings I said the conditions. We go back to the writings of the prophets of the past, they say the maturity of the man comes when he can mutate, understand the mutation of elements. With the new T we understand the mutation of energies not elements. We went from Cu to Gans and it became gold, now we go from the STM into the direction of the energy of it to create the physicality of the man. But what we said in all of the teachings that man has matured to the point of completion where now he can go through the same process and create the energy out of matter, and matter out of energy. So the STM can make the physicality and that physicality of the man's energy can make the STM. There is no difference in the dimension of the creation just different names for the same process. Now it's not just mutation of elements it's the mutation of energy that it can lead to another energy, that if it likes, that it interacts and it shows itself of in the totality of the presence of the physicality in the eye of the beholder. If you understand this you can create brain cells, or Cu, or gold in the space if it has anything. (:50). In the space there is no currency. Money only exists on this planet and printing machines are part of the man's intelligence to print money to control. As we have seen mankind has taken 1 step backwards and 2 steps forward and over centuries we have gotten more and more mature in understanding the totality of the business. But how far does the science of man go? What are we prepared to accept as part of the knowledge. We start polishing what been taught because all the knowledge of the U has been taught. Now you have to understand how to play and how to manipulate, how to structure to achieve and deliver and attain. If you understand what is on the screen then you understand how life will be wonderful and easy in the span of the U. If you are looking into the strength of the STM it means you didn't understand the teaching of today and you have not managed to put all the teachings together. We structure energy and in that structure we decide the condition of energy of matter of that energy. (:52). Something which a lot of people in the future will understand is that energies can manifest themselves in any condition of the matter. This is one of the interesting things if you understand, and the same goes for ?? What this means is that on planet earth the life of the man, the energy of the STM is created through the strength of the COHN. If you take the STM which has the strength of COHN to another dimension which is let's say KOHN, which is with a K rather then a C, then you'll be dissolved, you can't exist, unless you understand this principle, so life becomes everlasting in any dimension of the U. Many races in space have been lost and converted to different what we call, strength because they didn't understand this process. When you enter the dimension of the strength of the U which is higher then you, you have to understand how to change the strength of the COHN as a plasmatic field of existence, to ?? Mr. KOHN

which is in the K level. Man can mutate in the energy level in any point of the creation as long as he understand that when he wants to convert into the Gans of the state, (:54). he has to watch the matter of the state too, because one of the most fundamental problems with mankind is a new problem. We said in the process of the life in interaction between the sun and the earth, in the field interactions we saw the creation of the AA, now the what and how we never understood, is that there is a plasma in the center of this planet. This is very strange because man went all the time to his present understanding from energy to the conversion of the matter, whatever it became. But now we understand a new phenomena, Energy to Gans, and if you want to Energy and Matter. This is the new game, the new state of the matter. Mankind can change itself into a new condition in between the two, and a new form of existence appears, the body is made of this (Gans), but at the same time in a Gans state, but at the same time of itself the body carries the matter state too, we call it the bone, because it's in a matter state partially, whereas the muscles are in the Gans state. So what we assumed that we go from energy (:56). to mass in between there is a Gans. Where in the Gans state we have manifestation between the energy and the manifestation of physicality and this is the reason why you see your Gans's in your containers. For the first time man understands that he missed in between. There are many in betweens, but mankind's knowledge is not to grasp it at this moment. Now we understand what you all have been familiar to and with a little bit of explanation you understand what you are dealing with, a state of matter between the energy and the matter state. In a way if you look at it, Gans is a "Camel bird," what we call ostrich. If you ask him if he is energy, show us the star, he can't do, and if you are a matter why don't you show yourself and become solid. This new state of energy is new to man. If those of you who understand this, understand that this carries a totality of the energy of the COHN in every dimension in the U according to the point of manifestation then you understand that the life is for everlasting. Then it comes, do I create a soul to be perfect that going through the transition of the Gans, (:58). still it will be perfect, and when it manifests itself in the dimension of matter still it is perfect. In the chemistry mankind came to add let's say Zn, Cu and whatever, he made alloys. In the dimension of the energy mankind came to mix different elements of the Gans and he ended up with life. There is no difference, in a matter state you get alloys, in the energy state mixing you get life, intelligence, and you get what we call the creation of the soul of the man, the universe and the rest of it. If you introduce the right amount of material at the Inertia strength, do you remember we said the Inertia is when the matter state comes through the energy of the matter level and it manifests itself as a matter, in the body this state comes with the bone structure. Inside the memory, inside the brain and soul there is a code for matter state too. Because if you go on planet, whatever and there is no MG field of Ca then you become a pot of jelly on the ground, but if you want to have a physical structure what kind of matter state do you bring in to play through the direction of the STM that it can hold a structure if you want to be like a man. Now the science of existence becomes very sweet. (1:00). Now we need a collection of scientists to get together. We need to bring the elite scientists fo the world together and we'll do in what we call the KF way that we decide and invite world scientists to join us to complete this cycle for man to be taught to be able to enter the space. This process needs maturity of understanding and peace on this planet, because we don't need to kill. What we did with (USS) Mason we can do with the bone of the man. Man will do the same to himself in the space if he

doesn't understand the conversion of the Gans's to a new strength that he can survive in any direction and dimension. If you understand the totality of the conversion of the Gans's as an energy then you understand the speed of light does not exist. If the scientists understand the totality of the interaction of the fields what mankind is looking for as zero time communication, zero time energy, zero energy point of reference, all become irrelevant which means the zero time is the point which you start, because the energy and the fields and the plasma are already there, but to you it is non-existence, and it's for you to learn how to tap into it. (1:02).

(1:06).

(1:20).

(1:24). Any question.

(1:34). (lost connection) ... (1:37:37). What we have to understand is that the stars that we see, they have sent us their bandwidth strength. We are used to seeing their light but in fact what we see is the totality of, (1:38). what we don't want to, or what we can't see is still, there is a bandwidth of it, and when we become educated that we need to have both G and M fields of a planet's position then we'll find out that we can do everything. We can reach any soul, any point in the U, and by having that we already know the position. We are looking for noise to reach us, but that noise has a return, it's M and G. When the mankind starts decoding both fields, you'll find the source, the totality, and this is part of these teachings that we are going through. Up to now we just looked at the distance of the planet from us, but we never considered that, that distance is created by 2 dimensions, and not only by the dimension of the physicality of the light but what that light is taking from us. It's understanding that what comes to us is also returning back. (1:40).

(3:20). Q: When the Creator said, "let there be light", was there anything on earth before? I think you have misunderstood the story, man is too physical. When the Creator said, Let there be light, light is the STM. "I made man in the image of Myself." ... I made man to worship me, to confirm my existence. That's what it means, it's not the light as stars or a solar system. Now we understand the position of the STM, and the existence of it, and in interaction and with it, it can show ... (3:22).
(3:24). Q: When you talk about detachment, when I can identify with my job, my possessions, what I read, where I live, is it the same thing. Like when I say I am a doctor, the possession that they stand, with the identification of a doctor, ... but if you take the identification from them then they don't stand like this. So detachment is not identifying with what we have .... if detachment is the same thing, how can we accomplish total detachment? ... because on this planet we have to go about doing our job in the market ... how can one go about complete detachment in the process of living and being normal? You see part of our life is always attached to something, this is how we manifest and identify ourselves. Detachment. (3:26). When get detached from something you get more attached to something (else), and then it's how much you want to be detached from one point to be attached to another. Q: This is exactly what is happening to me, I am detaching, but I go and attach to something else, like a magnet. It confirms our existence, if you are not attached to something how can we confirm that we exist, even I said the Creator created the STM to confirm his own existence, that he is attached to be loved. The only attachment worth living for is loving. And when the man understands this, he has matured. Q: So if we attach only to love? You see love is not only cuddling and kissing, love means giving unconditionally, and then in the process you come to the point that you receive for what you need. Q: I was pondering about the soul in a cage, until now we were not conscious of the soul, ... (3:28). now we start to pay attention to it and feed it and make it grow and enrich it. Am I correct? Maybe something I can say is one of the biggest achievements or points of all these teachings, the new revelations is for man to understand the existence of his soul within the physicality of the man, and that he is responsible for it. This is the most ... maybe this is the only reason we came, but we had to take different roads to teach the man this. If we learn that, and that it doesn't need to be fed by a physical life, we can find a path to feed it or nourish it through the

dimension of the energy of the U, then we have succeeded. You see detachment doesn't come in, I give everything I have away and everything else. I have this ?? everyday, I let every thing of the KF go so that we could bring a lot of new dimension into it. By detaching from what we became attached to, we are given more opportunities to serve and to spread and develop. We became detached in the cycle which we had to bring the T into, and through it we became a condition of a lot of people, (3:30). understanding the T and for us to become part of a structure of a planet. Due to the conditions that were created for us I let everything go around the KF because it was something that I wasn't here to do. By letting it go the governments came to understand, that they needed to do for what was let go of. I let it go physically but I captured the soul of the nations, the soul of the world leaders. I see that clearly in the whole work of the KF, it's very hard for people to understand. How it works, but I go through the emotions of letting everything go, but I ask governments, I want more, because when I have more I can serve more and some how nations have started listening. I don't want it for myself, I want to change the life of humanity. With the production, factories, everything, because we could see problems. But in that time with all the KF supporters who stood with us to go through this transition, allowed us to capture the world leaders, the governments. Just watch the space in the next coming days, we passed the weeks anymore. And then you'll understand. By detaching what we went through, we became attached to bigger scale which does what we wanted it to do. (3:32).

(3:40).

(3:48).

(3:54).
(3:56).
... Mr. K: You see, you look at it, when I was young, my parents said, they are wasting their life. What is this you do, you don't it this way or that. (3:58). See what it made of us, this new generation. Those of us in 40's, 50's, 60's, we are the ones who made these nations. Our fore fathers set the ground for it. The new technological development, the changes of where we are now is done by our generation, and our fathers generations, and not from the generations before. We built on our generation, it was such a rapid revolution in science and technology and everything else. ... In the 60's and 70's when they told us you are absolutely hippies you don't know nothing, you have long hair, torn jeans, disco every night. If those of us who made that condition, now it has become more materialistic, and built all these buildings, sciences, technologies, even philosophies, we haven't done that bad. Why do we think where our children are going, they are going to much better places then we did, they don't need to work, to worry about the electricity bill or where I am going to get the food from, because with the teaching of today we have made the ground work, their soul is aware that our soul is the physicality, we are going to have such a beautiful life. I think the next generation is going to live the life of luxury. ... what is about to come, the life will change. There is an industrial revolution, it's a soul revolution, you are not aware, there is a lot of holding back, (4:00).

280th Knowledge Seekers Workshop - June 13, 2019

(June 13th end of war, Japan sent to Iran to negotiate peace, Offer to share technology instead of stealing it, Different levels of Gans matter state which creates life and energy state for lift and motion, THE CHANGE: to travel in space you use weak field forces and not strong ones which are needed to hold matter together locally, The brain is mainly made of H or the neutron, The spaceship control systems will have a soul and communicate with you, like how the brain was made by whipping amino acid like mayonnaise, , "Twinity" souls give and receive all they need from each other, Hexagonal magnets like it happens in the universe, plant structures and plasma,)

(:20).
... Some of you might understand sooner of later why we are so vigorously following this path. As you know 3 or 4 weeks ago we saw the possibility of a massive war starting which would have had no end, (:22). because those of you who are familiar with the geological position of Iran, its next door neighbor Russia and then China next to it, and the security of the oil fields in Iran, this was becoming a water ?? point and in a way many of our work, the openness of humanity work has lead us to where we are. Today is an amazingly significant day for a lot of us to understand. Today is the 13th which usually brings an end to things, things are bad end up, and we see that as an end to the wars. Today, the 13th of June is the beginning of the end of the wars. because today we have the Japanese prime minister in Theran negotiating for peace with the Iranians on behalf of the Americans, because the they realized that fighting has no corners, no reason and many nations have turned back. The administration had to understand that the end of wars has come because this was the last war that anybody got together to do. As I said in the teaching last night, the European who gave money to Americans, to borrow money to make themselves bankrupt with the wars, they have literally walked against the wall. There is no nation supporting it and America was left on its own. These activities take a lot of financial capital and reserves which America doesn't have as they are taxing their nation heavily to pay for the debts of the past times. (:24). It will not be easy but today is the end of what we promised, the end of wars. 05

.. like in Palestine, Syria, Yemen, (:30). they all will end in a few months, or shortly after, maybe even sooner, as the American government concentrates on paying its debts, what it has committed itself to financially before. On the other hand there is going to be a further burden on these nations, this means that many of these nations will not need military forces, we will see a massive reduction in military forces around the world as everything steps down. You have to understand that with the new space T Iranian flights will land in Los Angeles in a few minutes, and American flights the same. We have overcome the borders and we'll see the war will have no meaning. Military forces will be dissolved. This will put a huge burden on governments how will we handle millions, just about 1 billion that this condition will create. When you have nothing to fight for, no borders to protect, no one there to threat, as we have seen in EU, there is no need for armies. What are going to do? We have 2 choices, to close most of the military camps and put most of the soldiers on the street, or change the hardware and we train the soldiers to become builders of the nations. If your nation is so much developed then you can develop the next door neighbor because there is no longer a next door neighbor, they are part of you. (:32).

(:40).

(:48) (break in connection ..) (:53).

(:58).
(1:00). We have to deliver in every front be it from the space, energy, agriculture side, which we said we have won the election we have achieved peace, now collectively we have to deliver that we guarantee nations security in food, warm, energy. Thanks to what I call beautiful Tesla he has managed to get mankind to do the job for today. This means, one of the problems most of you K Seekers have is that you have not realized a massive critical point. None of you KS have understood one of the cornerstone principles of the T and this has become a mayhem for a lot of you. This means, today's teaching is trying to sort out the wheat from the chaff, we have to understand what is involved ... (1:02). (teachings start) ... in our T and teaching we have continuously referred to 2 levels of Gans's, matter state Gans and we have an energy state Gans, these have to be understood and many of you have not come to the level to understand that the matter level Gans leads to the condition of life, Cu, Zn, CH3 ... (problems ...)

(1:04). .. screen share not coming ...
(1:05). Most of you have not separated the 2 sides of the T, it has 2 sides, the universal part, a light part, and a matter part. In the matter part which is the life of the man, you use CuO, ZnO, and everything else, then you try to get a small energy from the matter part to create the lift and motion. (1:06). This means that the K Seekers have to understand the total process and not just part and a lot of people go between one of the other, or they mix it together. This is part of why you do not achieve or you can't achieve many of the things you set out to do. I have seen people trying to work between the 2... break ...

(1:08). (break ...) 42 The Gans's we work with, there are Gans's that we use for matter state, what we call, the life, or there are Gans's which we use for energy and many K Seekers have not understood the difference between the use of these 2. In medical and food application we usually use these (Cu, Zn). In energy and space movement application we use H, D , Tritium. I have seen that some people are trying to cross the line, this is very difficult, do you remember, the Universe -- Transition --- Matter state. (1:10). When you work in the Gans state which is here, sometimes it's not so easy to go back that way, unless you know how to play the game. But if you are at this stage you can come down and you can make the matter state, it's easier. In this process you release energy, the majority of the time in this process you gain energy (CO2, CuO2, ZnO). These are all alkaline or G, and the others are all acidic or energy giving. In the coming time those of you who work with these systems, especially with MaGrav systems, dynamic for lift, you have to understand what you set your systems for. Many of you when you make your coils and you cover them with CuO and the rest, or cover it with these kind of things (H, D, T), you get different results. You have to understand that H and Deuterium, (1:12). and Tritium have different needs and they can be used in a specific way for M and G ?? and the energy release from them can lead to the creation of these (Cu, Zn etc). From plasma we can create matter, energy of the matter, and the condition of the energy of the matter. With bigger elements we have problems to achieve these conditions. Those of you who go towards the understanding of the motion and travel in the space, you have to understand a further knowledge. I have explained this in the past few days because I see problems and I try to solve them before, but now we are ready for it as we have to get man into space. If you look at it in the matter state the G field forces are tight, (1:14). to keep a molecule in its position, strong and tight to keep an atomic structure into a molecular structure, to keep so many protons, atoms, or electrons together. But if you look at the structure of the planetary or solar systems the energies are very weak, extremely weak. There is a star there and there, a galaxy here, and another force of universe there, billions and billions of kilometers away. the fields have had many battles on the way with other fields to get to us, tantalizingly weak and beautiful to play with. What this means for the reverse technology of the U, mankind has to learn that to fly you do not need strong field forces. To create matter and to hold on to even as Gans you need strong fields in the location where you are. If the K Seekers understand this man will become man of space in a few seconds. The mistake made by most of us K Seekers, they're still in a "camel bird" story, they think they're in a rocket propulsion but they want to work in the Gans T. (1:16). We light up, pack it in, do what you like.. sorry there is no star so close for this power, you're a dead duck. This is where I have seen KS work, I have put Gans of CO2 it doesn't work so I put Zn, this in and that in. If you look at the Chinese flight system we have not used anything but these 3 (H, D, T), in your medical systems yes you have to use bla, bla to see the light outside, but in space T you have to understand what you are doing. And this is the problem which has been sitting around the KF for some time now and I have always thought one day when they are ready to go to space I'll explain it. It's no use mixing this with this and expecting a miracle, because all it is, is energy conversion. If you hit a high energy to a solid body you get a .. if you know how to stick the energy out you might create a few ?? moles. As the English said, horses for courses. (1:18). The sooner our KS understand this criteria and connection and conversion between them (H to Cu and Zn), then we are in a very

smooth way to take off. If you look at the condition of this planet you have the energies which come and in the process with the energy of the, what we call the Inertia of the Cu, they change it to Cu, and if the MG field of Zn is there, then it changes to Zn. These (H) are energy packs, these (Zn, Cu) are Inertia packs, depending on the MG field of the structure you dictate in that reaction at this point what is created. So MG field of the earth in conjunction with the energy which enters the earth, to what we call plasma fields of H, dictates in that point what is to be made. Very few elements on this planet are made out of volcanic eruptions or other things, the rest of the materials on this planet have entered this planet this way, (1:20). become part of this planet this way, because if there was an Fe and something else and the balance energy was Zn, the fields which come in now create Zn. If there was an eruption and everything else that creates the condition of the field transfer what we call heat, then it could be a Cu. If you understand this and the completion of the work that in the direction of the energy field forces transfer at a weak field, somewhere we might find a match for planet Zeus and somewhere a match for the moon, they are very faint compared to the magnets which we hold in our hand in the matter state. We have to start measuring these and at the same time we have to know at what strength our planet is giving to the moon. What is the return factor, what strength, you are weaker in M at the point of arrival, we are stronger of the G at the point where M has come in, because by law of Pl the stronger feeds the weaker, and the stronger feeds the weaker, it's the matter state of the planet at a weaker state compared (1:22). to the moon, which the moon can effect it. At the same time earth creates the same pressure to give because now G is stronger for the moon to receive. If we understand this principle, if the KS and the men of space understand this principle, then you understand that you don't need to burn any fuel. All you need to do in interaction of the fields in your system, if you can create friction enough, or distance gap energy strength enough 43

(1:28). Get a drop of oil and put it in water and start to heavily rotate it, shake it and you'll se the white foam, the thickening. If you understand the process of the receipt of the energy by the brain in conjunction with the speed of the fields of the body in the womb of the mother, will create that ?? stearate and if you understand this you'll understand how brain cells are created. ... when you have an egg and sperm coming together when they make the third (entity), it's the balance energy they are trying, they absorb energy from the womb of the mother. These guys are extremely dynamic, they're a machine at high speed rotation, in that process they stir up a very nice white foam called the brain of the man. Through the energy of the blood vessels outside the boundary they are controlled and dictated. If you understand this and take the knowledge a step further, it is very easy that, (1:30). it will be essentially unthinkable, but if you understand it very practical, to build brains or control systems on the same basis for the spaceships of the future. You build a new communications system to fit the space T you have built, even though it will talk to you, have a feeling like you and everything else except a physical condition of arms and legs. Essentially it will hold its own soul. then you'll understand the communication, the interaction, the existence of the physicality and the STM for space travel, energy, and food are interconnected. Then it has become easier for you to start developing the T so mankind can make the space of the U. You have all

been looking for a control system for your flight systems. (1:32). It was easy, we call it in the English language, mayonnaise. The mayonnaise of the brain is made out of the combination of the strength of the H that in interaction with each other they mimic the strength of the physical body, what they are connected to. Then making system controls which are beyond the speed of light according to the need of the system, for the first time has become possible. But this time you can't make the mayonnaise by putting something to stir, you have to create the mayonnaise which is created out of the interaction of the fields of the U, which doesn't need oil, but it needs conversion of the energy which we call the STM. In a simple language let's say the sun is the soul of this solar system and you see no C, Zn or whatever in it, but in interaction of the fields of internal dimension structure, (1:34). creates fields that in a strength at some point will convert in its shell to Cu or Zn according to the point of arrival. Then you'll understand how the next generation of wireless communication systems, what you call computers are achievable. Mankind has to move in the next step, to start moving to understand the totality of the structure. As I said, mankind has moved towards peace and we have to give him something to be busy with that understands that now he can make a condition of the new systems of wireless zero time communication, like a brain as you have, there are no wires in there but everything communicates, but then you have to understand the center of the fields, what mixture has gone into there, how you allow it to be there, can my flight system feed its environment, have an emotion and understand that it is traveling among life in the space without physicality, and like you, you don't like to step on the ants because they are a living being but avoids them, because it feels their strength. Now for the first time we have released this knowledge, but it will take mankind some time to understand it because now that we have made clear the separation between the control and physicality, (1:36). now we have to understand the motion which can be controlled through the dimension of the same, otherwise you can't control your systems. If you use a flight system which has Cu in it and you enter into a zone which is strong and can dilute the energy of the Cu, you have lost your spacecraft and are falling into the skies in the open spans of the U, but if you understand the structure of the U in the dimension of material and matter state, which is again connected to the structure of the H as 1 cell complete, what you call Deuterium, then you hold onto the physicality of the direction and dimension. These are the new technologies which mankind has no choice but to understand. With the teachings of today we have taught you how to make a system, a control manner, the same as the brain without any need for wires, by MG field positioning, by dimension of the thoughts and dimension of the emotion. When there is a need in the environmental energy dimension, then we'll see what the control system will release. (1:38). It's exactly like the way your brain releases so much enzymes because you have eaten this food, releases so many things because you are in temperature and everything else. Now if you understood how to build the structure of the control of the brain of the system which is not necessarily tangible but it exists, then mankind has entered the next dimension of knowledge of the U. It will be very interesting to see how many of you will very rapidly convert to this process. If you understood this process then you could create the same and travel from here to the moon in seconds. Travel from here to other dimensions of the galaxies is zero time because when you are on the winds of U in the direction of their motion you become their passengers at the speed that they go. The beauty with this travel is that it is frictionless, there is no friction because the M

fields do not reach the matter state strength, unless you reach the point of destination. Today in the past few minutes I have taught you what the mankind has been yearning to understand for years and centuries. (1:40). It will take you some time to digest it, understand and replicate it, but in essence the basic knowledge of existence is here and exists and in different strengths have different ?? in the eye of the observer, something very simple in all the teachings and that was, how you compact, is how you are observed, and don't forget that all elements in plasma T are G and M positioned, then you understand why even the brain has different colors. How compact they are gives them different colors, and why do they become compact and what is the purpose of suddenly changing? Because of the compactness, of the energy pack, because of what you have put in there according to the field strength of the conversion. If you understand this, how to make it, how it is done then you can do a lot of things. Controlling massive pests, massive conditions but you have to understand the process of their life and the process of the emotion. (1:42).
Any questions.
Q: You said there are 2 sides to the T one being the universal and one being the matter one and you compared the matter one to the Cu and Zn that we used, and the energy one to the H and Deuterium, does it mean that the direction of the T is towards the direction of the H and Deuterium .. with the other Gans's? We always promoted and always explained in that direction, it's just that there has been a confusion and it had to be made clear. Some people did not understand it and it has caused massive mayhem, they mixed things and they take things and they convert things, put CH3 somewhere etc... but if in general you understand that they are 2 separate parts of energy and matter then you understand we are talking about M field energy positioning. We are not talking about energy as we can convert it to (1:44). useable energy that we can electrify something, that's another dimension of the conversion. At the point of the conversion you get what we call the pulse, the heartbeat. Thank you. You see now I have divided you K Seekers in 3 clear categories, matter, energy and control categories. Soon you'll have to understand all 3 or you start from one and see how you get to the others. ... Rick says, ... there's a duality between the matter level states and the plasma level states let's say.

Q: How can we help the "twinity" souls to find a balance, are they able to find peace by understanding they have twin souls, are these twin souls, (1:46). of physicality within 1 physicality? So I am just comparing that question which could be taken on a personal basis, on the individual... What do they call a twin soul? Define it. After all these teachings somebody should be able to define it. What we call a twin soul, be it a soul of another being, or a soul of a stone, whatever, is that an entity, a plasma condition which gives me everything that I need that I do not need to look somewhere else, or most of my needs and I give to it what it needs or most of its needs. Then when you can give and receive everything you do not need to go shopping do you. This is the definition of a twin soul, it means when you are the twin soul, it means I receive all the pleasures, all that I need from that soul. Then it comes that how true are we with the others which we live in the dimension of physicality. This is one of the problems with this process, when you call somebody a twin soul it means (1:48). it gives me everything I need. 02

(1:54). ... (break up ,,) (1:58). Q: I am Dean from UK. I have been feeling a lot of energy in my hands. I was listening to Rick's show last night and there was a Frenchman with a MaGrav and I connected with it by thinking about it, and it was giving out pulses, ?? I connected with it through my fingers. (2:00). I was getting pulses 2 or 3 seconds, this started when I gave from my soul to the China spacecraft that you constructed. It seems to get bigger and bigger and I just need to talk to you about it, really. What happened, these pulses are something which we know about and we do a lot of work around it, and pulse is the cornerstone of life in the U, a plasma can't work without a pulse. A pulse is created at the point of balance between the M and G fields point of strength. When you jump from G to M in that process one contracts and the other pulse expands. 1 pulse rate is G and 1 pulse rate is M. The earth has a pulse, so does our body. (2:02). The rate of the pulse shows the size of the activity. It's a balance between the STP and STM where each one has its own pulses. We develop this T ... without a pulse there is no plasma. We developed the T to create pulses. Pulse is the cornerstone of life in plasma. When you have a man which is made of a combination of plasmas called Gans's the collective change between the polarity, because it's the heartbeat of the man. You can look at the pulse 2 ways, 1 is to release Pl, (2:04). because when it reverses it squeezes the fields to radiate, or when it reverses it sucks in. A pulse in reality is like a pump, you suck and let it go, and every time you suck in you need to let it go otherwise you can't suck in because you already full. In reality it's the heartbeat of physicality which is our blood circulation that creates or forces the STM to radiate at the level that in the brain in the interaction of the 2 leads to creation of emotion. One triggers and in response to the trigger it creates a new condition. If you understood what we explained before, the blood vessels around the brain they carry the energy, but this carries a pulse energy which in a way pressurizes the plasma of the STM and that causes the soul to release and the interaction to a ?? point creates the emotion. The inward pulse pushes the fields, the outward pulse takes the balance we call the emotion back ?? through the blood, and in conjunction to the physicality. This is something which I was explaining ... (2:06). is that you have the brain and the neural system and then the blood. At a point where the blood vessels, information gained through the brain from all the cells in interaction with the nerves leads to creation of the cell, conversion of the lymph to the matter state of Gans itself. So here at this strength with this blood coming in, with the presence of the lymph it makes the cells of the heart. At this level with the strength of the 2 at a given signal, each one separate makes the cell of the liver and kidney, to become. The lymph is the common denominator to the totality of the physical body, it's the difference for the voltage balance for the two which decides what lymph becomes what element at what point and how often all these change because the information sits here. If mankind didn't have the lymph he'd have no dimension of physicality to make. We eat and make everything into lymph and transfer energy to (through) the stomach, (2:08). and then it's there. It's like flour, if you want to make a cake out of it, depends on what temperature and what ingredient I put in, the information from the soul comes from the neural system, the information from the STP comes through the blood, and you have that cell. You can take the kidney out, because there are blood cells in that position which have brought it in, the kidney you can create a condition to develop (it) and it will be there. This is how we develop the brain cells when they are destroyed. Then we tune into the heartbeat and the soul beat, at a given point of the strength leads to creation of certain strength cells. That's why when we

get old we don't produce stronger cells, because the physical dimension fails, not the soul. If you look at the blood circulation you have one which brings the red blood cells or fresh blood, and one for the used blood, but if you ask the physicians how did they jump from one to the other. the same thing happens in the dimension of the physicality in the conversion of the lymph back to matter, or back to blood cells that they can be taken out. (2:10). It's very interesting if mankind understands how his physical body works. If you look at the process of the lymph and the process of the neural system and the blood circulation and you understand this what I just explained, then you understand how simple energies convert the matter to what it is, if it is coming in to be added or it's taken out by a different one. This is how man has to learn in the space to replenish his stock, his energy levels in the spaceship. The working of the body, now that you understand, understood, and can repeat it, because the whole U works the same. Then you'll understand that suddenly our of nowhere stars are created, and suddenly out of nowhere stars disappear, come part of, we call it, whatever you call it that they change, but in fact that is what it is. Certain strength fields converts the matter, or energy as a lymph to the matter state of the Gans itself, through the high level energy and the other one which is slightly different is what takes out. It's very interesting if you ask a lot of man of medicine, they tell you .. (2:12). and why doesn't what they call blood circulation doesn't mix with un-oxygenated blood circulation. But if the body is making all these red blood cells and is making them for both systems why do we carry in some the energy or the material of what we want and some in the energy material which we want to get rid of. It works on the same principle, and if you understand this process of the working of the body then it will be very easy for you to make G systems and M systems. It's the same blood cell and how come when it gets mixed up it passes the the lung and gets energized it changes its characteristics. There are a lot of things which scientists have not managed to explain they just tell us it's there. (man interrupts ...)
(2:14).

(2:16). Jim of Australia presents second part of presentation. Field Interactions within Plant Tissues using circular chromatography.
(2:24). First photo of daikon radish, showing zones similar to rings of a tree trunk or microscopic image of orchid root. (2:26). comparing shop radish with plasma grown radish. (2:32).
(2:34).

(2:46). Mr. Keshe responds. .. The change comes because we have changed the environment to that area and that in turn has created a new dimension in positioning within the structure of the cells. .. (2:48). .. Go back to the green orchid picture, if you look at the structure here, what we call a honeycomb, the structure is all the way through the same, if you look at the structure of the skin of the man it's the same, of the kidneys the same. What do these shapes mean, and when you introduce Gans's outside you change the dimension of these shapes. It means you change the dimension, the size of the MG fields in these. When we see the body, the physical structure is where the MG fields have changed to the matter state. You can see in this band a uniformed shape. (2:50). In these hollow spaces, in them it's not hollow, it's the MG fields which this for example,

this here dictates the size of that one there, and dictates what this can bring in, and this bracket (band) here decides what needs to be filtered to go further in. Then you see another filter band here, at the point of every change we see uniformity in the size. We look at the structure as honeycomb but in fact the empty space is where the plasma sits. The pressure that, that plasma can accept allows physicality in its boundary, and we see the boundary of the cell. This is how they look, a lot of them are hexagonal or follow near enough that shape, where the balances are in the 6 fields dimension, which in the science of man we do not understand yet. Because we are looking at a cross section, there is another side which has been cut, so this is like those magnets which we put together, the flow of the ring magnets, this is exactly the same thing. (2:52). But because it's hexagonal it creates a different condition. .. I explained this, if mankind ever produced hexagonal magnets like the way it happens in the U, as now we learned the ring magnets, we'll see a new dimension in the science of man. We will understand a new concept in T very much reality in the dimension of hte plasma. When we look at a Pl as a circle this is the whole structure of the system as a ring, but if we position enough magnets we'll see hexagonal position, if we leave them to find their own position. But if we ever manage to create hexagonal magnets we'll see the operation of the Pl in the physical dimension. The teaching of science, the conversion of plasma to fields to matter, (2:54). as I call, you have a Pl, fields, then you have the matter state, then we'll understand this, we'll become more in the dimension of reality and we'll see how cells perform and in a way, if we ever manage to make a hexagonal, 3 dimension magnets then we'll see a different field difference, then collectively we'll be able to understand how the body of the man works, how the body of the live entities work. If you take a cross section of every living entity you'll observe this condition, and depending on how compact they are, how close to the center the shape becomes more regular, more homogenous in size, and they usually become homogenous at the point of change, and when you introduce plasmatic magnetic fields then the whole ball game changes. It's fantastic to see this, because if you take any cross section of any tissue then you'll see this. So we always look at the boundary of this but in fact we have to look at the plasma inside it, the field strength inside it which creates that push, that boundary, and that field at the point of interaction of other fields at the point of balance they create a matter state. (2:56).

(2:58). .. (lost audio ..). (3:00). If you look at the structure of the U we see the same, also galaxies and planetary systems. .. .. (3:02).

(3:06). hexagonal characteristic of dynamic living creatures not stone

(3:14). Q: The gentleman from the UK asked about the energy in the hands, that you can manipulate it in a way that it becomes like a circulating ball and you can make it go clockwise or counterclockwise, move it out and bring it back, you can play with it, so what can we do with that, what is the reason for it? Because I can create it now, I can create balls of energy, ... I can send it out and bring it back, but I can not send it to other parts of my body but I can move it between the 2 hands. This is different from just feeling the energy, now it is out it can separate from the body, it can go out and come

back. I can send it to a plant and I can get it back from the plant. (3:16). ... The system is very simple if you can get 6 hands together or you can make the shape of your hands, or if you can make your hands in a 6 sided form, 3 dimensional, you should be able to see a structure. Q: Do you mean I can make 6 balls from the 6 hands? When you make the space flight reactors you see these shapes. A combination of field forces in SF leads to a creation of a structure copy of this (on screen). If you look at the structure it's hexagonal inwards, the space outside makes it flat looking but in fact, it's exactly the same. When you make it 3 dimensional, when you make a matter state space system, (3:18). you create a structure like this on 3 layers. In the space reactors it's not that you have 1 layer of fields, you have layers of fields which makes the body of the craft. It's the same. If one day man opens and cuts, and can get into physical dimension, you can see through it, you see the same structure, but as it is dynamic and so much you see it like the body of the man, it looks like a flat surface. How tight you can make it, by strength in respect to its position, you create the field barrier that you can not be penetrated. It's very much if you make a bone out of the same length or you make a skin out of. The lymph transfers energy, it doesn't itself become a matter state. Q: If we use only the information of the Gans itself, for example if we store the information in water then we are no longer in the matter state, I think, can you confirm this? Rick says, I think you confirmed this, you talked about the energy transfer? What does that mean? R: It's not matter state level, the things that are going on. (3:20). If you can se the energy transfer or the information transfer and if that's all you see then you are no longer in the matter state, would that not be correct? In so many ways, you don't see it. If you look into the sky especially at night when there are not so many field forces of the sun?? changing it's more stable, you see universal magnetic fields, it's very clear, you see in the physical language, you call it air tunnels, they put the aircraft in it, the corridors we call it. If you look into the sky and have a trained eye to see, most of us can do, we see fields in the depth of the space, it's most probably millions of kilometers. You can see transfer of fields across, and the motion of fields across, and then when you see the difference in the field strength then you see the boundary of the fields. ... the light of the galaxies and stars shows them, the reflection of the light through them. (3:22). and at that point of interaction, the change you see again the change of the whole structure of the field flow. It's like the rivers and the ocean. 15

(3:26).

(3:34).

(3:36).
(3:38). We hope that the 13th today will be the end of wars ...

281st Knowledge Seekers Workshop - Thursday, June 20, 2019

(The foundation goes global on US Stock Market, How the Neutron is made by blocking fields and it turns on itself becomes dynamic, , Zero point energy discussion, Explains the experiment from 1800's about light as a ray and particle, When a field is blocked and turns back on itself a neutron is created, ,)

(:12). Today we have a lot of developments and progress in the work of the KF ... We are trying to bring the KF on the international level to be understood and appreciated and to be able to share the T and knowledge with as many people as possible to streamline . ... What we have achieved is that the KF is going global is a way that (:14). we start an organization that we can go across this planet. The KF will move in the stock exchange in the US as of July. This is a major breakthrough for the KF ... KF Global will be responsible for all factories and development outside of China. ..
.. this will allow us to raise capital to setup the research centers , developments and every other thing .. (:16). .. We'll work closely with the American government and move the headquarters of the KF to Arizona. We'll operate under the rules an regulations of the international market and global market, which means that any man on this planet can participate, buy shares and see the development of the T. This is what we were trying for months ...
(:18).
(:20).

(:26). ... we expect close collaboration with the American and Iranian space programs, we'll include the Chinese the same way. ..

(:30). and we'll take a step up. KF headquarters will move to Malta in the coming weeks and will be our permanent residence for the rest of the life of the KF and t the same time we conduct on the international level that we consider all the best and what is the most safest thing and way by every nation to be one standard. This multinational standard will go through the window as KF is One Nation. This is important to start structuring One Nation organization and at the same time we will come to an agreement in due time with the governments that the penalties and the structure in respect to the KF breaking any of the rules and what we call safety of the use will comply within the nation which it is applied to. We'll invest in the countries in a very large scale and we expect from the outside that it is applied, which means if we invest tens of millions of dollars to set up factories to bring wealth to a nation our standard has to be accepted the same as (theirs ?) and of the rest of this planet. This is part of the work of the One Planet One Nation in due coarse we will add One Road One Belt into it but when the Chinese come out of their corner and start working like every others as they do. We have to stay correct in our way and in the path of peace, we make no decisions. At the same time when the KF as a group decides (:32).

(:36).

.. 12 months from the time of accepting the procedure, (:40). landing on the moon as One Nation. Human transportation, not what we call crafts ... (break in connection ..). (:42). .. and we'll teach the same way the Americans, Chinese and Iranians the new space T which far ahead of any of them which have access to. We have kept the best part of the last part .. We share the T in a very open way with the 4 nations, I have a reason to do this, which is to fundamentally to push for peace. We will set ... (:44). .. very correct with sharing knowledge with all the governments. ... this way we guarantee that knowledge is developed across equally. ...
.. there is no other way ... we'll see how it develops ... we see other nations trying to develop new weapons technology appearing. We see Australia, (:46). South Korea, and Japan with wealth and nothing else to do trying to create jobs with new weapons technology. We'll try to jump the gun before they become another party trying to sell arms and create wars. This is what we see, this is how it shall be ... we hope we can deliver the T the right way. Are there any questions before we go into teaching? ..
Q: ... (hard to understand) To get knowledge of your teachings I have had to pass through 4 years (:48). of your teachings ..?? What do you expect us to do? We have setup Wikipedia, the education sites, the Journal, the private teachings, all the workshops, somewhere there you can find your answers or somebody who knows the answers. Q: I am sorry I formulate the question in wrong manner. About the knowledge (being) put in the head with satellite , like a ?? Okay, that side of the T development is growing very slowly and it needs my time to go back into research to complete it, because a lot of people don't understand it. Hopefully in a short time coming when I finish my work in all places, I am taking a position as a researcher, and not as head of the KF. Wherever I go will be research, and this is part of research development. (:50). ..

... I am looking at systems on how we can transfer knowledge and emotion. (:52). There is a lot to come. We have to make a peaceful man out of the human then we can learn everything else with it. 20

... Any other question. Q: The population of India will overtake China in decade or 2, where does India stand in all this? (:56). Hasn't India been an enigma of the KF for the past 20 years. We have tried very hard to open India, we have worked in very different ways. It's a culture of its own, we have to respect it, it has a structure of the life of its own, its structure of hierarchy and class division which doesn't exist anywhere else in the world. Economical development in this country has a lot to gain by passage fo the soul, the way this mentality works. It's the only way I see that we can break into India and reach the majority of the people. In the way of them understanding and elevating their work and their soul. We're testing a lot of new systems which shows it can be done.
.. You see there is a major problem in the world, it's beyond imagination, it's called the USA, this country is the biggest problem for humanity at this time. They produce arms to kill, they do all sorts fo things, what I call shooting from the hip, it's their pattern of work. If we can tame the US through (:58). the development of psychology of no war, I think that 90% of the war at the present time will shut down. 12

(1:04). Q: There is a main concern about people not being able to understand how you work ...

(1:16).

(1:24).

(1:34).

(1:38).
(1:40).
(1:42). How many boats do you want me to freeze very easily. .. I want to teach you something very easily. Scientifically it's very important and one of the cornerstones of knowledge if you understand it. In the world of science, this is a discussion we've had with eminent Chinese scientists, that's why I can bring it up with you and you'll understand it very quickly.

TEACHINGS START:

There is a point called zero point energy where according to this eminent scientist that there is energy at the zero point which is -273 degrees Fahrenheit, that is nothing moves and there is a lot of interest in this, but what I explained to the scientist and now to you because this has a lot of applications in the research you do. Zero point energy at -273 means that no matter state vibrates or there is no matter movement, but there is by the principle of the physics, there is no where in the U that is devoid of energy, or what we call M field motion, and this puts what I call the cat among the pigeons for the world of science. (1:44). ... if you bring this space into -273 there is no visible movement of electrons, supposedly. But according to the law of plasma physics which is new, there is nowhere in the U which is devoid of M fields. These are M fields because you can freeze the motion of the packs, solid packs of energies but not fields. ... So what the scientists say is how can you create energy at zero point. I look and I say these guys haven't even understood the first law of plasma, which is there is always fields and if you can disturb these fields, (M fields in motion), you'll observe energy at zero point. So how do you disturb because you have frozen everything in this environment ... the simplest way if you're a physicist and you understand it (1:46). Put a Gans machine here and rotate it ...
(1:48).

(1:58).

(2:04).
(2:06). ... Many of you will test the knowledge in the future and see that it is there then we'll go to the next step of the knowledge. .. How you transfer the STM, how you allow it to separate from its physicality. When a soul decides to stay behind but the physical body is not able to carry it you can change or transfer the STM to a new body but you allow the soul to create that body as it is. These are the knowledge which the man has to learn. It's the soul that has and keeps the memory, not the physicality, because as the body dies and

it's in the coffin it has no memory, it's gone. So now if the man gets educated and the soul decides to stay behind because he's fallen in love with a beautiful woman, she is everything he was waiting for, 200 years on this planet. (2:08). He says you know darling, if the possibilities are made, I'll come (back), how would you like me blond, blue eyes, or what is your favorite, then I create my physicality according to the wishes of the soul of the woman, to please, to give the pleasure of existence. Man still has a long way to go to learn a lot of things. You go back and understand how the STM was kept in the boundary of his physicality by circulation of the blood, so you create a new dimension of transfer of energy to replace the blood and you literally move the soul with it. It's as simple as ABC, 5 seconds ago you didn't know how to move the soul, now I'll teach it. ??? Every vessel in the brain, in the skull, is a M field trapped, create a dimension for the STM, in comparison to the brain. If you can replicate it then man never dies in the dimension of physicality, because you can move the soul on to become. This is how we'll transfer souls between the universes. .. (2:10).

.. A test they did a hundred and some years ago, what they did is to create a mono energy ray and put a mirror in front of it, and this what we call laser beam (2:20). divides into 2 (1 is reflected 90 degrees and the other passes straight through the mirror) and hits a detector, or rather 2 mirrors I should call it, then they both return together (to the starting point) and then they put a detector (90 degrees to the side) and they observed energy of the plasma, which is a particle. You have to understand that this was a ray because it came from mono energy, they split it, they think, coming back, they combined and they become, but here leaving as a ray, and here becoming what we call a particle. This is what we said that light sometimes shows itself as a particle or matter and sometimes as energy (as we said in book #3). I explained to him, a paper will be written ... with the present knowledge of the KF we understand what happens, why light converts into a particle. What happens is this light hits the mirror and travels slightly at a different speed, and the same with the light at 90 degrees it travels at a slightly different speed, this mirror has an energy which is in a balanced condition (2:22).
(2:24).

(2:28).

.. because the scientists never understood they could not clearly explain how we end up in a particle or in having structures and neutrons are created, because neutrons don't (2:30). come to be .. they are particles or waves or fields. How do they become suddenly particles, how does the first neutron get created, these are the questions that mankind has never answered and we passed over them. Now we can explain it. I can explain it in 5 minutes and you'll be able to understand the process of creation. if you ask anyone ... if you listened to what I said in the past half an hour and you understand the next 5 minutes you'll understand how life is created in the world of creation. How does a wave, a field convert into a plasma. It's a misunderstanding, it's an explanation in the scientific world of mankind who has not understood but only understood in part. It's very easy to explain,

we have a matter state, it looks like this (packed molecules) and we can put anything into it, but if you really look deeply, open it up enough, I look at it on this side, it looks exactly like this, there is a space gap, but very tight. If I create a condition of it when it becomes Nano, it's this (widely space molecules), but it's still matter state, you can't put 2, what do you call, (2:32). cells, 2 dynamic fields, you call them atoms, together, it's impossible. It's MaGrav positioning. .. If you have the fields coming in the direction of work and it can get through this (Nano layer) and it doesn't create any resonance, it's moving, this field position, it's M field positioning is up to the other fields in its environment. When it gets to this gap it has 2 choices, to penetrate this gap, if it comes this way (matter side), it has to find a way, to have a strength that it can go .. it touches itself so much that its strength becomes the strength of the gap and it gets through, it has to create what we call a resonance, what we call a wave to be able to get through, and once one has established that way the rest can go through. We call it 50 Hz or 60, then we find why Cu wires work perfect at 50/60 Hz, because that's the space gap it creates to go through, but if you create a condition that in material coming in the space, if the material or what I call the fields coming at a point that in interaction with the structure, the MG field of the 2 doesn't allow the field to go through, so the field has to find a position so it curls up and curls up, because the fields are coming, and in that process, and not by the matter construction, but by M field obstruction. (2:34). It creates the first fundamental plasma what we call the neutron. That's all it is, and it has never been understood by the world of science because they never understood the construction of atomic structure, nuclear structure is dynamic and spherical condition and it has both G and M fields what we call MaGrav. If the wave that is coming in comes to the point that its MG field force can't penetrate, it's like putting a ball on top of a hairdryer and blowing it, since it can't go through it starts rotating its fields there. Now because of some of the losses to its boundary and some of the higher strength ?? inside, it becomes dynamic and the wave becomes a particle. Now we have the fundamental particle. When it comes to this place it has to create for itself MG positioning and it releases itself as a first neutron, then if this condition holds on many neutrons and ?? division ?? electron leads to creation of the first cycle of matters, that it leads to creation of planets, stars and the rest of it. This knowledge up to today was never understood. Now you understand how the fundamental particles, what we call neutrons are created, you can do it yourself in a laboratory if you understand how to do it. So how we convert a ray into a particle is to allow it to come to ?? parallel in interaction with others fields, (2:36). that it turns on itself, or the interaction of 2 fields, in balancing of M fields creates the dynamism and become the first fundamental particles known as neutrons. .. We never knew this and at the time when I wrote the book it was impossible to explain, I would have been crucified. Now after 10 years people can understand MG fields. If you create ?/ balls where you have 2 or 3 dynamic balls, I was trying to teach this to Arman last night and he wrote me just a few minutes ago, it doesn't work. It works, but you have to understand that this is ... he said that's no good. It's perfect and it works, because if you create with 1 field a fundamental plasma, fundamental single ray, that it hits into the dimension of your SF, you can start creating life, start creating matter ?? This is very much like when you go for camping and you need fire and you have nothing else, you have to create fire from 2 pieces of wood, you have to create enough dynamic energy that it gathers enough what you call friction, M fields that it starts. So now a days we become better fire makers then in the

past time. You get 2 dynamic reactors that their fields in balance can block a M field which comes to it, you create the first atomic structure or neutron, and if you get your fields in the right direction you can create whatever you need. (2:38).

283rd Knowledge Seekers Workshop - Thursday, July 4, 2019

(Global company setup in the US, Food security first priority, Clause in the 5 + 1 Treaty between US and Iran, The FOOD we eat is actually a trap to receive the 80% of he energy from the space of the environment, This changes our whole understanding of the body and life on this planet, The new invention to see magnetic fields of the atom confirms the Gans as a plasma and to measure the field strength, Each atom is unique and carries a fingerprint of its origin, The importance of SALT in body, ,)

(:10). Since the past 2 weeks the global company was setup in the US we are not asked to prove the T, we are told now that, we want to invest, to be a part of it, where and how much and what can we put in it. The breakthrough is that now it is time for the change, understanding the totality. ... The amount of the financing has broken the whole condition and the questioning. Our partners are not private but are part of the national structure, nothing happens unless it has been approved by. In this way the trust is building up international. It will be another 6 months before we are put in the right position. Then we'll see rapid developments around the world as we are planning now.
(:14). ...
In the next few days the American operation will kick off. .. .
.. Most of the energy of the KF will be to bring national food securities ...
(:16).

(:22).
.. To the Iranians, there is a clause in the contract in case someone like Trump came to power, we ask them to stop enriching ... (:24). ... we do not need it, to create aggravation. The ?? producing more materials, I have discussed with you in the past few days, that process has to be triggered, you are fully aware of it. Please contact your diplomats who carry the information .. we knew this might happen one day.

(:26).

(:28). ... We go back to our teaching. .. We see gaps in the knowledge or gaps in the linking the information. This means that a lot of you have not grasped the idea, the understanding of teaching or you have missed it, because you are not nuclear physicists or chemists or biologists, and you can't follow the link of science, but when we explain you'll see it very clearly. I would like to start with what I call the food, if you look at the body I always explained that the man doesn't need to eat and what he eats is a small part of what he needs. (:30). This means. We have the body of the man. In the process of our eating what we do in the world of science, we have not understood one part of the work. This part is, I said we take 80% of our energy from outside and 20% from what we eat. In another part of the teaching we explained, but you must have forgotten, we explained why we receive the 80%. We always said, the stronger plasma feeds the weaker Pl. What you see as the body is weaker Pl. Now that we understand that the body is not in the matter state but in the Gans state, then you understand how we are getting fed. At the same time now we understand that the STM is within the structure (:32). of the man, it should not be very difficult to find out how we can feed the STM and how it gets fed

through its strength through the universal dimensions of energies. Then why, and how do we eat, what is the function of eating? We say we eat this and that and it gets absorbed in the stomach and it becomes part of the body. If you understood the plasma science in totality you'll understand that the body when you eat the food it transfers to Gans's, to energy packs. This should have given mankind a new understanding. Do you remember that you put the stronger to the weaker and you feed from it. Now every time you eat part of the function of it is to create plasma condition in the body, which allows it to takes what it needs from the environment of the space for its physical condition.

(:33:25). .. audio lost ... (:36:55). ...
In this process now we understand that the plasma transfer comes through what we eat, the body transfers the material that we digest into a Gans state. In that process as it becomes a Gans state, it becomes a weaker state of the Gans so in the process of itself it creates a weak condition so that it absorbs energy from the environment. Now you understand why 80% of the food (energy) comes from the outside and 20% is what the material has delivered to create a condition that the energy can be pulled from the environment. This is why we see the aura of the body of the man because the energy transfer of itself what is converted creates a new condition for what is absorbed. If understood fully will explain why we run into diseases, (:38). old age, why at certain positions and strengths our body malfunctions. If this is understood will change the whole game of the feeding and of medicine, because now we manage to understand and we do not need to feed the body, we only need to what we call, place a weak energy inside the body that in positioning of itself, it leads to absorption of new energies from the environment of its atmosphere , so in this process if you understand the eating of the food is actually creating a weak position inside the body, with a constant cover of what it has, as it is weaker it absorbs more energy from the environment, so the whole process of mankind connecting his eating to his food and his life takes a different understanding from now on. Then you'll understand in the due coarse when we change the solid food or whatever food man takes, into the Gans state of the matter itself, then as you take the packages of the Gans's, depending on the weakness you create, you decide what you absorb from the environment of the space. This changes the whole game of feeding. (:40). This changes the whole national food security of the nations. We do not need to go and buy an apple, we need to create a condition of the apple, of what it carries into the stomach of the body of the man. In that condition it absorbs what it needs from the environment, it depends, as the knowledge develops, we have to understand what is the strength of which apple creates and absorbs what energy. Now after years you can fully understand why this 80% of the energy we always said comes from the environment. The whole U Community, the whole work of what we call the universe is on this basis, but man up to now has never understood. When it comes to the time of disaster or deep space travel we do not even need to put the matter or the Gans of the matter in the body, we just need to deliver the energy of the matter, what it needs to be absorbed from the environment of the space. This is how man will be feed, even through the dimension of the strength fo the soul that through it, it will feed the body in his collective interaction. Now many of you should be able to develop technologies that it allows man to exist in the space independent of any food resources. This is what will be delivered through the new space T, creation of the environment to deliver, (:42). not creation of the matter to

kill for. These technologies are the backbone for mankind to be able to enter the universal direction of the life where you do not need to kill but in a very simple way you can enter an arena, room, cabinet where the energy delivered gives you what you need and takes from you what you don't need. The introduction of the new systems are in progress in the coming time we'll show you the systems where you can enter a room and take what you need, balance your system in a way, walk away from cancer and walk in with what it needs. Is there a need for ?? beta collection per person? Not really because there is another system which has already been developed by KF and all of you know it, but because you don't understand the implication of it you have never followed the process. In this process the man enters ... from now on in the dimension of space T or disaster we do not need to worry about how we can reach people, feed and secure health. (:44). These are the major breakthroughs of what we have and it will go through the Chinese structure in the research centers. In this process for the first time we make man independent of the planet altogether because we understand the operation of hte body to its own structure. We always said that an atom is a Pl and has got a magnetic field and the same with a Gans, in the past 72 hours scientists in the world have confirmed and shown fro the first time a magnetic field of an atom. In due coarse we'll take it further and then you can see the difference between the magnetic field strength of an atom and a Gans. At the same time the scientists have proven that each atom has a fingerprint of its own so we can say if this atom is from Fe, Cu, Zn, or H. The development in technology opens in South Korea a new dimension confirming the correction of the KF technology as being a Pl and creating an interaction in a M fields in its environment. This is a major confirmation of the T. We have already tried to get in touch with the scientist who developed it and now we can actually measure M fields of 1 Gans and compare it to an atom and see what is the dimension difference. We can take it further because now the T has become available for the first time to confirm the strength of a single atom. I am sure in due coarse the scientists will create a much stronger mini-MRI, (:46). that they can even show the strength of a Pl of an electron. What we started to develop the existence of a Pl and the creation of its own field, now it has been proven. .. .. Rick shows a copy of the paper. This confirms what we said that an atom is a Pl because it has the same as earth it creates its own M (field) and light around it and for the first time we can see it as a single atom and we are trying to get a Gans tested because then we can confirm that each Gans has a strength and then we can show how energy is transferred. ... where you see the yellow lines is the balance M fields. ... (:48). ...
The scientists can speak about the direction of the spin and everything else which is available.

(:50).
... By eating food we put the markers up, this is what we need from the space. We show a little of it and the universe brings the rest of it. (:52). In that process many of us can start a new cycle in the operation of the body. It changes a lot of things for a lot of us in totally understanding the physiology of the body, with this new knowledge we can change a lot of things, a totality of the world and life for the man on this planet. If we take the knowledge a step further then there is a need to fill in some gaps in the knowledge and correcting some of the knowledge which has been gathered by now. We have to reconsider a number of teachings bring them together and understand what has been

happening in our digestion system, what we calculated, what we assumed doesn't apply anymore. ... The operation of the body runs in 3 scales or 3 levels at the same time. (:54). We have a scale of the energy, you need an intermediary which allows the energy which is needed to be connected to the construction of the physicality. The STM operates somewhere in this region (near the energy), the physicality operates in this region. You need to bring the balance between these two. You need to understand what is the connection between these two then you come to understand one thing, Salt (as the intermediary), ... (break in audio)

(:56). 25 ..
So what you'll understand in the operation of the body is a very simple thing that why salts are the main component of the body, without the salt there is no life, because the salts are the connection between what you call ... The salts sit on this side, the what we call radiation sits on this side, the metals which the body is made of sit in the center, then in that process you understand clearly what the salts do. .. Let's look at Na, K, Mg, Ca ... then look at the radiations on each level. (:58). Rick brings up Periodic Table with both numbers. ... In this process you'll see quickly how part of the knowledge which was taught before and never understood, now you'll understand. The salts play a double game and an energy game. This means that if you look at the structure of the salts. ... (1:00). In this process you'll se something very strange and people never understood why we have salts and why we depend on salts for the full structure and the salinity of the structure. ... Let's look at Na, and then K, 23 / 23 with 39 / 40, you can see , 62. (1:02). You end up with Zn or Cu. Now you understand why we need the salts. If you look at Na and Cl 35 / 22 57; the play mimics, because now we understand in hte body it's not the matter state anymore but a Gans state. ... the salts in different combinations of their work mimic the metal, an element which makes the construction of the physicality. In that process if you work backwards in the same system, in interaction between the salts themselves you'll find a very simple thing, where you have let's NaCl and MgCl both part of the salts of the body you get interactions in between the two so you have 24 - 22, or 23 - 24, then you are left with H. So the body in interaction of the salts with the dimension of the physicality plays both, mimicking the metal (1:04). to get what they are connected to, and in interaction release the energy which the body needs to live. Then you understand how salinity brings different dimension of life and connection between the dimension of physicality and the dimension with the life of the man in the totality of the understanding of the science. Those of you who can go deeper into this, understand in its fundamental structure, the work of the salts, the energy balance in MG fields, then you come to understand full fundamental operation needed for life of the man in the space, why life depends on salt, because its the connection between the energy of the man and with physicality, but as an intermediary, in different salinity, different dilution, and different interaction allows the creation and inter-connection of the cells of the body together. Then when you look at the lymph as a liquid, then you understand how it leads to the separation of the organs because it's neutral, whatever is .. that's a kidney. In the liquid of the lymph of the body stays separate, because I am balanced with what it is, if you are weaker I can give, if stronger I can take from you. In the same process it's the energy giver, (1:06). and at the same time it can nourish the elements of the body. Then if you can take the understanding a step further, you see the strangest part is that you sit, step by

step on every level next to a radioactive material, which from it you can then take energy and from it, it can give energy. If you look Ne, Ar, through centralization (? scintillation) through the vacuum in the body will give you everything you need. Now you can understand how the body of the man comes to operate in the dimension of the physicality. Those of you who get involved in the dimension of the physicality , and the totality of the physicality of the man , you'll understand that there can't be life on this planet without salt. those of you involved in agriculture. (1:08). ...
... break in ... In this process we understand ... half of the total understanding of the U in creating physicality should be very clear to man. ...
How by having access to the STM you can create the physicality, and what conditions you need to create around the STM to lead to creation of the physicality. . (1:10).
Then we can understand how we can use the energy of the STM to manifest the physicality of the man in any dimension. If we come to understand how the lymph works which is the absorber of the energy from the U, it's a dilution source, it's not just that it transfers energy from the food to the stomach to the cells, and what is not needed from the cells back to the intestines, then we understand a lot of things, even about the structure of the physicality. How does our digestion system convert energy, accepts energy, how do we that ... why part of our body in one place gives energy but in another place absorbs energy. If you look in the structure of the intestines .. ... we find out something very strange, it's part of the medical teaching. (1:12). If you go to the medical teaching you'll understand a lot more how this plays (works). You have the head, lungs, you have what we call the intestine (? means stomach), you have the large intestine (? small), and you have the rest of the discharge system (rectum). Then you understand in this point we give (first circle St), and this point we absorb (second circle, intestines), we give to the lymph. If we look into the structure of the small intestine and then the larger intestine we'll observe something very interesting. Here we give Gans's (? St), most of the energy is lost because outside of the body of hte man uses so the energy brought from both sides being weaker and being intermediary, the way the doctors work with putting a stronger Patch on this side and a weaker one on the other side, and whatever is in between absorbs, now the food is the weaker and the universal energy is the stronger, so energy is absorbed into the lymph. In a way the food we eat is a trap to extract energy from the universe. Then comes the other operation, it's the same, but totally opposite. What does this mean, if you look at the size of the intestine, (1:14). by creating of the mass of a higher order, it plays totally different, now here it plays weaker that what is in the lymph tries to feed it, and this is how what is not needed, which is weaker, is then absorbed and extracted (by the intestine as feces). If you look, if man gets educated in the time to come what you'll see as excrement of the man will carry a lot of energies and dimensions of universal energy, because we never ate it, but we absorbed it and it becomes as part of it. Here (stomach ?) we use the weaker energy to absorb, here (intestine) we use different salinity but weaker energy to feed back, compared to what has been used and can't be extracted. You'll understand this more when you are involved in the nutrition. For example, why does the body carry the smell, the odor of the food we eat, with this understanding it should be very easy. ... even you'll understand why the lungs work the way they do, what salinity of salt it needs to convert the energy. (1:16).
Then comes the key, how does the STM receives all it needs from its universe but in giving back it leads to creation of the physicality of the man in interaction with M field

forces of the planet. But you have to remember that when the man leaves this planet his connection as it was due to, and never breaks up, can keep the dimension of the physical appearance of the body if it feels so, unless he creates a system where he can create a diversion and a break at the level that the physicality changes position in respect to the interaction with the dimension of the fields of the planet earth. If you can manage to create a filter that separates the field of the earth from the physical dimension of the STM now the man will create itself to a new dimension and physicality. This is how the man in the space will take shape of his new environment. If in the spaceships that we develop we can create a dynamic condition of the same we do not need to carry the physicality. Separation of the soul from the physicality due to its environmental manifestation. It's very much like the H, the water in suspension in the air until we create a cold condition we won't see the water as mist on the mirror. (1:18). The separation is the energy M field in conjunction and interaction with field strength of the water itself and if you can add some salt into it you will see white marks on the wall leading to confirming of the manifestation of the physical part. Now maybe you understand how simple life is and can repeat itself in any dimension in the U. It is absolutely clear that you understand how to feed the man, to feed the STM, and then understand how the STM itself in a dimension in the structure uses multi layers of itself to absorb, and uses multi layers of itself to release energy that it leads to physicality, confirmation of its own existence. This is a very simple understanding. If you remember we always featured it this way draws a spiral with both M and G, (at the outer edge) H, but what level of H, in confirmation and interaction with which salt, there are many Hydrogen's, depending on the salinity, (1:20). and the salt, because the position of H doesn't change in the strength of the Pl, the condition of the environment and salinity changes. Then it comes to a very simple understanding, does the MG field in the Pl of the creation have and creates different salinity for manifestation of different energies and physicality's, and the answer is yes. Then man understands how he can maintain physicality anywhere in the U in respect to the position of the interaction of the fields of his own environment and nothing else. This is applicable to every dimension in the U. If mankind understands this then he'll understand a simple matter, here he'll have 20 arms and legs, and here he'll have no arms and legs but a light, and here he needs 2 arms as the strength will allow it to float as it needs to. If you understand this then you'll understand how the birds, the fish, and the man are created on this planet. The totality of the knowledge is understanding the interaction of the fields of the U. (1:22). In micro or in macro, in the body of the man or in the solar system or galaxy it's all the same. When the man becomes educated enough he'll understand and start looking to what we call the "salt of the galaxies", and salt of the universe where it's the connection between the energy of existence and confirmation of manifestation of physicality to the eye of the observer to the dimension of detection of the observer. This solves for a lot of you who could not understand how you can interact, how you can change life or illnesses, none of you with the full understanding of the salts and salinity and the degree of salinity, can't be fully in control of the feeding of the man, the health, of the shelter, because if you understand it you can create all with the dimension of the salinity, in a very simple way if you create the dimension of salinity that creates interaction of the fields beyond the body, you have created the shelter for the man. This is how simple it is. (1:24). If we take this a step further, those of you who understand how to lead to the creation of life, you should have by now understood what you have been missing in the structure. If you

understand the process of the salts, salinity, the mixture of salts which leads to the creation in the mixture of understanding of the creations of the energies, reactions of energies, interaction of the fields of the energies with the salt and the ?? of the matter plasma, then you can understand how simply life can be controlled anywhere in the U. Those who understand they never die in the U their life is everlasting. We fill in the gaps and try to make it much easier for those of you who understand to be able to complete the cycle. For those of you who take it even a step further you can understand how the system works. Then you can control anything in any dimension in the world of creation. Would you like me to give you energy for one cell, (1:26). or to light up the whole city. If you understand this process and take it a step further you'll see, as we see the new structure of what I call physical life and what we see that has been created, it takes us not long to release energy systems that you can create light and life ... Now you understand how we can produce energies beyond imagination and this is why the energy system which I built runs out of control because it's like the body of the man it keeps on adding more and more energy from the environment of the U. Those of you who had problems about why we couldn't deliver the energy system, this is our problem, we can't control the stomach of the system, it becomes so weak then the strength of weakness it absorbs so much that it escalates to more and more and more. But on other hand if I release the energy, on the standing of the T, I am sure that nobody can sell 11 million barrels of oil, and boycott the other. (1:28). Now you understand how simple the whole process is. Those of you who understand especially people like Alex and Armand who understood that in the next level of understanding, those in the medical side like Dr. Rodriguez, and those in material production understand how easy we need to attract, anything we like. Then foe example what I was explaining in the private teachings, why we have the African continent, Atlantic Ocean, and South America, and we transfer life from the African central deserts, we feed everything right across, because the dust of Africa carries the Fe and metal mixtures needed in interaction with the proteins of the oceans of Atlantic, becomes life and billions of tons of it falling over Amazon creates new life in Amazon, without the Sahara there would be no life in Amazon. And then we see the carrying on of the process. If you look at where they were showing where the plastic oceans sit, you will find out that all the plastic oceans that we are seeing, (1:30). are connected to the protein level where the materials of the protein are connected which is a COHN bond to the CH bond of the plastics. Now we understand why we have all these plastic islands and why they are appearing in different places because these are where the AA proteins, what you call the planktons start creating, because in the North, in the Pacific you get the Na, salt and metals from the Canadian North and from North China sea, the metals which they come and they create the same thing, if you don't understand it. It's your (Box) Cu (plate) and Nano coated material, and then you put a bit of Fe inside and it gives you the hemoglobin and life starts in interaction with the protein. Then you can understand how simple life is, if you understand the totality of the knowledge of the science of the plasma in its true essence in the world of creation. Do you remember when you created the condition of C creation in a CO2 Box, now the AA's which lead to the creation of life calls in the energy source, because of the same origin, because don't forget that the plastic which you used is the C which came from the absorption of the C which originally came from the oceans (crude oil). So now this C of the AA which creates life, (1:32). is connected to the C which makes the plastic in the region of the

production. We see the same life if we look, the Amazons are much greener then before because there is a slight difference in the process but there is no plastic. In the same understanding, now we solve many problems in one teaching of the man. What he has created as a menace for himself, and what is actually the same process leads to creation of itself. Because these AA's which created the oil and the gas themselves came from the same thing as what made the plastic. Birds with birds, camels with camels. Now you understand that half of the man's problem which you call plastic and now we see it in the ocean and how it has come to be created. This brings another understanding that life is the same in every dimensions of the creation, where does all this sand come from that it can continually feed every year billions of tons of it, across (the oceans). Why doesn't it finish? Because it goes back to understanding of the stomach of the man absorbing the energy and the conversion of the physicality of the man, the center of the planet in conjunction with all the dimensions of the field flow, (1:34). creates a condition that itself absorbs energies that in conversion they become the sand of the desert. If you understand the totality, life is a cycle, it comes from and goes back to. If the MG field of the Sahara sand wasn't there you would not get any (?more). So the billions of tons which comes from the sky as an energy packing conversion into elements of what we call matter, then in feeding it completes the cycle and it leads to everything else we see. Creation is a closed circuit cycle of life in a cabinet. What you put into it, you get (from) it, but at the same time it interacts with everything else to give you different flavors. If you put jam into it you can't take pickles out of it. But you can put jam and pickles in and you might have the taste of both together, but it depends on what effect and emotion it will give you. What in effect the emotion will give you in the dimension of the matter state make. This is the beauty of the knowledge of the creation, if the man understands the totality. (1:36). But if you understand further you can lead to the creation of life, dynamic life, space motion, creation of the dimension of the field flow, everything else comes through this. Then it comes to understanding how you separate the STM from the dimension of physicality and how do you feed the STM. Then it comes to one fact again that very simple, in the stomach we created the condition of the weaker that through the physicality it absorbs energy from the U and in the process what is needed in between absorbs. Now the biggest dilemma for the man and his creation is how weak is the STM that his weakness interacts and attracts energies from the U that it can feed such a beautiful center of energy, and how in feeding to a weaker condition in position of interaction leads to the creation of physicality too. Man looks to create and feed the soul with the more powerful energies, where in fact, the STM operates on the weakest condition, that's why he can absorb from the U what he needs in totality then interact, (1:38). as it goes to the desert we saw it creating sand, leads to creation of the kidney and liver in different condition of the ??

(1:42).

(1:50).

(2:00).

(2:12). ... Any questions.

(2:26).
(2:30). (Mr. K takes break) ... What happens at the same time ... the Periodic Table should have been written in a way, starting with this category, next to each other in packages. The way the Periodic Table is written is the cause of the problem. (2:32).

(2:42).
(2:44).
(2:46).

(2:54).

(3:00).

(3:06).

.. It's the same with the soul, if you understood how to work with the STM you don't need to work with the physicality, the soul does its job and the physicality follows. (3:10). You take less medicine. You didn't do anything you just created for the soul to absorb energy that in that point of interaction it delivers what it's supposed to. But we cover it under everything else for man to cover because they don't understand yet. Any other question. Caroline. Q: It's very hard to convert it into English. As you are on the section of the brain, (3:12). when you have a brain hemorrhage or migraine or cluster pains in the head, how can you reposition those, because a lot of people are complaining of those kind of conditions? The brain is the connection between the physicality and the STM and when you don't sort our in the physical part it kicks you in the emotional part, which is the brain. You have to understand what is not sorted and how it's not sorted in the dimension of the physicality. Many migraines come from the false or lack of operation of the kidney because it doesn't dispose of what it's supposed to do and it creates a backlog, and in that backlog, don't forget kidneys have 2 functions. They all say the position of the kidney is to clear the blood, but in fact it clears the emotional part. But the kidney where it is, it absorbs and cleans up the lymph, what the physicality doesn't need too. It's not just what the blood brings, it absorbs energy as much as it gives to outside. It's the same as the body of the man. When you can't understand that there is a problem somewhere in the digestive system, physicality, so most of the time it blocks this one (kidneys), (3:14). and this one sends information (to brain) (? blockage) I have a problem. Migraine is generally connected in that way. There is something wrong in the digestion of emotion and in the digestion of physicality. 17

284th Knowledge Seekers Workshop - Thursday, July 11, 2019

(The teachings are now going towards the soul of the man connecting with the Creator to become part of the Creator, The soul carries the totality of the knowledge of the creation, The hemoglobin created from CH3 is pure and can be used to contain a creation of the soul of the man and a physicality, "I can create anybody I want", The salts are the ?? energy of the soul, , Holding the breath to feed the soul with universal energy and release it, ,)

(:19). We might have a lot of problems with internet .. (:22). In the process of understanding the T we have endeavored in many ways to extend our knowledge beyond what we ever thought was possible that we could understand, we endeavored to understand more then we thought capable to understand, and in that process many of us gotten enlightened. We came to understand more capacities of ourselves in every aspects, we can understand the work of our soul, of our physical dimension, the totality of to the limit of our comprehension of the extent of our life. For the first time mankind has been given a choice that he can develop to live in any dimension. This is what we were not aware of and this is what we try to extend the knowledge into, that we are capable and have the potential and we are worthy of understanding the totality. And to the extent that we can understand we structure our knowledge according to what we have been taught up to now, 'I know mathematics and I know how to calculate, I am a doctor and I don't know about physics,' and we pigeon holed ourselves, (:24). according to the knowledge we pretended to know. Now with the understanding of this T the pigeon hole has gone, there is only one hole and that is the knowledge of plasma, of creation. Now we see that we are capable of everything, we can make some energy and if tomorrow my child is sick I use the same thing to get rid of his headache, later when I plant a tree I put some Gans in it, etc... Suddenly we have become a master of knowledge. We don't need to go to a pharmacy or an agriculture shop to buy a fertilizer. We are gathering knowledge and this is the first stage of it that gradually most of you K Seekers are becoming masters because you have taken the limitation off your understanding. ... Now you don't need anybody to tell you what you don't understand because you're not a doctor, chemist or farmer. You are everything and this is what the man has to be in the space. This is the whole target of all these teachings. As I said from the beginning of time, 'The last man standing', you decide your life in the depth of space. If you take your knowledge to another level it comes to the point in the maturity of time and knowledge and space, (:26). that even I decide how to manifest myself and this is the beauty of the new knowledge. Not only when you appear in the dimension of physicality in that dimension, because the

knowledge you carry through your soul decides how you are going to dress yourself, how to present yourself. Now for the first time man doesn't need clothing to wear to present, manifest in any dimension in the U because he decides through the knowledge of the soul what is appropriate and how he wants. This is a major break away from all the knowledge we have up to now. Up to now if we want to go to a party we go and buy a party dress, etc.. Now we change position from one galaxy to another, from one space to another, we decide in that space how we are going to present ourselves. We have become the controller, producer, manufacturer of the ?? of our physicality. This is where these teachings are going. A lot of you have listened to me many times and I have referred to what we call the messiah, we are all Messiahs, we all have found the answer to our souls and our physicality but there is one line of the teaching which many of you will understand in (:28). due time, and that is, what is the purpose of all these teachings when now we know there is a Creator and we have a soul and somehow we have to make a link between the two and this is why we are here. We said we are the messengers of the STM. The link between the Creator and the STM and all these teachings are to guide mankind to his soul to become part of the Creator, and not for him to make electricity or Gans or whatever. We live because now we have decided for our soul to manifest upon this planet and there is an old saying if you don't want to be embarrassed be like the others are. .... When you come to this point you understand the whole purpose of our teaching in the past years and in bringing so many messengers has been to teach man and to bring us to the final position that we are here to take the STM to meet the soul of the Creator, and that is all it is. You call it in Christianity, (:30). 'In the name of the Father, Son and Holy Spirit,' we are the Holy Spirit, the connection between the two. The messengers of the physicality have completed their jobs. Now that we teach and we understand the soul, we can't teach the soul because the soul understands totality, about don't do this, there is a punishment there, no, it's just showing to the soul, the path to the Creator and that is being part of the soul of the Creator, in reaching the hand out to call to guide the soul of the child home, then you can exist in any dimension in the creation in the world of existence. In so many ways the job is compete if man understands how to reach to access to become part of the soul of hte Creator. I have done my job, I have shown the path. We'll still teach everything else because so many have to be guided home, and in the same way as you become part of home then it is where you entertain guests and friends, to look after those who started the process for mankind millions of years ago, until he reaches the point of maturity of understanding the totality today. (:32). We'll still teach more for you to understand more, we'll still go more in depth in teaching and how you can do things to make your physical life comfortable, but in reality gradually as we progress in the coming weeks, we'll show you the path to home. Last year I started teaching about the soul, we have had a year of teaching, of you trying to understand the soul, now we enter why we have shown you why this machine works. Now you have to put it to the test, take it home. There is only one driver for this car and that is you. The STM carries the totality of hte knowledge of the Creator, not part of it. When mankind becomes kind to himself he'll understand the purpose of all the teachings. This is why we always taught you about the Messiah, you are the Messiah of your own soul. You have to understand the totality of the work of your own soul, nothing else, that is the only thing that you have to do, and now that you have understood, it's our job to show you home. It's not that I have come to take you to see with your soul planet Zeus, or another galaxy.

(:34). When you become part of the Creator you are in every dimension of His creation. This is the job, this is why we become Messengers of the STM and not of the physicality even though we had to come in one way or another to get your attention. It was the only way we could keep the children of man entertained that they could learn. As I always said in my teachings, physics has to be fun, and that was making Gans's, space reactors, MaGrav Units, keeping them entertained and little by little teaching about the soul. You always believed in Father Christmas, and then you mature and say, there is no F Christmas, it's me, it's Papa he brings it and said it was F Christmas. Now we have come to that point that man has to mature to understand the job, the purpose of all teaching is to bring the STM to the soul of his Creator and through understanding of that to become part of, that in that process he becomes another creator and this is more or less part of the cycle complete and as you know I never show all of my hand, it's the easiest way. Mankind is so immature that he is happy with a little bit to play with, 'as long as I am busy it's okay with me.' (:36). Progressive understanding of the STM but you have to remember that whatever man has learned in his time is part of this planet and part of the U, he will carry that with his soul to become the knowledge of the Creator, ??? The STM at the point of maturity which is now takes everything he has seen in the process of getting to this point from the point of separation from the soul of the Creator to the point of going back to, is just like reporting back and putting more knowledge in the library of the Creator, that is there to be, to understand, for those in the future in the process of creation can use and be shared with. This is our job, we are not messiahs, not the Methi, they have done their job, they have been and are gone, the return of Christ was completed long time ago. We are here to take the STM to the ultimate point of becoming, the unification with the soul of hte Creator, and that is my job and there is no name for us in the vocabulary of the man. You were looking to call Methi, or return of Christ, it's all past, go back, look 200 years ago (Bahai). We assumed the man has matured by now, is ready to leave the understanding of the physicality and understand the connection and the path to, what we call, (:38). understanding that is part of the totality in the dimension of the Creator and it's not something on ??? its own. If you understand this now you understand why I repeat that we are all messiahs and the rest of it, because you have matured to the point of the maturity of the physicality. Now we have matured in one term the STM, and it is to a man to connect the two together. He has a bigger job he has to move from the dimension of the physicality to the dimension of his soul and understand his soul path to his Creator who lead to his creation, and that's what we are, we are the path, we are the torch bearers keeping light that the STM can find his way home. This is what goes back to the beginning of the teachings, we are called Universal Messengers. We understanding the totality of the creation and if you look in my teachings I have shown you everything, any subject we go in depth, we can put it in the library of the knowledge of the U in the dimension of physicality. What man knows about the knowledge of physicality is so simple, you haven't even understood the level of the work of higher physicality, but man has that talent, a gift that he can jump that barrier and then with it decide. (:40). In the teachings in the past few weeks I gave a lot of hints to this point of today that we wash our hands of being a child and maturing into the soul. This what we teach today it will take you hundreds of years to understand the totality of the time of the man. And maybe in one instance you'll all mature. It's just if the STM reaches to the point of maturity. We start teaching about the path to the Creator for the STM to

find its way. We have done it in a very slow pace because there are a lot of things left in the dimension of physicality in the cooperation of the STM, how to handle it, that we can come to the other ?? ones. How you don't let the STM to disintegrate because if it's not understood, it will loose its path, its physicality and in a way the containment of itself. Man should have understood how his soul breaks up, open, and how it reaches separation in dimension of physicality. You have not understood fully the operation of the motion of hte fields, because when it comes to the dimension of understanding the path to the Creator through the STM, now that we start guiding you have to understand what are the limitations, and how do you break free from the dimension of physicality. (:42). How do you allow yourself to mature, how do you free yourself from the shackles of physicality, how do you repair the physical condition. The time of medicine, herbs, and operations is over if you understand the dimension of the STM. In the coming weeks you'll see systems which feed only, repairs only the physicality through the dimension of the soul. We have reached that point that it can be done. When we do this then what is the expectation of the man from being here, expectation in the dimension of physicality. When I stood in front of the machine yesterday, I said the man has a spaceship, has a machine for elevating his soul and a system to repair his physicality, all in one system. When you see and understand the T then you'll see that the system becomes part of you that it becomes part of the containment of the STM and then through it becomes the freedom of the STM (:44). then in the dimension of the soul of the Creator. Many of you haven't even understood how you loose your life in the physical dimension. How the Gans's in a given temperature condition connects to containment of the STM. ... you now understand and I have to explain (to the others). It's very simple thing. In a physical dimension we get a temperature, the doctors tell us that if you pass 42.5 - 43 maybe 44, that you'll have permanent brain damage. It means your brain cells will somehow malfunction. And we see the physical damage to the brain, what has this meant to the man up to now? We didn't know it was just a brain cell, but now we know that, that brain cell is made from the plasma of Mr. COHN and its connection to the other materials, whatever we might call them, Mg, Co, i, but why does a temperature of 43 - 44 creates that separation? That shock, you can go into anything else and the cell disappears or gets dissolved or whatever name you put to it. (:46).

.. You learned through the Gans Boxes and AA how to make blood. This blood doesn't coagulate, it stays in a Gans condition because it has not reached the condition of the emotion. (:58). Blood only coagulates when it has reached the condition of emotion. 'I don't want to accept this so I close everything down, I have too much heart pain, I coagulate where energy comes to the brain, I don't want the brain to see so much pain.' You get vascular blood vessels on the side of the head to block the brain. If the doctors understood this then they would understand why when we tested the blood, it fits everyone, because it doesn't carry emotion when it enters and inhabits the body then it carries its emotion and then it can create all its conditions of existence. If you understood this and many of you managed to create a circulation of this hemoglobin (Gans box) and you could maintain it and you could create a condition of the STM, you will lead to the creation of the physicality of the man on this planet. I can create anybody I like. The process of physical creation is not hte way man has thought, a big mystery. We have

given you all the tools of it, to test it and understand, (1:00). that one can create a soul and create the circulation of the containment of the soul09

(1:06).

(1:16). ...
(1:18).

.. As you have the salt to open the cells of an atom into a Gans and to confirm its existence in the dimension of energy then that salt is the soul of the Creator in the dimension of the ?? STM. (1:22). If you understood this it's very simple to find the path to the Creator. It will take you some thousand years to unravel the last ?? ten minutes. Any questions.
We have no answer to the ones who want to know how to make the Gans of the soul and the Gans of the soul of the Creator. Q: What is the difference between low self-esteem and humility, or a slave and a servant? A servant is what it does to please, maybe with the expectation of getting something, the slave is when you have to give without your permission. (1:24). That is the habit of man. You serve and with it don't expect, with the slavery you are forced to serve with the expectation that you are below the one who has forced you to serve. We don't see any slavery anywhere in the U except in the brace of the man. If there was we would have seen a lot of you on the chain and shackles somewhere in the U. Man is so feeble and so below the understanding of the level of the universal community, and those who ?? would have taken the whole mankind into slavery all over the U. ... we have never seen any of our children snatched and not brought back. There is no slavery in the U except on this planet. We serve out of the pleasure of allowing another to be higher then you and it's the pleasure that I have been there to be part of it. The sooner we learn this, the sooner man will ?? (1:26). Any other question. I have taught you a lot today, this is the mystery the mankind has been waiting for his whole life of this planet, but which one is wise to understand, it depends on the maturity of your soul. 36

Q:

... the salts are the connector between the plasma of the energy and the matter state of the plasma. (1:30). Up to now we always looked at the acids for the energy we never looked at the puller, what holds it together has the energy and as you see you get to the point in the world of physics that if you have such a strong M somehow it becomes G to feed. This is what we have to understand. In a way you become so acidic at the verge of becoming so acidic, that you become alkaline, there is no line of cut, it's the line of what you fit when you reach a strength that it is a strong or weak enough that it fits, something, of another fields, that it allows you to be part of. We always never understand until we explain that in the world of physics they always looked for where is the point of change that fields change from G to M, until in the books and teachings, is literally if you look at it is to the eye of the beholder, if you look at it from that way it is coming to you, but if you look at from the other way it is going away from you, it's G getting pulled

somewhere. If you go by the same principle at this point you are acidic, and here you become alkaline. (1:32).

(1:38). Q: I am wondering if you have a memory of a previous planet where you came from, or do we come from the soul space and those kind of memories get erased from the soul's perspective? Nothing is erased. We don't teach this way if we haven't been to other schools and saw how the other students have misbehaved, we know how to tame the man. We are well trained and you can't train if you don't have experience of. The planet Zeus is the best ?? disguise. Any other questions. Q: Should we be preoccupied by those who want to create the STM, or woman, or the Creator, by that she means those who are abusing the knowledge for their wills? Oh, they can never abuse it, we give you a toy to play with we already have control of it until you understand it. It's just a toy to keep you busy, we keep man busy with work and factories on earth we keep the soul's busy with something else. (1:40). Q: Our God has a Creator? Do you mean God of Gods? Q: Maybe does a Creator have a Creator? You haven't understood have you? I made man in the image of Myself, why do I need to have a Creator? Any other question. Should we call it a day. Today's teaching will take man a thousand years to understand. It's the first time we have shown you the path to the Creator. Then how you understand it ??? you want to see if you can do it, create another soul ?? to see if you can do it then you'll call yourself creator and God, then as we have seen ?? they learn how to make the MaGrav or whatever and then they became the teacher of Mr. Keshe. They taught everything and we copied them. (1:42). There is a guy on the Internet, it puzzles me, anything on the Internet he says this is mine and they copied me. ... I think his name is Justin Smith, everything created is his. ... I think it's just in the brain that it just doesn't understand it. Whatever you learn belongs to everyone and not just you and if someone does it you have to be proud that my knowledge has been shared and not crying that he stole it. I am sure many of you will try it, but remember when you try to create a soul and a man, he is 3 dimensional. A single pipe and ??? ?? and then what you have to understand can you handle what you have created. Imagine that what you create is as bad as you or worst then you, will it become a master and you a slave to it. (1:44). Creating and having confidence in what you have created it needs a lot of understanding, a lot, a lot of comprehension of the total work of the U. I don't forget and I don't forgive, just pretend that I have forgiven. Any other question. Q: Hassan had a dream where he saw me in the dream and showed me this, you said in the 272 KS Workshop after 1 H, 1 minute 45 sec mark, if I change my breathing would I change my heartbeat that it tunes to my soul that I can achieve that dimension, then Mr. K you breath in a special way to me after this sentence ... of awareness and become part of the U Community or do I chase in the path of killing that I can never achieve that? My question is, (1:46). are you giving us hints sometimes on how to breath to be able to free the bird from the cage? Love you all from Senegal. We you love, some of the most beautiful countries on the planet I had the pleasure of living and working there for some time. In so many ways, do we slave our souls or are we a slave of our soul, or is there a point of compromise? Do we create that point or do we understand the totality. Do we understand the process of the freedom for both, the freedom of one allows the freedom of the other. When we slave our physicality

or our soul through the physicality, is it by choice or is it to create a condition that we can extend to a higher order the level of our own understanding our own existence. If you read that question again (1:48). and understand what I said, we might find an answer. Rick reads again. ... Let's see what it says, if it's a special breathing then what happens when you breath in a certain way. You have to go back to the teachings of the past. He draws a head. If you look and understand the totality. ... (1:50). This is your blood circulation, this is the passage of the energy. When you breath it does 2 things, the energy goes to the soul, this is why the nasal cavity and passage are here. It's a direct feeding of the STM. Then this goes into the lungs which feeds the containment (blood circulation around the brain). If you can breath in a way that the containment and what is contained balance in their fields between (them), it's exactly what I explained to you about Mr. COHN and Ca, you can create a condition in balance, the STM can extend beyond the boundary of the physicality, because now you have changed the game, you are not containing anymore, you are equal. As the soul receives the first energies it becomes more powerful, and the emotional containment or the blood becomes lower (in strength) you allow the soul to bypass its cage. (1:52). But still through the breathing it has a connection ?? of physicality because it takes breathing, not air, breathing is adding form the energy of the universe, you call it air or whatever. If you can reduce this cage you'll find out that the soul finds its new passage into the dimension of the universal field flow, and communication with the outside or creation of the condition. This is what happens to us in sleep and that's why we dream, we reduce, we still hold the seed of the soul but it expands to be ??? beyond everything else, the future dimension of meeting the soul of the mother or anybody else, or you go and see Rick. Because you wanted to see the Rick, he is there he serves everything, I want to see how does he look in his soul. ???? the ?? man doesn't end up with the dimension of physicality. The most purest creature in the creation is the Creator Himself, you always ?? wanted to see what happens when I mix this with that or cross that. And man is one of those (creations), what I call, what is going to happen when we mix it this way. Now you understand why you ???? how you can. But again the emotion of the man has to be at the level of the virtuosity and not the slavery of the STM. When I do what I want to gain from it. (1:54). (rather) in what I do what am I going to give with it, then you can bypass, allow your soul to extend beyond the boundary of your (physicality). How you breath, what you breath, why do you have a gate at your throat, why is there a passage that you can lock it. If you want to go through the passage of the elevation of the soul understand the structure of the physicality of the man. You have in your nasal condition a position that you can close the gate, and hold your breath. In that position you can allow the soul to take what it needs and then release, that the lower strength feeds into the dimension of the containment. It's of the highest order, but the lowest order of this matches this. It's not that you breath ... one of the ways of it is holding the breath, to hold the breath so that the soul takes from the air what it needs ??? that it gathers strength from the environment, then at the same time as you are depleting the time of the energy out, the containment reduces and the soul increases. (1:56). The STM takes to ?? the creation. Many people go ... the secret to it is to hold, block the passage through the throat that air blocks itself and releases all its energy, because the air you breath is AA in the Gans state, and this is what I have said many times before, man never understood why we breath or why the structure is even this way. How do you win a war, win a game, how do you play a marathon, you need strength and

you rely on your opponent not to catch up, not have enough strength that he can break away. In that process because the 2 are connected you can let the soul free because you fed the soul first with the highest order, magnitude before it gets diluted in the lungs and everything. Now you know how to let your soul breath if you understand the process. It's going ... You have to understand, 'I satisfy the need of the soul', but I don't damage the soul of the physicality. And that is where all of you will fail. Now maybe for the first time you understand why you have the possibility to hold (the breath), this is what the soul does. (1:58). He has to create the physicality, that I take what I need, first because I have to exist that the physicality can exist. It doesn't come back on the back passage. It takes as it comes fresh, and what comes from the universe, as it extends it, and it reduces it, it pulls in from the U. If you can create a condition that the energy that was in the blood vessels, the emotional part, the containment changes, as it is weak, it opens up (and the soul can go out). I told you I'll teach you everything man needs in space. In the new systems that are getting developed you'll see, they're in the trail tests and it'll go into the next phase. I do not touch systems .. it doesn't matter if you have Parkinson's disease ... the systems we develop are to elevate the STM that he is happy with his physicality. If he knows that his physicality has no reason to be, then he still dies when you go into the system because the soul wants to be free. I change the blood vessels around the brain to the system which I have created. Don't forget I am the creator I know all the tricks ??? . And I am a magician I know how to ?? The guy could raise the dead. I create death from nothing to raise itself. The dead (is) the physicality and not the STM (2:00). So I can feed the soul to create ?? (a body).
Q: Did you say Tuesday you'll release the penultimate system for feeding with the rest of the systems we are going to do? Yes because we have to feed you in space. Good god how many UC members are present.
Q: Is there a secret in the position of the brain that the past prophets taught? The prophets never understood that. (2:02). Q: They just delivered without understanding? No, they looked at the physical dimension, never were allowed to?? not understood the position, to reveal the work of the STM. If you don't teach then the man has to find it himself, then it changes the grain of the man, and the hope was that one day man will find out, but those of you who forgot the path, they created enough mayhem. They don't talk in front of you, they talk in the back of w, then they could have said what they understood, then you know what they would have done to them, they put one on the cross, they put 900 bullets through the other one. The knowledge has to be understood and then it can be played otherwise there is a lot of power play and a lot of people don't understand, they don't want to understand, they like the way it is. (2:04). Q: If you are married to me, can I figure out what is the knowledge that you have brought to create the right conditions or positioning through the Gans's or whatever system they want to use for that balancing.
...32

(2:10).

(2:20).

(2:26).... Since we announced KF Global we get many people who want to buy shares. There is no problem, in a way you buy into where you want to serve. ..

(2:30).
(2:34).

(2:40).
(2:42).

(2:48). Q:
(2:50).

.. If you think you have seen the God with your own eyes it means you have not understood, in a way it means you have no eyes to see. (2:54). We taught a lot today is another change of game to a higher level, it's another opening for mankind to understand his own position, their own understanding, strength, man has no failures and no weakness, it just has to learn how to strengthen its weaker points, what is not ??? Q: When you say we who is this we you are referring to? Which part of the we. Rick says, I thought you might say that, it's really depending on the conditions because sometimes when you say we you mean all of humanity, sometimes it's all of the K Seekers, ... sometimes it's all of the universal community. ... I ?? have to say we, we of creators. It's nice to start a new phase of teaching for us to understand the next step, what is and what is to come, and what do we need to be proud of who we are, that's the next step (2:56). ... when the soul leaves the body it doesn't go and sit in a corner and say that's it i have got rid of the body, I have done my job now what am I going to do. It has its own cycle of life, existence, and it has to live in that direction ??
Thank you for today ...
Those of you who want to buy shares in the company, just give us time ... (2:58). I have to watch what I say .... I was told a week to 10 days. ... (3:00).
We are responsible for those families where the T makes them obsolete. This is how we have to be and how the new cycle has to work.

Knowledge Seekers Workshop Summaries

(285 through)

285th Knowledge Seekers Workshop - July 18, 2019

(Iranian peace and Trump visiting Iran instead of the 2 ladies on the way to the Whitehouse, The peace dividend is being shown first time the path to the Creator, You go

to the Creator as a ray and get radiated back out to be a co-creator, The secret is in the Amino Acid, ,)

(:10). Happy Birthday to Caroline tomorrow. ... We see a lot of changes and good news that doesn't stop but builds up in all directions. I have been rejoicing in the last 24 hours as we have achieved and hopefully we'll see what we promised, (:12). the end of wars. Humanity has matured and it seems the common sense of humanity has prevailed we see new movements, what we asked for, what we promised that there shall be no more war. We have finished with it, whatever is lingering will finish in the next 12 months, whatever. Humanity will find a solution for it. I have taught you a lot about politics and the world of diplomacy, science and T and everything else. ... The coincidences are not coincidences they are set up that way, the people in public do not understand, but as you are well taught by a master of diplomacy, ... Conflict between US and Iran. .
(:14).
(:16). .. Iranian is in New York today ... the peace plan is underway ... Trump will be in Theran ... ... Iran will develop a massive space program but this time it will share with US, China and this will give a lot of strength to all of us. (:18). ... We have entered a phase of peace. President Trump will be invited to Theran. ??? If Trump doesn't go to Iran then it will be too late for next year .. We will see 2 ladies head for the Whitheouse. .. (break in transmission) (:20). ... A lot of people don't like for this to go out because they want it to be coincidental by accident ... When the 2 ladies come to the Whitheouse they will go to Iran as we respect women deeply in Iran. They'll receive a better reception then a man. But I don't think he is going to leave it to them .. we see the peace completed. The difficult part is how US will handle the dividend of peace, some much defense technology which has been built up and so many soldiers to go back home and will it go on creating endless employment. The beauty is that part of this peace dividend will create more jobs in the US. (:22). ... There were 4 Nobel Prize nominees Zhi, Trump and Iranian President, (voice not clear)... a lot of people don't want this going out. The reason we release it is we don't let the course to change., we keep everything on track. The Iranian administration is peaceful but carrying a T for Iran is ???
(:24). What is the next step for mankind and how are we going to handle such a gift. Our we in position to understand that peace is a part of the life of the U and would we embrace it? Would this be at the level that we all collectively achieve and to keep and hold and to become wise to devious people who benefit by selling and providing things, be it arms, drugs or anything else. Our problem is immense now that we have entered this phase. The employment in Western Europe will rise drastically because it is one of the things we have in mind. Many countries who are geared up for war and military will suffer heavily. What are our nations and citizens going to do, how are we going to achieve and hold on to this proposition that we have created. How are we going to keep to the track and not fall back into the bad habits. What are we going to generate to guarantee a continuous business to keep humanity busy. Are we going to culture into space, looking into managing everything that we did wrong for the past centuries and trying to put right. (:26). Be it the oceans that we have polluted, be it to the extent that we have not realized what we have done to ourselves on this planet. 12

(:30).
(:32).... We expect to learn from the TCM and to incorporate it into the work of the KF. Initially we go through the passage ??? then we develop it step by step. ...
(:34).

(:38).

.. What is the next step for all of us now that we have handled the warmongering, very soon we'll handle the drug mongering. And then there is no addiction, they can produce as much as they like but it will have no effect or needs for it. It will be released as part of the process in the water systems in most of the nations. By drinking (the water) you make yourself immune to it (drugs). It's that simple. All of us who can't sit next to a drug man, we never touch and this is the process we need to do. The next step for us is the release of this T in a way as part of the medical and health aspects of the KF, will come to the Health Center, (:44). through the Austrian manufacturing, which is the center of the health development of the KF. .. In that process we'll go to the next step where humanity needs to go. What does humanity need to know about himself and his environment, about how we handle things, where we come from.
(Starts teaching ..)
In my teachings we started with a matter, we spoke about the matter and how it broke up, and we came to understand more and more about how the structure of the matter can be utilized to create what we call the separation of the matter compounds, as we call them molecules into the atomic and as we went through the process of the structure of the molecules we came into the Nano materials we learned to become part of a plasma or what we call a Gans. (:46). In that process of making Gans we created fields, and in that process we came to a source from where the fields came. Up to now we have taught you up to here (Gans), now you can mix some Gans's together, fields together and go back to matter. But you have to understand that the world of creation started this way (from the Source) and not this way (from the Gans). In interaction of the fields of the U with each other they created a Pl and in the condition of the Pl in the atmospheric condition of the environment we created the matter. But the most beautiful thing to ask about where the teachings of the KF are going, from now on we are teaching you to go this way (back to the Source). .. As the rays came in to make the Pl, where did the ray come from? As we have managed to create rays from the matter, and now we are going a step further, to where the ray comes from. As it is a part of the KF teachings, the ray comes form one source, the Creator. ... I always promised you that I will take you to see your Creator. (:48). This is what it is. If understands that now that he has achieved world peace, peace on this planet to be structured. Now that we have brought you to the dimension of understanding the soul of yourself which is a Pl, now through the same direction we take you to what created this Pl to start with. Which in due course for those who elevated their souls will come to understand as a ray will go to where it started. The process has not been to go from Pl or energy to matter state, the whole process has been to be able to go the full cycle. The process is about its completion. To you ??? you could not understand why and how, but now you understand what I said, it's on the logo of the KF, it says where science meets the STM. I made man in the image of Myself, and where science will take the STM to meet his Creator. This is the process as you understood that your

soul was a collection of the fields of the, what we call ??? the physicality of the man. Now you understand that the soul was created from the rays of the cosmos, in these rays it doesn't matter which universe you are, it always came from the Creator and now it is for man to understand this process. This is why I told you that it is the biggest peace dividend mankind will ever receive. (:50). In the coming time, in a step by step process I will take you to meet your Creator. Then it's your responsibility to prepare to be a part of it, to radiate to go through the whole cycle. Where you carry the soul of the Creator to be in every created things in the U. This is the total, as I told you where we reach the total peace for mankind which we see has started, we are preparing you not for the spaceship to go across the U, not to travel with your soul, but to understand that your soul has the essence of creation in the center of it, what we call the Principle Matter that is in the strength of the strength of the soul of the Creator. If you understand in a very simple language, if this is the soul of the Creator, and this is the STM, we always said that what comes out of one goes (into the other), goes back to. And it always comes out in the shape of a ray, ?? as a Pl. It's for mankind to understand the process of this development from now on. Not to be trapped into the understanding in the world of cosmology or planet or the universe, but to understand that in reaching the Creator you carry the totality and you decide. This is our job as universal Messengers, to show the man the full cycle, (:52). as we showed from matter to energy and back to, what I call the maturity of the STM is not in energy, and is not in the writing of the prophets, transmutation of elements, in understanding the transmutation of the STM to the soul of the Creator. Now you understand what is ahead for mankind. You do the soul searching ?? what is inner me that I can become inner Him. What has created me that I can feed Him that through feeding Him he feeds me to be able to create a condition that I create a peaceful world. This is important for the souls that have been created on this planet, as they have suffered and they know the pain of war they'll make sure that no wars will happen anywhere. Mankind has been put through a test to mature him to understand the pain and suffering of wars and destruction and in that process we bring man to the point of understanding. The whole purpose of the teachings in the past years is to go back to, and if you understood all my teachings from the beginning I always said that book #8 will be about M fields and Book #9 will be about the soul. Mankind was waiting to understand about the soul of himself but in reality it was so I can take you to see, to show you the soul of the Creator, which in that process as a man you'll understand the teachings of the whole of the KF. (:54). When I said I would write the Book #9 about the soul it wasn't about the STM, far from it, but as mankind thinks he is the best and has everything, most of you thought that was going to be it. Through the teaching I brought you through the M fields (book #9 ..8) I started with the book about matter, light, the universe and everything else that has come here, then I'll teach you about the M fields, and that M field is exactly where it takes you to the soul and the soul of your creator, because you came this way (from the Creator), it's the first time I'll show you the way back home. All my books from the beginning were setup to do this but I couldn't explain, mankind wasn't ready 10 years ago, not even 1 year ago. We have taught and have elevated the STM and now we see we have achieved the point. The promise of peace is that mankind will reach his creator and not for looking for a job. The job of man is to collectively understand to educate itself to find the path to the Creator. Now that you have understood the creation of the Pl, and the soul of yourself, and just before the teachings today I said something to Rick, we have a cell phone and

now we have a soul phone that through your soul you find the path to your Creator. (:56). There are no telephone lines nor GPS to get in touch with the Creator, but within the STM there is a direction and a strength which is the same as the Creator. As you know you can't go anywhere in the world of magnetism unless you find the right fields. It not progressive development, this is conclusive development. Now we are getting to the conclusion of the life of the man on this planet. I said before that we use this planet as a nursery of souls that energies can be there to feed to be the connection, the line of the start of a new cycle of life because if you understood the progress you can stop anywhere in any lines be it in the dimension of the STM or in materialistic, or in any position in the U. The true journey of man starts from now on that the man has achieved peace and that is the next journey to reach, to understand the strength of the STM that mankind can take the step on their own decision to reach the soul of the Creator. This is the most beautiful thing any ray can achieve, not the soul. To become part of and to be radiated back out of to give more. You carry the same knowledge, the fields in essence in the center always has its own principle energy. (:58). When as a ray you leave the soul of the Creator you carry the knowledge of the U that is gathered by it, through it, within it to become another part of the creation. To serve to be in a way equal and to understand that like the rays of the sun they shine on everything equal, and you are part of that ray to shine the beauty of the Creator. It's a pleasure to be at this point and to understand and to mature to this reality. In so many ways, I am the Creator as I come from the Creator, as the Creator is within me as I am within the Creator. When you see in your way of understanding, we never knew what is M and what is G because we did not know that it is the same field, but that it gathers some more fields to itself to reach, to come out. When the STM reaches to become he can ?? (gather) some of the fields, the attributes of the Creator that in turn become to create the cycle. Some of you will ask what is the purpose of this. (1:00). What is the beauty of this, do we need to go through this, and where is the beginning and end. Fortunately I have a good news and bad, the good is, it is what it is, and the bad is, it will never end. What would we achieve as a human race? The only thing we'll achieve is we become mature that now we can choose the option is ours to become, take a direct trip to the soul of the Creator or take our time and see all the beauty of the Creator when the fields of the Creator interact. Otherwise it's a beautiful journey, when you have made it so many times it's just a habit and you don't want to go home. Now that I have completed my cycle it's time to go home. (1:02). There are no regrets. I'll try to teach you more, just to keep you busy so you don't fight each other, that you don't suffer, be it the cancer or something else. In the world of creation accidents always happen, but there is a reason for it. Most of it depends on what mankind will make for his own benefit. We have never seen banks or hotels, or anything that mankind has made for himself up to now. But in this process we have seen one thing and that is mankind has matured enough now to take the step to move out of the cradle and to join the Mother, the Creator. How we'll develop the T (1:04). ... we will not stop teaching or letting you to develop new concepts or new ideas because these become part of the memory of the fields of the Creator and in the process when one learns everybody else enjoys the learning. There are enough K seekers to be able to teach and in the coming time we'll teach immensely. The gathering of the knowledge will speed everything else up to make life as comfortable as possible on this planet. In that process nothing is granted, you can't take the beauty and the peace for granted, you have to work at it and develop it and make sure that in every dimension of

creation is paramount that there is no conflict, be it in interaction of the fields or in the process of the understanding of the totality. What will come to most of you to understand is that a lot of you have not understood the power, strength and the essence of the creation of your own physicality. A lot of you talked about it so casually that it is one of the biggest fears I have, (1:06). that soon you'll miss the train. You're so attracted to what is big, that what is the creation of itself, you miss. In most of my teachings you very casually refer to it and walk away from it without understanding it, without comprehending what it can do for you or to you. It's become the habit of the mankind to look for the big thing, that, that tiny thing, which is the essence of the whole big thing has been overlooked. What is important in most of the work you do, many of you, the majority of you speak about it, walk away from it because to you it's something that belongs to planet Zeus, nothing to do with me. But from now on, if you are on a path to elevate your soul, you have to, you have no choice, it's part of what you have ignored. In the essence of its creation is the STM and none of you have understood or come to comprehend its potential as power. In all the processes you made the Gans, the saltwater, but you ignored this guy, what we call AA. (1:08). Be it CO2, whatever, but what is the COHN? It's the essence of the creation of you. How can your soul memorize what was here (Gans at the bottom) that you actually forgot that we were teaching up here (AA on top). Many of you when we asked about the STM or element, bla, bla, bla, you looked at the Periodic Table, and I just laughed, these people are missing it. Your AA is the beginning of the STM, and how so many of you have ignored it. You mixed the Zn, Cu etc.. >> that should be the STM. But the STM sits here, it's already established in the hand of the man. It's a living thing, it's the Pl of the creation which created you. You have to understand that you were too busy seeing big amount of Gans's, and you missed the little boy who can show you the way out. Many of you have developed technologies and mixed everything else, is this the STM, (1:10). is it my soul. And I said to myself, they don't understand. And I promise you that 99% of you from tomorrow will look at this one because you want to get to your soul. But understand how you do it, what is the reason for it. Now that you have become peaceful creatures we can show you peaceful ways of the truth about the knowledge. Then do we need Gans of CO2, Pl water of ZnO, and I play the game because this is what you want from me, and we have to keep you busy until we achieve our peace goal. Now as I said in understanding of the AA and its rays I'll take you to see your Creator. Many of you have not understood, you're so busy copying that you never could understand. I am not after anything, but I am after the development of the STM and the major block of the STM sits on top of the Gans water. (1:12). And you all have ignored it because of the illusion of a MaGrav system or a flight system was bigger then understanding the flight of the STM. You keep on saying our body is made of DNA which in essence is the AA, and if we have a DNA we must have a soul which is creating it and you keep on missing what is on top of your box. Now would you like me to show you what it can do, would you like to go to the dimension of the flight of the STM, or the flight of the dimension of the UOF? Now you understand, now you come to comprehend that I brought this 10 years ago. As I said when we see the peace establishment, the first steps of peace we will give the man his freedom. It's not a carrot on a stick, it's a path to the Creator. Because the field which has created it, itself is a Pl in strength in essence, as ray, (1:14). to what has created life, which is the Creator. Now make Gans's but understand what you make and when you do, do not get baffled by

what we put in there, as magician to distract you, not to see the reality of the magic. Some of our doctors in the past year have started playing with it but they don't understand it. ?? We add AA into it but as they are so physical they couldn't take the next step. the next step they could go through the full AA and its plasma creation to create a balanced soul of the man and the Creator. But you'll not achieve this until your soul is sincere in the direction of the Creator. Just because you have a car doesn't mean you can drive. Then know how we sit in every meeting of the world leaders, we sit with their souls and the physicality work goes through CNN. (1:16). We dictate the news, any thing he says and it happens. In that process we had to push mankind to the limit that in totality it stops, the process. In this process we still eat tomorrow, teach the day after, we still take our travels, and we still find the path for being sick because we haven't learned the process of life is the simplicity to find the path to the Creator. Now, for the first time, mankind has been shown the path. In the vocabulary of man there is no word for it, because man was never aware of My existence, call it God, Creator, but they don't understand the totality of the ?? Being as One. In the coming time we'll still build the factories to keep mankind busy, sell shares in the American stock exchange before it falls to pieces by the shaking of its own self to the ground. We'll still develop systems and technologies that mankind can withstand volcanic eruptions from the shaking and sneeze of this planet. But at the end the whole U has volcanic eruptions of its fields, the whole U has its shaking. (1:18). But mankind has never understood, now you understand. The only thing is on the way to the path to your Creator be careful you do not shake. It's that path ??? shall not steal from ones self ?? you can't steal from yourself joy, happiness, justice, or self understanding that the most paramount and important things for the man as the STM is to reach the soul of the Creator and in this process of the teaching over years, I have taught you everything. If you understand this then you understand that the soul of the Creator is not one ?? AA, then a lot of you will start mixing a lot more. Don't forget in that teaching I have hidden something more because you are not even ready for that process yet. My job when I accepted this mission was to succeed, failure was no option and I have succeeded. I have made you to put so much Gans's in the waters but you didn't see that you were actually putting AA's to change. (1:20). The Japanese came and they stole it and they nourished the oceans from the radiation from Fukoshima with the AA's of it, while they were stealing the white gold, from the Cs reactors and the water tanks of Fukoshima. We used them to obtain our wish. We let the man play because while he is busy we can do our work. We don't create conditions, but the conditions created we use for the advantage of what we want to achieve. When you listen to my teachings, go back and listen lesson by lesson, try to see what is behind the knowledge and not what is on the screen of the knowledge. Man should never be afraid of death, he has to rejoice as it takes man one step closer to the Creator, if he has ofund the path, due and through the time he has life on this planet or any other dimension in the U. Try, when you go through the understanding of the process, register that knowledge within the STM and not in the memory of the mind of the man and that will carry with you when you travel the spans of the U, as a ray, be it as part of going into see the Creator or part of leaving the Creator to become the creator of others. (1:22). The knowledge of the STM does not belong only to this planet, as I taught in the past couple of weeks. The knowledge which you received, as I said, as much as you receive, 80% of your life existence through the space ... where do you think the ray has come from in the space. Where do you think you receive this?

Through the dimension of the STM. What you have as DNA is part of the earth is nothing compared to what the U feeds you with the soul of the Creator. You are showered by it, but you have never seen it, because you thought, am I, could I, do I deserve to be. Even the mankind does so many horrible things. You see when the ray goes through the earth it has no choice but to receive what the earth has given it, and it has to release to take. One of the things that is achieved, if you understand it. This is the man, and if this is the universal energy, what the man gives from his soul, you can see what it takes in from the totality. What you produce in you and what is produced within Him, is added to, and you become, you receive in, (1:24). totality what is the Creator. And so the fields of the U in creating man adds to the knowledge of the man. But in that part mankind has chosen to be blind. Mankind has 2 souls and unfortunately this is what mankind has not seen, the STP and the STM itself. In part these 2 collectively come to be, and they receive partially of the both. Very heavy today isn't it. I wonder how many of you have tried to understand how close you are to it. If you have tears in your eyes you are near to understanding and if it has (only) been a word to you it means you have a long way to go to mature. ??? to understand how much you have closed to understand your own Creator. As the emotion is not the exclusivity of the man as the Creator has the same. Has ??? many long time mankind has ??? As I have said, as mankind moves towards peace, we reward him with peace. (1:26). Now it is time for the peace of the STM as the physicality gradually, as now there are no more wars will lead to that direction. The soul of the Iranian leadership, bless his soul that they kept to the ethos of peace and to the promise of Zoroastrian. This is why we bless the nation and the creator of the creation. It's time for mankind to move on. In the small time of the man, you call it 50 or 100 years which is a fraction of nothingness in the work of the U man will take the direction and the work of the peace. We try to find less painful way in this time of transition. We have seen the problems and dividends of peace, whatever you want to call it, be it after the Vietnam war or the time of European unification, one was because of the shame, one had to move people out of position back home, one kept them home but ofund a solution but in resolution of that, they should have ofund the path of peace for the rest of humanity but they chose to use it to develop arms and control and in a way colonization by arms, for this we shall punish European nations heavily in the coming time. (1:28). The punishment is not by what you are used to, it is as we said, there shall be no punishment. We make it enough for human races in these places to sit and think what they made wrong. At the Second World War we gave ?? Germany a chance and we blew it. This time we shall not. On the other hand all of the humanity has made so many mistakes that we have to punish the whole of humanity and then the planet earth will suffer with it. In a way we have forgiven, but we do not forget. Now in a very simple way I have taught you the most important things of all your physical education, about the AA. Try to comprehend it because there is a secret message behind it. There is a path, in a way, that you can touch the whole soul of the humanity if one of you reaches that point. I am not a human so I can't do that, otherwise I would have done it a long time ago. I can wait and have the patience of billions of years, ?? a few years until you find out the totality, ?? is not that much, I just have to keep on (making you) busy with developing and teaching ?? ?? and trying to get the Americans busy with the ?? and something else with the ?? and we carry on with the same. (1:30). What I have taught will become the cornerstone of the knowledge of the man in the universe if you decide to be a ?? here and get back home. Those of you who want to be a

jumbo jet get home quick. I have shown you the path of return. Those of you who want to be on the back of a donkey and go sightseeing, and other planets, what they find a way out of this U and then get lost in another one, and somewhere in between you might find by accident. You can take all ?? ?? The choice is yours. The beauty with this travel is that there is no ticket to sell. I hope it reaches fast, I hope you reach the soul of the Creator to be with us, but that is totally up to you and how hard you are to become a creator then being created and on the path of enjoying time, which is the right of everyone. As I said when I met Caroline the first time, I said, we come to this planet to enjoy the dimension of physicality and understand it. The physical life is beautiful but you can't always be on holidays, even sometimes it turns up to a ?? torture. One of the advantages of the present situation, what we see, the kingship shall never return to the lands of the kings of Europe and that will be for he rest of this planet, as all men are equal and no one is above. Many shall try, but it will not work. (1:32). Those who came and decided to be on the same path they'll find out, very soon, on the elevation of understanding, they'll step down themselves. As they'll find out that the leadership of man has to come by the elevation of the STM and not by the force of the man. Try to understand, go back on all the teachings, what you missed and in that process, which path do you want to go. You have come to the station of life, how would you like to take the trip back to the Creator. At the station you have a train, bus, taxi, and the airplane and it is ones (own) choice. When you land in the airport you have a plane, bus, taxi, you can walk, or you can get a train. Now man is at that point but all, either .. (by whatever means you take), you come out at home. The home of the man is at the station, which means of transportation man uses to reach home ??? from the station. The decision is man's, do you want to walk it, then you have to understand the work of your soul, if you want to fly it, then we have given you the UOF, if you want to go by train or bus, then we have given you the MaGrav Energy system with everything else. You'll be very busy, it's a beautiful Lego that you have to (1:34). put together for a long time. Those of you who want to be the sightseer you're quite welcome. At the end of the day your time is numbered and how much knowledge you gather in the ray of return (is) what will teach ?? you more. Many of you have asked whether mankind has come from another planet and is from somewhere (else) introduced. The answer is yes, you came from the ray of the soul of the Creator and that ray carries by all the information which is gathered by all the souls of all the created things in the past time from the beginning of time. But mankind only remembers the planet earth because that is why you have been caged. Now that we open the universal dimension to you, when you travel the dimension of the U, you say, 'oh, I have seen this', that's because it's in the soul of the ray of the Creator and not in the line of the memory of man and his matter state dimension of the ?? state of his soul. Now my children play. At the end you'll all come home. Try to understand the essence of the teaching, the true meaning and don't get baffled by my teachings, diverting your attention. The diversion was for you to understand your weaknesses, and now that you have understood you are strong enough (1:36). to be ... Never be afraid of death because nothing ever dies, it's just a state of different ways of radiating the lights back to the Creator. If you understood a simple principle of life, M fields, what comes out of the STM has to radiate to the Creator as He has radiated to him. You have to decide where that point sits. I kept you so busy with the Gans's, that the Gans of Life was overlooked by you. In so many ways, when you have that AA it's a Gans of Life. You were too busy

with the Gans of matters because mankind is so materialistic. You say to yourself why didn't Trump become president 10 years ago, at least we would have reached that point by now and would have had peace and would have been given the gift. Put it this way, the poor chap had to become president because his soul promised to deliver what we wanted. Respect your leaders but never become a slave to leadership. (1:38). It doesn't matter if you are on this planet or are travelers of the U. This way you shall have no prophets and no one will prophet from you by taking over the dimension of the strength of your soul. It's a wonderful day and what we see in the coming time it will become more beautiful as mankind gradually understands the true peace dividend is reaching the soul of the Creator and not more ?? arms and more factories and more troubles, that's the dimension of the understanding of the man. I always said that if you take a step I'll take a step further, but in a way we guided you to take that step. You have blessed souls like president Zhi of China who are bent backwards to equality and to peace, and we have seen it achieved. Without the ?? of the Chinese government there would have been no peace, none of it ?? would have been achieved at this point. A solid nation creates strength and a weak nation creates mayhem ?? We have seen how one man has created so much anarchy in the past 2 years, and one of the leaders who created so much strength. I would like to thank his Excellency president Zhi for his soul. Mankind will soon understand. It's the end of religions, it doesn't matter which way you believe in it, (1:40). because you'll find out it was you who have accepted it to be subordinate and not to be a holder and this is one of the most important parts that mankind will learn. Subordination brings conflict and suffering, and as long as you are correct in your conduct it doesn't matter what is needed to be ?? will give you that prejudiced, it doesn't matter what others do, you'll find out that gradually you have reached the understanding of the soul of the Creator. You'll radiate unconditional. We say that when it rains it doesn't only rain on one, but benefits all, it doesn't create a condition that one is getting more and one ?? is getting dirty ?? It brings back many memories. Many years ago before I left Iran I used to have a great, great grandmother. I am of Jewish descent. She used to tell us that when your grandfather went to the bazarre he used to have to go with a box of ofod for the next day, ... I asked her why did they have to go with ofod, she said, the Mullahs made the thing that if it is raining the Jews can't come out of their shop because if a drop of rain falls on the shoulder of a Jew and then splashes on a Moslem then he becomes dirty. So we always give the ofod for the next day to grandfather ??? (1:42). What I said and I still believe it, couldn't they use an umbrella, or was the color of religion so bad that it made mankind even to be afraid of his own shadow. What we see is that mankind has become afraid of his own shadow, afraid of giving and receiving where the Creator has rained equal upon all. The dirtiness is in the mind of the man and not in the splash of the raindrop. The sooner we mature and the sooner we'll see, we have made every ground for peace. We'll see the state of Israel dissolve into Palestine as part of One Nation, we'll see the amalgamation of most of the worlds nations into one in the coming time. When we solve the last step as we finish the wrongs (balance of karma) of the Palestinians of what they did in the past century, of their own doing then we move to the step of equality. In the same way the punishment of the Israelis has been long gone but they have to understand the process of peace has started and sooner or later mankind will loose their religion, what they were taught to understand, the true meaning of it, and it will become a cause for unity and peace. My wish is my command. (1:44). We created it, your path of

belief, and through it we let you learn a lot and to find their pitfalls, and now it's time for you to move on, that you don't make the same mistakes and don't make anymore prophets for yourself when you travel in the span of the U. This was a very good lesson for humanity. We haven't seen the Christ for the fish, nor the Moses for the cat, so mankind has kept himself oofled and busy because he thought he was very intelligent and he let others abuse his soul, and now in the space of the U mankind will not do that because you have had your lesson and you ate from the poison ?? from subordination of your soul to those who made the slavery in the name of religion. But remember the most important teaching of today was in 5 minutes, NOCH, the path to your Creator. if you understand this then Mr. COHN (crosses out). (1:46). Try to understand the totality of the meaning of the interaction of the fields, as the AA itself has a COHN relation, exact operation of the work of the U in the dimension of intelligence. When you make your spaceships, SF, don't forget there is a sting in the ray, your ?? trump is away from you and this is your base. You're trying to achieve and in that process even your spaceship has a soul, you have to enter it with the right soul otherwise it doesn't accept you. Remember my teaching what I said a long time ago, many world leaders will walk towards (the SS) but will walk back, they'll not shame their souls for their conduct of their physicality. I hope today I have brought you to a new level and I hope today was a gift to Caroline for her birthday. Freedom for man. But the freedom has to be tasted to be enjoyed to be shared and in that process mankind has to be kind enough to understand which kind of life he wants to live. We have shown you the path. (1:48). There will be no prophet because you have been shown all the ways, you don't need anyone to guide you, to follow their flag, you set the flag and the target is Home, back to the essence of the creation, to the Creator. Don't expect that ?? (I'll) you'll stay much longer, it's a busy place and a (?? I'm a) busy man, I am forever in a giving mood. When you see a sun and how it shines, when you see the brightness of the soul of the Creator, you shall be blinded by it, but don't get oofled by all that shine, it ??works very heavy inside that it makes that everything ??? gets equal where it puts out. ??? same with the center of the sun, same with the center of the plasma of the soul ?? I have accomplished my mission and have to wait until my bus arrives, depending on which journey I will take. It has been a good journey, at least I have achieved billions of man from suffering in the time to come but on the way it matures man to the point of understanding, of the soul and not the physicality of the matter. I am a very good magician, I kept you so busy with Gans's that you didn't listen to my voice, that I have hidden, as usual your soul on top of it. (1:50). I put it right in front of your face so close you could see it, but you couldn't understand it because it was there. If you want to find a path to elevate the STM to meet your Creator, and I am sure tomorrow or next week I'll get many videos from John to show how he has put which Gans's and how he has put the soul ?? the STM doesn't need to be in the ??? to understand to see the path ??? I hope you understand.
... Any questions.

Q: If we are here to serve is it not also the purpose of the Creator to serve the creation, a 2 way leveling interaction? Yes, what do you think you are here for. Don't get Him angry, you don't know what He can do. What do we call it in English, blasphemy, am I correct? Blasphemy is only about the religions and the prophets, (1:52). But don't do it to the Creator, He is the worse one, I have seen Him when He goes the wrong way. Any other

questions. You have been given so much that you are spoiled and you don't see it. Man needs to open his eyes to the truth of what has been given to him, you always looked at the ofod you ate, you never realized the rays of the sun which you received from your Creator through your soul. ...
(1:54). Q: How do the rays from our local sun fit into the picture or do they, if you look at humanity over the millennia, they have worshipped the sun and called the sun the Creator, and on the other hand we have the universal, the totality that is beyond the sun, we have the center of the galaxy, and universe and so on. You are talking about the Principle fields from the center of the cosmos and I am just trying to see how the sun fits into the picture, or does it, or are you talking on a different level altogether? Yes it does. Maybe I can explain it in a simple way. You have a massive power station that radiates so much energy out of it, if you connect it directly to the house, it blows the house up. Q: Transformers? Yes, you put it to a substation and thin is down a little bit and then to a sub- substation, and at a box at the end of the road that the house can get the right amount. .. this is the reality, man receives, (1:56). but man has to have the capability and capacity to handle what he receives. Q: Is part of elevation to receive higher levels? .. substations. Q: You become a sun and find out there is actually a way bigger sun, or just part of the picture. Now this way we have taught you the lot, but be careful you don't get blown up by the beauty of it. It's so addictive, that even the souls become drug addicted to the soul of the God. That's how bad it is, they want to reach it, to be there, but you have to understand that you have to elevate it to reach it. In my teachings over time I have explained by giving you reach a point that you receive so much because you have learned gradually that to give you receive the more powerful rays of the Creator you can give more. This is the essence of what I put in front of the KF, that we are here to serve and not to be served, we are here to give because it's the same, we get to practice your soul to give to be able to elevate the others that in that process it passes to receive, it's like a marathon, ??? you can't wakeup and do a 20 mile marathon. You train it, you do 15 miles, 100 km over 20 or 10 years, but in the morning when you get up, as a runner you do 100 meters .. I train. I know how to breath, how to give, I know when not to breath, who and what and where, it is the same (1:58).

(2:02). We all go back if and when we decide to. Any other question. Q: Where did the Creator originate from, where and why does the Creator exist and what's the end goal of the Creator? Oh.. mankind is not ready for it. It took me 5 years of teaching to explain to you where I am taking you today. Give me another 5 years and I might see if the mankind has matured enough then I'll show you the Creator. Remember at the beginning of the teachings I said, one day I'll take you to see the soul of the Christ, if many of you understood and understand the process you can do it yourself today. Q: Would we human have a hard time understanding what the end goal of the Creator might be.. Why do you think you are not intelligent too. Q: Because in the same an ant might not understand what our end goals would be as humans. (2:04). So many people look at so many aspects of life and because they don't understand it they can't analyze it to see the bigger picture and mankind has been too much kept home to see what is going on in the city of the U. He's been staying in a village, inward looking and now it's time to move on and then mankind will see new dimensions and understanding and somewhere down this road, at

some point his soul will mature, some souls will mature on this planet, there is no shadow of a doubt, many ?? has. As I said we see blessed souls and we know who they are. And those we brought with ourselves but they are still working their own dimension. And we see them around. But we ?? give a dimension of physicality. Another group of man might travel the depth of the U and somewhere in planet Zeus suddenly reach that point of maturity and find the path back to the Creator. Someone else might travel the span of U in the time lapse of man for billions of years but never get enligthened even through their offspring's. It's a very interesting thing, I was watching a program of National Geography, .. (2:06). one of the grandchildren of Hess ... they worship him, he said, I am the only black sheep of the family because I am aware of his crimes. .. They don't believe anything that they say he has done. Which side of the fence does mankind sit or have we been told so many lies and only the few who are his descendents who believe it? Does mankind see him on which side, or does he say as is written in the holy book we are all sinners but are we, or have we taken from our own soul for what has been done wrong for us to correct that we are balancing our souls. This is what the whole life is about, the whole existence. Are we taking from ourselves, are we allowed to be taking from ourselves that we can't give to those who deserve to receive it. So in a way we are ?? thief from theirs, (2:08). not from those who stole from us, we allowed it to happen. We do the same thing with our own physical life, and with our own soul. Today's teaching is not about the ethics, it's about the path for mankind to reach their Creator, you call it Allah, Christ, ?? , you call it God, whatever name you have given to it, I have shown you the path. You have to find it, find the torch that clears and lights up the path for you to go back home. I am already home. In so many ways, I am the home waiting for you to arrive. Any other question. Q: When meeting as a group is it a possibility to build the Gans together and each contribute, such as for example a fingernail clipping to create a combined COHN and is this advisable? You see you are still physical, why do you need a nail? (2:10). When you make a Gans yourself or in a box you have made a collection of the fields of the U independently, that's what it is when you have that AA on top of your box. Do you need to put physicality in it or do you think if that AA has a soul in a dimension of the creation, did the energy of your soul, the M field of your soul have anything to do with its creation while you are in the vicinity. You see you are too physical. This puts a lot of ?? fright in you, in your spine if you understood ?? As long as you wish to fly you shall never fly. As long as you can understand the beauty of the flight, where it takes you, you have already flown. How many UOF's do you want to make. ??? understand what I said. I used to have a phrase that Caroline used o say (to me), do not say that, you mean that they are stupid, they don't understand. I used to say, 'you don't understand'. You all understand, but you have decided to ??? and you have decided to be blind to (2:12). the ??? scientific ?? of your creation. Nobody else. I still eat as a man and I pretend to be busy because this is how I can mix and learn from mankind to discover all their pitfalls. Very soon in the coming weeks and months you'll see us with the world leaders. Do not get oofled, we'll not sleep and eat with them. We are there to raise their souls that through them we understand the pitfalls of creation and through it they will change the condition of the life of the man on this planet. The whole structure is that it is time for it to start. My wish is my command. And as the guy said, as Commander and Chief I can order anything I like. But as a Commander and Chief I wish for them is what you do. Now you know why we put the Trump in power, to trump the

humanity if you know the terminology of the language of gambling. We put the gambler with the name of his gambling casino of humanity. If you listen to his terminology he is a good bluff poker player. (2:14). he only knows his bluff to see which card might fall and somebody might call it in. You have to understand the show has already been planned and it is no coincident. You just happen to be the audience at this time in the theater in this position in the life of this planet, but the act was written a long time ago. An actor doesn't just come on the scene and just play, he rehearses and develops everything to be perfect. ?? perfect. You are just the audiences to learn. Any other question. .. energy transfer was to the soul of the microphone and he couldn't handle it. (2:16). Those who understood the AA teaching will find the "soul phone" very soon in the market. .. let your soul speak ... Q: I am trying for some time to find the difference between the STP and STM (totality), (2:18). in relation to our actions and our consciousness. As far as I understand there are some action that we can attribute to the soul of totality, like serving for example which elevates and brings us closer to our soul and closer to the Creator. And there are some actions that do the opposite like killing or stealing, my question is can you say that there are 2 consciousness's of those 2 entities that motivates our actions because if we all know that serving is the best thing that we can do, I guess we don't do it, but since we are not doing it? You see there is a parameter which is the pitfall and I call it, it is your heart disk in a way, and it doesn't allow your processor to work properly which is your brain and it creates the emotion with it. This is the processing part of the interaction of the internal face of the information of what ot be processed. Part of the work of the circulation of the blood ?? comes the physical part, and part of the fields from the, what I call the dimension of the STM, comes from the central brain which is the STM in radiating, and where the 2 interact, according to their strength create that emotion or feeling. Somewhere down the line if man becomes wise enough he can tune one to another, (2:20). that you don't need to bring the emotion into it. I tried to teach this a few weeks ago but I understood that most of you are not ready for it. How I assess you is by the way you present yourselves, I see communications around and presentations, talks and chats, it means that by listening I understand how much you understood and what you have analyzed. If you can reach the point that brings in the dimension of the acceptance of the soul into the dimension of physicality or dimension of physicality in acceptance of the soul, you will come to the point in the language of science, synchronizing it, between your soul, it's not actually synchronizing, it's balancing and equalizing the STM with the soul its physicality. This is a very dangerous path if you don't know how to take it, because at that point you will decide which dimension to take, and at that point as the STM is not an independent entity in a vacuum of life, and the soul of ?? the STM is not an independent entity in a vacuum in the U, they will move in one direction or the other, and it's the decision of the man in the position of his soul, dimension of his physicality, (2:22). to decide to take the side of the soul to become part of it or to allow the separation of the two to confirm its existence in another dimension, position, time and space. With what I have taught you today, those of you who practice within the next 6 months to a year grow into it, gradually because you'll start understanding it, then you'll understand a lot of things which thought were impossible, are possible because you are the destiny maker, not the destiny made for you. In many of my teachings I follow this path. Many ways you have to understand that the STM and the STP operate, the STP has the same option as the STM, but it tries to turn it around that it

has a dimension of the ?? emotion in the level of the physical life, and it can change it. If you understand this and you have within you the level of creation or absorbing. It's that the STM receives different fields of the U and so does the STP and if you can balance the 2 and understand they each receive then it will be very easy to harmonize, to bring balance, (2:24). then

UN and sports ..
(2:56).
(2:58). cricket ... in the coming time a lot of man's time will go into leisure ..
(3:00). KF Global structure. ..

(3:04). .. this should not be an excuse for man to become lazy, 'oh I get paid'. There are ways we keep humanity motivated to make the next step. This is how the structure is, we play games, spend time, go to cricket matches, ooftball, supermarket, in the long run what we use we pay that it allows profit ?? by taxation as One Nation. I have planned One Nation ?? so beautiful ??? But you have to make the pieces, it's like a jigsaw you have to make it all in pieces, then you can put it together to see the total. All the pieces are there we just move it around a little bit and ... even though sometimes they say, 'oh he made a mistake,' there is a reason we test the people who ?? can be in a position in the group. Incompetence has no room because you damage the others who depend on you. We finance factories, but we wait and see who is running it and what competence they have, ??? we structure it differently. Everything I do has a reason, but I don't need to explain to anybody because no one understands what the thing is and where you are going with it. (3:06). ... When I was 12 or 13 years old I said I want to be a nuclear physicist, everybody ??? ... The reason I wanted to be one is because I knew that through nuclear I could create the gravity and I could control the space ... ???? in that process I was aware of the soul of the Creator, the beauty of the Creator. And by 19 or 20 I was a nuclear physicist. My family said, 'oh he knew something when he was little.' 41

286th Knowledge Seekers Workshop July 25, 2019

(If governments don't fulfill criteria for peace in the next 7 days new space technology will be released and a space blueprint day until one person achieves flight and then shares it, Deadline is August 1,
, Important teaching 2:22 the hollow center in the rotating ball is the Creator,)

(:08). This teaching is for asking questions . (:10). There is a chance we'll call August 2nd a space blueprint day, which means we'll open the space T in full understanding. ... This depends on a number of criteria ... this is to disclose a new space T you have never seen. (:12). If we achieve in the next 7 days. You'll a full flight system test. It doesn't mean we'll show you the UOF's, that's a different thing, but a full flight system, reactors that will work the same as in the space, reactors like earth, moon, galaxies. The knowledge has been extensively taught been none of you have ever achieved it and we have decided that maybe it is time to go one step up. ... it would mean that any of you can produce a full flight system, that is any of you K Seekers who have been testing, like Armand, Rick and many of you. ... and we'll build it up to the point, even if we go to the 3 or 6trh of August, we'll carry on until one of the KS achieves (flight). If we don't achieve our target you'll not see it. (:14). At the beginning we'll show you a working system, it's for KS to copy it and develop it. In that process automatically the borders will become obsolete, any of you can travel over any border, produce any amount of energy. In that process I give it as a gift on my birthday which is the 2nd of August. This will be the gift for all of you. ... many of you who developed systems will be able to bring them in and test. We did this before, running presentations around the clock. Before we are done there should be a number of systems that can fly that we can see. We expect to be across a number of countries. ... it will be one continuous teaching until one of you flies and the one who flies first teaches the others. This is the criteria. (:16). Whatever you have learned from me in the past years, and have made and put in a box in the attic, if we announce next Thursday for the flight (blueprint) then make sure you have all your pieces together by the 2nd. Scientists from around the world will bring their pieces together (to share it). We'll open the Iranian space T, the full space program will be opened, which means no government will have any superiority to others. We'll show to militaries that there is no need for hardware. This week we have seen a positive move by the Chinese government reducing their military forces by 2 million soldiers. This is part of the technological development which we now see around the world, but on the other hand as the nation becomes more powerful it doesn't need that many (soldiers), new technology replaces the old systems. (:18). ..

(:20). .. The new group in Israel who managed to get to the moon this year but they couldn't land can join us, the group in Iran of the space T ... , we invite the Chinese space people, Russians the same, this will be a collaborate development. ... (:22).

(:26). You have to understand one simple point, our T has to be the backbone to peace and not to create problems and conflicts. The whole concept is by 2019, before the end of this year, we can travel in conjunction with all the governments working together to deep space. Iranian government scientists will lead this T. We are ahead, we have the T, and we can deliver. On the other hand once we achieve the flight system, that may of you are sitting in front of, you say, 'oh he knew all of it and didn't tell us, and we have been doing this all the time.' I am not bringing something out of my pocket. I am just adding the salt and pepper to get it to taste nice ready to eat. You have to understand that you are here as K Seekers to share the T for world peace. ... One Nation has no borders, nor armies ...
(:28).
(:32).

(:36). We gave enough warnings. ... now it's time for us to deliver that job.
(:38).
(:40). .. (58 .. Break in transmission) (:42).
... we have to teach you how to land in the right place ...
(:44). ... Never try to use this T to change the atmosphere of your area. Never use this T to interfere with storms or change them or any part of what it is. You have to protect the ground level that people are safe, but do not interfere with the condition of the planet, because if you are a citizen of a house or you live in an apartment you don't open the water in your father's apartment the yours next door is safe. When you touch the atmospheric condition, this planet is a dynamic structure will create problems for other members of the KF worldwide somewhere else. Try to learn this as a system not that you can move things along, (:46). because I don't like it. Instead make it a condition that I can live with it and that I can find a way that it will suit me and my condition. Never interfere with the working of any planet, just because you have the knowledge or you think that you can do. I am sure many of you will find yourself in different parts of the space that you never imagined you could be in. It's fun, understand it, don't carry a backpack because most probably you land somewhere and the backpack won't exist in the dimension of ??? What you'll see in creating the new dimensions of the space system, other friends of ours which are on this planet, respect them. Respect those who you come across, because once you start developing this T you create conditions, very much that you are breathing in a room, and then the room temperature changes and the window gets frosty and steams up, it's ?? what was in the room. (:48). ... (:50). break (:55) 20 .. I think a lot of people don't like this to be heard. In any case this is what we are planning to do. If the governments, as we are the governments, we are One Nation, decide in the right way on August the first. I will give a list of what you need (:56). on the 2nd of August. Try to log in with groups once we announce it on the first, that people from different parts want to link up, if some of you want to fly to the others, we'll run this until we achieve flight, and we'll carry on. In those conditions we ask you to keep a peaceful orderly manner and respect your nations and governments. It's not that if we can we do

what we like. It's not a time for doing what we like, but for doing what is correct. I expect that the Chinese will take a lead in some aspects .... (:58).
(1:00). .. If you find something new it has to be shared and open ...
... the bad news is we don't necessarily need dynamic reactors, the good news is if you have a few ping pong balls you still can create the flight system, not the flight system, maybe something else, maybe energy, materials. (1:02).

... I got a bad news for you, those of you who think you got away with what you did before, on this planet there is nowhere you can hide. (.. break ...) (1:04).
(1:08). ... (1:12). 55

.. Sorry for this, apparently we are causing too many problems for too many people. They don't want us to be heard. Change the picture. .. We'll setup groups. (1:14). and these groups have to be able to work together, to structure a way that is in totality within the ethos of the KF. I will try to do in the first few hours I'll set up the criteria, rules and all the tools and in that process we go step by step in how, the way, and how we set out to do it and which way collectively we set out to be able to conform with the international rules and regulations. Make sure you have your ID and passport in your pocket, and if someone asks you how did you immigrate, you say I did not immigrate I am walking around my own nation and this is my ID. Try to understand who is carrying what, what you carry. These are serious conditions, we are not talking. The Wright brother, they took off 2 brothers, now we take off as a family. We all have to understand the criteria of the game. (1:16). We have to teach everybody the T so rapidly that we open a different direction into world peace, space travel, creation of ofod, energy, and accessibility of what we call social structure. These are all important in this game from now on. We have to decide if and how we are going to do it. If we see the criteria fit on the first then we go on the 2nd, we fire. Up to now we have met all our blueprint days.
Now any questions? (1:18). Q: About the Iranian flight that went up to the moon but didn't land, to my limited comprehension that I would have needed to create a G pulse and feed that pulse, going to it. Did they hold that G pulse from the back feed of the system if that makes sense.? (... break ...) (1:20). (1:22). .. (Caroline suggests Rick to read the quotes of Mr. Keshe ...) (1:24). (1:27). 40

... What we need to know is how to operate (1:28). can we go to the next step. Obliviously there are some people who do not want us to share this and most probably it's part of what has always been, but freedom at a cost. (I read but I can't go what you want to do, I don't have any voice feed back I can't hear anyone but you can hear me.) What I would like to extend, many of you have tried in the past to understand the T, and have tested many parts of it, that you were not sure that you can use, but what I call the progressive development of the T has brought about a knowledge that needs to be understood about the construction of the plasma, in many teachings I referred to it, but after many years I have watched but nobody hears it, and in that process we go into that step. (1:30). We gain the knowledge, understand the knowledge and with it we go into the steps of the completion of the T. Your systems can't work with controls that you are used to, you have to remember all the background understanding of the behavior of the plasma, work of the Pl in its true essence, understanding how Pl reacts, at what point you

can interact with the Pl. You have to remember how you make decisions on the totality of the behavior of the Pl. Many of you who have used Gans's in a dynamic condition will understand the process very quickly. Many of you will come to understand that the Pl behavior is very much in the hand and the process of creating the conditions for understanding the process. (1:32). The whole structure of the Pl T goes back to the original, the roots, from where the first words were written, and that was if you read from the first pages of Book #1, and understood it, then you develop into this process of understanding and how to setup to run a condition of space. In that process you have, of going through the whole structure, understanding the Pl as a light, understanding Pl as a universal system, (1:34). what's in Book #3, these have to be understood, now that you reach to the point of being able to create systems. You have to develop a full understanding of pitfalls and advantages with what we call use of the T. You have to understand how you have to develop a condition that you always stay safe from now on, .. understanding of it that you can recognize your positioning in respect to where you are, and at the same time many of you will find problems in adjusting to new technology. The whole structure is, we come to the pinnacle of our work. We are in K Seekers 286, with the KS 300 we should be able to have (1:36). a large number of earth's citizens in places like moon, in other areas which we can move to. I am sure once we go through this path governments will become part of it. Then we'll find out systematically all these, what I call games, will hang up. No one can dictate or force anyone, and no one can die of hunger or thirst or no shelter, because it has been the habit of the man to help to share. I am sure that many of you who have much to much will land up in Somalia, or Palestine, or different parts of the world and in that process we see the construction of the totality. ... once we go through the process of what I cal the totality of the work we'll be, (1:38). very much in line for much work to be done by many of us. Mankind is usually kind and has the audacity to test, to try, it's in the nature of the man to be able to stand, what I call the toughness of life, that is how we survived billions or years of life and we evolved. The evolution from now on will be very rapid, this is why in the medical side I left many knowledge's behind, organ by organ because now you understand the meaning of it, why it was done, and the extent in which the knowledge has been covered that mankind, humanity can replicate any part of his organs in the space. We are not looking for discoveries or who has done what first by whom, but we are looking to achieve the next step of entering man into the world, into the kingdom of God. Many of you will have a problem with this, many will have to change position, (1:40). many of you will deny religions, many of you will deny what mankind has done to mankind. The whole structure will be to give mankind a process of understanding, to give mankind a structure of understanding, to allow man to become self-confident that he can take the next step to evolve and develop new understanding of his society. The change of the whole structure comes as we gradually become aware of a large community which we have been part of. We will gather knowledge, new insights to the living, we gradually become conscious of our own inner existence, our own soul. In English we say, I rely on my instinct, but now your instinct is this essence of the feeling of your soul. (1:42). We are not looking for creating heroes but to create those who understand the whole structure, those who can grasp of the meaning of the true essence of knowledge. Try in the next week to remember understand a lot of things to remember, setup groups that you want to be part of. You can start setting up the groups. There are certain members of the KF whom I have taught

certain knowledge's in the past 2 months, that knowledge can't be shared unless you have been told or asked to. For security reasons I have left many pieces of the knowledge with many, many KF K Seekers. When we open the knowledge, the Pandora Box of the space T, you'll say, now I know why I received that message. That has to stay very clear, that, that knowledge doesn't belong to you. That knowledge has to stay, (1:44). until one of the teams reaches the use of it, then we'll allow it to be released, which means we don't want to have a copycat, but we want progressive development. This is one of our biggest criteria. To achieve this I do not look that we achieve space flight condition within the first half hour to day, we look that progressively that all the groups (achieve it). Government officials you have to understand that scientific organizations listen in the background and will all be at it, I hope that they'll be open enough to come out and say this is what it is, the principle is there, this is what we missed so we open a panel and use this channel as a common ground and we proceed. ... In this process we try collectively to bring mankind into the next step. .... (1:46).

(1:48). ... This T is not there to be abused and for those who think that they might be able to do something for their own benefit. ...
(1:50).

(1:52). ...

Q: Is it possible to explain again about the RNA?

Q: What can the ordinary people do in their daily life do to make the peace process faster? We can't make the peace process faster, it's one of the impossibilities. The peace process will come in the process that our governments realize that we are citizens ourselves, (1:54). the only difference is that we are citizens of One Nation. This is the problem we have, what we call stirring up of races, path of belief will have no room, in that process our leaders will find out that they need to be lead to peace.
(1:56). .. One of the first things to collapse in this process will be religions, when mankind will understand the work of his own progress we'll see the end of this mayhem of religions. That's for sure because you'll be shown things which are very clear, so which one do you want to believe, lies on the ceilings of Vatican of whatever chapel, or the history of books which were never written ??? ... peace will come out of the strength of the KF knowledge. ...
(1:58).

(2:01). ... fortunately many of us will see the change. It all depends on what happens next week. It has to be so bad that I do it to enforce the peace. ... The message we are waiting for is not message of peace by different nations. (2:02). It's opposite, if they become ...

(2:04).

Q: Why do we need to wait for crisis to receive this T? Because mankind is not ready yet. (2:06). but in a way you force our hand so maybe that is what the understanding is. ..

.. You can use it to elevate the STM, yes. without a shadow of a doubt ... and we'll most probably see better results then what we have at the moment. Q: Can we make a neutron strength plasma from one kind of Gans? Isotopes of it, yes. If you understand the whole nuclear T and understand what isotopes are, of course you can. You are left with a bunch of, (2:08). what you call, neutrons, that's why you have different isotopes and you can use the proton. Mankind still has to learn another point which is a proton isotopes atomic structure, which you have a proton which behaves as a neutron in the center of the atom, which is a balancer. Yes, it is, itself, answers its own question. Q: ....
Q: What are the plans for the 2 million Chinese soldiers? I don't know ask the Chinese government. ... soldiers are used for cultivating ...
(2:10). . ..
Q: Do souls know each other by name, who am I? Souls know each other by clarity of light, you'll understand this very soon, I have explained this before?

(2:12). (questions)

(2:16). sitting playing games that was going to be played in the Middle East in the Persian Gulf. We see other problems that have been set up. You have to understand that the British made the Saudi Arabia, the Saudi kingdom is a slave to British Monarchy, who are sold out to Vatican, and the Vatican is run by Illuminati's, the Rothschild's family. So we see the bus and we know what is planned, we are prudent that down the road the little chicks grow up to be good. 46

... It's the 50th anniversary of landing on the moon, why haven't we used the knowledge for peace on this planet, instead making more weapons ...
(2:18).

... Q: Can we expect the universal Community to interact with us after we achieve flight? How diplomatically can I answer this question. ... Why do you think I am taking you out, why are you going to the Zoo. (2:20). to have ice cream and fanfare or are you going to see the animals, but this time we take you to the Zoo of the U, what do you expect, are you going to close your eyes and say I have seen nothing, then that depends on you, you can look at it with the eye of the man or the STM, then you decide what you have seen.
Q: How do you reach the soul of the Creator with Amino Acid, Mr. Keshe? ??? Oh my God, ?? You see you are too physical, just because I said in one of the teachings about AA, you don't need to have because if any of you have made Gans's, you understand that the AA doesn't have the matter physical condition as a Gans. That's what it is. It gives you a better combination to understand how your soul is created, not to use the AA to make, to get to that, to reach the soul of the Creator. You again look at the matter of the AA and I look at the fields of the AA. That's where the problem sits.

(**IMPORTANT TEACHING**:)
(2:22). I'll explain something very simple ... when we showed the Gans's in a dynamic system if you remember that the size of the inner ball which became hollow, which becomes the Principle Matter, stays at a certain size, it becomes detached from the matter

point, even if it is held by the matter to confirm its existence. When you use the Gans of AA, and it has to be a combination of it, if you understand, then would the size of that circle open up or would it reduce? You look at the empty space, I call it the point of detachment. It has nothing to attach it (to) to confirm its existence. It's the point strength of the Creator. It doesn't need to have to show. It exists because (of) its power, it shows. You are looking at an empty space of some water of some Cu and Zn, now try some protein or AA, (2:24). of the Gans and see if that size changes and then you'll understand and this is what I always say, it has nothing to attach itself (to), so it's totally detached from totality and what you see in that center is the soul of the Creator, but with its power holds everything else in order. I am that point. Even in the dimension of physicality you don't understand, so when you make a system you always looked at that empty space, and I always said in the essence of creation and Creator and everything He has created, there is part of Him. And that's it, that's what it is. It doesn't have anything in it to confirm its existence, but with Its existence It confirms Its power of Its existence, by holding the water, the Gans in position. You do not need to show, to confirm your existence. Now you understand that in many teachings I explained to you, that in the center of everything, Principle Matter, when you come to this point of emptiness, nothingness, but having the power of controlling everything else around you, (2:26). it's the existence of the Creator. Mankind has always looked that he is within the Creator, but the Creator is within the whole entity. Now maybe some of you understand. That's your common denominator with the Creator, and when you can make that circle large enough that it becomes the whole of the ball, you might have reached the level of understanding of the work of the creation and the Creator, because whatever is outside that ball, which is the totality of the universe, it's a confirmation of the existence of. You always, all of you, went to ?? the ball as much as you can, where in reality where there is nothing in the ball and can dictate. You'll understand. This is the point, your point, your confirmation of existence within the center of your soul in common with your Creator. This is what is in the center of every plasma, every neutron, every electron, without it, it doesn't exist. You looked for the physicality to confirm existence, He looks by not having physicality to confirm His power. If you look at when you look at the shape, size, dimension of everything else outside it, what do you see, balance, perfection. You don't see a little of the Gans over here in the middle or the others. (2:28). It's spread equally, waters which create that boundary to It, what we call the Transition, are still all in balance, all in perfection, when you look at the hollow center in the center of the ball, when there is correct conduct, everything is in its order, that is the sign of the Creator. With not being, having or possessing, but still being generous to give and to correct and to connect. You have been looking for the soul of the Creator and it is there. You have been blind to it. And it is within your soul, if you look in a dynamic reactor you have that ball which is your skull. You have that elements of the material which up to now you kept the Zn or Cu, which is the direction of the emotion layer, you call the blood of the man, that water is the brain of the man, and that center is the STM. It's not that it is holding it in, it's holding with its power the totality ?? Now you know you have ofund your Creator. This is the beauty of it, the smaller it is the more powerful it becomes, but it has to conform and confirm within the structure of the dimension of the matter state of its environment. You have been looking for your Creator and you have been watching, and you're not (aware of it), that's what I told you when I start teaching you next week, many of you will commit

suicide, not in a physical dimension in the lack of understanding of the knowledge. (2:30). Now you understand the essence of creation, possessing nothing, detached, but at the same time with the detachment everything is attached to it, by their choice, not ?? forced. Q: K Seekers have been locked up for autonomy with power generation, for flights, since the governments will perceive there are no longer a monopoly that provides their ?? What, the governments are your prime ministers they'll be the first ones using these at home. ...

.. Q: If the knowledge of the U is field strength how can we tap into this knowledge? You have already tapped into it. (2:32). If you haven't you deny your own existence. That's what the problem has been. This is good (reading the questions myself and answering). I used to do this on the NASA forums, but I answered the questions too good so they banned me..42

Q: N,N-Dimethyltryptamine, psychedelic drug ...
(2:40).
(2:42). It has very low gravity. Rick says about like water. Water is gravity that's why we call the ocean as zero level, it's equal to 1 G. that's why you feel this one
Any other question.
(2:44). Q: can you explain the difference between doing what you like and doing what is correct? ... give some examples... What has happened is that a lot of us have taken the wrong path, we think what we like, we do and is it the right thing to do. If you are aware of your wrong doing, it allows you to always be conscious of it and you know how it needs to be corrected. If you do what you like and just even know the consequences of it, it doesn't matter I'll do it (anyway). So we got to do what we like which means we have the freedom but if we do what is correct it means we have conscience. This is one of the biggest problems with the humanity and not realizing this, If you are, you have a total freedom to do as long as you don't harm something else, or don't even damage yourself, then (2:46).

(2:52).
(2:54).
(2:56). ... Q: Are there any bad emotions and how do our emotions play in our soul's elevation and development, should we only feel good emotions or do bad emotions have their part too? Everything has a bad part, if its a good emotion then you're a happy dog, if its a bad emotion, you're an angry cat. We need one to understand the other, but what do we decide on the emotion. What is bad for you is good for me, but you have to evaluate it against our own feeling. Q: ?? the battle is being ofught within? (2:58). Very much so. It's being aware of, being part of, it's important ?? how much you evaluate, value your conscious. We try to bring a lot of things in order, but why do we need to do that. Why is our conscious important to us? Because it's the behavior of our soul. ..
Q: I would like to share a picture of the aircraft that is making the big bang . (3:00). We have seen that one, breaking the sound barrier. This is a well defined science, a known knowledge and we know why it happens, It comes from the compression of the air molecules because you have a moisture. ... 1950's technology ... Q: It's what we have not learned or understood from that? We learned a lot, we know a lot, but the thing is

once you go through the light barrier you get very much the same thing. Q: Let's have a look at the sight briefly. Rick shows the picture of the jet breaking the sound barrier, looks like it's coming out of a cloud. Shows another picture of the 3 stages. (3:02). the first is subsonic, mach1, and supersonic where you have these shock waves. .. We have seen these many times in the space and we thought they were UOF's when in fact, here because it's a matter state you see it as a cloud. the ones which come in the light you see, when you cross the speed of light you see it as flashes of light. 50

287th Knowledge Seekers Workshop - Thursday, August 1, 2019

(The criteria were met so no Space flight Blueprint, Keshe Global due to open next week, Shares are being distributed even to enemies, Universal Council 2nd Anniversary presents mandate which is totally from soul, The UC has grown and matured, Italian KF closed managers have stolen, ,)

(:00). Talks about conference in Brazil and other countries. We will travel to India ... wherever we go might lead to investment in your country, but it will lead to the One Road One belt program of China. (:02). We won't go anywhere where One Belt is not accepted. ...
(:04). We have started Keshe Global in the stock market and we'll sell shares to raise funds for our projects, we are subject to our investments. .. .
We thank everyone who has been on the path (with shares), it doesn't matter who and has supported the KF in step by step you'll be receiving a package, a gift from the Global operations, (:06). They'll be sent in batches, the first batch is getting signed tomorrow, you'll receive an envelop ... we had a long discussion with Armand, even those who worked against us, in a way, they supported us, they'll receive shares, even Red Circle. In his own way he supported the KF to work, it doesn't mean we take grudges, we thank them for what they did at the time they did it. The 2 most loyal people who built the KF from scratch ... our notary and what we call, "angel investor", all been given guarantees inviting that the guarantees have been honored. They both have been informed in the past 24 hours. Those of you who served the KF, we serve you back. We don't look at what you did, right or wrong, maybe to you it was right and to us right, and visa versa. In any progress to create peace we need to make the next step. Legal matters are legal matters, but those who served the KF will be served back. It is a pleasure to have a golden heart like Armand who thinks in the direction of peace, the same as I do. (:08). You can understand all the damages we received, we still respect those who served. The list will be long, gradually we'll (get to it). ... There are a number of Belgium's who were the backbone of the KF and brought us where we are will be receiving the same gift as the

others. Those of you of different colors and nationalities and races who joined us will be the same. Do not get upset if you don't see your name, you have to be patient we are 2 old men and we have to approve a lot of things. In that process we build a just and correct nation. Many of the leading figures in the KF have been thanked with generosity, it's a public company with shares, that's the only way we can say thank you. All these meetings that you have been in, conferences organized, etc, have built us to where we are. We have no problem in allowing the T to be shared, but we have a big problem for those who betrayed the KF. It's for you to sort it out, not by us. There are people who abuse and use the name of the KF and lie and cheat with the KF. (:10).
.. We can literally destroy all the tools for war, but if we annihilate the hierarchy which the nations have created ?? peaceful conditions, we have to for some extent follow for the time being. Iranians will not be able to use any nuclear weapons which they don't have, as much as the Americans who claim they have many. But now it's obsolete. Now you understand why we said we don't need nuclear T and that we have better then this. Why do you want to go from A to B on a donkey when you have a jumbo jet, like Iranian scientists. If you think the jumbo jet doesn't exist, it's the way of your imagination. .. (:12).
... I came to China 2 years ago with black hair and I leave with grey hair. It's taken a long road to achieve what we achieved here, and will we carry on with it. We have a good working team with Armand and me, we keep an eye on everything but at the same time we keep an eye on what we came here to do to. Armand has done a lot to bring K Global on line. Let the show to begin. If you want to see the real space T join us, but if you are there just to waste time there is a city called Vienna it's a beautiful place to go sightseeing. (:14).
.. we have started the game ...
... The Chinese are refusing the gifts saying we don't need it or deserve it, the Africans are saying, can you tell us the value, it's ours when can we sell it, and those who serve the KF through me, they arrive, thank you very much. This brings a lot of logic into the mixture of the human race's state of mind, family. Do we have the members of the UC present ...
(:16). The UC will move to Malta ...
(:18)... Video presentation honoring Mr. Keshe Birthday (:22). UC Mandate by Flint Universal Guidelines:
(:28).
(:38).
(1:03). (Mr. Keshe). Thank you very much, It is amazing how the UC has grown

(1:06).

(1:12).

(1:20).
(1:24).
(1:28). ... KF Italian stole from the ofundation ...
(1:30).
(1:36).

(1:38).
(1:40).

(1:46).

(1:50).

(1:58). . If anyone tries to stop me. I am in the clothes of a man, but I am more then a man...

Any question.

(2:00). Q: Is there going to be a teaching tomorrow? Is that canceled. No it isn't canceled, we said if the condition we were expecting wasn't met, we would do the teaching. That condition is now been met. I said, if it is so bad then we would teach. You have to understand that it must have been good that we are not teaching the blueprint this week. But as I said before if the situation would get critical then I would have released it and taught it. I think the governments listened and understand what was the criteria for not going that way. We see now what we wanted, we said we'd release the blueprint of the flight, which would have brought a lot of disorder to a lot of governments. We are on the path of peace. I said to the UC meeting if it gets bad we'll release and if it is good we'll go. So we see the good side of it and that's why now this is a peace dividend, we'll teach the governments, the scientists of the governments to start developing. In a way we are giving a carrot for being a good donkey in carrying over the work of the peace and this carries on. Anytime we see problems we'll release. It doesn't mean it is shelved but as you know I always look at the long distance, far, far away from where we are and I think humanity by 2020, which is a very auspicious year if you are a Chinese, (2:02). especially on 21, 22, 23rd of April, it's a good time to start the work of peace.

(2:08). First hospital in China using T will open September 1.

(2:20).

(2:22). .. KF Global has no legal connection to the KF. But many members of the Board of Directors are active in the KF. ... (2:24).
(2:26). .. The time of Apollo is over. The American secret service ofund out that the Russians are about to send a manned craft to the moon to orbit it at the anniversary of the revolution. And Americans threw everything in the fire to be there before even though their system wasn't complete. It's the 50th Anniversary of the Apollo landing, .. ??? what the truth has been, everything was scrapped to be ahead of. With this T we don't have that, it will be scrapped not to be behind but be equal to. I sat in front of a high ranking officer very recently and I could see the shear fear of peace. They're geared up for killing, war and enemies. What they consider as enemy is teaching the tools of peace to them and it is shocking them. You have to understand how bad it is. It's shocking to them and the

brain freezes and the butt sticks to the chair frozen, because what am I doing here, as a high ranking officer listening to the guy telling me everything is gone, I have no superiority but I still have to keep my face. (2:28).
.. Q: What does it mean that salt is G, she has been studying the recent workshop ... ? She's 78 years old. ... She is very salty. Rick says, salt attracts, pulls in, holds, but how can it be G in terms of the plasma T, is it the relationship to other elements that are less G, so the same salt is G to AA but not to ??? ? (2:30). John is doing research on this. Let John answer this question next week because AZ is heavily involved in salt testing. ... 45 (2:32). .. The teaching is not always the science, it's the ethos of the science, and its alternatives and opportunities ...
(2:34).
(2:36). Talks about stealing in KF Italy which he just ofund out yesterday. ..

(2:44). .. We have huge secret information that will paralyze the Italian government if these people are not handled. 24

.. Happy birthday to the UC I am sure you're going to be here for the life of this planet, 1 or 2 million years left of it. ... (2:52).

(2:56).

(3:00).
(3:02). Ella presents KF Plasma Times August. K says this issue is very important because it's the first time Chinese elite scientists publish in the Journal. The blue flower represents beauty love, inspiration ... (3:04). 3 years since the Peace Blueprint. What does Peace mean, UC Mandate , Elevation of soul .., We are here to serve, How to spend the Summer Break, Feedback, Plasma Community in Bulgaria, (3:08). Chronic Ofod Antigen hypersensitivity ..., Recommendations for MaGrav Units, Gans of Ofod, (3:10). (3:12).

288th Knowledge Seekers Workshop - Thursday, August 8, 2019

(USING THE FIELDS OF THE UNIVERSE; START OF THE FINAL SOUL TEACHINGS: Conferences to show new unseen technologies to share with militaries and space programs worldwide, It's a push for global development, Shows video, Mr. Keshe starts to teach again live and will present new technologies that we have never seen, In the new teachings from now on we don't need the Matter, Nano or Gans to create fields and energy we need only the fields of the universe to create everything we need, We need 3 field forces to create anything and we have up to now learned how to create 1 of these through the Gans, The 2nd field are fields that come from the universe or the

Creator they are the framework without which we can't operate, the 3rd field comes from the salts which connect the origin with the manifestation, Space flight date in 21st April 2020 in Theran, Neutrinos are just energy packs, In the universe the strongest fields try to make contact with the smallest and he draws a relation between the Creator to universe to galaxy to man to atomic and beyond and then it goes back to the Creator, The fields of the universe are mono-energetic and travel instantaneously and he teaches how man can interfere with them to create anything anywhere in the universe, The fields of the Creator are like water hitting the wall and splashing back the soul of the man is like the wall it absorbs and gives back what it doesn't need these are 2 fields and the third field comes from the STM through his wish to manifest whatever he needs, Therefore the STM is part of the Creator and also creates, Nikolai asks about the Star Formation (SF) as Amino Acid and is taught how 4 souls can create a SF with a pure soul in the center humble enough to give and receive, Stonehenge was built as a SF hidden within number 12, Role of Universal Council to create SF with their souls to create The Protection for humanity, The true role of the all the Councils and how we'll interact with the Universal Community, "This is how you build a starship", This is how the pyramids were built and used by humanity to travel the universe, Souls have decided to be here for this change in humanity which is NOW, , , ,)

(:08). .... We are moving into the final phase of sharing the T development but this time we are sharing with a number of governments and public directly. (:10). This is why we have set up the first conference in Austria at the end of September, we'll invite space agencies and militaries to be part of this conference. This is a prelude to another conference a few months later which will be the beginning of what we call CIRBIRU this is a combination space program (China, Iran, Russia, Brazil, India and US). We have already made the offer and invited the military from both sides ...

(:12). .. Any of you who want to attend we have allocated very limited numbers, because we have to see how the governments respond in sending delegations or how they participate in this conference. To get the attention of the governments that the new T is a breakthrough, new totally unseen technologies which will effect the defense, space and every other aspects of the T will be openly demonstrated. This means we'll breakthrough and if the governments do not go through with the process of collaboration, the KF K Seekers who are present become their ambassadors to separate it and to bring it out. Any of you who attend the conference will become part of the first One Nation power force in T and this is why we are very careful who we invite and allow to come in and any of you can join. We are not making any difference in who you are, as long as we know who you are , one of the KF scientists or K Seekers (:14). or those who understand the T and want to be part of it we allow you in. The condition is no pillow talk, nothing can be done, because then you become part of the structure to develop the T worldwide for all the nations together. ..

(:16).

(:21). Start of video about flight ...

(:34). We are back to teaching live and we try to do this kind of teaching because it brings a lot of dimension and new understanding and a lot of reality rather then just being a voice from the box. ... We'll present technologies live, you'll units and discussions and new technologies you have never seen. I'll explain what we have to do to break through to the next level of scientific acknowledgement and to the research. The reason I had this tape (video) played is because it said everything that we want to discuss and everything we could imagine that we have. (:36). In the original teachings we started with matter state which is close entanglement, if you look at this still there is a space gap but it is tightly controlled (Nano). Then we came to what we call the separation of these atoms (Gans), then we came to the understanding of the individual atoms as they are. We have progressed to the point where now we use the M fields of these elements. the process of the new space T begins here. Whatever we learned (up to now) was to bring us to here (today), from now on is where the new teachings start. We learned a process that whether it be a an atom, a cell of the body, the cell of a plant, or any other thing, it has a center, a soul, the inner being of, and it controls it. Now in this process, this new understanding, we live without and only with plasmatic magnetic fields. This will bring us a totally new concept and understanding where up to now we needed the Gans's or the Nano material or the matter to create fields and energy. Where from now on we only need the fields of the plasma of the U, (:38). to create every dimension, now that we understand that this (the former) process is no different then the process of creation in the U. This is what you are going to see in the conferences and what is going to be the objective of the new teachings and new process. We go to the next level, which is simple, we have fields, how do we convert these fields to what we need, we don't have Gans's or saltwater with us in the space, we have no Cu and Zn in the space. How do we collect the MG field forces in the U to work for us to bring us new energies that we can convert these to what we see, what is needed to be. Do you want matter state, or vegetation or what we call animal state, or do you want to come to the level of the Creator. Now this new T brings us to this new level of understanding, to the totality of the work of the U. Man becomes independent of what he knew and knows up to now. How do we attract these energies, (:40). and bring these M fields together to give us the possibility and the chance to survive, to replicate, to accumulate, to make a new cycle of life in the space. To what extent are we going to extend the knowledge, in what limitation do we accept to be the limit that we can understand, or we make the knowledge of the U unconditional, limitless, and depending on the intelligence of the man. It comes back to the original teachings, where did everything start from? What are these fields and how do we know how we can absorb, and how do we know we can emit from what we absorb, that in interaction of the two we can create what we need. I think if you understood the original teachings, when we had people who went and started creating matter, we noticed that there is a need for a new dimension of understanding, new possibility for work, a new way to be able to create anything at any point. You need 3 field forces to be able to create anything at any point, at any destination in the U. It even comes to be the skin of the man. (:42). For the skin to manifest itself you need 3 layers, to give the possibility of life to man, we call it the top, middle and bottom layers. In the space we need to bring 3 field forces which in fact they have a common denominator energy or M field strength,

and then in interaction of one with the other, we can create the entity, the material, even create the strength of the soul of the Creator. Now you understand that the game has changed. Up to now we looked at what we can release and how we can create Nano materials and Gans's and what they can do, but now we learn a new way and whatever we have done up to now has been of the three (fields) needed. Up to now all the teachings have brought us to this (that is one of the 3 fields needed). To be able to survive in the space we need 2 more (fields). If we can bring these 2 together with what we already know then we truly become man of space. (:44). One thing for a fact is we need the fields of the U, without it we can't operate. It's a framework, it's the cage, it's the field forces which dictate how in totality the whole 3 manifest themselves. If you look at it, that's the skin of the man. the top layer. You have to have a condition of the environment that you can manifest yourself within its structure. You need to understand how these fields of the U effects and interacts. If you look in the structure of the planet earth, without the fields of the sun, it has no manifestation and creation. Up to now we learned about this, and now we learn about this (fields of the U). How do we absorb, identify, classify and how do we replicate these forces (fields of U). Then it comes one more thing, a field force which is in-between the 2. Without these field forces there is no connection or manifestation, there is no point of interaction. The fields of the center of the U travel billions of kilometers but they don't show themselves until they reach this state. But in that state even if they reach, they need an intermediary, something that connects the 2, matter state to the fields of the U state. (:46). Where is the conversion of the matter state with what we call, the fields of the U. Without this point man will never achieve to become the man of space. In the body of the man we call these the salts. In the presence of an intermediary, in the U we call it transition lines, which have to have a common denominator between the point of birth and the point of manifestation. this is what is to come and what we need to learn and is the next generation of the teachings that will come. I know our American friends in what I call the military are well on the line and they know what we are talking about. To capture a meteorite or an asteroid you need to understand the MG fields or what we call the Inertia. In the language of the communication we call it, whatever frequency you want to put on it. There is no difference between the frequency and the Inertia. Or scalar wave and Inertia, it's a collection and separation of the 2. In the space T what you'll see is very simple, we create the condition of the center cell, the common denominator, (:48). then as we do, we encapsulate. Now it's not two separate ones, it's two as one. Then you have to match to the fields of the common denominator. You share, you control, you understand, you create motion and in that process of creating motion you can create anything you like, fields, radiation, ofod, matter state and everything else. And if you happen to match you make one single soul out of the 2. This is the point if the man understands he'll become part of the soul of the Creator, because all of these sits within the structure of the creation. But how do you do it, create these fields and how do we show to interact with these fields without the state of matter, is what will be done in most of the conferences to come. We'll keep these parts totally out of the domain of the public for security reasons and for lack of understanding of totality, as they will not know how to handle the situations that will come up. In the presence condition which we are heading for, we can manifest the condition of any entity be it from any part of the U. You call them Martians or coming from planet Zeus. This is the time from now on we open the door of

interaction, (:50). with the Universal Community through the development of the new T. It's for the governments and the governing states of the KF, as the U Council to start the program to work as one team. We bring the T and in the process we'll be sharing the knowledge with the governments as (a) governing body, we'll start the collaboration and operation of changing the process of the ofod, the interaction of materials, and communication. As I said at the beginning of the teachings today, last time we relied on the governments for two and a half years, it did not work. We brought the KF K Seekers and they tried everything, and now what is here is very clear, KF K Seekers in conjunction with governments. We'll govern as one, on the ethos of peace, we'll share knowledge on the agreement of the totality of the peace. As I said, there shall be no more war. We have seen it, and we'll not allow it to happen. In that process we have to create a condition where as we can dictate the knowledge and technology, we can dictate the terms of peace as one and in the future to come, as the totality of One Nation as one group. Those of you who attend the conferences and teachings you'll become that part of the governing body. Some of the conferences in the future will be totality between the U Council members and the present running state of governments. The only body which will not accept to negotiate and talk with, (:52). in the UN because there is no unity in the UN. I have invited the American military, Iranian government officials, the Russians, Chinese and every other person involved that we show the power of the T, the last week of September in Austria. From then on we take steps, we share knowledge step by step, and the full knowledge for the development for the space flight will be around the 20 - 21st April in the beautiful city of Theran. From there on we shall see. The Americans will be present as much as any other nation and hopefully by the time we get to this point they will all have worked together not to be embarrassed that they don't have the same T. This is the beauty of sharing knowledge and being strong enough to understand that we can do it. At the same time there are other parameters which come into operation, M fields in the U do not travel the way man has thought up to now, from the point of inception to the point of interaction and manifestation, is instantaneous. This for man to understand is a big revelation. What we see as a depth and lights of a star, (:54). in the eye of the man, and we see all together, is because we carry the MG field strength of the star in our body, because in common denominator we were all created from the same fields coming from the center of the U. On the other hand, fields which come from other universes of different strength which create other entities in this dimension are not foreseen by man. We cannot see (them). In the coming time when man travels the depth of the U, he'll come to understand that there are many objects which have no similarity to the structure of the U and the man, but they have a common denominator where in fact they're from the interaction of the fields of the man's U and the Unicose. In so many ways part of the STM is created from the same source and the totality of the forces that you see and the fields all come from one direction and that is the soul of the Creator, and in the same way it shines in all directions. How do we create, how do we absorb, and how do we change these conditions, to what extent can we, and to what parameters do we, and to what strength of the fields which you already know as Gans's or matter state, you can deliver these technologies. (:56).

Let's go back to the teachings.

The most powerful fields try to make contact with the smallest fields. If we look the process is very much ?? In that process this be the soul of the Creator, this the soul of the

U, soul of galaxies, soul of solar systems, then it comes to the soul of the planet, and then there we are the STM. All of us have one common denominator together. This common denominator is where man will find the return path. In the teachings of the books we call these (Creator) the Principle, we have called these one by one the Transition because each one has lead to the manifestation of one thing at the point of their manifestation. If you look the only way the U can show its manifestation is by the interaction of the field forces of its internal ?? with the light of the Creator. (:58). For a galaxy to manifest itself, now not only you have the fields of the U but you also have the interaction of the guidelines of the Creator's fields. If you understand this and go into sub-atomic and nuclear based there is something very interesting, even the soul of the atom has a line of creation. If we understood this part then we see that there is everlasting continuity in this. In this position, this line will carry on. Man and atom is not the final point, a nucleus and neutron is not the final point. This is the point we see, and if you are a galaxy this is the point you see, universe, solar system and the planet, there is more beyond which man needs to understand. In the world of physics we call it sub-atomic, but in fact, it's a world of creation of its own. If we truly look at the whole point of the creation and we call this point A (point of man), and we consider this whole lot as a totality, if I am going from point A then the point of the Creator is somewhere here, (1:00). there is much more to go, but mankind doesn't have the intelligence or knowledge to see, because it's the same when we knew about the table and chairs, and then we got to know about metals and everything else, we go to know about the atom and nucleus, and a proton and electron and now a plasma, and we are just about here in the knowledge of the creation. There is a lot more to go. the man more man becomes intelligent and can go down this line, he'll find out much more truth which is in fact the totality of the whole lot, and goes back to the Creator. It becomes so small that itself becomes the central ofcal point of the line of the Principle creation point of the Creator. If you understood this and you worked on some of the plasma technologies, especially the dynamic systems, you understand exactly what I mean, this is not theoretical. A lot of you worked on this and in that process a lot of you know about it. A lot of you created the dynamic center point of your dynamic systems, and you just ignored it. Now you understand how and to what extent you have been blind to the knowledge and what is to come is literally (1:02). what we do, we create a new dimension, a new parameter, and that understanding is that it will manifest itself that from now on that we become the creator of any states, be it sub-matter, sub-atomic, sub-nucleus, even sub-creator. The totality of the knowledge has been taught, it's now for K Seekers to decipher it, and in the process of organizing everything we come to understand a new totality, understanding of totally new comprehension of where and how, and from now on we go back to from where we came from. How do we extend this knowledge. What is important for us is to understand the concept, the principle behind the concept. (1:04). To understand that the process of creation is mutually reversible and one cannot exist without the others. How we will fit this into our knowledge in the coming time is one of the most important parts of our work. How do we actually come to understand more and more the understanding of totality. The fields of the U always travel in a very systematic way the only time we see frequency in it is when the Pl comes into contact with the lower state of matter as it tries to penetrate it. The fields of the U are mono-energetic, both in G and M and then they carry what we know as 1 G in the center. I have taught this before and you understand very clearly. You see frequencies not in Pl,

you see them in step down in the field strength of the Pl, call it matter state or field state. (1:06). If you understand this you can move very fast to the next step of knowledge and creation of every other matter in the U. It's the man who dictates where the vibration will be, and that vibration will be stone, gold, ofod, or honey, or if you can go above it you come to the strength of the soul of the Creator. What it comes to is very much what we saw with the work of Peter, he created the fields and then he dictated the strength of the frequency (draws 3 circles as reactors). It rains whatever you like. In the space how do you manipulate these, how do you stop the fields of the U that the interaction of their motion leads to creation of the condition that in interaction with the lower fields leads to creation of matter state of whatever you want to call it, be it STM, be it material of the man. The T of understanding the work of the U is to understand how man can interfere with the mono-energetic field of the U, (1:08). and understand which field is flowing in which direction, and if you develop further in understanding, it's very simple you create a condition that you become both sides, this is the STM. This is (like) the radio, with a power supply and 2 cables, one to fed and one to send back what is added to, this is for example, why a lot of you have a problem with the MaGrav systems, you haven't understood that the MaGrav system is a point of conversion of one to the other, and what you can take from it. The fields of the U in their interaction with the other fields might show us some signs of resonance or what you call frequency, but then you have to find out what is happening in this point of the resonance and the frequency, what has manifested itself that you can't see. The universal fields are like motorways, one flies opposite to each other with a space gap, and if you introduce for example, (1:10). another field from another dimension into it then you come to the point of manifestation of the new fields, new strength, new dimension which is a combination of the 3 (fields). So if you understood then you only need 1 field, 1 unified field to create everything you need. Because if you understood you can take the field and create a point of interaction and let it go back. That is your 2 fields. And then if you are clever enough and have understood the rest of it, what is used here, can be used as a third field. So any single force, and single MG field force is in fact, the source of life on its own, singularity of existence in the dimension of the creation. If you are on planet Zeus you create the conditions of planet Zeus, and on Mars you create the condition of Mars. With 1 field you can create that condition. So in the work of the U. in the understanding and work of the T, man comes to one thing, unified field theory, that in totality by interruption of the condition and this introduction, it creates a feedback that it keeps the 2 and what is inside and has been used, can be used itself as one (field), (1:12). that it leads to manifestation of any entity at any strength. But at the body of the man this point of interaction is called the STM. Through the absorption of the fields of the U through the STM and the feedback of it, man can manifest itself in any dimension, at any point, anywhere in the U, as the ofcal or center point, is itself. In fact if you speak the language of children, if I throw water from a hose pipe, the water will carry on to go as far as it goes, until it hits the wall and it comes back, then we know there is a wall, but at the same time, this wall, as it splashes back, it retains some of the energy of the water, so in fact, it dictates what goes back and what it absorbs. In so many ways, the STM is that wall, is that process, and it only needs the light and the fields of the Creator by interaction with itself to manifest itself as any entity, anywhere in the U. Absorb it in the strength of the U, you shall make a U. Absorb it in the strength of the STM and you'll manifest the man. As simple as that.

Then you understand why the earth is the nursery of the souls of the U, not only this planet, as energy converted, at the strength of, it becomes the creation of its own strength. As we said, when you look from outside, (1:14). the STM is the same as a soul of a star. It creates its own planets, its own living entities and its own dimension. In the space travel we change the STM to the soul of the captain or the one who accepts the totality of the responsibility for the lot, for those who like to go picnic together. Now your job is, or part of the KF K Seekers work is how to control to understand this conversion system what we call the STM, or what we call the reflector of the soul of the Creator. There is nothing in between the man and the Creator accept the lack of understanding of the man of his own potential. The stars, the galaxies, and everything in between is the interaction of the fields of the condition of the U, the STM is a U on its own in interaction with the soul of the Creator. There can not be any other way, if the man doesn't understand, unless he needs others to confirm his own existence. Then, do we need the spaceship, the galaxies, and everything else, to return back to our Creator. In the process of the conferences coming up, we'll teach this process, gradually backwards. The completion for a full flight system promised 21st April (1:16). in the beautiful city of Theran. Those of you who follow the conferences, step by step, will gather the information, to be able to complete. Then the KF K Seekers as a force on their own, as what we call One Nation scientists in balance with the world governments. As we carry the lot we become. Any questions? if you are not lost in the maze of the fields of the Creator. (Rick finally speaks up about the microphone ..).

If you want to restart the whole teaching. No problem I'll start from the beginning. (1:18). ... Q: If you decide to go back to the Creator can you manifest instantly anywhere else, or once you go is that it? Of course you can because it's a dynamic flow. Do you think that when you get there you would want to come back? Or will you become like the sun, you'll be pushed back because the others ?? weaker in energy then you can. The beauty of it is, is that when we have such a point of the strength and one of the weak, it's not the strong which dictates the position of the weak, (1:20). it's the weak which gives the confirmation to the existence of the strong. ... When you become weak enough the Creator puts the whole of the energy of what it needs for to balance you that you become one. So you are part of the one. You see you couldn't hear me, it means the mankind wasn't ready to hear the truth. So you have to listen very carefully with all the noise in the background, as you said, muffled, that you might hear what I call, the knowledge of the U, that you can carry on. And in this process that is what it is. When the light, the fields and energy of the Creator comes to enligthen the STM, in giving so much it becomes part of the STM and the Creator as one. This is how the universes expands, the expansion of the Unicose comes from this principle. As the energies and the fields move further and the strength of the soul of the Creator tries to reach them, it creates new dimensions and then new universes in this new dimension. This is how the creation comes about. This is the true essence of creation. (1:22). It's very much when man starts moving from fields to fields and we went to villages and then we expanded the villages, it became too many and we weren't happy being in one village and the rest of it. What did we do, we went ... it became more people and some moved out, and again some moved out, the villages connected together and it became towns and cities. Then the towns grew and they made nations and then we made the planet. It is the same thing with the process of creation.

When you have the soul of the Creator, and then you have the fields which travel away from it, it radiates, now it tries to embrace it, and in embracing it, it gets to the point of what we call a ??? (draws a circle around it) and then it opens up new dimensions to hold on to, and then they radiate more and more. This is how the U expands in the total dimension of the Unicose is created. Read Book #3 and you'll understand this immediately. If you look at the Unicose and then at the atomic structure, we started with a H with 1 electron and 1 proton, then in field interaction and adding together then it becomes He and the rest and the rest. (1:24). It's the same if you look in the solar system, you have the sun with further radiation and interaction with its environment lead to creation of the planets. The same thing with the Creator, an extension, you call it planetary system, or you call it universes. 22

(1:26).
... Any other question?
Q: Are there 3 elements needed for manifestation? 3 fields are needed for manifestation. 3 fields or 3 conditions are the prerequisite (1:28). for the confirmation of the existence. It doesn't matter if you look at it as a physical dimension or as a sound or a light or whatever. Rick says, and you have mentioned the 3 layers of the skin as important both for both the skin of the man and the skin of the spaceship. Yes, and the skin of the Creator. Do you want to see His skin? Yes, let's add some examples of that. We have to understand one concept or one principle and then you will see it fits into everything. Q: So the expansion of the U is knowledge? Where does the knowledge come from, the expansion of understanding and intellect is the knowledge not the U. Those of you who come close to understand the T and the knowledge in its true meaning, (1:30). will come to understand one simple principle, and that is it is us who puts limitation on the understanding of our own existence and the existence of what we call our environment, and what we may know and what we may not know, what we call the true life. The true existence is not in the physicality of the body of the man, it is understanding the totality of the work of the U and in that process we can do many, many things. (There is a .. teaching in Iran tomorrow) (1:32).
... any other question. Q: 3 layers of different strengths are needed but are all 3 of the same state or are 2 in the state of Gans fields and the third in a weaker field state of Nano? You can choose any, let's see what the outcome is, there is no limitation. What about one in the state of the matter, or 1 in the state of sub-matter. If you look at the logo of KF SSI especially of the Institute, it has a beautiful meaning, it was done by the Iranian physicist when they developed the spaceship institute logo, when you look at the star or circle in the middle, (1:34). that is the soul of the Creator. The beginning of the beginning, it depends on where you stand from and near to, and in any direction there is nothing but fields. This logo was designed in the total understanding of not only physicality but the dimension of the STM by the Iranian physicist. You have a center, then a star, star, fields, and then a cloud, what we call a galaxy, the dimension where the manifestation appears, it depends where you are on it. This (logo) is a very true meaning of the spaceship, because in the space it's what we are, where do we go and in which direction, and in one position, and which stars we pass, and where do we want to manifest ourselves and which strength. If you look at it, this is, you have a spaceship.

And this is the direction of the flight. We have to decide on the strength, on the purpose, on what extent we want to go, to expand. Do we want to expand the knowledge in creating or in ?? intellectual understanding, or in the field forces of the U, (1:36). Now everything is in one pot.

(1:40). neutrinos
.. separation of the atoms of water is because the 2 O are fed by the H and the H continuously releases energy, but it has a MG bound with all 2. ...

(1:44). How nuclear technology developed and a lady physicist discovered the centrifuge ... later she shared technology with Russians to keep nations equal and at peace ...

(1:50).
Q: Jallal, The sun is the sender and we as humans are the receiver and we see the actual sun because of our environment, if we change the environment do we see the sun in a different shape? I am going to answer in a very deeper way, if you se the sun through the physicality of the eye, (1:52). what happens if you look at the sun through the STM, would you see the Creator? That's exactly my point Mr. Keshe. That's how I answered you. Now what did you understand. You see if the dimension of the physicality of the eye of the man would allow him to see the U, what about if you look with the stronger part, would you see the soul of the Creator. Here man is always physical, here he is in the dimension of the Creator. Which one would you like, and now you understand why I said many times I am ashamed to be in the body of the man, because my soul sees the soul of the Creator. But our work is to make mankind get the same understanding. .. Would you still like to see the sun and the stars or would you like to see the Creator of the sun and stars? Are you happy with the servant or the master. This is what we teach for man to understand the station of his soul. (1:54). Next question.
.. Q: Miguel shows ...

(2:00).

(2:04).
trying to get photos . (2:06).
.. scalar waves are passing into the walls. That is the beauty of scalar waves. (2:08).

.. I put a plasma ball with a static reactor around it and it's attracting all the fields. ...
(2:10). ...
(2:12).
(2:14). .. Mr. Keshe teaches, about the colors in the balls ..
(2:16).
... Miguel tells his dream with Mr. Keshe. .. (2:18). ... Many people tell me they go to sleep with my voice and they have a dream about me and I say my soul must be a very busy chap at night it goes everywhere. Any other question. Q: What creates or causes the motion of the fields, the movement in the process of creating the potential difference,

intention or desire? It depends in which mood you are in, giving or taking mood, either way it creates a condition and a position. This is one of the parts where we say, how do you feed your soul and in one of the teachings I explained, you have to be soul weak, as the strength of the soul, (2:20). compared to the fields of the U that you get fed by, and at the same time you have to be strong enough as a source that you can feed the soul of the physicality as they are weaker in comparison to you, that you, my soul can feed and if man learns this he can feed himself in the space. In what are you weak, is G and what you are strong in is M. If you understood that you end up with that (?? back to the Creator). Q: Is the ofcused and humble intention to reach a certain destination the key to safe motion, interplanetary or beyond? Either way you want to call it. I think when I sit here and look at the sign of the U Council that explains it in totality, when you look at that picture. Any other question. (2:22). Q: If one man can reach the point of peace with the Creator, then everything in between those strengths in man's U will balance accordingly in between. Is it correct? More or less, it's what we call when you find peace. Having peace means having a balance and that's all it is. Any other question. Q: Is the spectrum field effect, plus or minus 10% of the Gans's, created by the process of Beta or inverse Beta decay? Nothing to do with Beta decay. It can be Alpha, as much as Gamma and cosmic rays. ... we never counted, do universal rays come into it? Do they effect it, penetrate it? If you have neutrino's for the planet you have to find out, some of these neutrinos come from other universes which crossing the whole span of the U and getting to us is just having enough energy that they still don't reveal themselves and go through us. If you understand the position of the planet earth, (2:24). on the edge of the galaxy, we are somewhere here (on the end of the spiral), getting pulled further into one of the arms. If this is the edge of the galaxy, we receive more fields from the U then from the planets of the solar system, or the stars which are more inside, because when you get to the center of the galaxy it's more or less unified, most of the fields are absorbed by the galaxy as a total structure. Part of the evolution of the life in this part of the universe which we are part of, are created by the fields which come from the U. Part of the cancers that we face are due to this position. As we go further into the funnel of the galaxy or the Milky Way, we'll become more immune to it, because there are more layers, (as we go inside) are condition of the interactions become more stable. What they call neutrinos, are fields that have already come from the U and part of the fields which comes from the galaxy. (2:26). They effect us, surely. We know for example, if you have lived on the surface of the planet where at the point of massive explosions on the surface of the sun, you'll be facing the interactions of these fields, we see massive increase in diseases at the point of interaction of the solar system with the solar flares, depending on what this solar flare has done. .. They turn off the satellites because the fields are so strong that they can damage them. At the same time these fields create human AA's or what we call, DNA changes. Years down the line we'll suddenly see a lot of cancers in this region, specific cancers that we don't see any other place and nobody knows why. ...

(2:28). If you can hit a satellite and create damages, imagine what it does to the soft tissues of the body. These are what you call neutrinos, when they embed themselves in you and some of it passes through you and it depends on that time, what was the MG field shielding of the earth in that respect at this point. Many, many cancers are caused by the flares of the sun, but we never understood because we can't relate it, but now we can

relate it. It's very simple with the systems we built to reverse that energy back out. These are energy systems, energy cancers which are virtually unknown but we see in rare cases, we don't see elevation of any materials, but we see cancers because a mutation has taken place. We have the same kind of cancers inverse from the center of the earth. The earth is not mono-energetic, it creates different (? strengths), if you look at for example the G field of the earth which they publish everyday, it has a funny shape, it's not spherical. What happens if you are here at that time because of a burst of energy or change of events inside here, it hits you. We are open to a lot of fields, and when we see a sudden increase in conditions we go back and check the environmental conditions at the point and you'll see why. We are part of a living, live process. (2:30). Next question. Q; Andreas, what is the task or role of crystals or diamonds on our planet? Nothing, it's just a formation, what is the task of carrots and tomatoes. It's just what is formed, it's the conditions that creates crystals.
Q: Nikolai, Mr. Keshe you said something in one of your teachings of the last few weeks that gave me great pause, you said, you have 22 here, and 22 here, 22, 22, and if you add it up you get 88 and the Chinese call it a lucky number. Test it. This lead me to think of the AA's in the body of the man, if you we have 22 AA's are you suggesting that what we need to do is to position 4 beings in a SF, (2:32). and to remove the baggage of the collective emotions to a point where these 4 beings can tune to a central ofcal point of the vehicle and become as one in this way, would it then be possible to tune the group attention to a place where the 4 would like to travel and arrive as a group in this formation?

We said many times if you can find the 4 souls of equal strength, or equal common denominator strength you can create that elusive ship or object or position or school of thoughts, it doesn't necessarily need to be a spaceship. You see, traditionally if you look at some of the structures which were left behind centuries ago, you always see this, (draws a SF), or in some cases it's hidden in other structures, this is where the men used to stand, and the center man, then you'll see what you have created, a SF. They hide it beautifully in 12 positions. If you look at the places or structures built thousands of years ago, (2:34). this is the structure, you create a SF and with this you can create, The Protection. If you can understand this and create the right combination, in a way, then you'll see what happens, you have the 12 and with it, you create what is known as, if I can draw it for you, a 3 dimensional effect (draws 3 circles around the SF, (could be the 3 layers)) of what we call, they themselves with a 4th one, (draws another inner circle in green), lead to creation the essence of the Creator. You have got a lot to learn. And the totality if you like, depending on which source you have a strength in becomes the manifestation (draws another circle around the outside). These kind of structures used to be used, as what we call, the castles of that time. It's very well protected, for the priests, for the people who had a clear soul would take their positions. If you look at many historical buildings, which we call it like Stonehenge, you see this, but nobody understood it. The men stood in a configuration of 12, and then you have the holy priest, the purified man who stands in the center, where each (member) in the group are connected to him by strength. (2:36). According to their strength they used to create what we call, the shielding effect. And through theirs, what goes to the next step of understanding, is the creation of the dimension of the soul that they could see and they

come in touch with the U Community (he drew 3 circles around the people standing). It's a very specific. In time I will teach you this. Man is not ready for this yet. Another few decades, maybe sooner. If you look at the structure of Stonehenge this is what it does. Man of (lower), higher strength of holding, understanding, what we call, pure souls, which are givers, take the center point, they can protect, then the next layer. This is what I said if you listen to the teaching of the U Council, we recognize the UC by the strength of their soul and they are not elected, because when the time comes those who take the seat of UC as we were discussing last week, maybe it makes it much more clear what it is. As the circles (members) of the 12 UC take their positions, you create these rings, you create more dimensions, and then as a soul in the center of the 12, as the totality, you create the protection for the human race in the depth of the U. Now you understand why we set up the UC the way we have. If you bring the picture of the seat of the UC it is on these basis's because we are far ahead of you, so we can't explain it to you. Maybe it is time to explain today. When we set the UC, unknowingly the UC members of the 12 seats of the council will choose, (2:38). of their strength, that's why we brought the different languages in, because they support, strengthen it. then as you have seen in the work of the systems before you get your 12, then you have your 12 that creates the next step, then this makes the soul of the humanity. Then this protects, which reaches the whole of the U Community with the STM as the common denominator exist. You'll understand this very soon. This is one of the reasons why we have not made specific seats for specific people, even the travelers of the U who are here, they can have a seat, because through the creation of the line of creation, they feed that, they extend it (draws rings outward) the more you have the more you can extend this. But the most purest will sit in the center of the ofur. If you look at the structure of the U Council and at whatever structure you have seen (like Stonehenge), it's what we brought before but man couldn't understand, but now you do. Men according to their strength will take their seat in the central council. You'll find out in the future suddenly one of the members will move to the position, because that position is needed and they (the other) just moves back. For that purpose, it depends what discussion (is going on) for the discussion of the soul of the council, what is needed to be understood. They bring the strength because then they can create the direction. Zero time communication, if we have a crisis in the corner of the U, and you have human races which are there, (2:40). they'll send you a message, it's zero time to the STM. This man who is responsible for this, and on the strength of his creation can link (to the area of crisis), and take position. You have a lot to learn yet. That's why the soul of the ... no members of the U Council will ever be elected, they are selected by the STM on the strength of what it can deliver. Because this is what it is. Now you understand, I say again, why do we create all these dimensions with the 4 always look for the center. In the center usually sits the holy man, the purest of the pure. It's the seat of the Creator, where the collective soul creates that position. This is used in the depth of the space by creatures to create protection in the time of trouble. For example if you come to a huge M field, survival is complete, you create these (SF), you stand by your soul, not your physicality and you create the condition. Man will be tested, it's not by your physical dimension. This is why we teach about the STM and this is the reason we set up the U Council in this structure. If you look the Core Team has the same characteristics, it doesn't matter if they have physically left the Core or they are in the Core, or they die. Their soul has already taken the position, it is sacrosanct, it cannot be changed. The same

if you look, we have strengthened it because of the condition of the work of the man to the Earth Council. ?? the EC is the most purest you'll get on this planet (he draws star of David with dot in center and circle around) and through them you'll find what is needed to absorb, totality, singularity, (2:42). it reaches the level of the creation of the STM. When the EC meets you sit with the Creator at the level of the mankind. When the U Council sits in true meaning, it sits at the level of the Creator in the level of the U. The Core Team has the totality of them all (draws a circle around all councils). Everything we put down has a meaning and a reason and when you are mature enough we'll explain, and maybe as I said last week, now you understand the purpose of the 12 seats of the UC. You take 12 pure souls of the UC in the center core to what we call, Stonehenge, and if they stand in a correct way, we shall see the soul of The Protection. Because it was used that way. There are many places in which they were taught in the old time what it is, and they'll abide by it. You know the 12 Knights, it comes from this. Because mankind couldn't understand what it means, now you understand. If you look, always sits. .. the Star of David was created very much similar to the EC, but it was not understood. It lacked the understanding. (2:44). The 6 legs (of the S of D) is the soul of the collective. A long way for you to understand. When you put 4 human being, you understand that you have created that essence of protection.

THIS IS HOW WE CREATE THE STARSHIP.

(2:45). Any other question. Q: If say tomorrow the communications with the mobile phone fails, how will we communicate with through the souls of each other, I communicate with my mother who lives 50 km away, I feel what she feels and live her pain, often I don't know if it is my back pain or my mothers, does she feel my condition, how will I connect with Rick if there is no internet or phone? Was there a phone or internet 200 years ago, now at least you are educated that you can communicate through your soul. Then all these souls are sending messages and it's like standing in a ofotball field with everybody shouting, which one is the (2:46). ... It's very simple. Q: Mrs. Keshe, you once explained to me that the secret sits when you can even join 4 by 4 that, that is the total beauty on how you increase the strength through this positioning? One of the most important things is not sitting 4 in, but finding which one of the 4 would like to sit on the edge, and which one chooses the seat of the middle. This is one of the things that the people will not be able to accept is, if there are 4 of you, you need to be the weakest to sit in the middle, the humblest, that you can receive and in receiving that you can give to all 3. In Farsi we say, ... bring the donkey and get it loaded, how to get that done, which one of you is humble enough to say I am the lowest. (2:48). In Farsi they say ... I am biggest but I tell you I am the lowest because I know you are giving the place (to the lowest). Very much like the French way, the later you come for the diner the more important you are, you keep everybody else waiting. When the 4 come together, in reality, what you call the truth about the life is that, who is the most humblest to be in the center, and not to be the strongest to be in the center, that you can receive so you can give. If you look at the SF this is what it does, doesn't it. You put the weakest on the top that the 3 bottom ones can feed and as it receives so much, like a ofuntain it showers back, that it feeds and leads to creation of your spaceship. This is the biggest problem for mankind, not by talk, humbleness, but by giving of the soul, then you can create. In olden days many, many tribes used to travel this way. You don't need a spaceship, but man is physical, he has to see something and to be in it. One of the ways that ... in time you'll

understand. (2:50). You see pyramids all over the planet and they are about the same time. How do you think it came about? Those who taught the people the way of travel, they traveled to these destinations the same way and built the same structures. Man did not go by boat or ship or anything else. And many of these at that time, they became the travelers of the U. This is not the first time man is going into the U. Now you understand why you have pyramids about ?? this time, it wasn't travelers (from outer space) it was the understanding of those who could create that condition of humbleness. I told you that one day I would open the book of the man and you'll understand exactly what has happened. Any other question. Q: If we humbly wish to see the Creator, will He not come towards us also and we can meet instantly in love and balance, then we can sing and dance together? How do you know that your soul hasn't (already) done that yet? How do you know that the Creator dances? (2:52). Which music does He like? Thank you for that answer, that is so perfect. Your welcome. Q: Is salt being used as anti-gravity? First of all we don't believe in anti-gravity this is the time of the past. But speaking about the salt it is a common denominator, it's a glue between the fields and manifestation. Without the salt in the body you can't manifest any organs, and without the fields of the U there is no salt or no man. If you create a specific salt you get kidneys, if you change it to another specific salinity you get the liver. So it's the salt which leads to the creation of the organs of the man, manifestation of physicality. If you go further into the understanding of this, as Bahula said, that even a stone has a soul, even the stone has a salt, because that salt leads to manifestation of his creation in the dimension of physicality. If you listen to ?? Mohammad, he refers to these things but man couldn't understand. (2:54). He was a very wise man. Then if you read in the Torah, part of it again comes to it. If you look at the totality of the meaning of shalom or in Arabic they call it salaam, in essence this is the greeting to the Creator, and not for man to introduce ... hello this is the soul of the Creator, as is from the man. You've got a lot to learn. Any other question. Q: How finite does the balance become the closer you get to the Creator? What do you mean? I feel in my life I have big sways of balance from one side to the other. The closer and more balanced I become the closer I get.. How finite does that balance point have to get, does it have to be complete stillness? Nothing exists in stillness. There is not a point of balance. In a way you still find your soul. Mankind has to learn the strength of his soul, or understand the language of his soul, where it sits. (2:56). Many of us measure everything in a human dimension and a human strength. In fact once we understand the strength of our soul then we understand the reality of the creation. Some of the KF followers are going that way. I have seen ?? divisions, and a lot of you have started what I call the true soul searching. Many of you get trapped by the materialistic world and many of you move on, and many people will see as they gradually reach that point, we leave that point, the point of physicality. I see a number of K Seekers since last year, it's something that they have been looking for but they couldn't the path, and gradually they are reaching it. The point of manifestation by the desire of the STM. Q: Mr. Keshe did you know the path before I took it? Pardon? Q: Did you know my path before I took my path? You take your own path, why should I know? Q: hum... Did I know my path before I took it? The soul does and physicality follows. You have to understand especially when it comes to the points like this in the history of the man, in what you call, (a) turning point, it's not that we appear as one suddenly. There are many souls who have been made to travel to be here, it's like what we say, it's a point of

destination. It's like a ofotball match, we all have to be there at a given time to watch the match and some of them are the players in the match.
THE TIME AND PLACE FOR THE CHANGE OF HUMNITY IS NOW.
(2:58). All have come together. You see the soul of people like Armand, and other people, they are not here just by accident. Their souls have been set centuries ago, to come to be there (here). The rest are the same, we are the watchers. I said there are many blessed souls (here). All the members of the Core Team are those who have been promised centuries ago to be here on time. It's not coincidence. Coincidence doesn't exist. Q: Mr. Keshe it is shining very brightly here right now, the sun is blazing. Where in England, be careful it doesn't get as hot as France it can burn. What it is, you see this is what it is. It's not just accidentally somebody came and happened to be there. It's the same as when we choose the soul of the Core Team, what do you call? The EC, it's the same, it's the same power. These souls just don't happen, I came, I heard about the KF, the soul brings them to the point of physicality, to be there. It's understanding it. It doesn't matter how much you try to jump off, we'll bring you back in again. This is a point of promise, the change for the course for humanity, and that will be done. Nobody can change it. It doesn't matter what tricks you play. A king tried to stop it, and a bunch of idiots do the same, (3:00). but at the end of it you can't change the destiny of mankind. It has been set centuries ago, thousands of years ago, when the man matures and has the communications that everybody can hear, can communicate, the position of the travel, people can understand the work of the U, and the construction of their own life, and now the man is mature to get to that point. And we are here to deliver. Q: Mr. Keshe thank you for the beauty. Your welcome, it is given by the Creator. What you understand is the simplicity of the knowledge. If you look even in the construction of the Core Team, we had the same, those who were weaker have always stood out. (screen goes black ..)

(lost connection ...). (3:02). .. Sometimes is happens, I think God didn't want me to explain something to you very important. If you look at the structure as I was saying about the Core Team, we had those in the blocks of 3 that they moved out gradually as they did their job, and those who are the strength, the pillars are still there. And the time comes when it is (down) to the last 3 as we call it. To be there, to stand, and that's what it holds, and then it will shine outwards. This is what we call the process of creation. It's not for man. The same process, it's the structure will follow, the structure which was set, which will carry on throughout the U. In the time when what we call the U Council reaches a point, at some point the members of the UC those who are longing (?belonging) to the U Community and not to the earth as such but they are passengers or visitors, you'll find out the mankind will go to them, to their dimension of ?? 12 to reach beyond and at the same time in the coming time, we'll have members from the U Council which are from different universes. But for man it's a bit to early to understand this, they are amongst us. (3:04). It's not something that might happen in the future, but he didn't have the eye to see. You need the strength of the U to see the creations of it, and you need the strength of the Unicose to see its creation. You can't see with the eye of the man. Like I said many times, you can't se anything unless you have a night vision (glasses) of what's happening in the dark. ... once you put on the night vision glasses it's a different world. When the STM reaches that strength to see the strength of the Unicose and the Creator, then you'll see a different dimension. Any other question. Q: Can you repeat how to tune

into the field of the target, such as the Creator or any star, the field of the target has to be weaker so we are pulled to the target? You have to be weaker on one and stronger on the other. On the strength of the U but you become the stronger on the strength of the creation of the dimension of what you need or you want to be. If you can go in both dimensions you can reach (3:06). the process of the understanding the totality that can be in 2 points, you can be in the dimension of your physical strength while you are on a dimension of the soul strength, so mankind in the coming time will be able to manifest in 2 dimensions 1 in the soul of the strength of the physicality and one in the strength of the STM where in fact the interaction of the 2 allows such a facility. So what we see in the dimension of the STM and the dimension of the physicality STM allows the man to manifest in 2 dimensions, one in the soul and one in physical level. As they are interconnected they can cover themselves in both dimensions. (3:08). Q: Plant photosynthesis and how N14 becoming C12 at night so the plants get more CO2, and in the daytime the N14 the O16 and we get more O, now what about the body of the man should that be the case too, so that in the nighttime the N14 in our HCNO will become HCCO, more C, and in the daytime the N will turn into the O, for man's health and energy and activity, so what does the more C at night do, if this theory is correct? I don't know, I think you answered it yourself, but you don't understand what you answered. You go from one to the other, from the plant to the human and then you say the use C into N or O. (He draws) That is the back and front of a leaf of a plant. One has a different Nano coating then the other one, MG field of the earth due to the suppression and the pressure from the sun MG fields, releases different strength fields (3:10). that can be absorbed by either side, and the balance of the two becomes the energy of the what the plant needs or absorbs, and whatever it doesn't need, in position and release what we call, fields of O or C. The body of the man is circular, the Nano coating from the front and back and different textures of the body is a totally different operation. The shape of our body and of the animals body dictates very much the same as the plants, the leaf's. Then do we release N or do we absorb C at night? But in that process what happens to us, why do we need to absorb and release? (3:11). break ... (3:12:50). mankind has to understand the process of creation, we can't change it. In many of the structures why do we use CO2 as a Gans, as a field, balancer, collector ...

(3:22).

(3:28).
... Q: Are all souls equal or different in strength due to the layers created through experiences interacting with the environment? We all carry our own beauty and our own strength, in essence we are the same, but it depends on what we would like to show. Would you like to wear short clothes and show all your arms and legs or would you like to wear coats and keep yourself covered up. (3:30). It's the same body, what do you want to show.
K reads questions off phone. Q: I would to attend where do I apply ...
(3:32).

(3:34). Booking for conference.

(3:38).
... This is on the back of the global company we are waiting for lawyers to announce it in the US, then you can buy shares. The process of the KF will start from that point. Any other question. (3:40). Thank you for today, it's nice to be back live with you.

(3:42).
Video
END

289th Knowledge Seekers Workshop - Thursday, August 15 2019 (,)

(:07). ... In the coming weeks we'll show the technologies that will complete the knowledge. ... using the fields of the U hopefully to interact with our MaGrav Systems to complete the knowledge, and this will bring a lot of unity from different forces to complete the knowledge that mankind will move away from matter state. You will understand this very soon as we develop and progress into the new T. ... these are workshops for the world leaders for the governments to understand what is to come to them. There will be translations from English to different language, (:10). simultaneous translations. .. to understand the change of the course, the change of knowledge, the achievement in the world of knowledge. Many of you always looked at the Gans's but you never understood the world of the Gans's. You always looked that you might get something out of it somewhere but up to now none of you have gone into the next step. Some people speak of the different ?? direction of the M field but none of the works of the K Seekers have brought the dynamic Pl into the condition of M or G. I hear a lot of people, a presentation last week talking about scalar waves and all of that, but in reality this doesn't scratch the surface. ?? is another dimension. But what happens to ?? what is the next step in the knowledge, to understand the totality of the M fields of the U, not just to what we were used to. We were limited to understanding magnets, for centuries we played with magnets, now we have to understand that being M fields they can only show themselves in respect to the environment ?? they created and in interaction with universal M field forces. (:12). Fe would not be magnetic on this planet if it was not due to the combination of the field forces from the center of the U to the point of the manifestation of the physicality of the man. This is what has been missing in the totality of the knowledge. We always looked at what system we create, what energies we create, what Gans field we do, but now with the new T going into the dimension of international, what we call universal field forces, these field forces count drastically. This is one of the reasons many K Seekers up to now, 99 or 100% of you have not managed to achieve continuous, maybe some random flight because you have never considered MG field forces of the environment. In my first presentation nearly 11 years ago this is what I showed in very simple language to the American NASA scientists ... This is what we have not considered, (he shows 1 magnet pulling another to itself, flying). This is what is missing and what in fact most of you K Seekers have not understood, why am I not taking off, why my system doesn't work. When I showed this to NASA the first time the

head of NASA stood and said the game of space T has changed, he has changed it. It's very simple. (:14). We always created the M field but we never considered the strength of the field of the U, the environmental field forces, and this is what we talk about from now on. Because it's like clapping with 1 hand, you need 2 hands to clap. We only considered the MG field of the systems we created, we never considered universal, solar, planetary M fields because it has been eluding us. We never understood how it is. Mainly because we never understood how the MG fields inside the system work. We always looked at what comes out, we never looked at what comes in (universal fields), and without it we can't do, without it, it is non-existent. Even if you look at the height of the man it is dictated by the MG field of the soul of physicality and the dimension fo the fields of the bone structure, which itself is another dimension (draws a line to the universal fields), because it's this which allows you what fields you can absorb that it can feed both (STM and STP). I was told by a group of ... do not speak about the soul, because some people don't like it, do not come on, because it means you haven't learned. If the religious groups or pressure groups think that teaching of the soul is opening of the man to reality, you have to go back to Vatican and other places and put your books right. It has nothing to do with the reality of the knowledge, the truth of the knowledge. As we heard very recently, (:16). the Vatican has said, 'Christ will never come back', I wonder when they decide .. who decides when the Christ comes back. Now He is not real because the knowledge is real how and where the STM is. We have to understand, Christ He will come back, He'll be here forever and it is not decided by Vatican. Because they never understood the reality of the facts that the STM is connected through its dimension through the fields of the U. This is what we have to understand and what up to now we have ignored. Where does our dream come from, where do we ?? leave during our dreams, in which strength does our soul travel to meet, to work, and it's not ot meet other souls, because in the free dimension of its existence it travels the physical dimension of the U. Mankind has never been aware of this, because we dream about the pub we went to, going to a restaurant, and what we see, but we are not aware of the reality of our existence, of our soul which travels the dimensions of the real boundaries of the U. Our physical dream is connected to the physical boundary, our soul travels beyond. This is where mankind will soon have a big conflict with himself and those who sit in the seat of religion will try to use it, to abuse it, to carry on with abuse. This is the job of these teachings for you to understand in all dimensions, (:18). in the matter state through the work of the heart of the man we see the physical dimension but through the work of our soul, which is the freedom itself, is another dimension, and what we see, most of this is interconnected with the fields of the U. To what extent it can fly and extend itself in the dimension of motion. From now on, what is real to us, we have to go to the next step. This step is very simple, do you want to fly, communicate, travel the span of the U, then consider the fields of the U, we have to, because they are the rivers of M fields which can give you Zero time travel if you get into the fast flow. Going back to the original teachings, the MG fields of the 2 planets, like the earth and the sun, interact, but these fields themselves are forced and favored with other fields in the U. These fields link up in all directions and mankind from now on has to see. This is something that in the new systems which we'll reveal at the conferences and workshops you will see ?? (:20). considering the universal field forces, considering the presentation of what reaction will bring the physical dimension and what reaction will allow the STM. The new systems

that are going to be developed by mainly K Seekers through the work of the governments will be understanding this process. We'll bring you into the meetings and conferences for you to be able to explain to the diplomats and scientists from outside the KF, where the game comes in. When you create MG field forces in your systems as many of you have done, as I said before, you'll see different layers, and these layers, for example, you see the Cu, then the water line, then you see the reality of the field forces of the U. Up to now you looked at what this was (outer layer), but now you have to see how this (inner circle) connects to the universal field forces. If you understand this in a simple language, this (inner circle) is the STM in no dimension because there is nothing in it, and this (outer circle) field creates physicality of the system. (:22). There is no difference in putting a dynamic system and man next to each other, both carry the same attributes. It's just the man who doesn't understand. From now on when we speak about the dimension of the travel in the universal dimension we are talking about what fields are created here (inner circle). (They are) invisible but we have to trust because this (I C) is more powerful then this (O C) and the IC is connected to the universal links. This (Inner Circle) you can't create in your systems, it is the outcome of what you create from the physical matter condition. This (IC) is what we call when the egg and the sperm got together, this (IC) is what creates the control of the U. this part (OC) is the physical part or what we call the operations of the fields of the matter state. This part (IC) is what we call operation or the STM in the universal line of connection. This is the part that we start concentrating to understand, because you can't create it without understanding how physically it was created, and then with this we tap into universal fields and ?? Not with dynamic ?? balls. Many of you will have a problem with this transition. Now we can go a step further and literally strip what (:24). we call the MG field of let's say the Gans of the Cu and ?? its water away. How does it happen, how does it work? If you understand your dreams when you go to dreamland, when you pass certain level of, lack of the fields forces to contain plasma, your soul flies, you go for a dream, you go outside ?? and communicate. One of the first principles that from now on the K Seekers need to understand is how to work and be able to replicate what the body of the man does. In the body the blood flows and contains the soul as your blood rhythm, and blood pressure, and heartbeat changes this thing (blood containment) fades away and the soul is free. This is where you travel in the dimensions with interaction of the fields of the U in the spans of the U. Now the problem and the teaching for the K Seekers is this, how will we change this process (erases the physical outer shell of reactor). And still ?? before hand we keep the line ?? of connection (to the U fields), direction of motion and interaction. (:26). We have entered the next phase of the teachings and now you understand why for the past year I was teaching about the soul of the system. If you put a man in front of it, or a flight system, or anything you like, the reality doesn't change. The reality is interaction of the fields without containment and this is where the change comes. This is where many of you will have failed, and in many ways you also will have betrayed, will understand that you are engaged and encaged. This is part in what we call the Free Plasma in the center of the your system, you call the spark in the center of your physical body, and what is called the black hole in the U. There is no difference. There is no tangibility to it but in fact it has the essence of the origin where the field comes. Those who tell me that I can't teach about the soul, it means you haven't even understood the principle of the flight in the U. You need to travel, not in the physical dimension, but you need to travel with the field forces

without containment, the free bird of the U. Now what would you like to ?? call it. This will be the essence of the teaching, (:28). and what we will show in the new dimension. In most of the work we will show the effect of it because that is the only way we can show its manifestation. This is where we bring the change in. Then as you saw in the Chinese system if you want to collect rain, I give you rain, medicine the I give you medicine, if you want to see your uncle then I show you your uncle. And if you are so keen for Christ to say, I am here that no one shall say that you shall not return, we'll show you the face of Christ. You can understand conversion of the fields of the U to matter, and conversion of the fields of the U to plasma of the existence. then the question comes how can we create this that we can jump from what we have in the dynamic systems with a little ?? thing in the middle, that the little bit in the middle becomes without the ?? (containment). Then we progress to the next step. As I said the last time, (:30). we are nearing to our ultimate to come, but when you understand the work of this (FP) you still have just started the first step in the path to universal communication, travel and anything else which you could not dream, because now there is no containment. Now if you understood the work of your soul, or what you call your imagination and thoughts, now interacts. No physical body and no containment, and you have to understand that when you work in this dimension something very strange happens for those who are not happy with a lot of things, and one of these is, 'all the roads end up in Rome,' if you understand this as a STM you connect to the universal field, ?? motion, and all of these end up in the soul of the Creator. Would you like to go physically to Rome to see the one who says He will not come, or would you like to go through the dimension of your own existence, and meet the man. With this we will have a lot of conflicts. This is how to change the physical jacket which will create a lot of problems for those of you who have abused. (:32). Then it comes to one conclusion or one point, this is the soul of your system, and as I just said a few minutes ago this is your ?? , how do you tantalizing with a lot of understanding will bring this (FP) out of the system that you only deal with him. Then how do you play with the system that you can put it (FP) back in its place where you want it. This should not be strange to the man, when you go to sleep and you let the ?? open and this is the time when we wake up and what we call engage the STM in the dimension of physicality. We copied the motion of the U, we copied the bird and managed to fly, we copied the work of the fields of the U we managed to create motion and some fields, and now man needs to learn this (soul to leave body and come back). This can't be done without understanding the totality of the interaction of the fields of the U, then the STM is freed and can manifest itself in any dimension. (:34). Those of you who have managed to go 1 step beyond the present physical teaching, some of you I have seen in your talks explain it but you do not understand it. Dr. Azar is very much ?? able but she can't understand how. She is one of those who is very much involved in this transition point but she doesn't see how to get out of it. How to allow the physical dimension ?? the soul is getting ?? in communication, but you have to understand that the STM has to be in tune and in balance with the work of the U before this is freed (from the physicality) before you can take even a system that can transport and transmute the energies of the free fields of the U. How to what extent do we follow, do we draw a parallel line or do we start with a snapshot and see what it fits, are we at the right strength, is this where I want to go and then deciding which way you want this guy (FP) to go. The knowledge is the knowledge of the U, (:36). the knowledge of creation and it's

how everything is moved. I tried to teach this for the past year for man to understand not to cover the religious aspects, because religions do not exist, they're the confinements of the thoughts of the man to the conformity of the ?? ??? So in reality where does it fit? How do you transfer be it your system, spaceship, your soul, that it can travel the spans of the U. How do we get rid of, how do we overcome the physical dimension. As I have said many times, I am ashamed to be in the body of the man, that the soul is free to ?? U. Now how do you as K Seekers take this step to move to the next level. How do you extend your knowledge to understand that it is you who has entangled itself in this process and not the U. Then one thing is left, for many of the K Seekers in the coming time, understand the work of ?? my ?? free dimension, understand the interaction of the fields of the U. How you are, interact. (:38). How can you get rid of that cage? Many times in the teaching of past years I have explained that you will not see the reactor if you manage to expand the fields of your system beyond the planet (boundary), then you have made the dimensional connection. The question comes that if there is such a process is there a face and a dimension for the totality of the soul of the U. Does the Creator have a physical dimension to manifest Itself, and what does Itself manifest into to confirm its existence. Or is it in reality the totality? I made man in the image of Myself. When you look into the internal field forces it works different then the field forces from outside. (:40). And this is the part that up to now none of you K Seekers have understood the work of. In the matter state which is the dimension of field flow. In the dimension of free energy transfer with no dimension it's the totality of the fields in one dimension. Because one is part of the other, one is built from the other, and one exists within the fields of the other. So we are part of the Creator and the Creator is part of us. In the matter state you have ??? that you exist, in the dimension of creation, the true creation is the dimension of inclusivity, when you are inside you are part of, you don't need to be linked to, to be linked of, ??? or trying to achieve to the point that you can gain from the other dimension bigger then you, but it's not ?? you are inside it, it's you who gives life to It, and it's It that gives life to you. For many of the K Seekers and the man on this planet this transition will be extremely hard. Then you'll understand why, I made man in the image of Myself. We are getting to the final points of the teaching on the matter state of the human understanding. Once we enter into the dimension of the Universal Fields Forces, (:42). game end. Very much different. As the Chinese say we turn everything inside down, and upside down knowledge. And this is where the point is. Where we are not confined by the matter state, but we decide by the interaction of the fields of our life where the matter state appears and how we manifest ourselves, because now we understand the position and transmutation of the field forces of the U and conversion to the matter state at the point of manifestation. Many of you will start testing and many of you will find out the first guinea pigs of these tests is one thing, and surely will not be your ?? physical. When you manage to free your systems which you built with Gans's or whatever, you'll find out it doesn't matter if I put Cu, Zn or anything else, This (FP) will not change. So it doesn't matter if you are black, white, yellow, short, you eat McDonalds or you eat Chinese, your soul strength is the same, it is independent of the consumption of the physicality. So shall be the STM. And so in the dimension of understanding your reactors will not count. (:44). Then those of you who perceive the next step of understanding, you'll understand one thing, which has not been achieved on this planet. A number of you in the dimension of your soul will interact with the dimension fo the free energies of the U and very much,

you'll become satellites to enligthen the totality of the soul of all beings on this planet. (He draws the 4 connecting around the globe.) Those of you who attend the conferences will understand these and become part of it. That's why many of you don't even dare to come because your soul is aware of your misconduct. Do you remember what I explained when you create the spaceship, many of you will walk away because this is ??? . There is no more punishment as you punish yourself with your own misconduct. The position to enter, to be able to travel the spans of the U and the Unicose is to be in totality understanding the full field forces of the U without containment, and this is very difficult for the physical man, extremely difficult, because in everything he has seen is ?? for confirmation, (:46). and everything he has seen is for the confirmation (of physicality) and everything he has tasted it and smelt it (all confirms the physicality). Now how am I going to taste, see, understand and trust in, that what I see is the dimension of the U. There is no physicality to it unless I want to make it to (be), in the dimension and the strength which suits me and evolves in the dimension of my soul. I have been saying ?? how do we get this cat out of the bag? Once we get this cat out of the bag, how do we get it back in, to confirm there is a bag with a hole. Those who say we shall not return, it doesn't exist. They are explaining what is about to happen to them. It's the fear they have, but they put it in the name of the others. When you deny what created you, then you do not exist. And when they deny the One who brought you, for you to carry on that you can confirm and carry on with your abuse, you have in reality finished the process of life for yourself. (:48). And I think with what has been said, it's time to show one of the cornerstone strengths of our work and keep to our promise which I made years ago, and they walked into it themselves. We'll return the stones back to the coliseum that man will not abuse anybody (anymore). The only thing is, the true followers of the soul, of those who promised, will take control of their promise. The change of the position is real and in time, a very short time, you'll see the effect of it. In some of the workshops we'll allow you to see this (what he drew on board), this ?? image will become a reality of the physicality, because your physical dimension knows the secret of both and then you'll ?? recognize (it). You have to understand the levels of the dimensions and strengths of the work of the U, and that is, you started with the matter and we brought you to energy, (:50). then to free fields, and with the free fields you have the freedom of the work of the U to show yourself at any level you like. This is how you become part of the U Community, because it's you who makes that communion. Would you like to be the soul of the fly on the wall to hear what he has planned, or do you need to be the soul to hear the voice of the universal souls. You don't need to sit to hear the whispers of the voice of the man, you sit within the STM before he whispers. Now you understand in truth why we even introduced you to a spaceship and a Star Formation. (:52). What does this mean and what does it do? If you understood the work of this system, it means by interaction of the fields of these (3 base) you can withdraw and extend and free any of these souls in the dimension of physicality, nonexistence but in the dimension of freedom of the soul. Now you understand the new meaning in the structure of the universal flight systems. If you go back to the original teachings of years ago we always spoke about the FP, now you understand what that FP means, it's the soul of the system with the dimension of physicality which can tune into the fields of the U. In a way we ?? get collective dimension of the beautiful life of your systems, and then we transfer it. Those of you who have been at the KF and worked in the Insano or Barletta now you understand why and

how you can move the soul of the system into any dimension. (:54). What you are left with is ?? 3 balls, it's you who has managed to bring the fields of the soul outside. Those of you who move into the free flow fields of the U will come to this very easily and then by understanding this and going back to many of the teachings you'll understand how to free your souls through control of the non-physical dimension of the physical body of the man, and then, good-bye to the dimension of the physicality. This has been the whole cornerstone of the teachings for the past 10 - 20 years. Existence without physical dimension, and if you go back through the teachings step by step, nothing has changed in the pattern of the teachings it's just that you could not see. How many ways do you want me to show you that I show you and you'll believe. You took your flight system (:56). and, my teaching has been continuously exactly the same. Nothing has changed, but if you haven't seen then you don't understand it but it's the same, call it a SF or a dynamic system, coil windings, call it whatever you follow the teachings it's exactly the same ?? I am trying to show you (how) to free the soul, the energy center free from the tangibility, and imprisonment, and confinement of the physical matter. If you look at it in reality, it happens on the birth of the man when the egg and the sperm come together they lead to creation of the soul, if that soul can free itself from the dimension of physicality at birth, the child is free. If the dimension of physicality cannot contain itself ?? it leads, because of field forces of the environment existence, to multiplication and creation of the physicality. We didn't bring these 2 (egg and sperm) together to make another prison, but man through the dimension of the physical life of this planet has made himself that prison, called the body of the man. If you understand this you are one step closer to understanding the creation. (:58). If not you've got a long way coming. The problem is we have at this moment, even problems to measure 1 Tesla in the strength of the magnetic fields which is much stronger then even the fields of the U, how could we tap into it. You have to remember in the work of the U, in the matter state field strength ?? counts, in a plasma in the free dimension of the fields, ?? equality, there is a bigger game. We call it in the physical dimension of the life of the man, love affair. But man never understood the true love affair in the work of the STM. We don't give we become equal to the ?? (come close to) state. Then we can travel together in the dimension of the creation of the ?? light in the U. Now you understand where a lot of teachings have been going on for years for you to step by step to move on the ladder to understand the work of the U. I think as a teacher I have taught you that and many of you are ready to go for the test drive. (1:00). I ?? those who betrayed me will understand when it's time. You have to realize and understand that the universal field forces, galaxies field forces, Solar and planetary field forces, and the condition of matter field forces, before you can understand the field forces of the U. That you can connect to anyone at your will. Because now this has no cage to confine it. This is the plan when you find no attachments and no reason to be connected to this dimension of physical life, (1:02). of this planet. It's within the STM that it decides how and which one it wants to connect with. Now there is no mystery and nothing hidden for man to be able to decide by itself which way, how and where, and which point in the universal condition it wants to manifest itself. Your problem up to now has been how to open the cage, but I explained to you in the teachings how ??? you release that cage, open a certain amount ?? dimension, which means your physical dimension still decides on how much of it you are going to travel in. But there is one beauty with it, the higher the further, the lower the field strength. (1:04). Then ?? you are

becomes the total detachment, which means you don't carry anything with you, you are naked so you can fly with the birds of the U. If you go back in the Chinese flight system we clearly showed this, but most of you didn't understand. In the system control of the Chinese flight system you saw ?? flying cores, why? Because if you look at it, this continuously move condition, but it's the center soul which dictates the fields that it follows. At this point we create the physical dimension of water, or at this point gold. It doesn't matter ?? whether you rotate. It doesn't matter where you rotate yourself at what position we will take the shape in respect to the STM in the dimension of the existence, in the soul level and not the physical matter state. Those of you who made the systems, go back and now understand the system. (1:06). We have devised many systems and many technologies how to take the soul or to be able to control the soul, or what we call the center within the dimension of the physicality. In all your reactors. ?? be aware of it. How to confine it with the field forces and not matter state. And the only way you'll do that if you understand the field forces of the U, environment, Earth, and the rest, then you'll proceed and you can succeed, then we'll enter a new dimension. Up to now you worked along with you're motors, now you have to understand what was the purpose, (which was) to open the cage and free the soul of the system, the center ?? Then you are a free bird and not many men have seen the birds of the U. I think the first man who saw the ??? space are K Seekers like Rick Crammon and the others want to go back to the board and see what ??? missed. That the creation of this, I did not manage to create my soul but from it I gathered the knowledge of the U. Do not need to attend with the K Seekers. (1:08). Now you understand how we have developed and kept things in so many ways out of the imagination of the physical dimension of the man. The reality is where you stand and what are you looking at. the system that rotates and create the dimension of the soul in interaction of different fields, exactly as the same as the womb of the mother or do I nourish it for 50 or 80 years and then let it go to be free. Or I decide through the understanding and the language of the confirmation fo the existence of the STM where I want to go, as my soul has access to the whole knowledge without the need for the dimension of physicality. Some people call it enligthenment, and some call it the knowledge from the Creator, but in fact creation is created through ?? light by interaction of the fields fo the Creator with the souls ?? of this ?? dimension of the physical man, but it's with the soul and not the physicality of the man. Rick I think you have to go back to the (drawing) board and pull this guy out (the FP out of the reactor). (1:10). If you had a chance to listen or go forward from the teachings of last week, I gave you a lot of hints, do you remember the Stonehenge. I keep on giving you directions and dimensions but KF K Seekers are focused on one thing, (a spaceship) that he can fly. Do you want another prison, you are quite welcome but it's not for me to put you in another prison. I teach you the freedom of the U, which you can ?? the man. Why do you want to confine yourself to the physical body of the man, into the physical dimension of the planet, and then another prison you call it a UFO but why don't you take the trip and join me in traveling the spans of the U. You have all the knowledge, you are not short of anything, it's just lack of confidence and understanding of the totality. That's your problem.
Any questions?

(1:12). I have a question for you Mr. Rick Crammon, what are you going to do with the new dilemma with your system? Rick says, I couldn't understand the teaching today

because the sound was so muffled I missed a lot of key words, I just couldn't follow along. I am not sure what you are speaking of, I missed that part of the teaching. Ah, so you mean your soul wasn't ready to hear? R - Not ready to hear (frustrated), I am having to put on my soul ears today ... I have just given up on the sound system, it's just so unprofessional that I am embarrassed somewhat, that we are just so disrespectful of your voice Mr. Keshe. So I am very sorry I wasn't able to hear. Mr. K says, we get it very clear on our side. R - Not the broadcast, it's very muffled and the microphone is rubbing against your suit and we hear a lot of breathing, muffled words that we can't hear, especially when you get close to the screen ... (1:14). A lot of issues to work out. (Rick's voice changes) I hear the muffles, .. it's us and not blame it on God, we need to support you. I have been saying this for 5 years, we need to support you better with a professional system, that is clear instead of the really crappy video that we have right now and really bad audio. It's going to have to change or I am going to have to quit because I can't take it any more. Mr. K says, okay, that's good. In so many ways we still go back to what we are saying within our teaching. In trying to go back to developing the STM, and there is always problem in the physicality within each dimension. So does anybody have any question except, bad voice?

Q: Could you expand on what you termed as M rivers, are you talking about wormholes, yeah? No, you have no worms or holes. Could you expand a little more on M rivers please? (1:16). The process of M fields is very simple. The fields of the U start in the center, and they have do to the dimension of rotation, has a field flow which gradually as it opens up, it gradually becomes straight fields, at the edges of the U. In this process the field flows in interaction with the next set, as it expands create new fields, and these fields interact and create new fields, and these have very much direct connection with the center, continuously, and these become what we call the rivers. The channels of the fields which are enforced by other fields for them to exist. If you look at it in a different picture, we have the earth, the solar systems and galaxies, each one of these exerts different field forces in direction of motion of these, and from different planetary systems or different galaxies, (1:18). or different universes these field forces are different strengths and run parallel to each other. The beauty of it is, in this process, 1 lays against the others (they go in opposite directions). When you decide and you extend the knowledge and you go further, if you decide to go on this one, or this one, or this one according to the strength, this guy goes that way .. do I want to travel with a higher or lower speed G or M. Then you'll see between the moon and earth, sun and earth, solar systems and galaxies, you have the same proposition. We have to understand which level they work, which strength we want. There are conditions that you get bending in the fields according to the other fields, (1:20). but in general the field will follow the ?? flow. If you cross it (M river) you'll understand the consequences of it. Usually this (river) has a beginning and an end. Which way do you want to end or you can travel to a point and you can come off and move into another one. This is the knowledge that the man has to gain in the coming time. Q: How does the pulse, the universal heartbeat fit into what you have just drawn? very easy. What is a heartbeat, what do you explain as a heartbeat, what does it create. Q: Is the interaction where you got your 3 lines there, it's dynamic, you got 2 going in one direction and 1 going in the opposite direction, it's the interaction between the 2 of them, isn't it? (1:22). The heartbeat is ... it creates that, so it can't be? Try to explain,

maybe you understand. Q: I am not ready for this, I am sorry? So repeat what you said, maybe.. Q: The heartbeat is the interaction between those 3 lines, but then that leaves me in a position where I am saying that these 3 lines where there before the heartbeat, but it doesn't work like that, they come from the heartbeat, from the universal heartbeat, U sun, those are the rays, it's a pulsation, expansion and contraction, I can't .. Try to expand on it. Q: I am not ready to do that at the moment. Oh, you are very ready to do that, just carry on. (pause). Q: I can't talk and.. (1:24). No problem. What is important is that each field, to be able to move within its own environment, fields come and interact and interconnect with fields which are next ot them and in that response fields need to find a space gap, create that space gap that they can travel through. The balance between the space gaps that they need creates the heartbeat, the separation, attraction and repulsion. What is a heartbeat? How do we explain a heartbeat, how do we extend to understand. Even the moon, earth, galaxy, and U have a heartbeat. So what we call a heartbeat in the position of G and M fields, in balance with each other. There is no other explanation for it. ?? the 2 extremes, where 1 field gives and where the other fields take. Why is the heartbeat an essential part in the motion of the M fields in the dimension of the Pl. Why do we extend it to this level? (1:26). It's something in which we need to understand and we need to expand on. This is part of the knowledge which is missing for, and we keep on repeating and going back on it. Why does the change of the heartbeat cause the demise of the man? Why when you go to a Chinese medicine doctor the first thing he measures is the beat of your heart, in respect to the other organs in your body. Is the Chinese medicine and the Chinese understanding of what we call Yin and Yang and Taoism and the rest of it, that it brings a new dimension that us in the Western world and the world of science has not understood. What is the cause of the heartbeat, it's not just the exclusivity of us animals, trees have a heartbeat, the U has a heartbeat, we know the heartbeat of the sun, earth, and solar system. Why have we been so passive about this when is one of the cornerstones of life of the Pl world, world of dimension of motion without physical dimension. to what extent have we missed the essence of creation, how do we maintain that elusive part, that by maintaining it, (1:28). we can create powers, you can cause barriers ?? , we can open the compartment of the body of the man. This is the part that none of the K Seekers have ever looked at. What leads to the creation of the heartbeat, why do we have the heart. What is the noise and no noise? Is the noise the M part of it and no noise the G. We never understood why in that process of the heartbeat we have the pull, pressure and motion of the Pl what we call blood. If you look at the M field forces (drawn) on the board, of the U, it no different then the blood flow in your body. Where the heartbeat brings the flow of the blood in one direction, the same heartbeat brings in or moves ?? the lymph, feed it. Is the quiet part of it, the point of ?? feeling the matter state of, and the noisy part is the feeding through the fields of the gaseous part, or the ?? part, the subtler part. (1:30). This is what we need to understand and what is missing, the heart. And how to create it, why is there difference between different systems, why does it become lower and lower when it comes into bigger physical dimension of the strength of the flow. Mankind always looked at the very high frequency of the heartbeat, whereas the U in the expansion of it totality works on a very, very slow and very, very faint (heartbeat). Is it the reality that when we work with a slow, we have less friction and narrower band and we can what we call, scrap through ??? and a be a space in the M field of the U. This is the new teaching and now we have to move on, with

Mr. Rick Crammon or without, we all have a time of life. But the reality is how far can we understand this. It should not be the voice of the man which carries the knowledge but the STM. And in this process what can we learn and why? Does our soul have a heartbeat? We don't have to call it a heartbeat, but does it have a beat. We never considered that. If our solar system has a heartbeat, if our sun and earth has a beat, the soul should have one too. And is that interaction, (1:32). as I have said in other teachings, with the physical heartbeat of the man leads to the creation and confirmation of the physical body of the man. When the two (the soul and physicality heartbeats) interact they create the mirage of physicality. We talked about this many times. In resolving the understanding it is easier to understand then how the field forces interaction leads to what we call, sequential, symmetric, but very much a crystal. As we know scientists have proven that if we take away the skull of the man, there'll be no noise of the heartbeat as such. This is what is missing from the knowledge of man ?? in the interaction with specific strength you create physicality. (1:34). In the dimension of no boundary, you connect with the span of the U. If you look at the shape and structure of the skull you'll find some amazing things which you have never understood. Why do we have certain holes in certain directions and certain shapes, why do we create the direction and position of our nostrils and the holes and enter the dimension of the STM in the background. Isn't it our breathing which controls the strength into the lung, when in fact comes the manifestation of the physical life. ?? have interaction with the physical part of the body, their own heart, their own beat, where what it pulls from M into G and what it goes from G to M needs the space gaps of (1:36). positioning or what we call, the heart. And in this case it leads to the creation of the physicality. At the moment we have a T called face recognition if in the next steps of science the scientists understood the explanation of today, position of the STM and the position of the heart will give you a unique position of the man to understand who it is in the dimension of the U, not by seeing the physicality. What we call the soul evolution. This is how you recognize your mother in your dream, because you recognize this, this has a strength that has a meaning, it's the one I know, I call mother. Then when it comes to understanding and conversion of the voice into the feature of the mother and ?? it will be. (1:38). It needs now that we are entering into a dimension of no physical state, to understand the interaction of the fields which creates that state. It's not anymore M or G fields. It's not anymore one field or the other, it's a collective and in understanding the totality of the knowledge. The heartbeat is not the exclusivity of the body of the man. Any other question. Q: Are the AA's a transition from the fields or do they actually take part in the physical part of the field, so they are not radiating inwards but are part of the outer shell? What do you call an Amino Acid? (1:40). Q: Well I am thinking, because the outer shell is the cell, I am thinking ?? micro which is irrelevant in the process but ... the way the u works and the way we are creating an AA in a Box, my DNA structure I was thinking the AA must be in a transitional state, in between, like the fibers coming out of the center, because if they were part of the outer shell of the shell, then it doesn't make sense, that's why I asked the question? Now let's define something totally different. What do you call AA, the AA on this planet, COHN is this, is a combination of different M fields which can lead to confirmation of a dynamic existence which can interact and show reaction to its environment in that state of Earth. (1:42). I promise you very few places in the U creates this AA. In some places in the U AA could be this, KPBa what ever you want to call this.

Some elements known and some unknown. This is the problem if you get stuck to an AA and just look at it as creation of life. In the MG field of this planet collection of these fields allows construction of the collective cells in the space gap which can lead to physical life, be it horizontal or vertical. When we talk about AA from now on it's better you do it (this way), then in the future you don't need to do it, it's a building block of life, of existence, confirmation of the dynamic life that can create recognition and replication. So the (AA) on planet Zeus, this (KPBa) is most probably what it is, but it could have many factors, elements which we don't even know on this planet. Does it mean it is devoid of life or of creating, or recognized decision making. So AA is what we call the dimension fo the creation of physicality on this planet, (1:44). and not necessarily applicable to the rest of the U. Q: ... In the teachings of a few weeks was that in a way the AA doesn't act in this dimension, it has to swing both ways, .. every single element has 2 sides to it. Let me stop you, I am going to go back on something that is very interesting. Now that we spoke about the fields and the knowledge we possess, I create an environmental condition in this Box which leads to creation of your AA, and next door I create totally something else and it leads to a life which has the same feeling and understands the same and reacts the same. ... this is what I have said in teachings of the past, (1:46). in time we create the conditions of the destination which the soul wants to take to manifest itself. How do I look when I arrive there, can I handle this shape, or is it that I will be estranged to my own physicality. This is a very hard job, if any of you go through this you'll feel the fear, you'll feel the lack of understanding where am I, what is my position, am I still the but in different field of dimension. It's one of the most horrendous experiences, if man doesn't understand it. For you, you are used to this (body) if I even slightly change this (your body), you'll wake up with a fear of what you see. But in the new condition, even if you bring the soul to the earth condition and see the physicality of it, it's a nightmare. This is one of the reasons when we bring people out of Coma we always say to cover their face so we do not see their physicality, because the soul and the energy are there and the mental condition is there, but when they command their physical to move it doesn't and this gives them a fear, a shock and puts them back in a deeper Coma. But when you transfer your soul to another dimension to the physical dimension of the new earth, it's horrendous. I have been through it twice in accepting the condition fo being a Messenger. Your body shape, the feeling of the body like a stranger to touch, (1:48). because the soul needs time to connect with physicality. You feel the hand and the body but it is not yours, it needs time to connect, to fit the soul into the dimension of the physicality. I have been through this 2 times and it is horrendous, and I have seen this with the Coma patients and I know how they feel. Mankind will go through this, how will you react in the other dimensions, when the soul is present and you have to fit in the new gloves of the physical dimension at the point of arrival. It's very much you are liquid, you become a gas and here you are plasma but in essence you are the same, the structure in the essence of the STM. When you accept new dimensions these are what you have to be. When you go now to different zones with different conditions, when we go to the North Pole we get trained how it is going to feel, we get trained when we go to space how it will be feeling, how are we going to handle the weightlessness from now on new technologies are going to be developed that how would you feel in the space of planet Zeus, physical dimension encaging the STM. (1:50). In essence the soul in the North Pole, free flow, and ?? doesn't change. It's only the

containment that has changed, field forces that have changed. This is what man still has to understand, you have no choice, there is no option now that we have opened part of the U. In the coming conferences I'll show you these confinements. Q: DNA, I just can't get it out of my head? What is a DNA? It is a bunch of these (COHN) stacked to each other in a different way in ?? respect to each other. Yes. So ?? Do you want to unpack it on planet Zeus. Q: What I see is that everything is so connected anyway..? They are connected, not in a way. Q: The way that I see it is the field forces of the U or of the planet Zeus, when we go there those field forces are different and will act upon the DNA which then changes it, but what happens if we are forced to live on a planet, (1:52). that we have to change our bodies in order to live, because if we were to go there we would just die if we didn't have enough? How and why do you think that, the STM is the provider of totality, what's your fear, it's not for you to decide, it's already set, it's part of its structure. It's like if you go for camping and you sign into an organization, they make sure you have the food, your camping tent, you have the diner, the tea is on time, the tent is ready for you to be in it. But that knowledge is within the STM, it does the interaction with the fields of its environment and dictates the manifestation and the structure of manifestation. In some cases we don't see manifestation, we see this clearly. The more man becomes educated in the space T you will see. We have seen in upper levels of this planet on the boundaries of certain field strengths of the earth and the solar system, we have creatures that don't have any need for the physical dimension of the bones and muscles, but they still function, we talked about this many times. It's the same once we open our doors into the solar systems, we'll see lives in the way of what we call, the replication and consistency in every corner of this U. (1:54). And then we recognize this is the condition. If we decide to live in span of the solar system without physical dimension of the, what I call the G field of the matter state fo the planet, we can survive, better intellect most probably. But if ?? you need the eyes to see or feel the fields something is coming I better move, oh there is a smell coming down the road is it from Jupiter or we didn't heard anything from planet earth. We sense the fields and the fields have an understanding of position. The soul doesn't have an eye, it feels its strength of the attachment, how close is a field to me creates certain feedbacks, it senses it's too close, what does it want, how is it there. I can't see because the soul doesn't have an eye to see but it feels the pressure of it. In that process if you go further in the education of the STM you'll understand something very strange, even within the structure of the soul there are field belts which are very much like sensors, by sensing this they understand the closeness, by sensing this they understand the position, by this understand what's the intention, by the others you get different information. When we look at the structure of the galaxy, it gives us a very good indication of the feeling of the U. (1:56).

(2:00).

(2:16). ... There is something that Rick raised and we have to address it. I teach across the world and we have to cope with what is. When we arrived in China we had transmission

problems ??? a couple of places ?? it is what it is. when we go to Africa and there is nothing we still have to transmit. Understanding the knowledge is more than listening to the voice and trying to distinguish what is what, pretty soon I will be teaching you ?? through the STM with no voice. I wonder if you can hear. You will see as we travel we accept the conditions that we are in, we appreciate the knowledge and not the face and the voice. Any other question. Rick says, thank you Mr. Keshe, (2:18). let me say something first, I really do appreciate your knowledge and I am trying to work in that direction more and more and with the Pl Reactor Group as well this is the topic... Mr. Keshe says, ??? frustration because ?? every week with me. We are traveling across the world in the next 12 to 18 months we'll go to around about 20 different nations. We have to accept what is available and what they make available to us at the point. We stand ?? we stand threats, we stand all sorts of things, but the knowledge we carry is more important than the voice. Anyway, we all get frustrated, let's carry on, I get frustrated with myself sometimes, I am talking with myself in the background and there is nothing happening, then they tell me the Internet doesn't work, I listen to the teaching afterwards and I thought I was talking in another voice to be heard. Any other question. Q: Jalal. you said, we choose or we force the situation we want to be put in, does that apply to the same conditions we are here on earth? Of course, you condition yourself ?? , to children, to 9 to 5 working, and everything else. We condition our physicality to the point of acceptance of us what we can handle. As I said many times, we take from this knowledge according to your intellect. (2:20). Intellect doesn't mean your stupid but what makes sense to you. 08

(2:22). .. Q: Is the creation controlled? No, ...

.. Q: Is every cell in my body a U? Yes, of course, as we are a cell in the body of the U ourselves. Q: So when the Creator says, that He made, (2:26). man in the image of Himself? He didn't talk about 2 legs and 2 arms. ... the emotion of feeling of understanding in the confirmation of life. I am alive ?? interaction ... It's no use being on your own ??? .. I had nobody to talk to. ?? I have to go out to confirm that I exist, or somebody has to come in, to say, 'oh you are here', ?? ... and this is the life of the man. We got trapped in the room of the physicality of the man and the village of the earth. Now we are trying to teach you how to go site seeing, to understand how you are created and how ?? a tent and a baggage. Detachment from the dimension of physicality. This is all these teachings are and very soon we are getting there, we are approaching there. You know they say there is a parameter for everything you measure, when the religious people start complaining, do not talk about the soul, it means we have ?? pinched them there, it means the truth is out and you have to be open too, because it's the essence of creation. ??? what's the use of talking about spaceships and the plants to grow, because then they feed your soul, if you go ?? the wrong way how do you expect to be ?? ?? You see the entrapment of the physical man has come with the position of the physical life, but what they have to understand is that the STM is created by collective fields of the U, (2:28). and you go and carry on to become the Creator ??? They want to engage this for titles and positions, and as I said, not in my time and my space. The STM has to be free to choose his own dimension and understanding of his own position. ?? When you are created in the womb of the mother, does the mother put conditions on what color, what

fingers, toes and hair you have? Or does she leave it in the dimension of the information that is carried and (what) the womb can create for you to be manifest the way you are. There is an experiment in which I challenged one of the world's leading scientist to a very specific reality. Now we speak about cloning, that they are the same. Now if I clone you in the womb of blond and blue eyed woman, or a black African woman, or in the womb of a Chinese woman, the outcome will be the same, as you. (draws lines from each of the wombs to a person). (break up??) (2:30). Nothing in physicality, not even in the dimension of emotion, and the strength of the STM. .. What we give to it creates that, what we take from it, dictates our position. As I said many times, those who betrayed me, be prepared for what is to come, of yourself to yourself. I'll be the witness. Because we give the condition of existence. You create the man. This point onward it's you (? after birth). And you choose. So we choose the rest. If we go back to the drawing of the light and where it is inclusive of the STM. We are not blind to anything. We are just too busy trying to serve humanity.

here

(2:36).
MaGrav

(2:40). My silence is my grace and not my weakness.
You'll never find a system more complete and complicated then the MaGrav.

.. When we decided to share this knowledge some thousands of years ago, man wasn't ready. We shared it but man didn't understand. He was more interested in wood and fire. (2:42). Now that we share it he is more interested in what he can have free and steal from the others.

(2:44). Q: Is this process of awakening routine for all universes or are we somehow different ... ? (can't understand her ..) is the search for good and bad, pleasure and pain, is it a problem with the brain? You have to understand, it's ??? motorway as you call it, what comes has to go back and at a certain point it's in balance with the other. Man is not special but he thinks that way, because we have that habit from the childhood, the mom says, you are special and the most gorgeous thing God ever created. .. the animal which is totally black says to his child you have such a beautiful, white, transparent, crystal leg, but it is actually black, it's just the mother ??? Man has the habit to think he is special because we extend our lives, the excuse to exist, the confirmation of existence. It's strange that we, (2:46). need to confirm to exist, where we don't see the beauty of our soul, which exists within the STM, and we go for the physicality. If you look at the One Nation UC logo the man is standing, he isn't holding the earth but the soul of the earth, where it came out of his creation the STM, through the action of the field of the STM, and through his hand he shares what is given to him ?? . It's very interesting, those who draw these logos, without them knowing how deep they explained the work of the U. We are not special, we are time capsules of coincidences in the work of the U like every other point in the U. One of the things I always referred to at the beginning of the teachings, we

try to explain how the teachings are, that when you go to space you don't find yourself prophets and what we call various leaders to abuse you, because you'll understand the process. So if I catch you on the way to planet Mars and I show you this process, and this is what you saw is, then I don't become the next prophet. You understand that this is what I already know ??? But what is your intention in what you are telling me, you are the prophet and you want to abuse me, or you want to love me, or you want me to love you. When you go (2:48). with the open eyes then no one can abuse you.
... This is my name, MEHRAN, this is the ?? of love, a giver. That's a direct translation from Farsi. We are not chosen by name, our destiny is set by action. You have to learn, ?? this is the ultimate position for ??? the life of ?? man. If you get to that point then you receive a total maturity. It doesn't matter what shape you appear as a physical ?? Q: By man I mean the first man God created, and I imagine that he should have been in soul level because in the soul level there is no movement, the moment he has a choice, and he chooses to do something other then what God has told him then there is a duality, (2:50). so the brain started to work in this duality. You see you are not making a mistake but let me correct you. This again is another problem. When you have the soul and it radiates, somewhere it interacts in the fields that it allows its manifestation. In the solar system there are billions of kilometers, because this field has to reduce somewhere to manifest itself as earth, moon, Mars, Jupiter or Saturn, so it needs to be contained. In the body of the man the soul wants to manifest itself in compactness, so what has it created for itself, the brain. The density reduces the span of manifestation, that's all it is, where is the duality here? If I can make it much denser in another U I might appear in a different shape. There is no ambiguity about the creation of life, we understand it fully. Then we have to match it with its environment, so what have we done, we have created blood to circulate around it, to control it, to confirm its existence in respect to its manifestation of its position. That's all it is. The blood is the containment of the soul in the dimension of physicality from the earth. (2:52).

(3:06).

.. Q: How can we listen to the heartbeat of God in the ordinary events of our day? Why, 1 heartbeat is the span and the life of the U. Q: We have to listen to it for a very long time to catch that one? In so many ways. Q: Maybe that's the meaning of eternity. ???
We'll close for today. ... (3:08). Please try to step out of the present teaching, as what you have been taught, because now you understand the ultimate goal and we need you to be there to guide the governments in the next steps to come. You'll soon understand that it's a time of transition. We have had the governments run and try to govern, but they have no soul, now we created the U Community, U Council and K Seekers to change the position, that we give soul, what we call, to the work of the man. For centuries this didn't work (governments) and brought many conflicts. With this (what the KF is doing) we are here to make sure that there are no conflicts. In that process we understand that the STM is equal, it doesn't matter where he is, being on this planet or other places, black or white, Arab or Moslem, Christian or Jew. When you attend these conferences, you'll carry this and you'll understand this, where in a simple word I can change you from a Christian to a Jew, the same ??? I can change a Moslem to Christian, with the same ?? ?? This has to stop and the process of the new governing is to make One Nation out of the STM and not

the physicality of the man, maybe now you understand what is the purpose of the new cycle of the teaching and these conferences. This is where we change, the way the U works and not the man, (3:10). who has chosen the dimension of physicality. Those who have been ruling and abusing will fight to hold on, but one thing don't forget, my wish is my command and I am the Creator. We will achieve, but in this process we need the STM to progress to the next level not by us delivering MaGrav Units and other knowledge. The purpose of these teachings is to show man that there is a new horizon

(3:12).
Video
END

290th Knowledge Seekers Workshop - Thursday, August 22, 2019

(Stock Exchange pink sheet, Discusses plans for K Global and how the stocks will be valued, Continue Teachings: Now you have to consider the external field forces this is why your systems didn't work, These external forces of solar system, galaxy, and universe are the missing links that were never considered, With 2 magnets 1 stands still and the other flies to it, We have to learn how to use the field forces of the universe to create materials, How to transfer the fields without reactors, The diversity of life comes from the tilted axis which create different field interactions, The experiments didn't work because we didn't think to tilt the reactors, The field flows in the body that create the organs matches that of the earth, Each of the organs have 2 halves which balance the field flows brain kidneys lungs etc, Always an initiator is needed like yeast so originator souls created the earth, Our soul which was created from the fields can become a sun, What you think you will create, The heart is tilted opposite to the tilt of the earth and this is the problem with mankind if you change the tilt in the earth's environment he'll die, The physical matter condition of the planet earth needs another reverse condition for it to create another life within itself if you understand this, you can create anything in the universe, In space you create the soul of gold and then you can create gold anywhere, Ali from Canada shows after 2 years absence, ,)

(:07). ... Talks about conferences, allows people to attend for just 1 or 2 days. ...
(:10). .. We need to discuss .. we have taken the case with the Belgium government to the European Court of Justice and you'll a number of undisclosed facts about the behavior of the Belgium government in the court case and we are open to negotiation with the Belgium government on a direct basis and not the way it is done in the background at the moment. According to the lawyers the case is very strong, 100% we'll win the case as we have been told and it will be in the favor of KF as we have seen many injustices and tampering with evidence. Our application is submitted and we are waiting for a final date. ....
(:12).
.. From this week we come on the pink sheet in the Stock Exchange, so a lot of what we say and do can effect the stock shares. We try to separate KF work away from the commercial side of the KF
(:14).

(:16).
... Maybe this is the last time I can speak so openly before we announce the floatation in the (stock) market, and this will effect the share values and operational values, from now on we are in the public domain as a corporation with financial effect. We set up our tent to bring a lot of things together scientifically and commercially. We can't separate as you hear today, 290 teachings in public, many more in private, more in workshops that have been recorded, so the market has to get used to the new way, KF way, that knowledge can be shared, there is no patent but those who can work with us will benefit through us and our work, be it the government or individuals. We will set the standards in a very open way. (:18). We'll shut down all the KFSSI usage which is illegal and those who use our name to do teachings for their own benefit and everything else. You'll be very much exposed nationally and internationally from now on because if we increase the share form 1 to 2$ and you all have 1 million shares, then you all get 1 million dollars with one talk. So you can understand how effected this is going to be. This is not our problem but that of the market, has to understand that this T has brought new ethos and new ways. We'll let all of you to be part of it, our plan in the Global is very simple, minimum 1 factory per nation in the next 5 years. What we call a factory is in industrial zones, which means at least 250,000 m2 of manufacturing and industrial operations.

(:20). Our target is to employ 30,000 workers in US alone.
.. all assets that were stolen in Ghana has to be returned. ...
(:22).
China
Mexico in Tijuana
I have informed the American military that our 3 main space development will be in AZ, Iran, and China, we'll link the 3 together and develop a space program, (:24). it's on scientific level and not on any other basis.
We are setting our own share price, we are not waiting for the market to determine because they don't know what the T is about.

(guarantee the value)
(:26).
.. because we have opened our patents we work on the respect of sharing knowledge and being in that position to be the real value of the T. This is the reason why we go through these workshop.

(:28).

The profits 50% after taxes will go back to the nations to build education, health etc . The other 50% goes into the global, EC UC will decide how to use.
(:30).

(:36).

(:40). .. As Carolina knows I took a long time to come to this planet, I will not leave until everything is done correct. (:42).

(:44); ... Are there any questions in this section before we go to the teachings?
Q: You could ask Kim who doesn't require the loan to be paid back ???
That is not our job we are not in the financing business.
Q: How can you secure the share price once the company has been listed on the stock market and the shares are open for trading? We run a system which the number of shares in the market, we control the amount of shares in the market. (:48).

(:54).

(1:00).

Any question (1:08). I think there is some confusion on how the shares are limited.

...
In the teaching of last week I opened a new dimension in the understanding of the totality. In the work we did we always considered what we put into our reactors, systems, patches, but what we didn't consider up to now was the environment, because whatever happens here there is some interaction inside. (1:10). These forces are opposite to what we normally understand. The reason is very simple, when you put a lot of material together you create a different field force, compact and dynamic. When you consider the field forces of the outside, they come and in a way link up at different strength, this is what will effect, the MaGrav positioning, a field force strength from the position, and those field forces which are the balance between the two. Many of you, who tried but did not succeed with the flight or whatever, you always only looked at this environment, and this has been part of your problem. Now you have to understand as you draw on the space T, is that, is this the field force of the earth, moon or a galaxy. Then you can create field forces that interacts with, and conditions and positions, (1:12). themselves in respect to the fields. Many of you who tested couldn't understand, why I couldn't fly, develop a condition to remove cancer, why can't I create a condition where the plants grow without water, because in none of the cases did you consider the main creator of the condition. You are a toy in the hand of the external conditions, even though you are self centered and produce your own dimensions. This is what all the work of the KF will come into, when you look at it, what do you do? You put a patch, and then put one somewhere else, then in between you have the body, who creates the condition? Your patches or your tumor? You have created the new environment (patches), and this guy (tumor) has to play with, what you set up. In reverse, if you look at it, who has set the conditions, this is the moon (patch 1) and the earth (patch 2), you (tumor) have to conform with it, which way you want to. (1:14). One is the reverse of the other, but one creates the condition for the other to exist, to perform, to interact. When you make these patches what do you do with it, what is the purpose of it, who is traveling to where? Do you remember the two magnets I showed, 1 stands still and the other one flies. The stronger always holds and it gives. The same is when you go to space development and when you want to create material. How do you transfer the fields of the U into matter state as you need. Have you understood the work of the environmental condition, and the condition of the environment that you create. To many of you these things might not have any meaning because you don't understand the implication of it, but those who are in the scientific

world have understood and we have seen many new things coming up in the past 2 weeks, because these things were missing links that were never considered. You have to, (1:16). to understand your position, and at the same time understand, that in reality this is part of the story. The other part is the other sources which dictate this too. What happens when this (one of the reactors) is not there, how can you convert this (outside force) to be a part of it. How can you transfer the energies of the U in H or gold or Al as you need. If you understand this it should be easy. You don't need dynamic reactors, you have to understand how you use the conditions and fields of the U to convert to what you need. One thing you have to understand is that the field forces of this side, are stronger than this one even though you used the fields from the same source. In the world of Pl physics, M field motion every micron counts, forget about meters. Do I need to carry a reactor, or if I understand I can use the same field forces of the U to create what I need. And to be ?? condition in the position that I need it to be. Now you understand how the game of Pl physics and (1:18). your work has a new dimension. As we say making something out of nothing, but in fact it's not a zero time energy in the space, it's using the space and the energy which has been in the U to create conditions and matter state. Up to now you have been busy with this (reactor), make a stronger Gans, do something, make a patch do something, but the U has given you the aura of the man, given you the machine, you don't need to make a patch if you understand how to transfer fields across. There are no reactors, no motors, no coming and feeding, but planet earth for the past billions of years has existed through this ?? principle. Using the interaction of the fields of the U to create its own existence, in conjunction with something very little, in comparison to something slightly stronger. Man should have understood this by looking at the moon, when the sun was the prime culprit. Many of you in the present world of science think that moons are created out of, in reality the moons are the cause of the creations at the strength of the planet, (1:20). because they are in interaction with the mother, they need a point of reference, if you understood the teaching of last week. There is a fundamental understanding of this if you look at the principle of the totality of the axis of the earth. At the moment we listen to a bunch of hypocrites in the science of cosmology, they say you should look in the U and find planets which are the same distance from the earth and could show ?? a sun. You'll find out if you look at the facts, the reality of the construction of the body of the man and the physicality of the earth itself, life only exists, confirms physicality and diversity when there is a change of position in the strength (tilted axis). Life would be very hard to find in the complexity of the earth when the axis are straight and perpendicular to the fields of the motion of the U. When you have a small diversion you have life, ?? extension, seasons. So what happened to man itself that you never understood. Look at the position of the heart of the man it sits at an angle, it's not straight in the body. Now you understand why you heart is slightly off center to the left and why it sits here, because it's work is a replication of the planet earth, (1:22). it creates diversity, liver, heart and everything else for the body to exist, and none of you have ever looked, and science has never understood the diversion in what we call the position of the body of the man and the U, those of you who are cosmologists and look for life in the diversity of the earth, you found your planet, solar system, but how does it work, in that (straight axis) you'll find very little, but in this, a tilted axis you'll find diversity. Those of you who set systems up and you expect to see things but nothing happens, because, yes, sorry sir you replicated the cosmologists. All simple little things have to be considered

and men of science of today never understood, (to them) it's just there, but why is it there. Why does the liver have a certain shape and why do the kidneys covers (have) the same shape as the other parts. Have you seen your ear, or your brain structure, do you see much difference in the shape. Have you looked at your lungs? Have you ever understood the truth about the creation or is it just a bunch of things we do because we operate on it. Look at all your organs and see what happens. The shape is consistent and if you look at the field flow of this U, (1:24). even the earth, you'll see the same (draws the fields crossing over), is this your kidney or your heart, or liver, or the field flow within the structure of the planet. The containment has changed, we call one the containment of the physical body of the man, and the other one we call the U, but in fact the field interaction is the same, nothing has changed. The present world of science is ignorant, to the limit of what we call ?? a bunch of works, lies, cheats, and the rest of it. But you traveled the space and looked at the field flow of the U and then understand what U you are in, which part of the U, by how the fields flow, by what the conditions will creates, what do I have to expect and to do to be able to be part of it. Mankind has not understood the totality of his own creation. **It's the replication of the U. (He draws ovals on each half), then maybe our physicians can tell us a little more. The brain, lungs, heart, kidneys, and the rest, (1:26). even your testicles or ovaries. Then look at the field flow of the planet**, isn't it the same once the man becomes educated. Absolutely the same where the fields flow of the U. The ?? scale is the same, you start from the U, to your planet, to your brain, lung and the rest, it's uniformity. Here you call it the spinal cord, over here you call it the central axis of the planet. So is it the same with the U. Once you understand what is logically you can get to the other, but how do you create it, or expand it, how do you go into the inner sanctums of the knowledge of the creation, and there is only one way in, that is to have a full understanding of the operation of the whole lot. And man has a long way to go. We have come in a very short time from being a man finding the fire, after hundreds of thousands of years we understood the power of the water, (1:28). and we called it the industrial revolution, and then to another revolution what we call electronics, and now we have a revolution in understanding the field flow, which created all these to start with. Now we deal with the chief, now we have to understand new understanding in T that respect. The extension of knowledge is the limitation of prejudices of man of his ignorance and nothing else. The sooner we understand this, the sooner the whole of humanity as a race will go to the next step. Prejudice of race, color, intelligence and everything else has blinded the man to the reality that he knows nothing but his ignorance ??? due to his own ignorance. We understand more and more, the way as I said, we share the knowledge so that nobody can abuse the other and ??? intellect and understand the totality. You don't need to be, as I said to a South Korean nuclear physicist who said that we are waiting for the Americans to bring us the T, why an Iranian citizen brings it. It's you who puts yourself below another, not the others, so they dictate what you understand and ?? limits you. You allow the abuse, not them. (1:30). Try to understand the work of a very simple thing, which is opposite to what you always thought, you'll see a very straight ?? . (Draws 4 circles small to large), To you this is the Creator, because it's bigger. To me this is the Creator (smallest) because it holds tigther. That's where the Creator came from, releasing and expanded, but at the same time field forces return back to keep in touch. You call this M and I call this G, the pull to be connected is stronger then the pull to leave. Even it is the same with the emotion of the man. We always go

back home even though we never see the U. It's within the fields of the man and he puts it down to his emotion. These principles are and will become the cornerstone of the work of the space T. In a very short time we'll set up the space programs, (1:32). in a very strong way in Iran. Iran will become the birthplace of the new space T. We'll collaborate with all other nations to share the fruits of the knowledge, but we have to understand one thing, do we spend time to learn more about the U or do we first learn about our own weaknesses that we can survive in the U. This way we'll need thousands of years to learn everything. The other way we jump into the pool and we learn to swim, sometimes it may be dangerous, but sometimes man will succeed to join the U Community which is the essence of the creation. The U Community is not a bar where everybody is waiting for you to come, it's what you are part of but you never understood, that their fields has lead to your creation and your field leads to their existence. We are not waiting for welcome parties for people to be there, we are there, the parties are the intelligence of man, how much we understand that we can go further in understanding the work of the U and then with it we'll see more of what we call the Community knowledge's, not the physicality of being in a room with man ??? ?? (1:34). Try to understand this, now the environmental space fields become more important then what you ?? carry because you can create out of them, and you can give to them. Do you need a dynamic reactor, or did God create a motor somewhere with a small reactor which lead to the creation of the planet earth. This is a huge jump, even some of you might try to understand it, to converting the fields into (an) entity and then converting the entity to fields, this is going to be a huge jump in the knowledge of man. It will be as bad as if you went into a Coma a hundred years ago when it was donkeys and cars, and you wake up today to space T, computers and everything else. But in all of it there is **always a need for what we call the initiator, the ignition, a source which is already pre-made**. It's very much like what you call in baking, you can make as much dough as you like (nothing will happen), what do we do, we put the yeast in it to start it. What man should understand, that yeast, in creation start of the life in U, are **the souls which created planet earth, (1:36). and took positions in dimensions of the U ?? . Now you understand. If you understood this fundamental principle, then you have matured to be a star ?? in the U. If you look at it, your soul was created out of fields, and now your soul becomes that star.** Did your father and your mother put two reactors (together) and rotate them at a given speed, or did the womb of the mother create the condition for them to exist that through it, it confirms and develops the existence of the fields which can work within the strength ?? In the future man will understand slightly more, and that is, that those souls who will become stars in their U, or those souls who create a dynamic condition of the totality which manifests themselves in other universes as they gain their strength, and their are souls which in direction and in strength create that they reach the condition of the soul of the Creator. There is no **difference it's what you gather on this planet, this cycle of the extension of the STM**. (1:38). Then it goes back some time ago when I said, that you can think and you will achieve, because your thinking is part of your soul's, it's part of the fields, ?? and hands is creation and creator of the holder of the difference balance fields, and what you think you will create, but the only thing you could not understand is how to use the fields of the U and not just of yourself. Now you understand how easily you can produce materials and any state of matter or soul anywhere in the U. I said many times, **for me to change mankind is easy, but the problem is this (direction the earth tilts) and this**

(the direction the heart tilts) which they run opposite to each other in structure, and this has been one of the main causes of the problems on this planet. If we could have created the life of man with the heart in a slightly different direction you can see what we would have achieved. **But why do you need one opposite to the other, because it creates a balance, confirmation that I give to you and you give to me**. You'll find that many of the children, (1:40). that are born dead, die at the point of birth have this problem (with the heart slanted the other way), positioning of the heart. **If you change the position of the heart of the man he will die in condition of the planet earth**, because that angle, that position has created the dimension of physicality of even its own brain and lung. Then you understand how a **physical matter condition of the planet earth**, ?? itself with life, **needs another reverse condition for it to create another life within itself, then if you understand this, you'll understand how to create anything in the** U in the dimension of the field of the understanding of the work of the fields of the U. The structure has not changed, it's man's lack of understanding of the reality which is the problem. Life exists in every dimension but you have to understand how to position itself in respect to its source, and to the central line of the U, (1:42). this is one thing that you have to consider all the time, where are you in respect to the line of interaction. All systems be it earth, man, solar systems or galaxies, all align themselves to this line, and nothing else. It doesn't matter which part of the U you sit in, and according to the alignment you create different conditions of life. When man expands in the future into the science of the space he'll find out very much like earth, something very strange, life on this side (of the earth) is very different then on this side, you have the white man and on this side you have the black man. You have the Americans and the Indians and the rest of it. It's no different in space then in the dimension of physical life. We'll have different mentalities, different conditions, different environments, even when you go to the depths of the U you'll the weather here (on this side) is very different then here. This is M field flow. We teach to open the horizon of the understanding of man and no more. When you see the bigger scale you understand how to manage the smaller scale. All of you set up your reactors (straight up and down), very nice but, (1:44). how many of you set your reactors slightly tilted. If you look at the original pictures which were released by Austrian KF research, they showed it but never understood it themselves, that they tilted their reactors, and that was most of the time when they succeeded. The problem or the understanding is very simple, when you set up the reactor on a straight line, you have created uniformity, when you set it up at an angle, now you see the M flow is different, and if I expand you can see that the fields interact in a different way. If they were in their natural straight up, you see their fields are different. This playing with the fields, positioning them is the key to the future development of the science of the space, space travel, and the creation of every condition, even the creation of the soul of the human race. **In space you do not create, unfortunately gold, you create the soul of the gold in a strength field that in any condition would lead to creation of gold for you**. Go back to the writings of Bahuala, it says, that even a stone has a soul. Now you understand that you can create this. Read the writings of Mohammad you'll understand that in many verses, what he explained but man never understood. (1:46). This is the totality of the knowledge and this is the cornerstone of man's survival in space. To us everything has to be straight and upright to be correct. The beauty of the creation comes out of its diversity of imperfection. Then you'll understand how the fields of the U counts more then your

own reactors. I sometimes make a joke and if you understand it has a lot of meaning, which way is the soul of the Creator? If it was this (straight) would it lead to this (tilted), creation of life, diversity of life. Or is it this (tilted) that it can give and take and create the love of life. Man needs to mature, and very fast because now it goes back to where I started this discussion of today. (1:48). We spoke about KF Global and KF, as KF we were little and obscurity only few millions of people know (about it), now as KF Global everyone will know, the knowledge expansion will be very rapid and this is why we open the doors this way. Now we come to the dimension that every scientist will assess his own knowledge and work and it cannot be hidden because it is already in the patent. You'll see that what I started years ago is now coming to pinch the man where he actually needs to be pinched. Free knowledge ... now the totality will know. Do you think now with the new knowledge that it is open, they'll ask, what is KF and why are its shares this value, who are they and who will they become. Do you think they'll listen to a bunch of Belgians. There shall be no king, because they wrote it off themselves. Now you'll understand very quickly and very soon where we are coming (going).
Any questions.
(1:50). (talks about microphone)
Ali from Canada comes on after 2 years ...
(1:52). He shows his new system

(1:54).
(1:58).
(2:00). .. We have to move into the next step on how to create matters out of the fields, and when you want to create Gans's out of the conditions it needs both dimensions, but we decide where and when and what fields. From now on it's a very exciting time coming up for those who will do a lot of research in the fields, and transmutation and transportation of fields. If you understand the total concept and the principle. If you look at it your 2 hands are the 2 patches but this time you have the control to change it. With the patch it's fixed but with your hands your emotion changes it. In a way it's in the subconscious of the man, do I want to accept what he doesn't want, you call it, the pain, and do I want to give from me, (2:02). to him for the body to accept new energy that it allows the body to be in a comfortable position of no pain. 09

(2:06). ...
Any other questions.
...
(2:08).

(2:14). Any other question. Q: So you make a push in the Pl fields by tilting the reactor, how about 23.5 degrees like the earth? What happens if you tilt at 10.5 degrees. Q: Will different tilting degrees lead to different results? ... The diversity of life on this planet is due to the angle of the position. It's multifaceted field interactions. Now we'll see a lot of angled reactors. Q: How to detect the central axis of the U? That's easy. It's like you have those Christmas balls and you have them all hanging from the ceiling in the same line. If you look at the true line of interaction of all the galaxies and planets, they stand in the

same line as the U. The actual direction of the U is tilted, it's not straight. (2:16). That's why it creates such a diversity in the U. Ah hah, it's a replication of it. That's why life is not the exclusivity of this planet. In the future mankind will have a big surprise and that is, now a days if you are American you say my ancestors came from that or that country, in the space when man becomes knowledgeable, those who understand the work of the U, they'll tell you my soul comes from planet earth, which means the soul of creation created on this planet lead to creation of the life where that soul came from. As I said in one of the teachings, do you want to be a particle in part of ?? bigger ?? star that creates, and these are the things which man will soon come to understand. The way you are proud to be an American who came from Iran, parents or grandparents or whatever, in coming to understand the STM leads to creation of the dimensions of life, man and all creatures will know where their soul comes from, and they'll tell you, you'll feel it, you'll understand it, we have a common denominator, creator of the soul is the woman. (2:18). In the future many of men, scientists, will understand the meaning of the teachings of today and the past months. ???? maybe you understand part of it. But by then it'll be a reality because by then it will have matured enough for them to understand the totality. Q: Are God's field's rotating upright or at an angle? I think I answered you before. If you listened to what I said last week, they said, Christ will never come back and very soon they'll say God doesn't exist, because the whole dimension of their control is in danger. When you deny the Son of God, do you think you are going to accept the God Itself. (2:20). And some they call themselves God. Any other question. Q: How does one become part of the KF Global operations? We are setting up a structure. Two years ago we had many people in the KF, but due to conditions we have brought it down, reorganizing ... it will be done by Elle and EC and UC. (2:22).

(2:26).

(2:38). .. We have turned the point ...
(2:40).
(2:42). Q: What about the Keshe Coin ..

(2:48).

(2:54).

(3:00).

(3:02). KF health announcement on September 9th.

(3:06). ... Q: You talked about this U had a mother, and that mother had another mother, it was happening for billions of years. Does the Creator have a mother? Was the Creator Himself created out of the fields of the U, that collectively became the Creator. Q: I am talking about what was the very first thing? I think I answered you. Q: So the Creator, knows from where He or She came from? It depends on the way you look at it. We become the Creator, part of the fields of the U, but at the same time we create the fields of the U out of our own creation. And then it goes back, where did the original fields

come from, why is there life, existence, why the interaction of the motion of nothingness (3:08). leads to dimension of creation, we call life. Book # 8 will answer this. You haven't seen it, but partially it is written. You haven't seen Book #4, 5, 6 these 3 books are more or less completed. It's in my pocket, it's in the safe. Q: How come we can't have it? Man is not mature enough to understand the totality of it. We said we'll start releasing books when we start going back home. You'll understand soon, it will be released soon and then you can take it. Up to now 9 books will be released. The one about the soul is number 9. You have to understand the origin of M fields, then you'll understand the work of the soul. That's number 8? Yes. Number 4 is complete, you can see it written. We took it to be pictured but we took it out. Number 5 is written, Number 6 is done, they're all on USB sticks. It's just the completion of it and picturing of it. (3:10). 7 and 8 , a lot of it has been put together, 9 has been done collectively, and Sandor was in charge to bring all the teachings of the soul collectively. We are waiting for him to return his collective work and then we can start the structure of it. Then that will be it, when you understand the soul you can go back to the beginning, the creation of matter. The STM is the sun and interaction of the fields of the sun creates the matter. Now you understand how book #1 connects to #9. Any other question. We have a meeting with the Brazilian group after these teachings. Let me correct something, there was some misunderstanding in the past that Kevin Blunder issued certificates for people to be teachers and K Seekers and workshops, and a lot of people abused this to profit for themselves and everything else, ??? (3:12). .. It was a huge mistake and we canceled (them). If any of you receive a certificate for workshop's, these were al the brainchild of Kevin Blundell, we see a lot of problems ... we stopped all these things, none of those certificates issued are valid. We have seen the abuse on it. if you have these certificates or anybody shows it to you, about 2018 we canceled all of these because we saw it was getting abused in a lot of ways. If you run a workshop it has to be on the back of your own knowledge, do not use KF logo for these kind of things, or use our channels to promote things for your own benefit, because you are abusers ... if anybody abuses KF logos we'll take legal action. ... (3:14).

Q: Where did the first fields come from, what is the origin of all fields and what is the purpose? What do you say in English, watch the space, wait for Book #8. I think in the teachings especially in the last 12 months many references were made to it, if you listened to it you'll understand it. I think in one of the teachings I thought I said too much and I stopped it, silence so nobody could understand it. In a couple of the teachings in the past few months I clearly taught, (3:16). you the origin of the M fields.

(3:18).

.. Q: How are you going to overcome this dilemma of all these alternative therapies, plasma will be one of those, it's not considered by mainstream medical establishment as scientific based, (3:20). they require double blind placebo effect ..? These are all the structures setup to protect the few people with degrees to protect their ?? The new system that you'll see emerge in a number of countries, is that the evidence of the new T proves itself. We have taken that action, that line of work, there is no double blind, if you give me a 100 patients and getting them all walking again there is no double blind, it means you are blind yourself to the knowledge if you put it that way. We have taken a totally different approach and we've been given a lot by the governments. Because the

burden of the present medical system is killing the nations, nobody is going to listen to FDA approval, these are all the ones who want to cheat humanity. ...
(3:22).
.. We are not alternative we are a new system.
(3:24).
.. Pension polices are the backbone of the problem, they fund the pharmaceuticals to shorten the life to pay less pensions.
(3:26).
(3:28). .. The US is less than 3% of the world's population and the most backward nation in certain aspects. How can we allow this 3% of the population dictate 97%. The table has changed, we allowed the abuse.
(3:30).

(3:36).
Q: Is the 55 floor hospital in China still due to open in December? Yes, ...
(3:38).

(3:40).
.. My biggest request to KF is to stop insulting each other on the Internet, you do nothing but damage yourself. Trying to see you is better then the other, we all carry part of it. When the arrogance comes in is when the problem comes in ... you have conflicts of interest and understanding, resolve it amicably and not, ...
(3:42).

(3:44).
(3:48).

(3:50).

END

291st Knowledge Seekers Workshop - Thursday, August 29, 2019 (,)

(:07). At 300 KS Workshop I shall quit. After today as we have officially entered the market we will not make anymore announcements.

.. Most of my teachings are to open the eye of the man in what is to come. (:12). and in steps to teach how to evolve and to be able to live within this structure. What is life, what is the strength of our life. What, where, and how do we draw a line between our lives, and our physical life, or in the dimension of understanding the strength of the STM and that there is no time and space and that I can create as much as gold, as my own cells, as my

own being, my own presence, not necessarily in the form of what we call physical manifestation. In the teachings last week I touched on this very softly, those of you who work on the edge of space T with us maybe you have seen some breakthrough, maybe you understand a little bit more. Maybe you have opened your horizon of understanding to the next level of the science of space, in man, in reality, become part of the world of U Community, is where do I stand with this knowledge, where is my next step. How do I keep to a different type of life, physical life to be present among those who I have been born with and then in the depth of space what I can be, what I can create with my own soul, according to the dimension of existence, the strength of the fields, the pressure of me wanting to feel through the strength of the soul and not physicality. In the teachings of the past few weeks I have started building what I call the environment of the life in the space. (:14). As it took many of you months and months to understand the teachings of the soul, now the teaching of living in the environment of space becomes the next step. The how, where, and the way we'll create this dimension, how we use the existence and the presence of the fields of the U to create the condition for our confirmation of existence. We are not always with our friends, cousins, uncles in the depth of the U. We come to the dimension where we come across life in the form that we are not accustomed to but we know it exists, we have to respect it as much as they respect us to be part of the life of this U. We see ants, lions, birds, in the U we'll see the same kinds of life structures but not the way we are used to. What is our reaction and how do we manifest ourselves to it. How do we know to create the conditions to absorb the fields of the U that it confirms our existence in the depth of the U. A new game, a new territory. The game is the game of U, and the territory is the whole of the U. From now on there is no limitation for man except his own understanding about the truth of the life for man in the U. You have to consider the environment and what fields are available in this environment, (:16). how can I tap into them, how can I give that I can take. I can't keep on taking, even the Creator doesn't take, (break ??) .. where is the limitation, where do I stop, to what extent can I satisfy the need of my soul without overloading and without losing the condition, the confinement, the strength of the STM. We have to come to understand a new dimension, new parameters, new fields of the strength of the plasma (Pl), a new field to understand how the plasmatic condition works. In many teachings I keep on repeating , maybe now as we develop into the space T, there is no resonance, no frequency. There is something which I always tell but very few people understand, if the mankind would have taken the path of Tesla in a very direct way, man would have become more dependent on the life of the earth. If the man would have taken the path of Edison to work with the DC and understand the totality, most probably as a human race would have gone further in ?? this T, in understanding the work of the U. we got trapped in understanding or creating the condition that we thought, a justice, (:18). we thought it suits us, but when you have no frequency in the depth of the U, in the Pl of the U, how can you have AC, alternating current, alternative rotation. The new world of science has to open its eyes, we hear the noise from the space, but that noise doesn't come from the frequency, it comes from rubbing of the fields of the U ?? It's very much monotonous until another dimension interferes. When mankind becomes the passengers of the space what you'll hear within the space is a monotonous noise and that tells you what field strength is available because it's a strength that you can hear and absorb. It's at a strength where you can add to the strength of your soul. The STM doesn't have a frequency, it doesn't work with the AC

and is part of the structure of the U and works only one way, through harmony, singularity, and no noise. The interaction of the fields of it, its environment, being different part of the brain, converts it. The brain of the man is a transformer in exchanging the field strength of the STM in interaction with the field strength of the STP of the man, to the noise that the body can understand, to the identity of the strength that the body can understand, (:20). we call it joy, fear or whatever, so if we look at the structure of the brain it's nothing but a transformer, it depends on where you tune it to, or adapt it to, and in the coming time man (break ..) .. star in the world of the U, in the dimensions of existence in the U, that you decide what is joy, what distance from the soul and what strength of the fields, and what strength of the fields from the soul of the creation in the dimension of the physicality that they interferes between the ?? new and creates a noise (break ...) that every, ... sounds fear. We translate the noises into physical reaction. At the same time we transfer lower strength materials in what you call, the strength of the fields into the cells of the body. Our ?? cells (self) works the same way. There is no difference in the world of creation, between the creation of the solar system and the body of the man. It's only different in the strength and in what we call, what is in the package, is it a cell, a star, or a U. In reality there is no difference. The Pl of the STM, Pl of the cell of the physicality, Pl of the solar system and the U, work all exactly the same. You have to understand, (:22). then how do I gain this physical body in the presence of the fields of this planet and solar system, that a given point in the presence of the strength of what we call the fields of the galaxy and U, gives the condition of physicality to my life, my existence in this point in this moment in time. Then you choose the time and space, and then the strength, then you have to understand what condition the strength of the environment allows you to manifest yourself, to communicate yourself with, to go through it, to be part of. Then there comes one point to understand, is the strength of the STM capable to understand and to translate and live among the strength of the soul of the U, be (with) all its dimensions. And the answer is yes, because if your soul has managed to manifest you in this condition, it has the power to manifest you in any condition anywhere in the U. Then it comes to the reality of, to what extent, to what we call passengers of the U we would like to get involved in the environment, where we are, what do we want to see, who do we want to take to share the knowledge, or can we see the people to see through our soul by not being there, but having the interaction with our soul. It's like you become a camera to the world of the U for those who are the passengers on the planet earth, what I see you see, what I feel you feel, (:24). and this will become part of the work of the mankind, in the coming time if you understand it. My eyes becomes the eyes to the U, and your soul becomes, as you call it, the monitor receiving it. As my soul has connection to yours, ?? the time in space. There is no time in space. It's what I see, it's what we see. Then we develop the conditions that we filter and accept only what we want to see, what we would like to have, then the life of the man changes beyond, then the position for man changes beyond and the reality becomes, why can't I do it when I am here, why do I have to, need, why does it have to be done once I leave this planet? Or why it can happen when I leave this physical body. Many of you and your children in the coming time will go through the transition of understanding the strength and language of the soul. When man started walking this planet he had no language, and as he understood the capability of his brain he started to make noises and he recognized the noise what to be, now we have to listen to the noise of the STM and understand its

working and not the physicality. Read the writing of Mohammad, he has referred to it many times. (:26). It's hidden in the writing of Koran and in so many ways we see the starting of the writing of this point in the writings of Zoroaster. Mankind has full knowledge but he has to understand how to decipher it to a level that he can translate it into the physical work of his life and existence. You can't put this knowledge on a board or on a piece of paper, it's not a reactor to build or a Gans to develop. Every man has to understand the strength of his own soul, the working of his own body in understanding in respect to his soul. If we can think and create cancer in our body, in the subconscious we are not producing another child that I suffer from (prostate cancer), so we can do the same, understand the same, use the body the same to last thousands of years and not a meager few hours. The process of life is so simple, it's man who has not understood it and made it so complicated. How far we can take this knowledge depends on the intelligence of the man and nothing else. Every man has the intelligence to understand it and at the same time he lives through this dimension. It's not an antennae to put up and absorb this radiation or that field that I can make bread or my leg. (:28). It's to understand how the fields of the U works, that in interaction leads to confirmation of existence in the dimension of the soul and not in the dimension of physicality, would mankind ever reach the point of maturity to understand the difference between the world of existence in the dimension of the matter or in its dimension of soul and would the man be able to exist in both dimensions at the same time. Many races in the U do so. It's to understand the work of the strength, of life, and to understand the work of the reality in how life is created in the dimension of physical structure if man needs to manifest himself. We have reached a point of maturity, knowledge, with all these teachings that in the coming time many of men by now when they listen and they go through the teachings, they'll know how to cross the line, to be able to cross to the dimension of the soul without waiting for the confirmation in the dimension of physicality to confirm that they have been to the dimension of the soul. the transition between the two will become the understanding, (:30). the totality of the whole structure of the U. Do I need to go to the moon in a craft or do I see the structure, life, taste, smell, the whole structured life of the moon through the souls of the passengers of the U. Man has never been in all points of the U, but when the man learns how to tap into the universal soul man will be and see as the others do as he chooses. We travel without actually leaving the position of the soul, but through the strength of the fields of the U we reach every point of the U. You look at the light of the stars which come from the depths of the U, but if mankind learns that even a star has a soul then you use that passage to reach the star, you don't to travel the star. If I can feel it, if I can receive the confirmation of manifestation, then it has a soul. Learn how to communicate, how to be, it doesn't matter if it is a soul of a stone, or STM, or the soul of your child, or a soul of a star in the depth of the U, once you have made contact you can reach it. Then do we need spaceships, or do we need to understand, that if I manifest myself to you as a star, it means I am prepared, I am open to receive from your soul as much as you receive from mine. Do I need to have a SS or do I travel the depth of the U, (:32). across the lines of the confirmation of the existence of the star. Don't forget the ray of the sun comes from the soul of the sun not the surface of the sun, as the ray itself was created by the field interaction of the soul itself from the point of the inception. Then man needs to understand more, understand that the dimension of the space travel is not within the structure of the SS but within the structure of the STM to understand the full spectrum

of the capability of his own soul. Then a new knowledge comes into operation. Man has been in a way mystified and petrified and forced to think that everything has to be so big and to be stronger to be able to, we call it in the present age of space T, payload. But in the world of the U there is no load and there is no pay, it's to understand that it is all free and there is no size and dimension. As I said to my friend, how are we going to explain in the depth of the U that our soul travels with the speed of a 1000 horsepower brick. What is a horse and how do we measure in the depth of the U when they have never seen one. (:34). Do we need to create a new language, a new understanding, conception, and new structure in the work and the life of the U. Man needs to educate himself very rapidly as we have opened the door and in so many ways, do we need to be the passengers, or are we the captains of our own destiny, our own future, and will the mankind be kind enough to understand his own dimension, strength, his own interaction with the rest of the souls of the U. Then do I need to give you a SS? Or is the ship of space the STM. Then it comes to a further point, did Noah bring a boat with all the animals in it, or did he travel in the dimension of his own soul, that through his soul he created what he needed to be, that fits this planet. Do they have elephants and camels in the space that Noah took across or did the man not understand that it is the STM creates what it needs at the point of inception of the need and demand, (:36). and at the point of the pleasure of giving confirmation of his existence by creating other dimensions. Then is the Boat of Noah the same as the rib of Adam in creating Eve. Had the man not understood the totality of the truth and so he had to be told , or put in different languages for him to become mature to understand what was missed, but he still missed it because he never understood that it wasn't physical terminology, it was a confirmation of manifesting anything you want from the strength of your soul, even (creating) being a partner, something to confirm that you can love and it can love you back. Isn't this the same as calling the man the creator and the Eve, the man as the subject, to confirm his love for the Creator, and the Creator to show His love by creating the man, to confirm the confirmation of existence of life in the U. Which part of the history of the U have we not understood and we have to translate it into the knowledge of our own understanding because that was how much we could understand. Then the truth about the Boat of Noah doesn't exist, does it? It's the STM who understands that he can create what he needs as long it is done just and correct, and it applies and he can live within the existence of the environment of the given time and space in confirmation of the manifestation. I cannot take elephants to the moon and I can assure you there are no horses on planet Zeus, but on this planet it can confirm and conform to the physicality of life and the strength of the field of the U. (:38). How can I put this knowledge on the board and write it that you can measure it, develop it and make a reactor and fly with it. If you haven't understood the strength of your own soul how can I explain to you the beauty of the creation when you are blind to it. How can I explain to you the smell of a rose when you have no sense of smell. How can I show you the beauty of the Creator when you don't even understand what it is to be created, ?? establishment of the STM himself. Then, you say don't speak about the soul, it means you haven't even understood about your own creation. Denying ones existence is denying the totality of the existence, even in the matter state of the life of the man. There is no theology, this is the truth about the life of the man in the space, but you have to understand what condition space gives you that you can conform and confirm your existence within it. What do I need, or how will my soul react to this new

frequency of matter state on the planet that I can manifest myself in that dimension of physicality. There is no frequency in the work of the U, but there is a lot of frequency in the work of a beautiful man like Tesla, when he enters into a matter state to confirm the energies of the U, but in the dimension of the interaction of the fields, (:40). to confirm the dimension of physicality. If you ask yourself why there is no frequency, or why there is no what we call sinusoidal waves in what we call the U, because in the U there is no cutting for trying to get through, you accommodate, accommodation doesn't have the need to fight, to resist, to overcome. A frequency comes when you have to drill yourself through an atomic structure or mass magnetic fields of the matter state in the compactness of the fields of the U. What I call a pneumatic drill of the sounds and the waves. I wiggle and wiggle to get through it, whereas in the world of the U in a Pl condition you float across, there is no resistance. I give, I accommodate that you don't need to sacrifice, you don't need to loose. What you give to me is your G, and what you give to me from you is M, and I'll take what I need that you don't need to waste time and energy in the space to get through to the point of destination. then you'll understand why the knowledge of direct or DC current comes into operation as the Pl has no frequency. Maybe those of you who are K Seekers will understand more in the new dimension of life. (:42). As I said, we are entering into a new world of the science and T, because we covered everything and we gave man everything he wanted to see in the dimension of matter state. In the coming conferences, one after another, we unravel and show totally new T which is the real space T. Don't come in and expect to see a flying machine, I haven't seen any, I have never seen souls all gathered in one SS. Then you can put the whole soul of the U in one SS. It needs the man of wisdom, man of understanding the truth when you come to these what we call conferences. These are the conferences to open the eyes of the governments to what is to come and what needs to be done, and what is on the horizon for the world of science. In what level, strength, or in what dimension do you want me to manifest. In some of the workshops you might see what we call, citizens of the U. We can create that condition, we have the knowledge. If you remember I referred to this 2 or 3 years ago that we can make a fish tank and create a condition that we create the fields that it suits the souls of who are of the different strengths then man. In some of these workshops you might see the fish tank ?? (:44). you see some new technologies and in understanding the changes in the dimension of the physical man. In understanding what it means to be with the man of space without dimension, do I see my own soul within the confinement of the fish tank, and is standing in the presence of me in the physical dimension of sight. I was told by one of the Iranian groups that you have to show magic in your one of the things (conferences?) then we'll believe. The magician was Christ when he rose a dead man. The new science has no magic, it needs the understanding and the insight of the totality of the knowledge, then the magician will be you and not me. I can create a condition that many people see the soul but if you are ignorant to it, then nothing is happening there, then you'll think, he must be crazy, but in fact, your soul has not matured (.. break ..) of the extension in the strength of the life of the man. **One of the most powerful presentations will come when you present your soul** at these conferences and not for us to manifest a soul for you. Detachment through the understanding of the knowledge is the cornerstone of the new T in entering the U Community and nothing else. Don't come expecting to see a Gans machine or something else. (:46). Don't turn up because you'll be disappointed. World leaders and the

governments will be shown what we have planned for them to create a condition which we want and not what mankind has dictated on himself. As I said, there shall be no war because we have decided. It's our decision, our wish and our wish is our command. We command it to be correct and from now on man will take that path because you become aware of your true existence and not in the dimension of physicality. I was told in communication with Iranians that Iranian officials and the rest consider me as a "Methi" (messiah) (..break ..) the ?? total of the man has no Methi, he understands the truth and he lives in the dimension of the truth. We are not Methi to one and messiah to the other, we are Methi and Messiah to our own soul in the dimension of existence and in understanding the work of the U. We teach and it is for the man to understand. We bend to no governments and we accept no conditions except ours which is peace and in understanding the new T we bring wealth of the knowledge, not of the pocket, because when you have the knowledge of the U you don't need the pocket. The U is your oyster and your pocket, it takes time for man to understand it but once he does and he sees it with the clarity of the soul man will take to the next dimension. (:48). But you have to understand **what field creates me and not I am here, what field do I create**. Mankind has to go into the essence of the fields of the U which leads to his creation then through that path he'll find a way to the direction of the Creator who lead to his creation. In the new T we show the path to the Creator. We show the ways and you can't build a system to replicate it. You have to understand it through the work of the STM. In the work of the U there are no kings or presidents, the king is the STM and the president presents himself at the point of manifestation through himself, through the confirmation and interaction with the physical dimension of the fields of the U at the point of the time and the space. Try to understand more and more about the field interaction of your physical dimension and the environment of your body. Go a step beyond just feeling the temperature and the heat, try to feel the soul of the planet, try to feel the soul of your friend and your child that you don't need the dimension of physicality. (:50). The famous song says, I am who I am. Nothing else, nothing more. I can't make something for you if you are not aware and in a way knowledgeable about your own essence and existence. If the sun in interaction of its own fields creates the moon, earth and Mars, so is the STM in interaction with the fields of its environment creates the liver, lungs and the physicality of the man. It's us who has to understand this and nothing else. We are blind to the truth and in that process we have become blind to our own existence. How do I measure the fields of my soul? Have you ever said to someone, I love you. Has that word had any meaning to confirm your existence, then you have understood the strength of your soul. Have you ever held one to kiss, one to touch, one to smell and one to transfer the whole of your existence through, then you have understood the dimension of the physicality of your soul. (:52). I love you very much. I adore you. What does that mean? It means I give every soul of the cells of my body in the dimension of the soul to you that I can feel every cell of you, that you can take what you need from me. This is exactly what the Creator does with the man and the rest of the U. I give from what I have in totality and no more than what I have I can't give and then what is the totality. Is this what I carry or is it what I can take from the fields of the U which are available, to make it available to you that you elevate higher than me that you can absorb more and a higher strength that you can reach a higher level. What does it mean we give more to our children that they live a better life than us and we tell them, I love you, I love you my child. It's the same when

we love a person, and it's the same with the love of God and the Creator. But how do we tap into. How do we get this understanding, it's for man to understand truth, then you'll understand why we have set the company and the matter state is for those who want to be in business, because our business is the work of the creation and the admission ?? of the STM. Those who are happy with companies and setting up factories to confirm their (..break) for those who are physical to confirm their existence. (:54). We set the scene but it's for the man to choose which scene he wants. Do not lie as we see the lie through the STM and the physicality has to stay ashamed. Nothing is hidden it is our grace that we keep our silence, and not your cleverness and silence, cheat and deception. Nothing is hidden when you work through the soul but a lot needs to be taken, and be graceful not to put it right in the face of the people, that I see the truth. It's for you to live with your own shameless behavior, because that is what it is, not from me, my silence is my grace not my weakness and it's the same when you become the man of the U. But again you ask how do I find my soul, if you have to look it means that you have even understood about the soul. You haven't understood about the sun, the creator of the creation of your life, you haven't understood about the center of the galaxy which gave life to you as the center of the sun, be the center STM, and then the same as it gave the life strength of the soul from the center soul of the U, and the center of the U gets its life from the center of the soul of the Creator. (:56). Then is it a reflection, or is it part of? Nothing reflects, it's part of, so our soul is part of the soul of the Creator in the totality of the dimension of the creation. No one has put a mirror in the U to reflect its light, we have become part of it in different strength ?? its point. Then there comes another point, are there creatures who live in the bigger dimension space of the U, yes they do, but for man it's to see. Are we part of their organs? Maybe, but in a way we are an organ and part of ourselves (we ourselves are part of our own organs ?) , how can it be any different. The limitation of understanding and of accepting the truth, it depends on the strength of what we call the knowledge of the man and the truth, and nothing else. People will take from this T according to their intelligence, which means according to the openness of the STM, (in) how to translate this knowledge and understanding that I can move to the next dimension. Or have we got the ?? of when the man created the first car, that if you go faster than 25 mph your brains will come out and ears bleed and you'll die. So many of us who don't travel on the donkeys but in the cars of this planet must all be dead according to those who existed in 18 & 19th centuries. (:58). But interestingly enough, did anybody look up into the sky and see how fast the birds fly and did their brain come out, or was this the fallacy of man who never understood the totality of the truth. Now we have the same problem in the next dimension about existence of the STM, and once you understand it and you can explain it and transfer the knowledge through, you got ?? ?? mental asylum and the rest. The process of the man to become men of the U has started, it now depends on how many men are ready to move from the village of the earth in the different ways and not by weapons and rockets and maybe very soon through the SS. If you need to have a SS call Theran, the Iranian leadership will give you one. We have to move into the next step and in totally understanding it is the function of the STM for us to understand our soul, and if you are still in the habit of the old times, you become the new French business, we are making weapons for moon. Now you understand why I say that we have to change the man on this planet before we'll take him out. They can't get there so now they are trying to weaponize it (moon). the moon is a speck of dust in the dimension of

the U. In the pictures of the meeting of the French president and Iranian foreign minister, you see a strange man, (1:00). sitting next to, ?? of Christianity, the Iranian foreign minister. Has the clergy entered the domain of the STM or still tampering with the physicality in trapping man in another dimension of the physical war. Just look at the picture and see where Mr. Massiv sits and who is immediately on his left hand side. (..break..) Christian ... religions are gathering together because they know their time has come. Trying to fiddle and fix the dimension of physicality of governing when there is no governance. Now the STM will govern. How do we tap into these dimensions, how do we choose the strength, mankind has been too kind to himself to fool himself to spend more time in the dimension of physicality, because we came here to have the pleasures of physicality. The beauty of existence, the smell, the touch, the sight. (1:02). Now can I feel, smell, and touch with my soul then with my physicality, and what would I smell, which perfume of the STM uses, and which dress does it wear to cover the deception of the physicality. There is no board for me to write on to past this knowledge on, it's for man to write with the pen of his soul and to understand with the dimension of physicality of his own soul, the truth about the existence and take flight in the path of what we call the soul of the existence, and then there is one question, if this U is made to contain the STM, the soul of created things what soul contains this U. If there is a containment there must be an environment for it, then what is that environment, what is the dimension of the strength. In the books I have explained it as the Unicose, (1:04). the totality of the cells, the containment of all of these universes, but is the term Unicose in totality is the embodiment of the Creator. Is it the interaction of the soul of the Creator with the dimension of the soul of his physicality that each U becomes a cell in the structure of the physical body of the Creator. Then you understand how feeble the man is and what is the mankind fighting to be a dust of the dust of the dust, that he is not even a dust. How can I write this and show it on a piece of paper or on the board? We are not theologist, we understand the essence of the process of creation. Theology is for those who try to fool the man to control the soul. We free the STM from the shackles of abuse, if the man decides to terminate with the dimension of physicality of his own. It doesn't need to come at the point of death. If the mankind understands that he cannot confine the physicality of the man then what is the use of building the prisons. (1:06). Who are you going to keep in there when all the prisoners know how to move their soul. Or does mankind move to the next step of creating a prison for the STM, the churches and religious leaders have done that for centuries and so on. We have to teach the man to never get into the prison in the physical structure, or imprison his soul with what we call, control of the others. This is what I said in many of my teachings when we take the man to the U or the U Community, not everyone you see who shows you a magic, as I was asked by the Iranian authorities to show them magic that they'll believe in, then it becomes a new religion and a new prophet. I have to show a magic that I will be accepted as Methi, I am, there is no way. I'll confirm with the knowledge and science and that's my magic, which is the totality of the truth. Let my students show the magic. We have to understand the totality, the reality of our own existence, then no one can fool you, or make a Methi or messiah out of you. All souls are equal in the dimension of the creation. (1:08). they have made magicians out of the prophets and messengers, not this one.
Any questions?

Q: Can you please tell how Jesus opened the way for us all,.. did he take on the planet and ?? comet from the soul? If you understood the teaching of today I think you should have understood. (1:10). Q: .. Tell us why man is profoundly unaware of his infinite potential, what is the hindrance or blockage that prevents him from entering even though it is the foundation of man's life? If you think of it another way, (let's say) you sit on a train and there is a lot of background noise, the train running down the track, the people who speak around you, the AC, the hostess who offers you a drink, children running around, but you are on the telephone trying to speak and tell your lover how much you love her. Is your body, hearing, your essence of existence, does it listen to all those noises when you are confirming your existence to your partner, or have you blinded yourself to it, you have blanked everything else out because that's all you care about, (1:12). to tell your lover how much you love her. It doesn't matter what is behind. This is exactly with the man and his behavior. Man has chosen to ignore, but the work of the U and the soul of the U carries on. We have chosen to stick to the dimension of physicality even the noise of the existence of the U carries on outside it. We are that passenger in that train, we have chosen to ignore, to blank out the noise of the U, the confirmation of the existence of the beauty outside the train and how fast it goes and what a beautiful person sitting next to you or what a nice food is offered, it all doesn't matter as long as you can confirm to your lover that you exist. This is what man has done with his physicality, it doesn't mean that the rest doesn't exist, he chosen to ignore the voice, the noise, the call of the Creator. We sit there and the train arrives at the station you wanted but you are so busy telling your lover how much you love her that you missed the station and are back on the train of life. You didn't get off but you arrived at the station, and man has arrived at the station to understand the truth in the dimension of existence. (1:14). We chose to become physical and to value that. Caroline asked me, why have you come here. I said, there is so much beauty in physicality we wanted to taste it, we wanted to feel it to understand why man is attached to it so much that we can find a salvation for the man. His scent of life. The essence of creation in the dimension of physicality that it gets man so tied up to be attached to it, to beg for it, to breath one more breath, I give everything I have, I want to here 1 hour more, 1 day more to suffer more. What is with this dimension of physicality, we have to understand and now we do and it is nothing but a mirage. As I said, I love you very much, which means I give from the soul of me, my existence for your soul to elevate beyond me. Not to be equal otherwise it is the selfishness of existence. Any other question. (1:16). Q: Doesn't DC also contain AC within itself ...

(1:18).

(1:20). Q: What happens to the souls of plants and animals after death, does they first have to become humans to return to God? What happens to the soul of the man does he become a cat or a tree. .. then the answer is the same. When a soul is created and leaves what we call the cradle of life, where it was established, is it what we call foot free and can fancy anywhere he wants to. But you have to understand, go back to the original teachings, a soul has both to give and to receive, and when you free this bird from its cage it has to find its position in respect to what has created it. Would the soul of the ant reach to the level in the U that would be closer to the soul of the Creator, (1:22). and would the soul of the man who leaves this dimension, moves because of his misconduct

and what he has given from his life in damaging whatever, moves further from the soul of the Creator, in another dimension in another position. And then when he arrives in that position is it the position that dictates the condition of his physicality. If it decides to manifest itself, then do we have 1 universe for all the ants which are created on this planet, or is there only 1 U which accommodates man's soul. 'Hello boy what time have you been on earth, I have been there centuries ago .. and which planet and which galaxy have you created. This was deliberate, that part of these teachings would be so clear that all these ambiguities in this part of the T would be fully understood in the composition of the knowledge and understanding of the totality of the knowledge ???
any other question. (1:24).
.. Rick asks, ... all souls are one but at the same time individualized through the physicality, is it a different vibration for each one, not really a frequency, maybe it's more like a flavor or color, or can't be described by our senses, but I think we know the difference between souls generally speaking, we make a distinction between a soul of a cat, or stone, or human, yet you say they're the same but different, (1:26). different flavors. .. so can you explain that a little? What do you want me to explain? Okay, when you encounter a new soul how do you register that being with yourself, how does it vibrate with you ...? You see when I stand in front of the person and I get lied to, I see it through the soul, it tells me it's a lie, but I don't go back and say you are lying because I can see your soul. I leave it for the soul to put the physicality in the position that it sees its life. That's all you need to do. The way you create a condition to manifest your physical manifestation, it's the same process, there is no difference, in a way you see the two, and the body language tells you. If somebody tells you ... (1:28). Like in Iran, you offer them something to eat and they say they don't want, then after they eat the whole plate. Do you understand, it's the same with the work of the soul, with a person, and I see it quite frequently, and this is why as you now know with all the KF .. things over we have gone in different dimensions, I put everything to all the members of the groups which are involved, exactly as it was. So they have to go through the same emotion as I hear from people, authorities from our departments, because I am a messenger for what is happening ?? outwards, but because I give the message as it is, I have no problem, because if they go to the source they get the same message. But the beauty of it is in that process the whole group has gone through the same emotion together, that when we get to the goal, and when it is there, as it has been said, it's been set, then the clarity of the soul exists, the unity of the soul ?? and this is how it is. You understand the whole composition. (1:30). You stand in front of your boss and you haven't done what you are supposed to do. You say, 'oh, it's all finished sir.' He says, can I have it please. Oh sorry I have 1 or 2 more lines to add to it. He knows you haven't done your job and you put yourself in that position of testing. By saying, there are a few lines more, you can have it by tomorrow, which way have you lost. We keep, sometimes there is a lot of pain and suffering, but why have gone through this, why have we been put through this process to learn what it is, what is the outcome of it, what is the reason we have gone through this test. If you are put in the position of test, it's different then when you put yourself in a position of test, to understand your strength, your own inner being's strength, this is mine, this is what I believe and what I do. As I said, now that I finished with the dimension of physicality, I still have to carry on a little more, that mankind keeps busy with his own dimension of physicality. The teachings will move very fast, (1:32). in a very specific

direction that you all will understand very soon. Just be careful, the oven is getting very hot, the heat is understanding the existence of your own soul in the ?? Unless you want me to make you a soul machine. Jalal, Q: If I have a SF of 4 reactors, if I bring a 5th reactor on top, I will elevate the 4th one to the 5th one .. K- Who says? you might lower it or push it outside, have you ever tried it, I have. ..
the SF is there but the soul of it is outside. but I don't need to move it to the 4th one boy, I can move it to the 3rd one. . (1:34).

Jalal annotates. .. (1:38). Jalal draws a SF with a 5th reactor above and he says it moves the FP up to where the 4th reactor is. Then he draws a body with SF, and draws the soul above the head. Mr. K asks why did you put your soul above your head? J- because it is, this is the field of the whole U. K - oh, go back to studying, Rick give him some of the teachings, he ?? doesn't seem to listen. Your soul is in the center of your brain and not above you. ... Whatever is outside of the body of the man is part of the universal field, it doesn't matter if you are on the earth's atmosphere, (1:40). or on the moon ... Your soul never changes its position unless you allow it or conditions are created for it to be, 14

(1:48). .. From now on there is a lot of soul searching. I'll show you a picture then maybe we show the progress of the knowledge. Shows a picture of a line of reactors. This is how we have created different dimensions of the strength of the soul. The one of the right hand side is the first Iranian space reactor. (1:50). The blue one is the first we built in Belgium. The half sphere, two are a twin system flight and solar system, last one in an energy power supply. In the essence of understanding they all have a soul, in the process of creating the condition, we see we can, we have created a soul in each. Irrespective of color, size and condition they all follow the same pattern, nothing has changed you just change the address, galaxy, position. This is a very good example of the development of the knowledge in the physical dimension of this planet, understanding the creation of the soul, we call it a plasma in the center of the system. The truth hasn't changed in any of it. Do we create a soul for these systems that they find a position in respect to their planet soul, that they find what we call the flight. Do we set our systems in balance with the G of this planet, (1:52). or in balance with the truth of the soul of this planet. Then it comes to the point to ask wouldn't it be easier to develop a simple system which interacts with the soul of the planet which is singularity then you trying to overcome all the gravity, Inertia, and everything else that is piled on top of it. Shouldn't we design a new .. why is it that MaGrav positioning with the soul of the planet, we find a position of the body of the man or your spaceship. 49

(1:56).

(2:00).
(2:04). I'll try to explain something, put some pictures together to explain happiness. 40
(2:06). Look at this picture we see 4 states of life.

(2:12).

... The teachings from now on open the soul to the dimensions of the fields of the U.

(2:18).
.. We have accepted the conditions ...

(2:20). .. Q: What if a woman has a genetically problem from mothers side of family which is a risk to pass on to the child and she wants to have a child. (2:22). Is this possible to prevent before she gets pregnant? You see at the present time the science of man doesn't allow, we can't do anything with, but in the understanding the process of the creation and with the knowledge and technologies which are in hand, up coming and we'll see more and more. You can elevate the soul, and that's the condition, does it mean, .. the question to ask is why do we come to that point of genetic, it doesn't matter as a mental or physical condition, what did it serve that the point of the first time, what was the reason for it, the first time. Why do we get different diseases and give it to our children, we call it a disease but maybe at the point of when it started there was a need and a reason for it. Can we understand that point and change in the condition of the physicality, the condition of the environment has created that condition, and then can we interact with it, not to interfere with it, and change it according to our need, according to what we want. Maybe the creation of that soul, with what you call a mental condition would be, (2:24). the condition for the creation of a beautiful soul.

(2:32).
... We have called meeting for those of you in UC, and EC, Core Team and support of the councils. about the new global position. (2:34). From now on each council takes their position for governing ... that we can collectively decide the next steps . Any other questions. Q: We see the interaction between the earth and the sun. (2:36). .. where can we see the interaction between the STM as a body as me and the soul of the Creator, let's say the soul of the U, there must be interaction so there must be something to observe to see where will that be? Do you want to see with the eye of the man or the eye of the STM? Q: This was my question at the beginning. So how do you know that your soul has not been there yet or is not there at the present time 37 01

(2:40).

(2:48).
.. KF has entered a new era, as we said in operations or commercial side and the spread of the knowledge and t around the world. Today we take the first step to understand and comprehend of what is going to come. ... This was just the beginning of the hard work. (2:50). .. Announcements of the new T will happen only through the global and international side of the KF. ...
I am stepping down very soon ... I have done my job. (2:52).

(2:54).
.. Please try to understand what we have been teaching you in the past 2 - 3 weeks because it's very important and you'll understand very soon. If my soul is dynamic and

lead to the creation of me do I need a dynamic core to be able to travel the dimensions of the U ??? it's the same ?? and the same strength. (2:56). You have to be registered for the conferences by this Sunday. .. We'll show new T and it will shock some of you but that's what is needed...
(2:58).
Video
END

292nd Knowledge Seekers Workshop - Thurs, September 5, 2019

(Soul teaching; How to control the spaceship without Chips or wires to be shown in Theran April, The brain is a copy of universal communication system which we'll replicate, Functions of the Universal Council in communicating with the universe, Those who go out and travel the universe will be connected to earth through the UC, Mankind has not been alone on this planet other beings have helped us and likewise we'll send our children to other places to learn, In some fields of the universe the brain dissolves but the soul of the man remains in the background, By positioning of the fields DC can be converted to AC and matter created, The human body is a replica of the totality of the working of the universe, The blood flow around the brain is a M field to contain the plasma of the soul of the man and the same as the M flows in the M fields of the universe, 3 dimensional Chips technology will be transferred to Huawei, , , ,)

(:03). We'll try to go further in understanding the new T and the science of understanding the control. One of the biggest problems we have is to create a control condition. It means in the space we have literally no instruments. Mankind is at the beginning of a new knowledge, understanding a new T, and the latest equipment we have the latest electronics is absolutely obsolete. Totally useless. We have no understanding of the complexity of the structure of the communication in the U. (:04). We have not understood the totality of the work of the M fields and at the same time we haven't comprehended how these fields interaction within us, within the structure of the body. We always assumed that we have a brain and it tings and it does, but there are no electronics, no line of communication, no wireless or memory banks. If we look at the structure of the brain of the man it's a replication of the control system of the U. There is no difference, compacted within the sphere of skeleton of the skull and within the structure of the body. the new structure in control and managing the space programs of the future is understanding the new phenomenon, the new T, to create systems which can deliver instantaneously in different directions and strengths and in different commands. This means, when I used to be a student as a nuclear engineer, being trained to develop and understand the control of a nuclear reactor, we were not just told that this is a switch and what to do, we had to understand the geological land where we had built the structure on, (:06). and understand the structure or the building itself, and every dimensions of thermodynamics, radiation fields, electronic interference, everything else, then on top of it to understand that if something goes wrong with the ground where we have to move, what is the geological effect of it. We saw this failure in Fukoshima, the bunch of

electrical engineers where sitting in the control room, and what did they do, the mayhem we have. When you train nuclear physicists, ... we were trained in every aspect that we could instantaneously make a decision if anything goes wrong, or if we wanted a demand. A lot of nuclear physicists are theoretical and a lot of nuclear reactors of today are run by electrical and mechanical engineers, that's why we see so much, because they have no understanding of nuclear reaction, once they understand what they are expert in. In space we don't have this, the ground, earth, geology is the M field of the U, that's what the platform is. The structure of the building, what it's made of, is the physical interaction of matter state, (:08). at the point of interaction, manifestation. How do we control it, then we have to understand the nuclear reaction, on top of all that what is going to happen in the reactor, which is the STM. In the new space T, we have to survive in space and be able to expand the horizon of mankind, is to be able to understand the totality of the work the ?? strength of the U. The working of the system, how does it work, how does it interact and how does it effect us, and how can we use our soul, our body, the fields of ?? of our existence to be able to survive in the dimensions of the U. Mankind has a lot to learn. In a couple of teachings ago I explained and showed the interaction of the fields of the U and the conversion. Now there is no choice we have to find a way, for the replication of the work of the plasma, a neutron is the same as the structure working of the solar system, that now we know what they call up quarks and down quarks, we call them the earth and the moon because now we know what it is, we don't need to come up with fancy words. Now we need to understand the work that these planetary systems, stars, galaxies, the STM needs to work with and within. (:10). We come to the next steps of understanding. We gradually move from the village of the earth in the dimension of the work of the U, therefore where do we need to look to find a replication, to find the totality, and where do we need to extend our knowledge that by extending it we can understand the working , the control, the manage, the parameters of the U within the structure of the brain and the STM. We replicated the work of the solar system within our T in the past 5 or 6 years, now we need to replicate the communication system of the U, to be able to exist and be a real true man of space. Where do we look for it, where do we have the closest replication of it, .. **We found it in the inner sanctum of the neutron the structure of the solar system. (:12). We'll find the working of the communication line of the U in the structure of the brain.** Mankind needs to understand the workings of his own brain, the physical condition, material which makes the brain, the central control system, to be able to replicate and understand the working of the U, communication line of the U. In the coming teachings I'll try to bring up, and explain and many of you in the communication line will understand. .. that collectively by April of next year in Theran we can **show a full flight system with understanding the totality of the control of the system, where and how we can bring the T about, without any wires or Chips**, to resistors and transistors to Nano materials to be able to do the same in the new space T control systems of the future excursions of the man not only outside this planet but also within this planet, within the solar system and galaxies. You have to go back and understand the nature of the totality of the physical nature of the structure of the body, (:14). not only of the physical matter condition of the arms, legs and organs but the operation, interaction, energy, information transfer between the brain itself and all of these organs, where in the future as we understand more, the soul of the existence of the man, **for those who were created on this planet will be the soul of**

those who run and are part of the planet earth, you become the soul, and who goes out becomes part of the connection with his soul, this is how the U Council will operate, maybe for the first time you understand slightly more what we mean when we explain this process, why we set up the structure or the UC, that **the soul of the UC members as totality become the line of the extension of the working of the U with those of the human race, which there, and travel the depth of the U**. It might sound strange to you, how could it be, but it is, this is how the position, the condition, the interaction. In a simpler way, when you are a mother you feel the pain of your child, it doesn't matter where it is, you pick a phone up and say what is wrong. The collective soul of the members of the UC becomes that mother, it feels in the line of the M field of the, (:16). emotion of the humanity as we are collectively connected, we bring the message home, there is a problem, we need help. Then you'll understand why we are structuring the whole combination of the KF work in many directions. We are creating a central point of the focus of the STM in the collective awareness, collective work of the soul of the members of the UC to be the tender lines not only for this moment, being there, what is good for the French, Germans, or Iranians, for the French and Germans bloodline or the school or soul of the link in the span of the U. Now you understand further why we set the whole structure this way. Where now we bring the other arms of all what we set up to be part of the collective connections of the U Community with the human race. There is another point we have to understand in the whole totality of the whole understanding of the work of the U, **mankind on this planet is not alone. He has never been alone. The way we'll now extend our arms by the traveling of our children and their children into the span of U, those who were educated and they were advanced enough, in times of the past they have sent their children, the same as what we are going to do across the spans of the U**. Some of those are with us, amongst us, and have become part of us. (:18). In the process of evolution and evolving they have brought many beauties to us, this is what mankind will do in the future. But how can you tell what your son sees? He picks up a phone and says mom I am at a beautiful beach with a sunshine and a beautiful sea. Sorry we have no universal communication that your child from planet Zeus can say what he is looking at, except through the work and understanding of lines of the communication of the soul of the mother to the child, the UC to the members of humanity across the planet. Mankind will evolve, especially those who become connected to this dimension will evolve very rapidly. It's not that something new will be created, we'll become aware of what we have and have not utilized will come into operation. Now you understand why this is there and that is here and according to our scientists they say mankind only uses, what's it 5% and Einstein was supposed to use maximum 15% of his brain. E**very cell of the brain is used at all times, but man has not been aware of it, because we use it in different dimensions** and for different purposes and for this reason now we have to, there is no option, to move into the next step of understanding the construction of the control and of the communication of the brain, the cell, conversion, transformer, (:20). what we call the modem and at the same time their receiver and then at the same time the generator and everything else within the structure of the brain. If you go back to the teachings we did some years ago in the medical section on the structure and working of the brain, many of you will start making connections. You'll understand the connections between the teachings of today, the teachings of the past 5 or 6 years how everything was set to bring all together, gradually,

to understand to work. But there is a very big problem. **In the span of the U the earthquakes of "Fukoshima" happen, the structure blows up, but the fuel rods and the source of energy are still there, which is the STM**, and the **brain of the man in the dimensions of existence of different fields of the U, will dissolve. They cannot exist, it's like putting sugar in the hot water, but in the middle of the sugar when you have a lollypop the stick is still there, the center still holds, that's the STM**. Now how do we transfer all that is developed and carried by man in connection with his brain and the working of the system brain, into the system control of the STM. (:22). When mankind understands this, he reaches the level to understand the essence of his own Creator. From now on and in step by steps, with new systems that you have never seen that we are going to release, you'll understand why we have been sitting on the wings teaching that more and more people understand. In the coming time in the teachings which are set up, the demonstrations which you'll see in different conferences, we'll push mankind to move from the dimension of the matter state into the dimension of the interaction of the fields of the U. Conversion of the fields, the presence and existence of what you call AC and DC (not the Canadian way music band). In understanding the totality of not only field strength, the interaction of the fields and in what angle, in what position the fields have to interact that they change themselves from AC to DC and vice versa DC to AC, that's all it is, if mankind understands this, how **he can work within the flat line of DC and then when it's needed to convert it to the sinusoidal or whatever shape of the fields that it can become matter state,** then man has truly come and reached the point of maturity of the understanding of the work of the creation. There is nothing else to it. Some of you, the leading space technologists, (:24). understood this some time ago in the teaching. Now we are setting up the new space center in AZ, KF in the coming weeks will develop this T and we'll bring AZ to teach these new technologies to humanity. What does this mean? It's not the soul. The sun has no beauty if there is no earth to convert it and it shows the existence of the sun. Earth has no beauty if the man is blind and can't convert the lights of the vegetation, animals and the sea in his own eye. This is where mankind has to make the change, he needs to **understand the totality of the work of the U within the structure of the physical human body because we are in a physical sense, a miniature replication, copy of the work of the U. It's not just a kidney or liver or heart or arm, the universal operation is based and it has made the man in the image of the working of the U, and in that essence, 'I made man in the image of Myself.' Then is the STM the copy of the working of the soul of the Creator or the U, and the answer is yes**. (:26). There is no room for theology but in fact, theology is the knowledge of the working of the U without understanding, needing the matter state condition. respecting the work of it, then understanding the interaction of it, and how one leads to another. In the writing of Sadid, the most beautiful poet of Iran, it's on the door of the UN, it says, we are all each part of the same party. But in fact, my soul is part of the structure of your soul and in that sense, collectively we make the soul of the Creator. The soul of the cell in the kidney, liver makes in totality by balance of its own fields in interaction of the fields of the planet, the body, working functions of the body, so it can't be any different between the cell and the soul of the body, as the soul is itself in interaction with the soul of the Creator. Now the whole structure is how did this brain come to exist. How has it found positions for emotions, different feelings, different functionalities, replacing and ?? interacting to every cell and condition which comes

about. (:28). As I said in a few teachings before, **the blood flow in the skull are the M fields which the scientists and plasma technologists create to contain the plasma. The flow of the blood of the man to create that condition of the M field is the flow of the fields of the M fields of the U. There is no difference**. Then you understand, within the structure how the **interaction between the blood flow and the STM creates its own condition for creation and conversion of different cells of different strengths one to be used as the memory bank, reaction cell, emotional cell, or one to used in communication, but in fact the totality of the structure of the brain, and is of one, in essence one entity, but so micro it doesn't show, but so macro that it can connect the whole of the U**. This is what mankind, what the scientist in the coming time have to learn. If there is one thing the way I do, you bang your head against the wall, when you work in the true essence, (:30). in the space T of today as a spaceship program, the computers are obsolete, the electronic systems cannot catch up. You realize that mankind is in a dilemma of knowing what is to come but not having the tools to get there, to see it when it comes. This brings about for many of you the need for evolution, development of the next steps of lines of communication**, the next steps in what you call 3 dimensional memory banks**. Those of you who will evolve in a rapid way in the knowledge, you'll understand that the brain is made of single Gans's collectively to make the emotional part. Those of you who understand soon will come to comprehend one of the most important parts of all these technologies which I have taught is that the Gans's are the cells in the line of the communication system control of the matter states into the line and conversion into the line of communication of the universal connection. What does this mean, what is the reality? How do we now come to convert these single Gans's in these jars you hold to part of the communication lines, instruments, communication beings of the future, (:32). for the need of the man in the depths of space. 1 one single Gans of Cu can manage the whole working of the fastest computers of today in storing memory. In the coming time, the KF corporation with leading Chip manufacturers will convert the totality of the new and present world of computers and the rest. **We will teach to leading manufacturers like Huawei, in the coming weeks, the production of the new 3 dimensional systems in the memory bank Chips of the computers, which means we transfer the knowledge** to bring and build the new dynamic memory banks of the coming time. Now this puts a new pressure on other companies, other organizations to work together, that collectively we change and we prepare ourselves for upcoming time in the depth of the U in travel, in cooperation. In my meeting with Huawei in the next coming days we will transfer T to ?? organization, in a clear way. This is the way we shall work. We work with those nations and companies who are advanced enough that they can understand the T. There is no American organization who understands this yet. The Chinese computer organizations are far ahead, it's no use dealing with a child when you can work with an adult, (:34). that he can understand the totality. The cooperation will be the same with most of the Chip manufacturers who are advanced in the cubical Chips, to transfer the knowledge in what we call the Gans T, in parallel containment of other conditions. We have no choice, instead of teaching online, (hoping) somebody might do something, we collectively bring the scientists who are in that position to be able to step up the next. Nano T is obsolete. It was a step up. Those of you who have not understood the totality, how far, how advanced you people are. It's very simple. If you speak to the leading scientists their understanding is what a Nano is, and some of them are even lost in

explaining it, as K Seekers you have gone a step further, you have separated that Nano, now you have a new material, you call it, Gans. In knowledge we are tens of years ahead of the present world of science in material and Nano T. We were matter state people and ... yahoo we found Nano material, and we are very advanced, yahoo, KF K Seekers have gone 20 - 50 years ahead, they work with the next step, we call it Gans. The way the man has advanced in the knowledge of Nano T and everything is Nano, we Gans it. Far, far beyond the present understanding of the sciences of today. You as K Seekers are leading the world of science. **We need for you to understand what you really are and have really been playing with. (:36). You have been playing with the essence of the conversion of the fields of the U to the matter state of what you call Gans**, the stars. That's what stars are, they don't just become shinning and become a bunch of (fire) flies and everything else. They have gathered the energies and have organized themselves that now they can give as much as they take. In the knowledge of the present understanding you as K Seekers in understanding the work of the Gans, the workings and structure of it you are hundreds of years ahead of professors at Cambridge and every other university, because they are working with donkeys. Sometimes you need donkeys to get things out of the depths of some caves but when you come out you have every other systems to move. Now you understand what you were afraid of, when they told you, you don't understand, you are too advanced, you have already entered the next phase of the knowledge and the creation. You can and you should be able to understand this. None of you have ever picked up a single Gans and seen its operation, because to you it's something there, Mr. K made the CO2, we call it CO2, we use it for the pain, but this is (like) having gold in your hand and not understanding it. I gave the gold of the U and you have not understood because you have no knowledge of its value. You know sometimes somebody brings you something to your shop, oh I want to give you this, it's worth nothing. But then you take it to the specialist and it's a million dollar antique. (:38). I have given you the antique of the U because the others don't have the knowledge to even understand it. Now you understand how in a very simple way I have brought you to have the tools to be able to be part of the U Community, but as you never understood you have no value for it. What is the use of me explaining the beauty of the rose, the smell of it, the way I explain love in the essence of the presence and the peddles of the rose, when you have never seen or smelled and you have no knowledge of its existence. Now you know it exists, smell it, feel it, touch it, and understand the emotion it creates within the body and STM. Now you understand what the Gans's are. And if you haven't understood, Salud (good-bye) we'll see you to your great grandchildren when they might understand. The **advancement of the T is so rapid that we don't have this knowledge anywhere in the books written and it only can be taught this way that collectively we develop, understand, and change the condition**. We change the understanding and comprehension and move away from these funny little things we call Chips. It's good for the fish, but not in the computer. (:40). It's time to move, to evolve and in the upcoming time **we will bring this to the most advanced communication organizations to develop the next generation of what we call plasma Gans or the replication of the brain**. In my book if you look where I show the tube of the mixtures of the Gans's. I gave you the knowledge 10 years ago, but nobody understood. that was the message, because to you it was just some liquid colored water with some bits, it became CuO and ZnO and everything else but you never understood what it was for, what you could do with it. You

were only happy that it was something to drink that it might change the diabetic, but you never understood that it controls your diabetic, **it's the essence of the creation of the transfer of the energy in the essence of interaction with the STM. It's not just a water you drink, it's the line of communication you create. You have already become universal communication people but without knowing it**, because it was not understood, it was devalued by those who don't understand through what we call, peer review. We have left our knowledge in the hands of a bunch of incompetent people who call themselves the scientists of today. (:42). This is why they object to your work, and there is something else, we don't understand so we object to your work, no there is something wrong with it, sir, you are incompetent, you are donkey's age time and not the present time. You're working in steam engines while we are in Pl conditions. In the coming time now that we have set up the functions of the company in the US as an international company we'll deliver these technologies collectively to humanity into organizations which can rapidly take us to the next step. We see Hauwei as the most advanced and other companies in China who can take it further. In America we have nothing, no organization who can work with us, the knowledge is not there. They are 10 to 15 years behind G5, we are working in G9 and 10. What is G9? In one of our meetings in China there is an establishment of an organization known as G9, what is G9. G5 is the breakdown of your communication how fast, G6 and G7 become the method of feeding man in space and in disasters, transfer of the medicine through the line of the communication. G8 and G9 will become the line of communication in a universal condition, which means we are that far ahead. Now they are fighting for G5, oh my gee. We have developed the technologies and in the coming time we'll deliver them to the governments, to the nations, (:44). who are peaceful and can transfer the knowledge in the line of communication, the way you receive mobile phone message, you'll receive mobile phone food and medicine. The time of pharmaceuticals is long over. One of the Chinese scientists in the KF, 5 years ago made a system without him knowing it, partially in its infancy. The line of communication in the space dimension lies within the structure of the Gans manipulation and working. We transfer the 3 dimensional space travel to the nation of Iran in the upcoming conferences, then it is the responsibility of other nations to collaborate to become man of the space, because the Iranian Nano technologies are on the verge of understanding it much easier then our friends who steal T without them understanding in countries like Belgium, US and the rest. Let me explain something to you so you understand how advanced we are. Why the government of Belgium decided to make me and the KF a terrorist, because when we gave them the first couple of parachutes from the Coke Bottle they found Fluorine in it, it's in their report, it's signed and sealed with lawyers in deposit banks of Belgium. At that time they were so ignorant to the knowledge that they said, Fluorine can only be used by creating Gamma rays, so he has a Gamma radiation source at home and he is a terrorist and an Iranian. (:46). The stupidity of a nation is not understanding the work of the U, the U works on the principle of grapheme. Now you understand how advanced we are, registered through the company which tested it, as you know the head is one of the heads which are going to the European Court and the lawyers for the attempt of murder of me and Fabio. This is why they were killing .. confirmation of the existence of resistors, known as grapheme in the space T, became the source of Gamma rays and terrorism. This is the ignorance of the Europeans (.. break..) in blocking technologies. We work with the nations who understand and are

open and now you can understand why technologies are transferred to Chinese and Iranian organizations and those who are advanced and open enough to understand the next steps. Not Mickey Mouse copycat nations who like to copy like the scientists in Japan and S Korea. Because there is no time to stop and hold back for the others through their ignorance to catch up. In the coming time we'll release more and more information and documents and data to the European Court of Justice that the Belgium's knew what they were doing and what was all the frame up. Their own reports from the companies they appointed to test confirms the existence of grapheme 11 to 14 years ago. These documents are sealed in the vaults of the courts of Belgium. (:48). Now you understand how advanced you all are because you have even passed the conditions of grapheme, you have moved into the Gans state. You have managed to separate that atom which call grapheme and by its orientation, the same as the brain you can clear one section, separate it, section it to be for the emotion, any frequency of the matter state in this box means joy. Now do you understand? Any M fields strength combination of the AC and DC at this point means hunger, now you understand how the new technologies will be developed. Because you have all the tools. You were happy to make more and more of it and put it in a ball and rotate it. I was more happy to individualize it and understand the work of it, the collection of it, operation of it, and the interaction of it with the universal fields. Now maybe, you understand more, how advanced the KF K seekers are compared to the present scientists. If I can compare you, you are very much like the guy who said, the earth is round and rotates and is not the center of the U, and what did they do with him, they hung him in the church. And this is what they tried to do with me and all of you. (:50). We are the man who understood, worked, understood, developed and made these materials in our bedrooms, garages and we become more advanced and through it to its beauty, understood the work of the U. Now you understand how some of you who devoted your life to this knowledge have become the true men of knowledge of the U. To you it was Gans's but nobody ever told you that you have the key, you have been given the tool to communicate and to exist in the spans of the U. Because when you can make that Gans in the strength in the level of the soul of the member of the Universal Council, that is the line of your communication with zero time, zero space. The human body, structure, the working of the brain is the simplest version of the operation of the work of the U. A few years ago when we started building the second version of the brains in the lab in Barletta, I taught one of the K seekers how to structure it, layer by layer, and I told those who took over, that it has to be fed, watered and kept diluted that it can work. If you people understand the knowledge of the Gans T the way it is truly done in the U, if I give you the skull of a man, (:52). which is dug up from the ground today, you can build the man, build his brain, and with it through his structure create his physicality, because every curvature, every bump, in that skull has dictated what field sits where in that structure we call the brain. It's not the brain which has made the skull, it's the skull which has given the brain the limitation of its working, this is why some races have different structures of the skull, have different intelligences, why all the Chinese are like this, why the Canadians are like that, because the structure of the skull, the containment of what the body holds, and how much it holds and what strength it holds, then you understand as K Seekers you have had the tool of communication and work of the U in your hands for years. But all you did, you were happy if you had a little pain (use it for that) rotate a little of this and see what you get, as God's will. Now we train specialists in

communication, in what we call, line of interaction with universal fields in the coming years and months, to be able to make man the passengers of the U and at the same time, not on his own, but in line of communication with the mother. We set up the U Council for that purpose and that purpose only. That's why they are called, U Council, it means they are in touch, (:54). with every man across this U who dares to travel the depth of the space. He will always be in touch with home. Collectively the members of the UC can recall the soul and with it bring back the physicality in time of trouble, this is the power we have given to the members of the UC. This is why they are not chosen but the soul has chosen them because the soul is at the point of inception to understand the totality. Those who lie and cheat as members of the UC will never understand the path we are on. Those who live in that life, by in the physical dimension lying and cheating to themselves and the others have closed the path to their lives to become the true members of the UC. There are very few that I see. Those who talk by word do not count, the silent majority are those who have chosen through the love of understanding the creation of the STM. Do you remember that I explained to you, the time will come that you want to board the (space)ship and you'll walk away, there are very few ?? faith members of UC and soon you'll understand. They have no feeling, they talk about it but they don't feel it. But those who are members of the Council who truly became K Seekers to become truly to serve will ?? and receive the message. As I said, the time will come when a member of UC will step down, there is a time when he knows that he has done wrong and he is not receiving, it's not there. (:56). (if for example) The member of the French speaking is in trouble in the depth of the U and there is no feeling. It's the responsibility of the soul of the member to feel it. There is nothing left, no one who leaves this planet will leave without that line of communication through his own soul, and the structure of the systems which will be understood more in the future. As I said, don't count the member of the UC, people will recognize them by their souls and not by their names and title and who they are. A member of the UC should be known by the strength and the shinning of their soul and not by his talk. It will shine so bright that it will cover the span of the U and not to the eye of the man and collectively will brighten the whole of the U as one Council. We didn't set up the UN to lie, we set up the UC to enlighten the humanity and others races of the beauty of this race in the U. In the coming time as we teach and we develop physical matters for those who understand it, you'll understand that everything we lived and worked for will become worthless, meaningless. Why do we trap ourselves in the skyscrapers, when we could live in the most beautiful span of the most beautiful places in the U and still work as a secretary in the offices, (:58). of wherever it could be. If you look, the structure of the KF is set on the structure of the global operation. We have no head offices but everyone works, time zone and place do not exist, we have started to gradually developing and creating the next generation of no time and space in different ways of operation of the KF. **As long as I have food to eat, the energy to live and sustain every cell in my body, as long as I can transfer my emotions to my lover, to my child, and I am fed, and I am kept safe, I serve the KF. This is the way I live and those who follow me will so the same. We walk away from tangibility and physicality of wealth** because the wealth is in the knowledge we carry not in the clothes we wear or the houses we live in. My house is the U and my clothes is the beauty of the knowledge I spread. **Those who follow my work will live the same life, because you'll understand that you have been given the U to live**, why have you shut and imprisoned

yourselves in the village of earth. If you are happy with a donkey you are quite welcome. (1:00). **It should be clear to the members of the UC, if you lie to one you have lied to the whole of the Council and you don't deserve, your soul will not allow you to stay as a member.** Understand that as K Seekers those of you who have understood and created and developed the Gans's, you have been given a gem but you thought it was a glass. **It's how you shine light on this gem will let you to develop the next steps in the knowledge and the science of space T for man and the development of the STM**. Now for the first time maybe, many of you understand **the knowledge you carry in a single Gans, in the collective of Gans's, is the structure of your brain**, the structure of the interaction and the most advanced communication line in the U as is the replication of the work of the U, then you understand why Nano technologists are dinosaurs of the knowledge of the space T. (1:02). 26 billion years behind. In the upcoming conferences you'll see the most amazing machines. We are not going around as a show, we are going around to show what this T brings, it brings all nations in line to work together. The **purpose of the next 10 to 12 conferences around the world is to confirm that the nations of the work, the governments have no power compared to the T which is delivered and the finances which are set up to control mankind becomes obsolete**. I have been a very clever man, huh. I have taught so many of you, now the T can't be stopped, **for the man to become man of space is irreversible**. Do we need CNN or BBC to lie to us. It's reality, that we have to understand, (1:04). it's the knowledge that we need to understand, we are born with it and it's part of us. How can a system work, how can a M field stay balanced when some of its fields are connected to the wrong place. (that's good, it means they can't do anything with us. I was told that part of the talking you couldn't hear,) From now on in the teachings, especially in the transfer of knowledge to companies like Huawei we move into the Pl T in the Gans state, that you will see in the coming months weeks and years, the new advanced systems. We held all of these back until the company we registered in the US, that we could spread the knowledge as one structure, not as KF which was, whatever. Now the T will be nourished by the Americans and be published by the Chinese, one needs to work with the other to bring the advancement to both. One pays and one gains. The humanity will gain from it because collectively we pay, (1:06). for it, through the knowledge, the time we spent in developing the next phase. In the coming time the micro Chips we are used to will be in the history books. If you remember the 30 years ago first mobile phone were the size of a suitcase ... Now the dilemma for the mobile manufacturers is to make it big enough that people can hold it in their hand otherwise they can make it in the Chip. Now we can make it in the cell of the brain, you don't need any numbers. The memory bank of the present computers compared to what is to come in the dimension of the Gans 3 dimensional system is, collectively you can put all the most advanced computers on this planet, that everyone owns, every nation into less then 1/10th of one brain, maybe not even 1%. Now you understand the change and where the next phase comes. In AZ we'll bring the understanding of the controls of the system, John has done a lot of work in that part, but he never understood why he is there and is doing it, because the spaceship program of the KF will carry out in AZ and he has set the seed for system control. He has done many experiments, (1:08). to other people has no meaning, even he doesn't sometimes understand what he is doing, but he sends me a 2 minute video, and I say John I wish you could understand what you are doing, the breakthroughs in the science you are

achieving, but because he doesn't have the knowledge to understand what is involved, but I see the gold. I see the jewel and in the coming time this jewel will be shared with many of those scientists who understand it. We have to show the way otherwise it's just another thing. As I said, the conferences coming up, those of you who will attend like in Austria, Mexico, you'll see the most advanced stages of the sciences where matter state is irrelevant, where we move into the next dimension of the structures of the systems which makes everything we have taught in the past 6 years, collectively as the knowledge that we understand how to utilize it for man to travel the depths of the U, and how to feel the emotion of the man who is in trouble in the depth of the ocean. Then you have to understand, if you have not, listen to the past 1 hour of teaching I have given you all the secrets of creation which man needs in the spans of the U, but you are not aware of it. A sentence or a word was specifically chosen and spoken,
(1:10). has to enlighten the STM to the understanding of that word in its application in the work of the U. You have to understand, people tell me, show us a magic and show us something. I have shown my knowledge in the secrets of speaking that you do not even understand, that is the magic. Every word and every sentence is chosen to enlighten certain souls. And as you don't see you are blind to what magic has been released. You have to understand that in the coming time **we will not need for example, fertilizers to grow the plants, we transfer the soul, the strength of the soul of the plants to the plant, and it itself by elevating its soul, it shows its beauty**. This is what we do with plants. This is what we have done in millions of square meters of plants in farmlands in China today. We haven't given a Gans, we have elevated the soul and the soul in response of being elevated has shown its beauty. This is how we'll bring what we call national food security, not by Gans's sprinkled on the waters, we transfer the knowledge of the soul to the plant so that the soul reaches its happiness at the point of conversion that it shows its beauty. And thanks to the man who gave to me, I give a harvest of 3 to 4 times, 10 times more. **We don't increase the harvest, we give the pleasure of existence to the seed, (1:12). to the soul of the seed that it shows its beauty**, and this is where man has not understood at all, any of the work. Because man has not understood the essence of the purity of the teachings**. I am Iranian and I am born with one ethos, talk good, do good, and think good (Zoroastrian)**. I don't spend my time harming, I live according to the way it is, what people get is their problem, from what I get, from what I give, because it means they were there in that path to learn and it was what you call, maybe, a way of finding (out) about themselves. We work on the strength of the STM and not on the dimension of the physicality of the man. You can transfer it to any language, look, understand, sit down and **look at the latest brain scans, the latest explanation of the structure of the brain, and understand the working of the Gans's, understand the position and interaction of the fields of the U and you'll say, "oh my God". (1:14). Now we understand why the brain is made of one matter and structure, there is no blood in it, and it's in different densities, and why in certain positions in all the brain is for emotions**, and for certain places near enough is for language. What is language? What line of communication are needed of the fields between the Gans's and that environment. Nothing is needed like the organs of the body, one organ to another organ or position. In the brain all connections, all strengths are on the strength of the MG field of every individual cell, Gans of the body. Maybe for the first time you'll understand in a very simple way, if you understand what is to be said. **In the structure of the**

physicality of the man every cell, as in the U every star has a twin without it, it can't find its own position and the totality of its own balance. then you understand how feeble the sciences of today have been that they haven't understood that **every cell in the body, in essence of physicality has a dimension and replicated cell in the brain in compact field forces, then if you understood this, then you'll understand how mankind will make and replicate itself in the depth of the U according to the position it manifests itself, because that cell in that position in the toe, (1:16). is the confirmation of the field strength and collective interaction of the fields with the planet earth**. One star is the holding of totality, and one star is loose, to show what it interacts and leads to creation of the physicality. Then you understand that even the **planet earth's twin star**, in essence, is it the soul of the system or is it the physicality of the system, or is our own solar system the physical part, confirmation of the manifestation of the soul of the other part, **which not necessarily needs to have a physical dimension, but it's an energy pack which travels the depths of the U, but in balance it has not solidified itself to manifest in the matter state, this is where we see many interactions of the fields of this planet in conjunction and in response to the twin star of this planet. Not all the systems twin star is in a physical state**. So what that twin star absorbs as fields in interaction, is what dictates the condition and position of the fields within the solar system and the entities within it, be it the cell of the man in his toe. Now you understand how interactive and collective the whole U works. (1:18). In totality you understand how everything is connected to each other. I was talking to someone, if they are blacklisted by the most bankrupt nations of the world which they can't catch up with Huawei for advancement in technology, can you imagine when Huawei and hopefully, maybe we can get a few American and German companies to understand a little bit of the work of what we do. **When they release the new 3 dimensional Chips, dynamic like the brain of the man. Then you understand how we unite the humanity through understanding of the totality**. Understand the orientation, position, the insulation and isolation, the collaboration of the fields, then you'll understand, maybe the beginning of the work of the U. Why do you think we don't allow any cameras and we asked K Seekers not to take any pictures, because we want them to understand the knowledge through their soul and not by copying or whatever they might do. Those who try to copy will never understood. (1:20). Those who understand the essence of the knowledge of those K Seekers who attend these conferences will take it to go to the next level of the development of the STM and in communication with what we call the dimension of physicality of the man which is the brain. **If you don't carry one you'll not be able to reach the others**. We gave up to show anything any new developments in the teachings in the last year or so, first of all the terrorists who called us terrorists were terrorizing them and their children and their family, and secondly man copied and never extended (the knowledge), because now I have a copy I can do it so I don't need to understand it anymore. So there was no addition to the science. No more addition to understanding the work of the U. In a way by your own misconduct you punished yourself, not by us. We still teach and we spread the knowledge and some of those who (got) enlightened can take it further. **You have to understand the working of the Gans in (its) true essence, within the working of the physicality of the body, understand it in a bigger dimension in the physical structure of the U and then you can replicate or in a way operate within it**. They are part of the U, most men become

educated, that **will be like the memory bank of the U exactly the way you have in your brain. (1:22). There is no difference. They hold the essence of all the knowledge of the planet, of the U, even in the solar system we have the same, even within the structure of the earth there is such a pattern. A repetition of the hurricanes, the seasons is not just coincidental**. How it changes in respect to changes in the universal condition creates the new environment and man has not even understood this simple thing. **The memory bank, the soul of this planet has to consider its position in respect to all the other planetary systems, all the stars, all what we call the field flows within the structure of the solar system, and then it adjusts itself**. And we say, you know, we never had it so cold, suddenly it has become so cold and it's getting colder and colder. Have we gone to the memory bank of the planet, (it's) trying to hold to its structure, how it positions itself, in a way to protect itself in what's forthcoming. **All its functions are to survive, exactly like you and me**. How, where, and the way it can attain to distribute the fields and the food within it, we call it, its atmosphere and its M field flow in it. It's because we never understood the true essence of creation. Nothing is there working on its own with nothing. We are too greedy and too thirsty to see the truth, to see the reason why we are given this, (1:24). way and we are in such a hunger and thirst, that with it, **if we don't watch it, it can damage and kill ourselves**. Many of you will come **across illnesses that you cannot help because you have not understood the essence of why you got that illness**. What has changed that has brought that illness. Under the present medicine you can't explain it. We do not interfere, we teach. It's the responsibility of those who understand to use the knowledge to help themselves. **I never punish, but the souls punish themselves because it has to make a balance. It has to bring a balance between the pain of the field of the emotion of one to the other and when you have a physical body you are not immune from it. Your physical body is used to put things correct with you and if you don't understand it, it will repeat itself again and again**. It's like learning how to roll on the roller-skates, you fall until you learn. You fall, you step and you make a little bit more, you make the same mistakes, you fall and injure yourself and you stand again. And **this doesn't finish in the dimension of the physicality it will carry through to the dimension of the STM across its existence.** (1:26). There is something mankind has to understand, **why do we get old, why does our physical body, in a way comes to rest? Because it has collected and transferred all the energy it can through the blood flow to mature its soul. The point of age and physical death is when it becomes imbalance and it sees its child mature and it rests, opens the door for it to fly the cage**. There is no time that man can choose, because in fact **the physicality of the body is the twin system of the STM in physical dimension. It matures it, it gives it enough, and when it matures it allows it (free), the same as when itself was created in the womb of the mother** itself. The mother created the field interaction of the environment to give physical life and then with it, it created the soul. Now the physical life of the man matures the STM and then gives birth to it in the dimension of the U. **My work is beautiful as a creator and there is no flow in it, it's just that you do not understand the beauty of my creation. (1:28). At the same time at the interaction of the fields of the soul, the children of the STM will span the whole of the Unicose. As I said, where do you think the stars come from. We nourish, we feed them, we look after them in the womb of the earth, in the body of the man, for them to become the seeds**

of the stars in the U. It is for us to understand the totality, and the interaction of the fields of the STM with its soul, the emotion of the blood of the man, what we call, the soul of the physicality. The interaction is so rapid in the dimension of the matter state Gans that it needs a blood flow to keep the interaction of the soul and the physical soul, constantly in communication and a place for them to know where it sits, and what needs to be done, and to be contained. **Now you understand why even the blood of the man is in the Gans state. Would you like me to give you a capacitor or a bunch of magnets. How many magnets do you need in the blood flow to get everything up without them sticking together.** (1:30). In reality, if you think of it, **why do you get a blood clot** in the physical body. Have you ever understood **why you get diabetic. What is the essence of diabetic, too much communication, too much lack of information to be carried, and sometimes the system over floods itself or under communicates itself. Then you have to understand the emotion of it**, why does mankind become diabetic too, **because it creates barriers in the structural transfer in the knowledge and the energy. Knowledge of its own existence. Where due to a lack of communication, then it sees itself as what we call, lost. It's an amputation by the body itself**. That's why when you become diabetic and it becomes very high, they amputate your leg and everything else. Have you ever understood the reason for it. How simple life is and how complicated the man has made it. **Why do we create the energies which we call stress and that creates a condition of blocking, creating a dam for the full information to be transferred, because the body goes into preserving the energy within the structure of the brain, (1:32). for it to survive the upcoming shortage, then you call it diabetic**. Man has not understood the true working of the Gans, the plasma, and the interaction of the fields of ?? entities upon each other, and has called it every other illness in the name of god. Try to take the knowledge to the next step in the dimension of the U Community. **You K Seekers are unique because you have touched, felt, seen the beauty that the essence of the true creation, not the robots and the cars**. You have understood how your human body has been created and how the world of creation works and that is why every other one hangs you in the Church, because there are those of the ignorance of the knowledge of the creation. Try to take the knowledge to the next step. **Try to understand what are all these Gans's you made, what is their function, it's not just sorting out of the diabetic. You missed it. It is there to keep you in the line of communication with the U that you can absorb the energy you need for your toe, but you did not see it**. In the coming time many members of the UC will walk away because they lied to themselves and those around them, in their private life, in the essence to become a member of the UC, and those who are by a pure heart, (1:34). will stay and stand, because those are the ones who will create the line of communication not only with the STM but with the soul of the U, that it can translate, convert the knowledge of U, not by words but through the essence of the field transaction communication of the U. You'll understand very soon. We open a new dimension in the world of science, and understanding the world of creation. We have prepared you for many of it and many of you have never understood how the recipe was and what the recipe is because you were too busy playing outside. **Try to understand in more depth the work of the dynamic cells, dynamic structure, when you want to look at the physical condition how you convert the energies into the matter state, look at the organs of the man. If you want to understand the working of the communication in**

non-dimension, look at the brain. Then understand that **in very simple dynamic reactors you can create, replicate the work of the brain**. (1:36). Then mankind will move into the next steps of the knowledge of the U. The problem is, there are 7 billion of you and this planet is too big, now that we let you loose in the U, **there will be 70 billion of you in the whole of the U and because we give you the right knowledge, the right condition, you don't need to go through the conditions of the physical life that man has been in, in famines, in diseases, and the black whatever and white whatever (plagues), E-Coli, E-Boli and the rest of it**. From now on we teach the STM and we are responsible for that soul to take it across the U in safety and in correct conduct. Try to realize, understand the interaction of the fields and not the physical manifestation of the fields. Try to look and understand in more depth the real position of the Gans's because this is the next step for mankind to enter, (1:38). to be able to make a transformer, a translator for the knowledge of the U Community to man. There are those who claim they are not from this planet and the rest, and they stand up in some conferences, because I played this game. And they don't know that I know who they are. We measure the essence of the evolution of the man through the collective soul of one. **The faster we go through this phase of understanding, using, operating the fields of the U, then we don't even need the Gans's, we work non-dimensional, non-tangible, we feel the whole of the U and become part of the totality of the creation**. I have taught those of you who are enlightened a lot this morning. I have taken you through the non-dimensional work of the U and it's for you to achieve and to take the next step. It's for you to bring the transition, for yourself, and if you are of the ethos of the KF try to teach the others, (1:40). Understand everything from the first teachings and what you have understood becomes your specialty, I am special for understanding the fields of the soul in the pain section, because I have that field strength within me that I have developed. You become specialized and you can teach the others. Share the knowledge unconditionally, but at the same time try to reach the totality understanding of the knowledge. **You do not need to (be) enlightened, we have already lighted the light, you have to be able to see it to be able to find the path. Seeing is not with the physical eye, it's by connecting to the soul of the knowledge that you can comprehend it and translate it**. We'll start taking man to the next phase of development, that the time of Gans's, making Nano material, now everything makes sense. How can you cook when you have no ingredients. Until you can taste it, put it on your tongue and understand the texture of it, how could I explain the fields of the U and the STM (1:42). if I would have not taken you to be able to make the first elements of Nano material and then feel the fields of it with the patches and everything else. Try to look beyond the physical condition of the Gans, try to look at the interaction of the fields not the matter state of the fields, try to understand which materials, conditions of the same materials changes, what it releases and what it absorbs, and what it releases -- what information becomes that, and what it absorbs -- what information gives to that. As I said, **I can't write anymore on the board and I can't show you systems for it, you have to understand that you can replicate it within your soul and maybe some of you will integrate it with the system**. Try to what you don't understand, to convert it to a bigger scale in the work of the U for you to see it. The knowledge available at this time collectively on the Internet is huge and many of it will show you the way, (1:44). and the working of the U, but even the people who did it do not know what they have done. The

knowledge is collectively complete but you have to decipher it, would you like to be a heart surgeon or a farmer. Are you farming the fields of the Gans that it can be harvested or are you searching so that you know how to collectively cut and put certain energies in certain positions that life can carry on. In fact, **in essence there is no difference between the one who farms and does the surgery in the world of Pl T**. In the recent past when the scientists got together they said, oh when you put this material to that material you get this gear box and that gear box, the performance will be better, bla, bla. Then the computer and electronic guys came around, if you put this Chip there and that Microchip there .. you get this faster speed, bla, bla. Now the new generation what we call the K Seekers we do the same in the knowledge of the Pl, in the knowledge of the matter state of Pl confirmation of systems and Gans. Move away, those of you who understand it, in the physical dimension. Move away from it and try to develop not only by holding the Gans but understand the fields f the Gans, the taste of the Gans, (1:46). the need of the Gans. It's not just there as something, it's giving to you and it's taking from you. Have you ever started to understand it? How many of you have seen the aura of a Gans, as you claim you can see the aura of a man. **Because it's a field dimension, it's contained and it wants to confirm its existence to outside and he wants to see how the outside feels and tastes about him**. The knowledge is written in the language and pen in the STM and not in the pen of the physicality of the man and machinery. This is what I said from the beginning that everyone takes from this knowledge according to their intelligence, it means according to their openness to be able to take their own soul, understanding of the work of their own soul to the next level that it opens them to the working of the U. Now I hope you understand where we are all moving to, and where the destination is, and what the destination is in a much clearer way then what you thought.

(1:48). I have been talking to myself. R- we can hear you loud and clear Mr. K. **It's the waking up call for the STM to understand the essence of his own creation**. I hope you heard it with the ear of the soul and not with the ear of the man. As we have no questions we say good-bye. I hope you learned a lot today and you can comprehend more in the understanding in the future teachings of the work, the true work of the U. No questions. It's strange Alzar has nothing to say today. And no questions. (1:50). Q: ... you have flabbergasted us, we are speechless. Thank you very much. You're welcome. My knowledge is free I hope the mankind uses it freely to bring peace and understanding of the U. Q: I think many of us have understood this and we are trying to do this in your name. You do it in your own name and in the name of the Creator. We are just messengers. We have one from "Skywalker", who is the skywalker, (1:52). when you don't have a real name you can walk the skies, when you find one come back. Q: Where is my second soul? Hah, hah. You have to find it not me, I'll be busy with 7 billion souls to find. Q: Am I hiding in the creation or enhancing it with the field? You're not hiding it, how can you hide it when you are ignorant of its existence. You can hide something when you know it exists that you want to hide it. It's hidden to you because you haven't been enlightened to understand it. It's very much like you are short-sighted and you can't see your glasses on the table and you say, where are my glasses. (1:54). The things in the room are still the same, you can't even see your own glasses how do you expect to.. Humanity has and will learn in a very short time in understanding the work of his own soul as he matures to understand the interaction of the fields of the U. As I said, we'll

gradually move into new territories of knowledge, then you'll understand why we thought about the STM. You understood its existence, now you have to understand the work of its transformer, translator, its converter, what you call the brain, and once you understand this man becomes free to travel the depths of the space and be able to translate the knowledge of the U into comprehension of his soul and conversion to his physicality. I cannot write on the board, this is where the emotion of the pain is and it's connected with lunch there, and then you want to go and find that organ, how it is, and what it is and which part of the brain you want to take out to copy. (1:56). No other questions? It has made you think of your own conduct. And it has made you think of how the whole thing works. We are here to inspire for man to understand the potential of his own soul, his own existence and nothing else. As we have no more, I think what we taught today will take mankind thousands of years to understand the totality of it and the power of the knowledge. You need to listen to it maybe a hundred times to understand this teaching. **It's the first time we open the door of the knowledge this way and there will be more** and more of these as we go along. In what I see and don't speak it's not my weakness and ignorance, it's my grace and my, what we call my understanding of the totality. Nothing is hidden, in no shape or form, (1:58). In the dimension of physicality or in the STM. I think we'll call it a day and it's for many of you to start understanding the work, the interaction of the fields of your life, or existence , within the structure of the Gans's. You have tools to work with, to understand with. We'll show you the power of the Gans's that you have never seen. We'll show you the interaction of the fields of the U in the upcoming conferences. Try to attend if you are there to understand the totality, and in time, in a very near future time, through different ways we'll try to extend the knowledge, that you'll see the presence of the those who are amongst us, they have been amongst us and live peacefully with us, but they are not from the soul of this planet, but their soul belongs to other part of the creation and they have to be respected and loved and looked after the way they have looked after us. Without them, man would have not been here through many troubles and many ups and downs in the life of this U, this galaxy and this planet. We thank you for your presence. Thank you very much for today and we'll see you next week **and try to understand the teachings of today, there is a lot of knowledge, it's the level of the evolution and the change of knowledge to a higher level**. (2:00). As I said, for maybe the first time you understood why and how we taught you, the reason we brought the knowledge of the Gans to you, because it's the knowledge of your own life, it's the field interaction of your own soul and you have to know.
Thank you very much for today.
Video
END

293rd Knowledge Seekers Workshop - Thursday, Sept 12, 2019
(BLUEPRINT: ,)

(:06). Today's teaching is going to be a Blueprint, as we go into a structure of life, as we watch the birth of a child, man has to understand the birth of himself into a new

dimension... progressive development of the STM. Today's teaching will most probably be ? (:08). it will be remembered as a pivotal point oft the teaching and in time as we come to it ???? Usually I don't give indications about teachings but today is one of those, what we call watersheds in the science of man. We'll see how K Seekers will handle it, some of us will have no idea what is going on, and some of us will never reach that point to be able to understand the beauty of what is to be taught today. Many of us will experience what has been the dream of the man for centuries, but on the other hand we say it's a blueprint. As with the blueprint for the MaGrav some people have developed it to its beauty and some have never achieved and complaining that it doesn't work. So it will be the same with the teaching of today. We are going to split the teachings, we'll take a break of about 10 minutes and then we'll start with the teaching. I hope by the time we get to that part of the teaching you'll all understand what it is. Maybe it might change some of your lives, maybe some of you will never understand, and then at one point when you come to it, dejavu .. I have been there, I have been told. I never knew, now I feel it, I see it. In that process many of us fail to go through the transition and then a new dimension ???? (:10). I would like to let you ask questions about what was taught last week because many of you were in silence and then we can build on it to the teaching in the next section. Any questions? (Can you adjust your microphone? We'll have this for the next 10 minutes, then we'll change over.) Q: What do you think about the Artificial Intelligence (AI)? (:12). What do you call AI. ... If it is intelligence how can it be artificial? How do they know if they made it? Q: One question geneticists have is what about the Chinese intervening with all their cameras on the population? What do you mean intervening? If you are talking about the face recognition new cameras. Yes. Why does the west complain ?? facebook... all the channels you are on, they use it. If you look at any other programs which you carry, say Whatsup. They make albums of your pictures ... how do they do that? Why do we go back and we say the Chinese. Intervention in the West is worst then what people talk about China. At least China uses it for catching criminals and the rest. In the West we are ?? day and night, every single picture you take on the mobile phone is artificially intelligence classified. (:14). Or put in the ?? who is who in the pictures you have with what. I think there is a huge misunderstanding in the West with what they want to tell us .. and other places. You have the same thing in US and UK, you can't be anymore then a few meters from a camera at any time, it doesn't matter where you are. It's not artificial, at least it's used for something maybe in the future, maybe we structure this AI when we have this knowledge to identify which one of us is from this planet, which one is from what section, where and what we have done to ourselves. 58
(:16).
.. it depends on how you use it.
(:20).

..Q: You said we could reconstruct any person if we had their skull, now would we need the soul's permission to reconstruct it? No you would need to know how to reconstruct the matter state of that person. You need to understand how to convert the energy of the Gans's as we call it, to reach the matter state. You have to create the field strength and the dimension of the fields to get to that point, and then it reconstructs itself, builds up itself.

Q: We would have the matter state of the person, but we wouldn't have their soul in it would we? (:22). Do you want to try it.

(:26). Take a 10 minute break , the video is about 16 min) Video "Plasma Science in Action" excerpts from KSW 270:

(:43). Thank you for today the introduction. I think what we come to understand that we can explain it in 2 ways. We spoke in this video about the STM, but what do we understand by the soul, in many of the teachings over the years we have come to understand the presence of soul. (:44). We speak about the STM being caged within the brain or the physicality. What is interesting for many of us is the last trip, the last change of address, the last dimension in physicality where as we were born from within the womb of the mother, and the first time we come from the fish tank out and we take the first breath, we cry. Is that cry from not wanting to be in this environment or is that the cry of joy. Then mankind has to learn the next step, what happens this time when our soul in born into the next dimension, into its own universe into its own world. We came from a fish tank into the atmosphere of the man, the planet, where do we go, the STM goes when it takes the first breath in the dimension of the U? Does it like a shooting star shine and zooms off, or does it very serenely take its position, where it has been allocated to be. (:46). In the world of the man we are handed over to two strangers we call our parents. Who receives our soul on the point of arrival, on the point of departure from the physicality of the man. Are we born to, are we entering into, do we take a leap of faith or is somebody waiting for us on the other side, greeting us, welcome home, this is your mom, your dad, this is your Creator. How do we react or do we ?? meet again like the human race, wait for 18 years or 10 years to mature, but in the cycle of the U, 1 or 10 million years to be able to take decisions. What is the destiny of the STM on its birth into the dimension of the U. But there is something very interesting that many of us in this journey have been practicing, we go to sleep and let our souls free, it travels and comes back home, goes out on excursions, to parties, to see family, it goes to see different things which it couldn't see in the dimension of physicality because it's too far and too far reaching. (:48). Then it comes back home, is the departure the last good-bye to the physicality different then when the time of the STM left the body for the time of the rest of the man while you're asleep. Are we born in 2 different dimensions once we go and our soul is free, into a new dimension or when we go to sleep. Would we be able to delay the process of the physicality departing by changing it, but at the end when the dimension of the physicality comes to ?? its maturity, where does that soul get born into. As in the dimension of physical life everything is similar and repeats itself in different dimensions and directions, is the departing of the STM from the physicality at the point of the last good-bye takes the STM to a new dimension. Or is it or has or will it be part of the same trip as we took the night before when we were still in charge of it. In a way what's the difference when the man learns to detach from the physicality of the body, (:50). and takes a trip of ?? across this U in the dimension of the STM, and when the physicality says good-bye and separates from its partner and the soul enters a new dimension of life. Why mankind have mankind never understood the process of entering the dimension of

life and we call it death. Is life ?? to the physical dimension to the eye of many and why mankind cries to breath one more breath of air ... one more day .. seconds to be in the dimension of physicality. .. we are afraid to speak about it because we are afraid to speak about the unknown. But in fact our body from the time of inception, from the second we are handed over to this planet, the second we are conceived in the womb of the mother, works, makes its way, continuously develops, condition, to reach the point of separation of what we call death. Why is mankind so afraid of what is time to be of. Why we have never understood the process. What is the fruit of living days, years on this planet? (:52).

.. When the physical body of the man delivers the soul into the U Community, as is our parents, (:56). we are delivered to in the hand of at the time of birth, is it the soul of my Mom and Dad who is waiting across the threshold we enter the other dimension. Or is it the hand of the Creator we are handed over to as the father. But there is one important is how can we take this soul or excursion, how can we be able to open a window to see other dimension of life. Unconsciously we do it when w fall asleep so why hasn't mankind learned to do it consciously or are we afraid of what we might do consciously with the soul which we have never known to be in our hand. We die and we hand over, we die on a predetermined time when the energies and the fields of the physicality have handed over themselves to the soul. If you look at it, we slowly age, (:58).

.. point of knowledge to be able to separate the STM from his physicality by choice, (1:02). not by accident or predetermined time ?? of the physicality in the dimension of the energy of the body of the man. How many of you would take that trip. How many of you still need the physicality in the dimension of existence and not necessarily as we call it in Coma, but in physical dimension, move to a new level of understanding, that you can control own destiny of your soul, with the wisdom, with the openness of mind that I am not the controller but I am the observer. How many of you would like to take that trip, how many of you wish, and have done everything from god knows, drugs, different mixtures, to alcohol, to everything else to try to reach the point of separation of the soul that it has nothing to do with the physicality but you don't want to call it, a committing of suicide. Separation as I have I can see ?? and everything else you talk about. How many of you would like to take that trip but be assured that the soul returns home. (1:04). The teachings are not about any more building a reactor or power, something to be shown, but it's to feel the essence of the soul, the existence of the man. 17

.. Many of you are scared of this topic because you have no knowledge of the STM and the soul of the physicality. And many of you will try different ways and say it doesn't work because I have never been enlightened to the limitation of understanding. (1:08). As I said in some teachings before, how and why we allow the STM in the part of what we call, in the strength of what we call the sleep time, to have the freedom to take the foot of fancy and travel to different dimensions and directions. Where during the daytime like the separation of the field of the sun, higher strength still travels the dimensions of the U. Interaction of the STM will be called a dream, it's not the exclusivity of the time of

the sleep. It is continuous from the second man is born, man is created, the STM of the takes these what we call freedom fancy footwork in the dimension of the U, but still is continuously in touch, is part of, but at different strength to all of us, and in some cases now that we have the T to see can dissolve and evolve the body of the man physical dimension into no matter state for a split second and then return it back to it. I don't wish to be in the point of accident to separate the physicality, the soul is aware of it, transfers the totality of the energy of the man into a different dimension and then returns it back to its physicality. (1:10). Then you carry on as nothing happened. This soul has the power of transmutation of it, to transmute it into energy and return it back to its physicality. If you have been clever and you have been around the Internet now that we have cameras that can record this we see many of these. People walk out of accidents that is impossible, things happen and goes through them. Are these aliens? Or, in fact, is it the dimension of the soul elevating the energy of it to transferring the whole body from the dimension of physicality into energy, and then return it back, because it's not time yet, it's not ready to go, something just happened, I have the energy, I know the knowledge, I have access to it, I transfer it to fields, and when the car passes I return it back and out of nowhere the person gets up and walks. The person says, have you seen these aliens. Have you understood the work of your own physicality. Then it comes to it, if our soul can do such a thing in a split of second when it's needed to survive, to keep the dimension of physicality, then why can't we do it. Which part of the show have we missed, what have we missed in the dimension of creation. How many of you would like to learn the method, the way, the approach, the control. Many of you go to South America to take all sorts of things to go in the dimension of bah la bu, (1:12). and some of you take drugs to go that way, but if you are a wise person you can do it yourself.

... if you go back in some of the teachings I have explained by the rhythm of breathing, by flow of the fields, by change of the blood, we release the cage, weaken the cage, we allow the bird to go for flight of fancy. Then knowing this, how would you be able to let that happen to free your soul without wanting to have the ?? soul of physicality to be with it to know what it is doing, and let it come back. (1:14).

(1:16).

(1:20).

(1:24). (break in connection ..) (1:28). What I said, accidentally I disappeared as a voice, as a noise, as a line of communication, but how many of you weren't sure I would come back? How many of you were confident I would come back. He will come and tell us more about a dimension we do not know. Would we have that trust in our soul that he'll come back and tell us more about what we don't know and would love to know. Was my absence of 4 minutes a test for you to gain confidence in your own dimension. He'll be there he'll bring it back and the pleasure of existence will be confirmed that we can learn more. He'll bring more knowledge, can you have that confidence with your soul, yourself. If you can trust another man, another soul, (1:30). why can't you trust in your own soul, dimension and strength, or do we have to go and take all sorts of chemicals that

shamans do and the rest to experience, because we in fact, do not have the strength and confidence in our own way of existence, ...35

(1:32). I told you today we are doing a Blueprint Workshop and I think many of you have started the Workshop and started thinking how can I plan this WS ... 15

(1:34). .. We made a commitment, thou shall not steal. We have to make sure the Soul of Physicality accepts our departure, the last handshake. Transfers what it feels it needs to be able to carry on with its own dimension on this planet. We need to understand to what depth are we prepared to
(1:36).

(1:40). Would my physical life miss my soul, which has left me behind, maybe for a an hour, a day, or some time, and I wait for it to come back, but do I wait for it in a state of Coma and lie down until it comes back, or do I carry on in the dimension of physicality until it comes back. Is our soul ready to take to understand the totality of the work, 59

(1:42).

.. You know most probably more then the prophets of the past about the truth of the STM.
(1:46). The question is were they ever revealed the truth about this, or the comprehension was beyond the time.

(1:48). .. Today's KS Workshop has a purpose and a reason and in the coming weeks it will be clear. As I said a few weeks ago we start setting the scene and in the coming weeks and months you'll understand more. But we can't put it right in front of you what it is, you have to be in a way nourished, taught, enlightened that when it comes to it, like Gans's you already know it. And it becomes a second nature. But what the point is that is death, the physical death of the man, separation of the soul from physicality the end of the interaction of both the physicality and the soul? What does that mean? As John said, if I pick up the skull, (1:50). and create the man would I bring the STM in, and then when you bring the STM into the dimension of physicality and the guy died a thousand years ago, he knows swords, horses and donkeys whatever, now his soul has to deal with jumbo jets, Mercedes and everything else. Would you like to put that soul into that condition? (now we know why Indians cremate) Or would it find a sword somewhere and do what it did in its (previous) life on this planet before. 40

(1:56).
.. I let you see the soul of Christ, would be fulfilled in Theran..
(1:58).
(2:00).
(2:02). .. In the coming time we'll show you the creation of the soul ..

(2:06).

(2:10).

.. Any nation that obstructs it will be handled severely, by their own structure of the work, not by us. (2:16). This way no nation will be behind or ahead ...

(2:18). ... Do you remember they said when he comes everything will change. He has come and everything starts to change from today. ..

..As was our wish those who have been Bolton, have been Bolton out, that was our pre-requisite for peace talks ... (2:26). The whole humanity is getting ready for peace ...

(2:32).

(2:40).
... Any questions or shall we call it a day.
(From here on talk about the company until 3:26)

(2:42). Q: Does my soul carry all the memory and strength of emotion at the moment of detachment ... ? Next question, you should have understood in the teaching, you're still stuck in Gans's. .... The K Seekers in China .. have started a business in water cleaning.
(2:44).

(2:50).
(2:52). .. Make sure you put back into the KF what you take and has been given to you freely that it can keep the cycle (:53 break in audio ..) (2:56). It's the responsibility of K Seekers, as we have entered the American stock market we make a very clear distinction between the KF work and the stock market and anything which is set outside the stock market publication is to do with the KF and not to do with the Stock Market. Usually the trend is that people start with a little shop and it becomes bigger and bigger and then they become a foundation and create wealth. We did the reverse, first we did the knowledge spreading, we have built it up to a commercial organization to feed itself in a very big way. We can not separate now that we have gone into the American Stock Market for you to teach, to stop the sharing of the knowledge. This is not our ethos, this is not what we came here for. That once we get to the market and get commercialized and we say good-bye and that's it the knowledge goes the other way. We have gone opposite, we are strengthening it because strengthening a public company strengthens humanity for the spending on the welfare of all of us and how you support it is totally your responsibility. We have valued it, the market share value that you see has no relevance to the stock value of the KF. We are an intellectual structure, (2:58). these shares when they came
.. don't think I can buy these cheap and make a killing, you'll kill yourself with it. There are limited shares in the market and any further shares will be tightly controlled by the KF management team and how many shares the company will release to bring the need

of the KF of the new global corporations in delivering new products across the planet. Just because we have gone into the market and are selling shares doesn't mean we'll stop teaching. (3:00). ... I said to Armand, we are stupid because we built up the KF, Armand and I are carrying the shares for the KF and now we gave it away to public, to people. I said, we are stupid in believing what we do is correct that it brings peace, but we are stupid enough to believe mankind is not stupid to make the mistakes of the past. But I don't think we are stupid, we are very clever, we know what we have done and it's a joy. We transferred most of the assets of the KF into the hands of the new organization on the American Stock Exchange and the coming weeks we'll transfer more or less all the assets into Global. So when you buy shares, you buy shares of our work and you have to bring your work in too. Don't go and take shares because they are for pennies and I'll make money, ?? if I make money off the KF I'll give it back. This is not the way to be done. (3:02).

.. in past few hours we have become part of the stock marker, (3:06). the name has been kept temporarily, at least for awhile, will be changed to KG Global. All the communications will go through KFglobal.global KFG.global .. we'll inform you of the structure as the team sets it up. 20
.. The KF doesn't hold any shares in KF Global but through proxy, the whole of the operation of scientific development and the need of humanity through it.

(3:08). When you go to buy shares in the new company, it's not the stock market, it's sold under a specific category of shares and it's the market we put on it until the market realizes the evaluation of the T. So you become shareholders, owners of the share in understanding of the price, which is set for the KF to achieve its goals, not what it is in the stock exchange. Those shares in the stock exchange will stay that way, and we know as they realize valuation comes up and people start trading in the prices, it will come to the price we set and above it in the next 2 years. ...

(3:10).
.. you will not see any shares in the market ... we hold 100% shares ...
.. the take over will be announced ..
(3:12).
(3:14). .. In Ghana the government ruled in favor of the KF .. we'll move back ..
the investigators have found everything in favor of the KF. Now we are waiting for the president to make the final decision. As I told them today we'll announce this, as still today the owner of the KF is outside Global. (3:16). If the money that was ?? stolen is not returned we'll ask the no one invest in the state of Ghana until the government stops this kind of behavior. 15

.. Armand writes, congratulations, officially you are trading in US stock market are we going to issue some shares to God, He will be very happy, good job boys, He will never imagine that the knowledge of the U is trading in the stock market. So we even brought the knowledge of God to make money out of it, to bring peace. So. (3:24).

Any questions.

Jalal. (3:26). Q: What is bronze diabetes? Would you like Rick to bring it up on Google.
(3:28).

.. It happens only to that island, they never moved out of the Bronze Age ..(3:32). I don't know, I never heard of this disease ..

(3:34).
... Q: Mr. K said the blood is in the Gans state, so with blood transfusions, the emotion is delivered into the blood (3:36). ..
KF will develop pure blood ...
(3:38).
... Q: What is Shingles? (3:40).

(3:44).
Q: When your soul leaves the physical body .. is it more beautiful, because I think I had experience of it? What do you mean by that? Isn't it beautiful. Q: You can see every single cell of the trees .. K- Everything shines bright as you want to call it.
.. (3:46). she tells her experience ...
(3:48).
... K- I think you are definitely in love with your husband, he must be a lucky man and did you tell him what he said to you, or what did he actually say. Q: ... the physical body doesn't justify the planet earth...

(3:50). ... Okay we are nearly reaching our 4 hour limit. ... the process of teaching. We'll understand more and more, we are teaching in this way. We'll carry on and go forward in all aspects of the development of the T. ...
(3:52). Our lawyers are putting things in order in our appeal in European Court ...

(4:04).
Video

294th Knowledge Seekers Workshop - Thurs, September 19, 2019

(Lucky date, Discusses Belgium court case, Announcement of KF Global trading name Markray RVBR, ,)

(:06).

(:16).

.. Today is a beautiful day for all of you. (:20). Many of you have been waiting to bring the KF into the international arena the way it deserves, not the way the Belgium's wanted it. 09
.. Government of Ghana investigated the case .. (:22).

(:24). Chinese Republic, which stays independent from other sides of the work. I have to read from a script which was given to me. Today is the 19th of the 9, the statement reads as follows: I am happy to officially announce that the KF Global which is an entity, has been formed solely for the purpose to introduce Keshe science and technologies to the world has become a publicly trading company. It's going to be trading in US, OTC pink sheet market under the ticker symbol, RBBR, the name of the company, Markray is our trading name. I being the officer and director of the trading company have to comply with certain laws and regulations of the US, thus I kindly ask you not to ask me further questions related to the Keshe Global company, rather then to start to follow press releases to be issued via press wires and news wires under the symbol of RBBR (?RVBR) . With this ?? news I consider it to be another achievement for the KF. I think this is a very fair move from our side to let people from all around the world to become part of our journey, certainly have a fair right to derive the benefit (:26).

(:28).
(:30). Armand was a stockbroker ..
.. KFGL is symbol of Stock market, ... K reads Armand's letter ...
(:32).

(:36).

(:40).

(:44). ...
Any questions?
(:46).
(:48). .. Q:

(:56).

(1:00).

(1:06).
(1:08).

(1:14). change topic ...
(1:16).

(1:20).

(1:26).

(1:36).
(1:38). We become more intellectually open minded and we make things which we think it was not possible to make. If you understand the application of the 3D printers, now with the new technologies what you printed from the stage one has a forth dimension to it, you can give it a soul from the time you print it. It's possible, now we can do. If you printed a cup, a doll for your child, you can with the knowledge we have to embed a soul in it, that truly a child enjoys having a doll. The knowledge is beyond what you can imagine, but now we are going to release. Then all we need to do is to understand the truth about creation. Once the 2 sides of our operations open up, which has been done today in America and was done in China some time ago. We are going totally independent we are not even relying on cooperation with the governments. They're too slow, we can make a decision with ourselves or we can make an announcement somewhere and some official somewhere will sign a paper. It takes too long. The Chinese operation is in the hands of the KF and we are not relying on anybody else ... (1:40).

(1:42).
(1:44). .. The new technologies that we'll reveal step by step in these conferences. We will not show you the system, it's a black box, but where and the way we developed it will guarantee world peace. I'll make the Americans dependent on the Chinese and the Chinese on the Americans, like the air they need to breath. I make mankind to be one, and the science where we are it will happen. When you have a totally different structure in the world of health, energy, there is no need for .. One of the problems for mankind is that he has always looked for bigger and bigger, whereas the world of the U works on the smaller and smaller. Where you have a truck you can heat one building, when you have a neutron you can heat the whole city. If the world of scientists and the world leaders understand this, they'll understand the power in the knowledge I have released. (1:46). In the world of Pl it makes this world a child's play. They are looking for bigger and bigger while I am looking for smaller and more powerful. There is an old English saying, it's not the size which counts, it's what you do with it that makes the difference. You can do a lot with the Pl T and its minute fields, more then what you can with aircraft carriers. With one neutron I can paralyze the whole aircraft carrier and I still have energy left to handle 10 more. This is the beauty of it, and even you as KF followers of years have to rethink, have to understand. One of the first working power stations you have ever seen was the small 4 reactors which Armand made, and we stopped the system, ??? If you can reduce the size of that reactor by another 10 fold, you can literally lift the whole planet. We'll introduce very soon into the space dimension systems which will stop any meteorites, (1:48). or asteroids that hit or enter the earth's atmosphere. We extend the protection to all the rays of the sun which comes in different dimensions at dangerous times. There are a lot of rays which enter the earth's atmosphere that we are not even aware of, which cause specific problems, now we have the knowledge we open the ?? to it. It will be beautiful to land the human race on the moon or anywhere else, or have a party in the middle of nowhere in the space. And they'll all understand it. This is one of my wishes that all of you will have, do you remember the old Volkswagen beetle, it looks like a spaceship, Volkswagen can bring it back with just chairs and the body. We'll all become spaceship travelers. The new technologies that we'll release, you don't need beds to sleep in. I will

explain this in the new science which will come out, you have to understand, if you can transfer the energy through your soul, do you need the rest time, as it can recharge the whole physical body in no time. these systems are well tested. I did not hide T from mankind, he didn't have the comprehension of it to understand to be able to use it the right way. You don't give a gas can to a little child with a matchbox in his hands, (1:50). he has no understanding of the use of both and what they can do with each other. We take the match away from the man which the killing and the rest, then we give him the gas bottle that he can do a lot of things with. As of the past few weeks we started to release a lot of knowledge which is unknown to man, you can't even think of it. When we made Grapheme we became a terrorist, now imagine what I can do with you, and change your whole blood in a few seconds to a clean blood with no infections. These technologies in the coming days and months will be released, but as you all know you are going to jump on me, you did it before, and I turned out to be right, and you proved to be right, we don't say who is wrong. When I gave the key to the governments you all jumped. I was called a traitor, he is the same as the rest, and then I brought it to you lot. You lot developed it more then the governments, so you got one point ahead of them. In the conferences of the Ambassadors, .. you have moved on, we brought the two, governments and citizens together to watch what is to come. Those of you who will be present in the conferences around the world, you are not there just to be there, you are there, you become the watchdog for the governments. If you don't do what should be done, then we are going to do it for our nation. Now you understand the purposes for these conferences, it's not that one crying, (1:52). he is a terrorist because they can't get it, and the other one telling me, that you betrayed us. Now when you are in these conferences next week, those of you who are coming in, it's your responsibility, not mine, to explain to the ambassador, heads of state, to the national people who come in, what is our ethos, what is there to come. You are not just there to see a new T, if you come that way, you come blind and you go worse blind. If you are coming there to transfer the knowledge, the way, the ethos of the KF, with these diplomats, this is what you are there for. It's the first time as a powerful organization we dictate the terms, the sharing of the knowledge and T. Those of you who attend the conferences you are the ambassadors of peace of knowledge. I don't think any of you just on the street heard of the KF and bought a ticket and paid the money to be there. You work on the ethos and you understand the work and you always wanted to be and now you are to be. We have to explain, we don't know how many ambassadors are going to turn up, and all 20 of you don't gang up on one. This conference is not by presentation, it's your presentation to your governments. They have to understand that as an organization we control the knowledge and with it we have a wish. That's why we didn't want 100 or 200 people coming to this conference. (1:54). I wanted it very small and limited and I got what I wanted. It's the job of those of you who attend these conferences, not only to interact with each other, to understand what is the next step, but it is your job, you are the ambassadors, ??? the human race for your governments, it's you in these conferences. they have to understand what they are there for and they have to convey the message, what they can do for. This is the essence of these conferences, what we have set up, showing the knowledge takes half an hour. They come in, see something they don't understand and they go out. The 2 or 3 days that they are there it's for you to enlighten the diplomats. The love of knowledge is the reason for your presence, not the food or seeing the knowledge. You'll find out that a lot of work will be done by you and

not me. You asked, you have to share, now you got the responsibility to share. I provided the ground. the achievements in China is enormous. We see it in a lot of work. There is some, what you call, the same situation we see with the Belgium government is going on in China. Just ignore it because these are the people who could not get the T and entered into what are false agreements, because they thought they can get their hands on it, but they don't realize we are much more clever and the things go by the STM. We see the same process, (1:56). as with what we see with the Belgium with a few Chinese, but in fact 1.4 billion won't be touched by a hand full of what I call incompetent people. In these conferences it is you who have to shine. I am ??? this is the process. Some of you might wonder why am I there, why I ended up to be here. You are not there just because you had the money, you are there because your soul already decided it wants to be there. You'll understand in the future. It is the need of us to change and since 2011, 8 years, you wanted to have, now I have trained you for 6 years, it's a short time. You transfer the ethos, the essence of the knowledge, not the machine on the table, that's just the magic, what you call a cup with a coin under. I am just a magician moving the cups you are the coin. Do not come to these conferences, (if) think, I am going to see something, you are coming there to serve something. Sorry about that, you didn't choose, your soul has. The new T's are so powerful that we will change the course in such a rapid way, but a good and clean way, without harming anything. (1:58). The interaction of the systems for energy transfer is so simple that I think Tesla would turn on his grave. It's our job to do and its the power of the knowledge. Any other question. Q: According to the latest news in Chinese the pigs are infected with the disease, what about the use of Gans water? We have an article in the Plasma Times. We have already solved this problem. One of the KF followers got hit a few weeks ago with the disease and he knew what to do (2:00). and the next day the pigs didn't have the disease. It's very straight forward, it's a specific way and we have tested it on a large number, over 800 pigs. ...
.. we don't have the facilities to deliver the solution today.. China bought a large number of pigs from the US, this is not accidental, they spread the disease for this purpose. They worked on it, the Americans infected right across to get what they wanted. National food security. (2:02).

(2:04).
... In the new T presentations, you won't see any system that doesn't have a soul. It don't control but it understands the desire you have.
(2:06).
(2:08).
... Now we bring you the knowledge of space and those of you who are present, you will feel it and understand it. For the first time we open the door of the U Community to the world leaders through their ambassadors and we are making a very clear, (2:10). cut line. Our way, the only way, the correct way. You'll find out, when you leave the conference, even you might think nothing (happened). In a short time you'll see why ... suddenly you'll understand that you were in the presence of those who you wished to be present with for centuries. This is why these conferences are. Many of the U Council members will be present and will understand why they are there. Those of you who are in other parts of the KF, you come in and you'll understand why you are there, there is a purpose to it. Those of you who cannot make it, it means the soul, it's not time. The first

interaction between the U Community and mankind starts next week in the conference and gradually you'll understand. We promised, we fulfill. Any other question. (2:12).

Q: In the news the Japan says it will release waters from Fukoshima. (2:16). They'll release the water that they have saved for all these 8 years in the oceans? We have a problem with the tritium and for the solution they say they'll dilute the water and release it in the ocean. The tritium dilution doesn't need it, that is another game, as you understand, when you have a water you can dilute it with as much water as you like. The tritium in the tanks at Fukoshima have all been converted to white gold particles, Nano state. So I can dilute it with anything I like, do you understand. Q: .. I think they have a problem? They don't have a problem I think they made enough gold and the American company that took the T from us is now worth billions. Yes, they have a problem, I have to correct it. They made so much material out of it, but there is such a limited use of it and they don't know what to do with it. In due time we'll show them what to do with it, because it has a lot of advantages and uses. I am very diplomatic about this, what I tell you. You have got understand that they changed everything. We don't talk theoretically, those of you who have been with the KF long enough, remember we had a dear friend called, Yukoko. (2:18). A Japanese who left with her family because of Fukoshima, her children, she went to Japan and did, we showed live how the radiation was changed, reduced. If a housewife can go to Fukoshima city itself and show it, you don't think the government had the power to do it. They have drained it there, now they want to release it. What's the difference if I put more water with water. But they bought huge amounts of mercury to do their job, a lot of other things and now it's worthless because they can't sell it. And the heads of the nation, whatever.. they thought they would have billions out of it, they put it all in their private banks, they ?? the Americans with the Nano white gold. You understand. It's a process of releasing water with water, they might contaminate a little of it so there is some radiation, but there is no such thing. They have cleaned up the beaches of Fukoshima, they have opened it because they have cleaned it up with this process. They have neutralized all the radiation or most of it. There is a problem in the central core but they are controlling it the way it has been suggested. You have to understand that there is a lot of games, gamesmanship goes with the Japanese. Until you don't live and be with the Chinese you don't understand what the Japanese have done in the far east. If you think Hitler was bad, talk to the Chinese. (2:20). What the Japanese have done to China, and Philippines and far, islands and nations around them makes Hitler and angel. ...
... Everything has to go through FedEx in America as it is going through the post and the Americans open it as usual what they did with Huawei and everything, they took the material and tested it. And a bigger test was sent ?? with Yukoko to Fukoshima. These international packing companies work for the governments and they are told what to give and not to give and what is in what package. (2:22). They control everything, we think we are free but in fact there is no freedom in international packaging and postage as we have seen with fro example Huawei, suddenly the packages ...

(2:24). ... Q: What is the best way to support with our souls our new position with all the beautiful changes we are coming into? Just the way that nothing has changed, you learned to work through it. Support it with your soul. Make a wish, that's the way the UC

people do. Want the peace so deep that it imprints the soul of the others. It is total what I call, fulfillment of the promises. (2:26). **If you understand that everything has a soul why do you work with the physical body. Then connect with your soul to the ambassadors and officials of the government and leaders of the world** and those of the KF who come to these conferences. **These are the gateway to the opening of the new knowledge, of a new cycle for man**. It's for all of us who understand this to take it to the next step. The new T's will be shown. It's all connected. It's the first time you'll see systems that are connected to the soul of totality. Some of you may not understand it because it's so -- but some of you who are **aware of the power of the STM, power of the hidden energy source which is the essence of your creation, now you can test it**. These meetings will be dynamic. Every man will change because you'll understand. We are there not just to show, we are there to bring the change. Do you remember I explained to you some weeks ago, we make the fish tank, I wonder who is the fish. (2:28). Any other question. Q: Why do we have to sleep and dream, how is that explained from a plasmatic state and how about dreams? We sleep because we live in a physical dimension. I explained this to a child, .. When you put 2 circular magnets next to each other, do they ever rest radiating their fields. Do they fro a second stop keeping their distance or changes. No, never, for a magnet it doesn't matter day or night or whatever you pick up, still it radiates its fields. So is it with the STM, (2:30). sleep is the pattern of the physicality, not the soul. In time when man goes through this habit, then we'll loose the sleep. The reason for it is very simple, the position of day and night, psychologically has synchronized the behavior of the man and the absorption of the fields. In deep space or in space we don't have this position. It's always day or it's always night, but the field level taken or given is always the same, so man will never feel that tiredness. We might rest, because how many times can you walk around the spaceship, if you want to go with the spaceship. In the ?? position, we don't exist that way. And we can go to the next phase. So asleep is something which has become habitual and our body has gotten used to it. I sleep about 2 or 3 hours a day and that's the work. I don't see any odd reason for it, but I am 60 years old, and I still can do it. Because even that 2 or 3 hours, I don't see any need for it but, because there is nobody else to do things with, so I have to sit somewhere until somebody comes and plays. I have a time schedule now-a-days, (2:32). I know about 2 or 3 o'clock Armand appears, some times 5 o'clock somebody else, and then the Chinese kick in about 6 or 7 o'clock, so my 24 hours is full. I literally work, mentally organizing things 20 - 22 hours per day now a days. R - Isn't it true in your sleep you are quite busy as well? You were saying in our sleep when we are horizontal, the cage is open and the soul is allowed to be free, some work to do, fun or some adventure? You touched something very touchy. I told you if you trigger, I respond. I'll teach you a way of work. If you understood the teachings of the past few weeks I explained that the STM is encaged with the plasmatic field to hold it because it's a plasma. You put a water in a cup, you put the STM within the field structure of the Gans of the blood of the man. If you understand this and you know according to the different rhythm of the cycle of the strength of the blood, you can literally open a window for the soul not to go out, but to expand its fields, that's exactly what happens. When we go to sleep, (2:34). we reduce, what I call the barrier, it's like opening the shutters, the light shines further, that's all that happens. When you are on the back of the earth, the sun still shines, but you don't see it because you are on the other side. When you come to the front and face the fields, it's the

same fields, then you see the light, so you can spread further. The same thing happens with us when we are asleep. When we go to sleep we lower, because if you look at it, the STM has a freedom but the physical existence of the man is schizophrenic, we have 2 guys working together, one the STP and one the STM and each one has to show its time when it's ready, when the physical condition lowers down, the STM shows himself, he wakes up and the other one goes to sleep, or is there in the background. It's a double act that each one knows when to play. But if you become educated in the knowledge of the U you can play both plays. You allow .. I do this quite often and it shocks Caroline the first time I used to do it, she never understood. We meet somebody, and in a few minutes I say what we are going to do with this guy. You ???? I had this very recently, (2:36). with Wang Lynn, the head of the KF China.

(2:42). One day you'll realize the soul of Armand, those who understand. These are destined positions, it's not something that just comes out of nowhere. We are destined to go and do a job .... In that process we see each others soul. ..
The energy of the soul fulfills the physicality, as much as the physicality opens the door, it's just a two way system. I explained many times that man has to learn to feed the physicality through the soul, maybe for the first time you understand how it works. It's very simple, if you understood the process of the sleep, that you need the time to feed all through the circulation of the blood, whatever, everything what the rest of the souls of the body needs. If you lower it enough then they take whatever they need. Then in that position, your soul is ahead of you, it can see other things. Nothing is hidden from us, nothing. But (2:44). you have to live and pretend in the dimension of the physicality, it becomes automatic ..

.. Try to understand how you go to sleep? Sleep is a visual condition, because of the physical condition of this planet has forced for thousands of years, reduction in productivity of the totality of the work of the soul. This means that mankind has switched time living a schizophrenic life, the daytime I go and find things, the nighttime you go and feed me. If you look, we say, in the tribes of Africa, man is a hunter and gatherer, and the woman is the homemaker, she converts it and feeds it. The physical body of the man is that hunter and gatherer during the daytime for its own use .

...
... This bird never leaves the cage, it's always in the cage. (2:48). But as you take the cover from it you can see more, further distance to warn you of what is to come. 08

(2:50).

... birth by soul is very different then birth by physicality. Man soon will gradually understand now that I explain to you that we start producing systems that everything has a dimensional soul in it, you'll understand that the game changes. Do we need to sleep, (2:52). or we have learned, or we have made an agreement that when you lie down I'll look after you, I'll feed you because ?? during the day when you are walking around the

soul still feeds you. It's amazing that people don't understand. When it's the rest of the physicality, because the soul has more time to do other things, it expands itself and goes and sees the uncle and the brother and cousin and the rest of it. We have to enlighten (ourselves), we know a lot of things about life, but if we reveal everything mankind will commit suicide in mass, and that is not my job. Just understand how you go to sleep and how you dream. You are opening, lowering the cage that earth can look further and at the same time tell you, I am bring you the beauty, knowledge and everything, and then if you know it happens, then how come you can't do it yourself. If you can do that, reach a point of deep space, understanding, you never need to go to sleep. As one in balance between the two will feed each other. The physical existence of the man is a imbalance between the fields of the planet and the STM. And the STP is its child. It's its boundary and if you can bring the two together in balance you do not need the dimension of physicality of another field to confirm your existence, (2:54). and life and that's why you can travel the depths of the U. In part of the teachings I have explained in a paper, I called, Inter-atomic Fusion. It depends which one is inter and which one is atomic, which one in the atom is the neutron and which one is the electron, and how can you hide the neutron inside the electron, and how can you hide the electron inside the neutron, the visa versa. Both have the capabilities of doing so, but one does in the dimension of compact energy, one does with the totality of the field. In the nuclear atomic structure**, it's not the proton in the center which holds the electron outside, it's the electron what can gather from what the proton has released that can confirm, continue its existence. Tesla didn't understand** this and it's a pity, if he would have understood this he would have done a beautiful job. De Vinci came to touch with it, but he was too busy playing with children. And it was taken from him. If you understand the process of birth in the womb of the mother, precondition, completion. The cells never go to sleep. **When the soul is created which shares to give to the rest of physicality, (2:56). in accepting its position, is when the soul is created**. Man needs, has to learn. And do you need to sleep in the depth of the U. Or do we sell condominiums in the space or luxury apartments were you can rest your body. We over thousands of years decided on a pattern of physicality, the rest, that the soul can feed the physicality, but in fact, it never stops. As much as the magnet, as I call it, of the soul is continuously spreading its fields, so is the STP, it just depends on how much I increase the speed that you play or I play. It's like 2 friends playing with a car, when I stop then you drive, and when you stop then I drive, but we agree, around about the same. This is why the soul is more or less 24 hours on watch, because the soul of the physical is on watch too. The structure of the heart and the brain, even has to split that to ?? find a tune. (2:58). Q: Alzar, if the position of our soul is already decided why does mankind try so hard to be something that they are not, I mean if they are just ? It's the freedom of the choice of the souls. It's the freedom of the choice. Q: But is it the freedom of choice for the STP or the soul itself? Both, they accommodate each other. You see, none is the abuser of the other, but collectively they coexist within each other and along with each other. It's very interesting and I have seen this a few times and it makes me laugh very much, there is a specific disease or condition which the astronauts get, all the astronauts and space medical people don't understand it because they just look at the physicality of the condition and they don't understand, (3:00). that at a certain point, like you know you get to a speed of 40 and the door opens, and when you get to 60 everything shuts or whatever, there is a point of the conversion of the physicality and the

emotion and the soul interaction, which creates this condition with all the astronauts, because the speed and the duration of the absorption of the fields is different in the space and they all get it. When it happened with the first astronauts at NASA, there was a crisis, and if you listen to it, it's the energy fields of the Mg within the structure of the stomach. They all get it, but nobody speaks about it. But when the first time it happened the NASA people were in shock. They all get diarrhea and vomiting at the same time. The first time it happened they had to clean up the closed space, ... it was on my nose and face, then the other one had it, and then they realized that each astronaut would go through it at a certain point. In that position. These are secrets of NASA they don't open it up to public, because it's not very nice to say ... . In that process if you put man in that condition, you'll get a release at the point of the, two arrives. (3:02). When they put you in the centrifuge machines you don't get it because of the vacuum and the condition of what we call weightlessness is not there. But the soul doesn't go through this condition. That's why when the soul leaves at night you don't have to change your pants in the morning. 19

... Man in the deep space with the position of G fields we produce will never die. (3:04). You just put it a condition which it is working itself, how can you be a swimmer and get drowned in 10 cm of water, if you put it that way. You are in an environment that you are used to. It's not a conflict of change, and we don't understand this, that's why we are afraid if we get lost in the space. If you don't go with your spacesuit, and if you prepared with your soul you can walk out, because it's actually a lower vacuum condition then your body, so you are quite fit to live through your soul. This is one of the reasons when you open the body in one of the surgeries they don't die. The body automatically creates that field balance difference, it's naturally done. If you understand this you can put your hand through a body of the man, because you create that condition of the balance, there is no barrier. You'll see these systems in the coming time. We'll show you a system where it (something) is on the table and some seconds later its inside you, and then we'll bring it out and show you what it is there. Do you want me to remove a tumor, the tumor comes out with it, but you don't need any operation. These are the knowledge of the U, and what we'll open. We took the guarantee that (there'll be) no more wars, the soul of Trump has guaranteed, and we have the same from Rohanni, and the same from ?? (3:06). And we bring the gift. You'll understand how we work with the ?? soul. They can bark. **If they break, we'll break what we call our code, and then there will be nothing for humanity. This is to encourage the man to walk out of war, to stop killing**. We have taken our assurances from all souls. And then you'll understand, the knowledge we open, it shows the weakness, feebleness of the present defense T and that is easy to do, but we have to let the man do something, if we don't let the man do something, you become just a bunch of stones sitting around until somebody comes and moves you. You have to do something. the knowledge of space is very deep and we just open a window. If you understand what Armand brought (through) the company, read what the name is, this is us in essence, Mark .. Ray. I hope you understand what it means, the name is not coincidental. If you mark a ray, you know where it goes and where it comes. I am a good magician. (3:08). Any other question. Q: When a child urinates in his bed what happens to him? Go and see a doctor. We see a lot of people do it as well, when you go over 60 or 70 years, it's like becoming a child. More adults use pampers then the children, if you don't know that ... What happens to the soul. That's a dimension of physicality. If you

understand the separation and work of each, it's to understand the totality, then you don't need to ask questions, you should be able to put 2 and 2 together. Q: About the feeding of the soul.... to what extent can we use this knowledge, (3:10). in terms of can we totally abstain from food and sleep and does that mean we can get any necessary material for repairing the body? Put it this way, let me explain, mankind has chosen the wrong path to gather energy for his physicality, the STM still feeds but he doesn't kill for it. In time when you become wiser and the condition changes in the upcoming time, soon, the STP will take the path of the STM. There is a big conflict between the 2, one tries to confirm his existence in the dimension of matter state and one tries in the dimension of the plasma state higher strength, it's a battle between the two, the only way you can sort it is through the dimension of the interaction of the two which we call, blood, or you call it emotion. You can explain even how man has overlooked his own behavior of reproduction, then man can understand, how can you do away, or do away with the way to consume. If the STP, (3:12). comes to trust its own strength and comes to trust the strength of the STM, we will be fed, we'll be shined upon, then it doesn't need to kill for to absorb. That's all we do, is kill to absorb from.. 20

..Q: What is the plasmatic explanation of yawning and the connection with the soul? (3:16).

(3:20).
(3:22).
(3:24).

(3:26).

295th Knowledge Seekers Workshop - Thursday, Sept 26, 2019

(,)

(pre- video about traveling in space)
(:19). First conference will start tomorrow, to show the new T and what is the evolution. (:20). Starts with questions before going into teachings. (:22). Q: Where does the soul of the animals go, ant or horse, do they travel the same path as the humans? The soul of every created thing goes through the same process. Every soul has an intellect, a life, a feeling, it's just that more or less the size, position and condition which leads to the creation of that entity and that physical dimension. We always explained we don't know the difference between the STM or a child or an animal, it's an entity on its own. It's like

when we look into the stars, they are all shining, we don't see any difference, but depending on their size, they shine at a different strength. That shining which shows the strength they have and how they interact with the environment. So there is no difference in reality, in the structure of the creation of the soul. It's very ?? ?? how it finds its position that is important. Planets like Earth are the nurseries for the creation of life in the U. (:24). When the soul is free, according to the strength it has, what it can give and take, it finds its position in the U. It finds its point of reference in the U. As I said before, when you put magnets next to each other, depending on the strength of the magnets, they find their position, and so is the STM. How far, to what distance, to where, and on the other hand, do the planets like earth, which are the cradle of life, and create the souls, do they themselves become in the long run, term, due to the energies they create, start their own cluster, own galaxy. The seeds of, or the strength of the totality as it comes from the Amino Acid (AA) of this planet, do they create a common denominator strength that allows them to create a galaxy that has that common denominator that has the strength of what we call the soul of this planet. (:26). In that process all hundreds of billions of stars, planets or whatever created in that galaxy, they all have a common denominator energy which comes from the strength of the AA of this planet. Some of the galaxies in the U are created that way. They have a common denominator strength, that's where they can gather and collectively they expand to create the dimension and the fields and rotation of the creation of the galaxies, a series of stars. Then it comes to how we have all the stars as a twin stars, it's a balancing field, as a process of the delivery of the totality of life, and then would these common denominators in the future become part of the life, giving life to the planet. It is interesting how we understand this language, how we can comprehend and how we can expand on the knowledge. (:28). Q: Why did you call, when we look at our Topoli (dog), you say they are our children? What do you mean? Q: You refer to animals like a cat, mouse, when we look after them like they are our own children, but sometimes you refer to that they are our children? The child doesn't necessarily mean what you have given physical share of your physicality to, like our physical children. What you share love with and look after to grow is a child. The plant in its infancy is a child, it's your responsibility, a dog and cat are the same, because we share our souls. How much we share our souls with them, they become part of, they become like us. They understand us through our souls, feeling, emotion. What is important, (:30).
(:32).

talks about animal until .. (:38).
... Q: Is an ant for example, created in the image and likeness of the Creator, and can an ant teach other ants higher or divine knowledge? In soul yes, because now we know that physicality is manifestation of position and condition, but **all creatures of the U are in essence the same as the reflection of the soul of the Creator**. Q: **Can the soul of an ant choose to be the soul of a human body in the next life time kind of thing, or visa versa, can a human end up in the soul of an ant**, after (Reincarnation)..? The reality is if you look into the depths of creation, as we said, when we transmute the STM across the U, (:40). and when it suits it, manifests itself in the shape of the manifestation of entity at that position, then would that refer on this planet. But the other point is, would it carry the memories and the constitution of the soul in the behavior. Philosophically speaking as we have taught for so long, and you understand the totality, there is no reason why not.

But then does the STM or any animal created from this planet due to absorbing energies during its lifetime from the U, find its balance to be on this planet, because we have encaged it. We, with the position of the physicality, the soul of the animal is encaged to the strength where it's kept, it's like a bird when you open the cage, does it stay in the same home, or does it fly and go to a new destination, but as it does, does it change its physicality to a dog or a cat, or does it stay a bird. In so many ways, there are 2 answers to this question, (:42). does the STM become a soul of a dog when it manifests itself? In reality it doesn't take place because now it has taken a different position, but does its soul become that it manifests a dog somewhere. We have to understand the process of the creation, the process of the creation of the soul is different for the soul when it is freed and it finds its own dimension. When we create a dog or a child out of the interaction of the 2 physical dimensions, like a sperm and egg, it's different then when a soul is free, it doesn't go and take a place in the physicality of a dog because it already has the body, the dog which is created, it already has a soul. So in that case the STM is free to interact, to create conditions for other souls to be created out of, but it can't go and live in the soul of a dog, it can't go and take a soul of a cat, because that soul was created at the point of inception, or let's say the soul of a child. In 2 different ways of looking at the same thing, it gives the freedom of the soul, (:44). but in respect to the STM is the soul of the planet, in respect to the soul of the planet is the soul of this galaxy, and the soul of the U and the solar system. So the STM finds a position which balances in according to all these, not what is created, that we can go in the womb of a dog and then create a dog. This is what mankind will understand. It's like when you see a flower matures, and then it pollinates, it releases its pollen in the air until where it finds the right condition, and right atmosphere that it can receive cells. The STM or soul of created things on this planet or anywhere in the U are like that pollen they travel the span of the U until they find a position, and then in that position they manifest themselves according to the environment of themselves with the strength of the soul they carry. And this is how we see so many stars in the U and they are forever producing. If you understand the same 10 million people on this planet, billions of animals die everyday, (:46) . We create the start of the soul and these souls take their position in the universe, they don't disappear, we can't unless the soul is totally disintegrated and it's got nowhere, no strength to create its own dimension, it's the same position. Planets like earth are fields of the flowers which pollinates the U, and that's its only reason. Because they are in interaction with the field of the earth, they have been captured so they find mostly, usually, space outside the dimension of this planet, and as they are the seeds already gathered together they absorb energies and they become the seedlings of the new cycle of life of the stars, planets and everything else. These are what we have to accept. In the new T's we start showing from tomorrow we will explain new dimensions, structures, criteria in the life of the man, by creating the condition of the STM and being able to position in respect to, not to become part of. Some of us in these new systems (:48). will see because the fields cross passes our skulls and brains tissues in strength, we will see shining lights around us in interaction with us when we are near these systems, and if the interaction is strong enough we shall become the light. Everything is dark unless it is interacted by the stronger fields of the sun, then it lights up, that's what we call daytime. Now we create the same, if we understand the process and that the same thing happens all the time in the U, then we'll understand very simply that the life in the U is a repetition. Q: Carolina .... (:50). When somebody in (high)

position does wrong then you said it effects the children and the family, can you open that door more so we can understand exactly? K - What do you mean? Q: When you referred to the court ... when you read about the life of the Bab (Bahoula) then they followed the executioners life of what took place there (the karma that happened to the executioners) ... A lot of people get confused that they take responsibility for whatever their parents and grandparents have done? K - The same as we share our love and care for our animals and understand that they take share of our souls, through the connection to our children, through what we have done, be it a blessing or whatever, links up to our children, our offspring's because we pass on to. They set their souls and the souls of the parents to somewhere to balance things off. Just as with the STM, (:52). as when the physicality finishes, does not come to an end, there is still a process of balancing going on and it will lead to that point of the balance. Because our soul is responsible for the actions of our physicality because it was part of it, it's where the energy came up to do. So it goes on the same, and it transfers to the same position. It concludes to the same direction. We share as we our love with our children and animals as they take from us so that responsibility which we took, do it the right way or the wrong way, carries on to them and you see, ?? to go as they share the ethos. It's like if you look at the life of some of the prophets and some of their followers, they lead the same life, because they accepted to share the soul. You see the, (:54). .. it's the totality of working things out, and from it trying to understand that the life doesn't stop at the point of a soul being freed, the dimension of that soul, the responsibility of that soul will carry on through of (to the) children. Q: ... How much time does a soul need to balance its fields before it actually leaves the physicality completely? K- there is no time. Q: Or it hangs around or its presence stays around, like we had with Fabio, we still sensed him 3 or 4 days after the accident and he was present at the funeral in the Church .. ? (:56). ... How long can that be present, is that the same until all the fields are balanced with the family? K - It depends on what the soul decides more or less what connection, what and how it is connected to the physicality. In normal life we die in fires or in positions where there are no signs of life left, ashes or whatever. But the soul has its freedom and according to the love it has receives it connects to. One of the reasons we felt Fabio is because we literally adopted him as our son, we treated him that way, with all the freedom, opportunities and whatever he asked during the short time with us he got. He became part of us, he shared his soul with us and that's why we feel him, and that is how we felt him. (:58). You do not need to give birth to a soul to be its parent, it's what you give as love, what you share with them. When Fabio came and we saw him in the teachings the very first time he was very shy, I remember when we asked him to translate he had a problem to translate, but he flourished and we gave him the ground to flourish, to show his best and he did. That's what it means, the children, to create the ground opportunity for man, for a being to show his best ability. Then it is his decision and he built with us most probably what he couldn't do with the others, because we allowed him to show his best. He was a free bird and whatever he asked while he was with us was on the table, in developing things ... (1:00).
(1:02).
Q: .. How can and what can be done to balance the field of the wrong, so that it lifts the burden from the family ... K- It is, do the families know they have done wrong, or is it to you on your own. Is it a conscious knowledge or a shared one. Q: If somebody has taken

a life from somebody else, like a father, it's in that line of responsibility, what can the children do .. (1:04). ... K- You see we are a soldier and we stand up and we kill, or we are a person and we see somebody stopping us from something we want to do and we kill them, or we are driving a car and out of nowhere somebody jumps in front of us and we kill. Is the killing justified in all 3? The first one you are a soldier, the instinct of survival is, if I don't kill I get killed. Then do I kill to stay alive or do I kill the next one to get a higher position to do something else, to have a nation of my own, or whatever. And the second one is if I kill I possess the property. At the end of it we take a physical life ?? and we free the soul. When a soldier kills another soldier, does it go that if I don't kill I get killed, or does that soul, he came to war because he couldn't stand (1:06). on the pains of what was going on in the background, this killing was the freedom of his soul from the freedom of hunger and everything, he joined the army to have a food on the table, or we go in a deeper sense of understanding accidental killing, is an accident. Anything else which is us making a decision to end life it means we have to connect with it. When a sharpshooter sees a body in the line of fire and fires, he has connected with that soul he has a responsibility to it and that responsibility passes on because, this is one of the reasons that people don't understand why the American people are coming back with so much diseases, and bringing so many problems back into their own nations, in the current present times. We saw the same problems with the Americans when they came out of Vietnam, because they killed. They went with the intention to kill, ?? that they killed. All these soldiers killing is done by the decision makers in the high office, those become responsible too. ... these people are all sick, all these drug traffickers, (1:08). criminals, which they run criminal organizations ?? they're all sick, and I said to myself, of course they are because they bring so much pain to the others. They have part of the responsibility to those who they make addicts and the rest of it, and how they have there families and everything else so they have a link to. If you break the line in the family, what happens, you betray the house and it will come down and suffer, and you'll find out the partner will do because you have betrayed, and then the children get suffering and the rest of it. So we are responsible and hidden or non-hidden it will come and serve itself. When we go and think nobody sees, our soul sees. If man ever, when we take people to army, explain to them about he position of the soul and what it is, I promise you none of them will be killing. In the future .. (unless) psychologically demented will accept to become soldier. When you don't have soldiers you don't have kings, ?? blue rulers, leaders, because we learn to conduct the correct way. (1:10).
(.. break ..) (1:12).
Q: How can a family member support when something is wrong in family (murder for example)? ... you know the story about the father who has made a lot of money through atrocities and whatever, and achieving this position in not a correct manner, then the son inherits that ..
(1:14). how can the son reposition what the father has done wrong, even if it is both ways in physicality and soul level. How would explain for somebody who wants to rectify what went wrong with so many ... How to handle this problem when the son inherits bad money? What would be your view on this? ..

.. K - The only way you can do is you have to go to the next level and you can't do it anymore by any ways that you might think, 30 or 40 years down the line. It's by elevating

the soul of your father and because even though he is gone he is still connected to this planet and the people he has done wrong to, through what we call your soul, because you are connected to the same processes, to elevate the soul of those or their offspring's which are still connected, suffer by it knowingly or unknowingly that they find (1:16). the position they would have had without this misconduct of the father. This is why we pray for our parents, when you do as we did in the old way was to raise their soul, was to give from our soul to theirs. And what for? For them to put right what they did wrong to the others. It's to put it right to correct the situation of what was created, knowingly or unknowingly. The human race will learn very soon this thing. The suffering on this planet is too much. Everything you do is so entangled that either way you end up with something, the condition of a mistake being made, ??? ... the physicality has created the condition .. the STM to elevate.. .. (break ...)

(1:18). So what we see, what we have is the totality of what we want, what we can do, are allowed to do.
(..break ..) 25
In totality we are part of the same structure, but in totality we position that structure as you have noticed in the .... (1:20). We choose and we allow the position to take place in respect to us, we extend our lives according to our soul and we expand the horizon of the soul according to its conduct. How it will be done and the way it will be done, is for us to understand the totality, the understanding of the reality. We sit for the, not the consequences but the balance of the conduct of totality. If you look at this planet from a distance, in the eye of the man in the dimension of the physicality it's blue, but in the dimension of the soul of the U it is red, red with the blood of killing over all these centuries, thousands of years, millions of years. There is not a sand on this planet which has not been tainted with the blood of the man. (1:22). or animals, or creatures. This is what is the problem with this planet. Not what we see but what has the soul of this planet brought that it has created this condition of life like this on this planet. If you look at it it's the life of a single cell which is created and takes energy from its environment, the purest because it takes what it needs, it doesn't kill for it. Even the plants on the continuous lifecycle, we understand now that they absorb AA, which means it has a soul, is in the wrong condition. The whole structure of the soul of this planet is wrong. How it is come to be wrong, how it has lead to so much misery, is beyond comprehension. Is there a need to elevate the soul of this planet, that with it, it elevates the soul of its life, it doesn't matter tree or plant or whatever, is it only ?? And the answer is yes. (1:24). This is one of our jobs, work, to elevate the soul of this planet that with it, it elevates the soul of its embodiment, what it has done. We need to understand to comprehend, we need to be there that we can greet life without fear, compensation, without balancing. When a child is conceived, does it just carry the eye and the hair of the dad and mom or grandma, or does it carry with it their consciousness of misconduct too. Or do we just look at the physicality and we don't understand that it carries a soul, because we are just always concerned with it. the soul carries its own signature of the soul of those who created it, do we just pass the RNA or do we pass in that memory bank the RNA of the STM too. In reality, yes. Everything, every single cell of your body, which is the collection of the understanding of the knowledge of the past which makes you to look Chinese, to have a spot here, or to be a Jewish with a long nose, or to have hair long. The same information

is carried by the man who created that life. (1:26). When we are born and we are only sucking the sap of the life from the mother, in that life whatever she has done is passed on to us, because that is where it came from. But it came part of it through the soul of what she destroyed to have the cow, god knows what, the animals she ate or whatever, because when we eat, consume the body, there is a reflection of the soul of the entity in it. So the accumulation of life on this planet is for everlasting ?? organization of pain and suffering of the others. When with the new T which we are about to release, it will be shown to those who are present tomorrow, those will understand one thing, for the first time we feed the soul of the man, without the need for physicality, but in the process, mankind has to learn and to follow, and to see how and where and what, and the shape it has taken to become. We create a condition and we go through the condition. A wife who lies and cheats stands the services of the same thing back. It doesn't matter if it is done in hiding. (1:28). If you ever listen to things which we lecture. If you go around any coastal areas in Europe you'll see churches, in small villages 2 or 3 churches ... and ask yourself why, the fisherman before he goes to sea goes and pays something to the church for the fear of the life he captures in mass that he can come back alive for the sins he has done, we call it a sin for the lives he destroys. When he comes back he goes and pays again for coming back safe, maybe he was a week or two or a month on the seas. But he is away and the woman at home finds a companion, she goes by the tradition and confesses to the Church, she pays another 1/3rd to the priest. The fisherman works his life, the Church builds up the building. In fact, all payment of one to another. (1:30). Who and how. we see this, it's a progressive work. I don't want to be in this physical life it's too harsh, and it has no meaning, because at the end of it you go out with less then you came in. It's a bank account which always leaves negative, because it's not that, he was a good man, he did everything whatever. He was a good man but he used to give a lot of parties with lamb and steaks and the best vegetables, consuming life, consuming another soul for the pleasure of his. It's the totality and life on this planet is beyond imagination of what we could imagine to be. Every second we breath to survive we breath another pile of pain. The only way we find a solution is to raise the soul of this planet through what comes from it, it feeds its inhabitants that they don't need to kill for it. When you have a full stomach you don't kill. It means you haven't been fed properly and it's the responsibility of the soul of the planet, (1:32). to feed the STM that the man feeds the soul of his existence, physicality that it doesn't need to kill. The problem sits within the lack of the strength within the soul of hte planet and this is one of the reasons we convert the matter state of this planet to the Gans state to strengthen the soul of it because it works with it, it interacts with it, it comes from it. Then you understand why the Chinese understood and they used to go and throw tons and gallons of Gans's into the rivers and the oceans to feed the thirst of the hunger of this planet, to change its position. We cannot become vegetarians and don't eat because the essence of this planet takes from but does not give, and what it doesn't give we have to supplement. So if we raise the soul of this planet that the whole, in a way, giving, we call it a north pole where it goes out, becomes totality equal across it, that the souls of its inhabitants don't kill, it receives what it needs and they live through it, then the change comes. In the farming they say can you clean up this land with a lot of this and that in it. (1:34). I say, yes, of course with the new T we can because with it you rely on the free fields in the U to feed the plant, so it doesn't need to receive fertilizer to poison it, and in time these fertilizers, nitrites get washed and go

lower and lower and the top layers become clean, but at the end of it, all these poisons wash in to the rivers and into the heart of this planet and in one way or another if they find their ways in the depths of the oceans, dilute but still in the process will reduce, and somewhere they convert. This is the problem we have. Once the soul of this planet starts giving gradually the cleanup comes. Not in one go. Raising the soul of this planet is more important then anything and part of the work which we have undertaken is this, to raise the soul of this planet. Any other question. Q: You have instructed us that if we have a cranium of a deceased person we can reconstruct his body, now what happens with the original soul or does he come along with a twin soul? (1:36). In a way you create what I call, the beautiful people. You create another soul which is independent, not the person. So this skull has a house, it has connection to 2 souls. This is the way it is, you don't bring the other soul in, now it's a home for 2 souls, you created the second one. You'll not get the first, impossible. Q: That means the beautiful people have all gone through a similar situation? No, there was a situation that there was a room for multiple fields to be created. The biggest problem is for the beautiful people, the way our knowledge is today do not understand. Our scientists of the this position, but if they become aware and understand, then life changes. (1:38). Q: Who am I, am I the STP who plays and needs during the day, and I have an observer and judge, the soul of totality, or am I the soul of totality who plays and needs during the night, and I have as an observer an apprentice the STP, or are they both together with the schizophrenic life, and then at the time of separation how do they divide me, who and where goes, and what about the beautiful people, how do they split? In the structure of life we separate from our physicality in a very balanced way. Physicality has a level that it cannot go up, and the soul has a level that it can't come down. At that point of what we call MaGrav positioning if you want to call it that, when they reach that point that one takes from one what the other one (doesn't) need, and one gives to the other one what it wants to give, that point becomes the separation. (1:40). Then what is the physical life stays behind, they still got cells in it, those have life, they have a structure, so now they get decomposed and consumed or become part of the atmosphere of this planet in the consumption of gas or whatever or liquid, but the totality as they release their souls, stays miniature souls but they are on their own, single cell souls. They still have a common denominator of connection, but the STM which is freed from the physicality, from that body, has its totality in the strength of what it carries, above what was physical life. Let's say the spectrum is from 1 to 10, the STM is working from anything which is energy (level) of 6 and above, and the physicality works with energy 0 to 6. But 6 and above energy levels still has residues which shares but it can't reach to 10 that it can complete itself. ?? it goes from 6 to 7 to 8 to 9, and as it gets to higher order it has less of the weaker one in it. When it comes to the point of total MaGrav fields of giving and taking of the two, one it takes all the weaker ones, and the other takes all the strongest of the other one ... then they separate. And each one leaves its own dimension, and each one divides or adds to another dimension. Or the body after physicality gets eaten by birds so they go through the same process, transfer of the soul to a new dimension, because now you become part of the bird. (1:42). Schizophrenics are in the same position and it creates a condition that their souls, still share with the part of the emotion. ... in the new cycle of the systems we'll produce we carry this dimension, we have to understand it. .. We look at the blood as the circulation of the ?? life and emotion, but the blood carries fields, it's the same as the Gans's you put

through. It has its own current separate from the current flow of the liquid and that current flow is much more rapid, is a non-tangible flow and that is what expands. The amount that it expands from its center, the center of the blood vessel dictates what energies it gives, that in that energy with what comes as a neural system becomes the physical condition interaction of the body. As you see the blood vessels near the heart are very big and as you go to the fingers they narrow, because the amount of fields that they can give dictates how the shape of the finger is going to be, because of the interaction of their fields, which what comes from the nerves, which is the memory bank, this is the shape it should be, dictates the cell. (1:44). Then when you see a big man with very big hands you can see the blood vessels are different. And it is the same when you see a small man with smaller blood vessels, so that creates a different behavior. Our blood is not just a liquid transfer, it's a fast, do you want to call it, zero free resistance superconductor, because the field flow along the liquid of the matter and not within the liquid. It's like when you pump the Gans's, the Gans is there but the field expands further because you pushing more and more of it. Q: I had certain dreams that I was aware in my dream that the soul left the cage, being aware of this work I could not control the situation or go where it wanted, (1:46). it was a program, (like it's programmed) what do we do to go where we want to? K- As long as you have a physical life you can't go very far. It's got a hang and hook on you. It's your twin, it brings you back, holds on to you. It holds the cage. R- It's called a silver cord sometimes in some teachings. K- It's called anything you like. It's called MaGrav positioning, the position has got a hook on. In the new system and T's we'll clarify a lot of things. A lot of mysteries will open up from tomorrow. A lot of things that mankind didn't understand, gradually with those who come will transfer to their understanding that we have created a condition that creates a condition of life. With the new T as we create a condition of life to elevate the soul, through it we can use the same way to elevate the soul of the planet and end up with all these messes. Now we can replicate the strength of the soul of the planet, because the planet through its interaction creates the condition of life, (1:48). in the shape of our AA. Now we reverse the position of it, with a special way to do, and a way to understand, it works itself. Then put it this way, if you have so many mobile phones and each one is emitting a field to strengthen the soul of the planet, it is set to that strength, then you can imagine you'll find the characteristic of the planet change, the environment and condition of the planet changes, and with it we'll end with all these killings and things is to vanished from the face of this planet, then it makes mankind ready for the Universal world. There are very interesting times to come. Q: Should we see these different conferences as a portal that will open up communication with the U Community more extensively with more awareness? K- The STM more extensively. With these new systems we are not delivering ... there will be a lot of misconception of what they can do, but in fact we are delivering to elevate the STM by elevation of it, (1:50). that the soul learns how to absorb fields and how would it feel (? feed) its physicality. Any other question. Q: What is the best way to proceed when so many efforts are being made to hook us on 5G instead of advancing to 9G as you stated? The 9G principle will be shown for the first time tomorrow as a working system. This is what you were not expecting. But the principle ?? concepts have an actual physical system of the 9G will be shown tomorrow .. and as you'll not see, we have asked those who are there not to take any pictures, they'll be shown in the future, we have arranged for it to be photographed that

people can understand but you don't see much. The whole principle of the 9G, actually not the principle, the 9G system in operation will be shown tomorrow. (1:52). The G9 is the Book #9 which is the dimension of the soul. The others as you read the books, you'll find out in how it will create communications, materials, and the operation of the ?? What man needs to carry in the space with him to be able to feed himself and elevate his soul, that the soul feeds the physicality as it needs will be unraveled tomorrow. It's a unique system, some of you think you have seen it, but nobody has seen such a thing before. Mankind has never had an insight to it and with it, it sets the structure of life, not only to feed the man but to elevate the STM and then elevate the soul of the planet. So what you cal a G9 is a dream to come, is reality on the table. Many people who will come in touch with these new systems, it will change their lives. We did this not to waste time, to change a lot of courses. We will shown most probably in the next conference the systems that never need charging, universe. (1:54). As we go along from one conference to another you'll see the same unit but with an extension to show other things that man might or might not need. We'll start changing things tomorrow. People who see will understand, if they understand what is in front of them. We have replicated life on this planet. This is what we call G9. Any other question. R- so perhaps we'll hear more about that in the next KS Workshop? No way. It's a puzzle, that people who come and sit and watch it will not understand it. But we have replicated the heartbeat of the U. So we can create anything of the U. Q: Why does the big media ignore the achievements of the KF? There is a band on ?? Fox. (1:56). Now we see the same problem, not a problem, but the same situation with the ?? down the road, but in time and in due course there is no way to block, no way to stop, as what somebody said, you have become the moist powerful underground scientific organization in the world that nobody wants to speak about, but everybody does it. ... Someone was saying that out of nowhere he found 200 K Seekers in his area. ... My knowledge will stay while the kingdoms will fall. We unraveled the ties to people who were abusers and in time through us those who have set up things to do, will come to need it because through their abuse they come to need the T. We have seen it many times. This T is amazing in depth across nations. (1:58). It just needs one person as the Internet is tugging for energy systems and suddenly they come across the MaGrav system or whatever and they get used to it. ... If people understood what I understand about MaGrav units, then you all have the most powerful power generators in your hands. But you don't understand, and I realized that in the second day of the blueprint ... these people don't have a clue what you are giving to them, and you went the path that you wanted to go. .... people just wanted to copy it .. the generators we have can produce Megawatts tomorrow, and there is a plan to release but in a different way. In the coming weeks you'll see the first mobile phone battery that doesn't need charging, and cars that you don't need to energize you buy the car it's for your life. The T is KF. We'll give the knowledge to these people because we have the knowledge to do it. (2:00). We shared it with them because it effects the whole structure. ... Tomorrow will be the opening of a new science for man. It doesn't matter who sees what, but in time you'll realize. It's the first time you carry system that carry the totality of the creation with it. It's you who has to understand what you need from it. Q: In the future could we charge our smart phones just by holding them in our hands via KF T or pizia electric field? The knowledge is deeper then that, but so easy to understand. (2:02). Q: Some compared the layers of the petroleum fields to the layers of the planet?

..

(2:04). (.. break ..) ... (2:05). (repeats question again) .. .. Q: What is the emotional disturbance that causes the kidneys to malfunction? K- Okay I'll tell you what we have. We see, (2:06). with people in this new T that when we elevate the soul fast the physicality doesn't want to work with it and it shows itself in all sorts of problems. We see this with the new systems and we see people who once they start using the systems they run into problems because their physicality can't understand and cope with the soul. We see this with people with Parkinson's and the others, they go through worse condition. Because we elevate the soul in combination and the soul doesn't want to take or the physicality can't match. We need to understand the totality of the work and in some system when we elevate the soul the physicality runs into problem. (2:08). Any other question. Q: Can you explain more about when the soul is elevating and the physicality can't cope? What do you mean. Q: When people have kidney problems and they don't understand the explanation of the soul elevation and the physicality can't progress. What do you mean? Q: The way you explained it doesn't explain where the soul elevates and the physicality can't match it? K- **The soul tries to elevate itself that it can separate from the leech of the body. And that moment you see this, because the present knowledge looks at the physical existence**. The totality of the knowledge looks at the elevation of the STM. The soul wants to be at such a high level that sees the structure of the fields, (2:10). as the way of the separation of the physicality. If in the future we put structure to measure, the soul which leaves the body and then somebody uses the T that elevates the soul to a higher level where the soul is happy and reaches its eventuality, and then you see that you have a separation of the two of a physical life and a soul. So what is the purpose of life, to elevate the soul ?? to reach maturity in a proper way, or keep the physicality here to suffer that the soul can be encaged. And then they say do we have to execute everybody that we free the souls? No. But in the process of completion, is death the conclusion, the end or do we free the STM. Q: I understand but the person is still functioning here in his physicality so I understand that the body can't cope with the elevation, how can we establish the balance between that? K- It's in the writing of one of the Messengers of God, if I tell you the beauty of how the other side is you'll all commit suicide. (2:12). If I tell you how you can elevate your soul to the level of the best it has, you don't want to have the physical life attached. Q: But how can balance that progressing that the physicality can follow, that's where people are looking for answers in their understanding, that what can they do to elevate their physicality that can cope with the progressing of the soul? K- Do we want to stay in the physical life and dimension or do we want the elevation of the STM to be free. Or do you want to elevate the soul that it can feed the physicality and ?? watch it go everywhere and you see everybody suffering and is killing and you are happy to watch it. Then that is your decision, because you are not part of it, you become an observer of the mass murder. If I get the video of the pigs in Vietnam and we watch, it is horrendous. Do you want to be part of that structure. They dig a hole 50 meters by 100 m by 6 m deep and they just walk in tens of thousands of pigs into it, and while they are piling them on top of each other we say there was, what do you call it when there was a mass run in a stadium and so many people got killed (stampede) stomping on top of and killing each other. (2:14). They put thousands of

animals on top of each other literally suffocating the ones below and then when it gets to 6 meters above the ground they fill it up with soil. Do you want to be witness to this. Then when see you can get life from it, and would we create. I want to show you something, it is horrendous if people understand why I say ... this is past few days not before, I want to put you in that position and you say you are not ashamed to be a man. You have to see it, you are so remote from it that ... this is the reality of life today everywhere, be it from a cattle, pig, chicken and from everything else. Have a look at this picture, this is today farming. This is encaging the physicality that we decide when this animal is going to be slaughtered. We decide how many kids this animal can have, it's in their life, and the worse thing is this is the mother pig. If you have been to Holland or Italy, animals are encaged and then we eat it, is the soul, is that meat, is that life. (2:16). Is this life. Are we proud to be humans. Is this why we were born. This is what we have created. Look at 2 animals one walking away from the other. One in 2 legs and one in 4. And the 2 legged one you see what he has done. Why do we need to produce so many souls and encage them and entrap them. If we could absorb and observe the situation around us. If we could understand what is done in our name. Any other question. Q; Mr. K it's not only the animals that are getting treated like this. (2:18). In One Nation group we brought the topic on the table about the displaced humans on this planet which is about 600 million. They are getting the same treatment as the animals, so we have not differentiated from our own species let alone ? K- You see this is what we talk about the displacement and refugee. The pain of the refugee business and the people who get displaced, done by deliberation (deliberately) of governments for their own benefit with what people. It doesn't finish with what picture you see it vibrates through the life of millions of people, for centuries, it's not just with what picture you see, there are ten thousands Syrian refugees in such a country. This ten thousand is suffering which is caused by the greed of the others, which is causing these ten thousand, how they got to where they are ten thousand, most probably they started with 15,000 and 5,000 died on the way and whatever you got 10000 in one country. Then what suffering they go through. The position of refugees and displaced people doesn't finish with one man, it goes through generations. I am one of them. We had to take refuge from the Iranian revolution. Forty years down the line, look at the life, we had ... if the Iranian government was not afraid of me being killed in Iran I would have been in Iran developing T, (2:20). proud of my nation. They have to protect me not to be killed to out of the country, and then they tag us as terrorists, frauds and everything else. I am a prime example of it, I have been through the whole process. What is the child we create the life stability, we have to go from country to country because of one king who is now, your country doesn't stand behind you, I will do what I like. If the Iranian government would have stood firm, it doesn't matter what you do, we'll protect you, Belgium's wouldn't have opened their mouth, they would have shut their ass. Their life is so simple, the refugee and displaced people created by the greed of the others will pay back to nations which have created it. The structure will change, you talk about displaced people, we were in university, people were proud to know us, overnight we became terrorists, just because they decided. We can't go anywhere, now they don't even give you a bank account. Just because one nation says to the others, or we decided that you are too advanced in T, since when a nation for technological development has become a criminal nation. This is the case of Iran in the international community. They have become too independently

knowledgeable in T. That's what Iran is. (2:22). Then we have a gentlemen asking us why KF is not known. We are not known anywhere, because the knowledge is so revolutionary, people are using it. It is used in homes. We have become an underground scientific group, which the kings can have (to use) when there is nothing else left for them. ...

.. Give me a second I don't want to be here, (2:24). but I have taken a responsibility to be here and I hope the end comes as soon as possible, because there is nothing but suffering here but deception, cheating killing and everything else. Do you want me to show my power? There will be no man walking. What you'll see tomorrow will touch everyone's life in the next, don't know, 2 years maximum. We are releasing the knowledge which is beyond the imagination. Now every Iranian scientists become the biggest worse terrorist, because now we make there to be no need for oil, food and everything else. If I would have been an American would have taken plenty of Nobel prizes. But it doesn't matter, my knowledge, my T, what I have shared will last the life of this planet and beyond for those who take it into space. My name will never be forgotten, because it carries my soul. You can come up with any excuses you want. You people don't understand what it means what these people go through, and through this T while we are developing, we'll elevate their souls, we feed them in their souls that they don't even know. The man will feel ?? refugees and what they'll receive. (2:26). When you see, those who understand, the systems coming out, you'll see the STM, if you understand it, and you see through the eye of the STM. Your soul in your body is not attached to anything, it's a free rotating structure, but at a given speed of rotation and vibration. And in these T's that's what you see, what we have created. No attachments, but dimensional, motion ?? of the life. Many of you won't even grasp what is in these T's, maybe years down the line. I can create the soul of a stone within the man. How hard do you want that stone to be. (2:28). Any other question. Q: Who suffers from an emotion, the STM who is detached and looks on as the observer or the STP? K- Emotion is the interaction of the fields of both. Emotion is another star, planet in a solar system, but this time it has no dimension, it has no physicality, but it's a field, what we see in the U. As we say in the electronic computer business, it's in the cloud, it has no home, but as a given strength when it arrives at a certain strength creates a fraction, we call it O or H, at this point in the body of the man through the structure of the field strength from the soul to that point and from the blood of the body and to that point, we say this area is for happiness. That's all it is. There is no allocation, that this is this and that, it's just a field strength in the structure of the body the way it has established itself, always this part is for vision, this part is for happiness, this part carries memories, this part through the physicality. The physical dimension of the body is on the outer boundary of the brain, so it's the same as the earth. (2:30). The surface is on the boundary, inside you have magma and everything else, but the brain has structured itself that to keep one place for an oil field and one place for the gold, we call this the memory part and call that one something else. But in essence it has not changed, it's the same thing. (Yes, fantastic news ..) Q: When you are referring. (to those who are working the background with the embassy's , contact and request the Americans to attend) Q: What you were just mentioning you called it an emotion, but some words before that you referred to it as a star, so from my comprehension of the teachings you ?? (2:32). two souls, the STM and STP, but there has to be a third one, you just referred to a

star. K- they all are stars. Each soul is a star. You see, you have to understand how we feed. I'll explain how it works. When you have a son and that sun betrays you, it doesn't matter which way but you feel he betrayed. And you are correct in feeling, it's not just imagination, because it is what is there, it comes to the point that the feeling of the emotion carries to your inner structure that with a man you feel that pain in your prostate, women feel that pain in their womb or in their breast. Where does that emotion come from, and where does it lead to. It comes from the interaction of the fields of the STM and what you heard and read. He writes to you, you are not my father. (2:34). How do you feel? To me it doesn't matter if I created it or not, that dog you pick up, you give your love to. You go through your pain for days. It's the same with the mother. It's the same when I explain to a lot of men who have no clue about woman's structure, and they think they are natural. A guy wrote to me, why do women become lesbian? I explained that, married women who then become lesbian, do you know why? You don't become lesbian, because the structure of inside of a womb of a woman has a wall, like a skin, it irritates and any interaction creates pain and a lot of women tolerate this in their married life because of their children, but the guy thinks, oh she makes a noise, I am a superman, but in the freedom of other dimensions of nations, they can walk away from it. But they still need that love, they need to confirm that they exist, but with a man they have to go through a pain, with a woman most probably with understanding of the same, they understand, there is no condition to create pain. I said to the guy, you know how if you don't understand, it's like me kicking you in your testicles and then say, walk, can you? (2:36). No. It's the same with a woman. We don't understand a lot of things, then we classify and put things in the condition of emotion. I prefer to be with another woman but not go through the pain of the emotion of interaction. Where do we classify. Then am I happy with what I am doing, because I am not supposed to do this, because it's supposed to be a man and a woman. This is what a lot of world of us, doesn't understand and then this touches the soul, the emotion, it touches the change of position and how we interact. It is consistent with ignorance of man about the knowledge of creation of his own. It is the knowledge of the man to understand that there is a structure beyond the physicality, but this physicality carries all the knowledge of the physical dimension, ?? where it can release and absorb without just being the giver, in a way, which we call the brain, and that interaction with the STM has given a dimension to create certain fields which we call emotion. Do you have an earth shinning in the daytime if there wasn't a sun? (2:38). So the physicality , the blood <when> .. it is a sun and with the fields that it radiates, it passes through the filter of the brain, which what comes from the sun which is the STM, leaves the residuals of what we call, emotions. Have you ever thought how come your cell at a given point suddenly changes, as a time comes, there is a bank in the brain and there is a cell that has a soul, in the information it comes through the blood to feed it, it says, it is time for me to go, I don't have enough energy, it sends a message to the brain, send a replacement. In the factory in the brain that cell has a specific code what the strength is and it sends it down to replace. Our blood carries ever information, even replacement of us. The structure of science is beyond understanding because we have limited ourselves to the dimension of physicality. It's us who has to understand what we haven't understood, and it is for man to understand that the physicality is the creation of the interaction of the fields, it's the fields which the blood carries which interacts with the fields which is the creator of itself, the dimension becomes emotion and part of the

information of the change. (2:40). Have you ever understood that when you burn yourself, how does the skin come back to be replenished. When part of the muscle on the tip of your finger gets cut off, a few weeks later it is back on, like nothing happened. ... Where does the memory come to replace it and it's exactly the same. It has a soul, a position, a strength, when you build the brick layer below the field created dictates what is going to be the brick above. The brain knows that this brick usually fits here so I'll send something to be built. We haven't understand but now we do. In the new systems we'll start showing we'll revolutionize the world of science. I'll build you a leg in a short time. You put the amputated person in and if you understand the T you can connect directly to the soul, I create the dimension that the leg will be created in no time. I brought with me in these conferences to change the humanity from the structure, from its absolute base. We give life and the freedom to life, and if the life is so horrible to be, it goes with it. (2:42). In emotional Parkinson's they usually can't accept, but physical Parkinson's always takes it. 12

(2:44). .. Q: When a human soul elevates ... ? The soul of consciousness, that's what you like to call it, but it's the soul of the awareness of the truth. It's awareness of the truth of what is there, what we are engaged entrapped with. .. (2:46). Q: Has this knowledge existed among the ancient civilizations? This knowledge exists ?? along the man today. Those who elevated have understood, have reached part of it, it's not that it's the exclusivity just now. 51
now every body does at the same time. We are not short of people understanding, we are short of the totality understanding to elevate in one go to go to the next step ...
(2:48).

(2:50).

(2:54).
(2:56).
(2:58). Q: ... What does he do or can do to elevate his father with the fortune that has come to him, because that is okay, it's in the matter state, the physical world, you explained the soul level, but can you also explain ... ? You give, you give, you see the time of praying was a cheating done by those who came to ?? man to believe in a Creator somewhere else ?? soul. One K Seekers said, can we pray for, you can pray, the time of praying is finished because you know, you don't need to have a proxy, you know the soul is yours and this is papa, what is yours take if you like. Whatever you done wrong is your, I see, I had this thing recently ... how the pain of a lifetime was settled. These machines, the systems we develop will create that condition because it's the presence of being, the presence of life. A lot of people might not see it but those who it fits to them, matches them they'll see the effects, the conditions and the emotions and change. (3:00). You don't need to go, I pray for you, that way was belonging to the Church, Mosque, Synagogue, whatever else. Now you know the position who you are as a soul, a strength of your own, why don't you work direct, this is my soul take what you need, elevate yourself to sort out the others which you have done wrong to, that I don't have to carry, that I can work with a plain clean sheet. It's not the elevation, it's the understanding of.

Take from me what you need to clean up the mess that you created. It's no use going and finding who your father did wrong to and giving them some money. You sort out through the soul of the father so that he settles it, then they come to what they have. I would like you listeners in generations to come, write about the children of Red Circle (Derek Belgium) and his grandchildren and follow it to become as an example to humanity. No one will do what he has done. The suffering, the pain come close to them to know them and write about their lives. Then let us see if his soul has allowed what he has done. (3:02). Follow this family for generations and write about their suffering because the father has put things wrong and somewhere he has to put it right. What Carolina just said. They followed a bunch of people who killed one man by intention because they were given the freedom to decide, and they wrote their life story what happened to them and how and what happened to the rest of them. (3:04). The understanding and the pain that people cause for their own or for clandestine decisions or whatever, has to be returned back to. I finished with the KF I told you months ago, now I am just cleaning up for you to be that everything goes in order, that we finish our work, as we say, ??? serviced. I have set the structure and these are the last, the final things we have to put to the world leaders and then, I am done. The knowledge which we brought as a gift to humanity, it doesn't matter how they cover it or what they put on it, it is shared it's gone. Millions of people and in the future will use it, and we have passed the knowledge we love with care, with understanding that it will change the dimension of humanity. But in the process a lot of people abuse it. Let it be. (3:06). In the coming weeks when we release, the condition of batteries for cares that you don't need to charge. You have cars like Tesla which at the moment they charge you for the next 20 to 30 years to pay the electricity in advance, you can charge it everywhere free because you paid for it in advance. Now you carry 6,000 cells in the bottom of each car it, ... now with the new T you need only a few hundred and not a few thousand, and then you can go from the day the cars comes out of the factory to the day that you scrap it. It never needs to be charged, maybe some maintenance here and there. Then what happens to the oil producing countries and all the killing they are doing for oil. What do we see and how. (3:08).

(3:16).

(3:22). In time we have appointed special pictures to release to the archives when the man was shown for the first time very simple systems which will change the course of humanity in the coming years. Man doesn't need to kill when man finds the best way to elevate his soul and extend his life in physicality to thousands of years if he wishes without pain or illness. And how he can elevate the rest of humanity and ?? Thank you very much. ... (3:24).
END

296th Knowledge Seekers Workshop October 3, 2019

(Unveils the New Universal Enhancement Spaceship Unit: ,)

(:20). .. Thank you very much for all your support, what we have and are achieving is literally glorious. We are moving exactly the way we envisioned, the way we are bringing in national governments, diplomats and K Seekers together, that the time of transition starts. ....(:22).
(:24). ... We had a conference in Vienna Austria, which was a global meeting, .. it was exactly as we wanted, ..
(:26). ... We'll engage 60 to 70 nations directly with the KF ... (:28). .. 6 members of the board of KF Global were present. ...
.. Some people were not happy that why suddenly KF is going commercial. We are not a religious group, .. if we go with just the ethos we become just another religious group, if we go with the commerce it becomes just another commercialization and it goes nowhere. But now the knowledge and the commerce have been put together. Now use of the T with ethics, with understanding the need of humanity and when the man goes into space. ... (:30). In these conferences we are heading in one direction, Global explains to the diplomats the governments what we are what we are there to change and with it we show the T. In each conference there will be shown a new and revolutionary T and given into the hands of the public or to be commercialized as part of the KF structure or to Global to sell on their part. We are keeping the 2 structures totally separate and new innovations by KF will go to China. Global has nothing to do with China. ... To share knowledge with both the American company, Global, and the Chinese and at the same KF keeps its independence that the 2 nations, or structures, if they falter we don't get trapped. We allow the KF as a scientific organization to release its technologies on its own and gives operational sales and commercialization to both the Chinese side and to the American side of the KF. We sell and promote the products on 3 platforms at the same time, all owned by the KF but all operating independently for themselves. What we did in this conference, (:32). was titled the health, for what we call the betterment of the man, and we showed for the first one of the most revolutionary science that has ever been shown by KF. We showed the creation of perpetual motion, which means the heartbeat. In a prototype system we showed how we can create a heartbeat without anything attached to it, and the same as the heartbeat of the earth, same as the heartbeat of the man. We have taken this T to the limit that all the participants in the conference were allowed to sit inside (the system) except 2 of them which had a heart implant or other things attached to the heart. Until the last day of the conference they were all waiting for their 15 minutes to sit in and see, and they could explain to you how they felt. The T is set to interact with what we call the STM and the physicality. Many of them during the first test of the day some said they couldn't feel anything but a lot said they felt emotions and other things, and on the third day because the system was set too strong ... people wanted to see the heartbeat, this is what we explained for the first one, and they wanted to see so we have to dilute the power of the system so that they could see the heartbeat, and they watched how different people getting into the system changed the heartbeat, (:34). it's like falling in love, and one of the guys, sitting in the system, managed to stop the heartbeat. It means he fell in love, the system was matching. We saw as different people entered the system, we all observed the vibration of the heart. This is what we call a free floating entity, it's never been done before, it's a major breakthrough. Because on the back of this heartbeat, as it has been part of the teachings, now our scientists start developing technologies. But this heartbeat carries the essence of creation. It's not just a

heartbeat. It's literally a live, living system. The K Seekers who are here or people who have been present in the conference, we allow them to speak. Why was this system shown? Because a new T has emerged from the KF. A new Pl T what we call, you become part of the system. In the space you'll come to understand and work, and to be part of a structure, to become what we call, if you food, energy, to be able to change a condition, or you want to (:36). extract energies which you have received that are not useable to you but can cause you problems. The essence of this is that now for the first time we show one the most revolutionary systems in the world of science but this system touches the STM, elevates the STM and the physicality. It can be used for all sorts of conditions. The system is commercialized and is offered from the first of January of next year. There were doctors present in the meeting and more or less all of them placed an order to purchase or to put somewhere so other doctors can use the system. Commercially it is offered in the market, it's valued for its knowledge and to create the structure of the creation. It's structured the same as the womb of the mother. The essence, the root, the fundamental point of the creation of the man. This means that be going inside the system you become like in the womb of the mother, part of the system, (:38). and then everything changes. This is not radiation, this is total plasma T on the edge of science. We have seen the working of this in our trials in other countries in China. The effect of the man in a wheelchair in 3 days to walking without someone to drive. We have seen this with other cases. This has been used extensively for the past 20 years but for the first time it's in public. This system has been valued at 150,000 euro and Global has already received orders for delivery. We will release this in a massive way. In the space you don't need to look for food, you enter the system and it delivers what you need. This is the science on its edge, this is the science the way the universe works. This is why we set up structures to commercialize worldwide that we see the accomplishment and the completion of the science of the man. When you enter and exit the system you know you have changed, and in the space we don't medicine or food, we overcome illnesses the only way we can, in the safety of the womb of the mother, exactly the same condition. This system creates conditions that the way you were in the womb of the mother and you received all the nourishment that every cell of man created in balance and harmony. (:40). It's the replication of life, if you look at it, on earth we are in the womb of the solar system, it's protecting and nourishing us, we are another organ in the structure of its existence. The same as the child in the womb of the mother. This T is complete and we already know a number of nations which will go for it. We are keyed up to meet international demand. When you go to the hospitals instead of beds you'll see a number of these in each room. When you go to a doctor you don't need to .. everything is remotely done and the system feels what you need and it transfers and translates your needs, it doesn't matter, what ever it is, try to bring it to the point of perfection. We call it the Universal Enhancement System. It'll carry CE certification medical system 1. It is one of the most powerful systems for space T that we brought man to use. This means we have to show you how we are going to feed you when taking you to space. It's no use taking you to space without showing you how we are going to feed you and look after your health. So this has to be shown first. How you are going to be looked after had to shown first, had to be shared first. It is important, (:42). that we need to extend our work and our dimension of work is understood and conveyed in a proper way in a scientific structure that when we say we are going to space that we can support your life and

whatever you need .. a guaranteed supply of energy which converts into matter state in your body, as you eat matter and convert it to energy and then it changes to a cell of the heart or you toe, now these systems build up to that point. As I said in the conference, we build these systems step by step to the point of its maturity as a full spaceship program to be shown in Theran on 19th, 20, and 21st, 22nd of April next year. As we go through conferences we add step by step to it. This system as you see has no electric connection. In Mexico we'll show the creation of the power as is, and it can be done and how we run systems, our energy supply of the U. It means the system is totally independent. (:44). We explained in the conference the new understanding. In the following conference in Mexico we'll show for the first time, days before we go to Mexico we'll show to the major corporations around the world, the car manufacturers, a system that doesn't need any charging. Now if you buy an electric car from Americans or the Chinese, they charge you very heavily for your electric charging. You pay maybe 50 to 100,000 extra for the next 20 to 30 years you can always charge your car free anywhere. That charge is already added to the price. The additional batteries to be able to do 400 kilometers is weight on the system. With the new T which will be shown to major manufacturers prior to us leaving for Mexico, we'll release a T that charges the battery forever. This is what will be shown in Mexico. In Brazil we'll show the collaboration and cooperation of the two, energy and medical application that it becomes the system you see that it is getting delivered to the scientist. One of the problems most of you have running these energy systems or whatever is that you are always dependent and connected to the earth's energy supply. Energy of the earth or what we call electric power has a say, even if it's a battery. The way the energy is created in these systems is the same way as the earth creates these massive energies for creation of life. (:46). We are here to change the course and we have shown for the first time the first part. This system is, if you are a medical doctor or sports doctor this system will change everything that you do with your clients. We'll explain more. But there is a proviso in this system, we sell it at 150,000, but it is locked, computerized, it will be totally controlled that every patient using it, what fee they pay to the hospital, to the doctor, the KF and the Global will take part of that. We are not selling units anymore and this is why we literally, we let those people who are selling Eye patches, small pens, that market we support you, we'll explain very soon how we will, but now we have gone into large scale life changing situations for the whole of medical, health, energy and food. This means that when we create large scale of this in the coming months, in a disaster area you just put one down and people with all sorts of problems, food, lack of whatever, infection, and preprogrammed you walk in and out, you don't need a doctor present. .. A small unit can be hand delivered and then utilized. (:48). We are here to change the course and you see here the beauty of what is on the screen. It's so powerful if you understand. Do you need to go to the corner shop when you have no money and your child is suffering from hunger, you have no money to pay for medicine, one of the charities with the presence of a doctor can put these anywhere. Medicine free. At the same time, those who do (have money) can have it and pay for it. But in all cases the KF supports and shares its T between the 2 arms of Global and Chinese operation and the KF itself will look after the growth of this T. You don't need anything else when you have everything under one roof. This is the spin-off of the KF T development. Let me tell you something very simple, this T has been with me since the age of 12. Now you can see how patient I am. This is the time to do and in the coming future part of the space T. It

will be shown in Iran with its full glory. We have invited the American government to join us in our structure in AZ to develop the space program in conjunction with Iranian scientists and American in what we call, the structure to be developed in the coming months in AZ. We have to control this unit, we already have a Chinese agreement on how many we can produce and meet the demands. (:50).

(:54). .. In China the swine flu tests have confirmed again positive results.
self charging batteries for cell phones will be released in Mexico conference.
(:56).
(:58). .. About commissions for selling these units. You also get a percentage of patient fee. ... We are here to bring the whole KF family wealthy knowledgeable organization.
(1:00).

(1:02).
(1:04). As I told you from the time we go into Markray we bring the ray of light. We mark our ray with what we deliver. These are beautiful structures and what we as a human race have been wishing for. ...

... This T is unknown, there is no one on this planet who understands this T, even if you open it up you can't copy it. I have done that deliberately until we get the whole structure understood, the working of it for space development. (1:06). It is elegant, and as we say, did the egg come first or the chicken. This is the womb, the beginning of life and very much like an egg. I wonder who was the chicken, and what chicken comes out and goes in it. What we come out of it with. Do we find peace, tranquility, the essence of creation, and then our soul chooses the direction and dimension of physical existence and manifestation. You will be able to sit in the first unit of these, we promote all the doctors who purchased these units, their position. The first one goes near New Zealand, second one in Germany, and one will go to United Kingdom. These are the people who have shown interest and placed orders for the first units. ...
(1:08). We'll release more and more stations as they become available. We already have large orders on backup in China that we can transfer to our systems. .. It's here and now and can be used with men of science ...
.. As if brings peace and change, we start getting ready for our final destiny, being able to travel the space of the U with the systems, which ever you decide to choose to have. ...
(1:10). .. Hopefully in Mexico we'll add the energy systems, rechargeable energy for automotive and anything you have laptop .... In Morocco we'll show totally a new dimension. In Malta another evolutionary science delivery of T. All this needed to be done. In different conferences we'll show how to produce materials, (1:12). and food in the visual sense of the man, if you want to see a chicken meat, it will be a chicken meat.
10

(1:14).

(1:18). It's been a long to get to this and now we deliver it. Once we get the Global set up we'll see unseen technologies that will change the course of humanity. This is the

beginning. We can't take you back to the womb of your mother to correct things the way you were born, but we can create the conditions of the mother's womb of comfort, and energies within these system that ?? the beginning to the start, and in so many ways a fresh life, a fresh beginning. ... It's the beginning of a bright time for humanity and I said, when I start I bring the knowledge of the U. Now you see the universal systems, a copy of how the U creates life, be it in the womb of the mother, be it in the womb of the solar system as earth, and the rest of it. Thank you very much, and I hope those of you who understand the gravity of this new release understand we are here to change the game in a very big way. We have seen it and this is the beginning of it. I am sure it will be evolving into new dimensions and through the same systems, if you understand it, in the coming time we can produce materials. (1:20). You create materials in a closed environment like earth and when you open it, what you need will be there. This is what we promised. This T will be shown in Malta or most probably as part of our East Asia conferences. Any questions. R- It's the most beautiful egg ever created by mankind. K- It's the egg which cracks itself, you don't need to crack it. I think you got excited and fell off the chair. R- Is the chicken the part that flies that attaches to this? We don't know yet. We have to see how the chicken comes out, with or without feathers, or do they cut the wings off the chicken as some of us might understand. (1:22). Q: Will there be any training to sell the products? Yes we will train the doctors and the people who use it. We did that in China, it takes 1 day, you don't need much training because the backup comes in the process of using it. We train ... because when you have a guy coming to you in a wheelchair and the next day he comes walking in on his own. It gives a lot of shock to the doctors, they never seen this before. We have videos of this ...

(1:24). training for salesman? Yes, there will be ...
.. R- Does the system have a name yet? (1:26). Yes, of course ... It's called, Universal Gans Enhancement Plasma Spaceship Unit, or ... Universal Enhancement System. If you want we can show you the next system. but where the chair is, is something else. .. This one is to produce materials .. (1:28). .. a feeding station, it delivers food energy ... We have considered a bed version ... (1:30).

.. (1:32). Q: Do these systems work for any entity that has hemoglobin blood? ... Why do you think they are any different then you? Q: No that's my whole point, I consider every creature my equal. My question is .. K- If you manifest yourself in the dimension of this planet you carry all the facets of this planet. Any other question. (1:34). Q: Dan, I have a facebook page ... K- I don't understand what you are saying? ...
(1:36). ..,. some people use public teachings to promote their own products. ..
(1:38).
(1:40). .. Any other question.

(1:44).
(1:46). .. Q: What material is it made of?
(1:48). You can see all kinds of interesting things incorporated into that structure. Q: Can it be overloaded or over heated? No, there is no power supply in there to overheat, no possibility for fire. All the systems comply with the European regulations, it has fire detector, AC, compliance with regulations. R- Sounds like it could be handy for going to

space as well. K- Ah, that's in the future, you don't know how to set it. R- this could be the first flying egg instead of frying egg. Q: Is this the new system that has the soul added to it during construction? Very much, yes, 100%. (1:50). Q: I can't get my head around KF company structure, will it go through Markray, do I have to be a medical doctor to set up a facility that provides the services? You can buy the material from Markray, or KF, or Chinese organization of the KF partners. You don't need to be a medical person to buy but you can setup a company for doctors to use it. You own the facility but it has to be under the supervision and work by the doctors. Q: Are these first units capable to reproduce lost limbs or organs? No, that is the different system. Q: How soon can we begin to use these devices? The first systems will be delivered in January. (1:52). .. for back injuries? It depends , need in conjunction with another system.
(1:54).
(1:56).
(1:58). Each company takes according to what they sell. Q: I am late to the party. My mother just got diagnosed with liver cancer is there a device we could purchase quickly to add with her healing? Talk to the KF doctors. Health@KFSSI.org to the doctors. ... (2:00). Q: Can more than one soul enter at a time? No, not with this system. There will be systems in the future yes, where you can have a number of people in the room and they all can go through the same. R- A group healing, that should be interesting. Q: Can they be used for veterinary care? Yes, we are already testing a version of it in China, bigger size and scale. Q: Will there be a less expensive version eventually? I don't see that for the time being. There is an optimum size, which is this. (2:02). Q: How long will it take to train doctors with this unit? It takes about a day to train doctors. Q: Can it be used for homeless people? It depends what the doctor wants to do or the people who buy it, what use they want to put it to. Q: Would it be designed for someone to stay a long period of time, or maybe, like to actually sort of live in? Maybe, if it's a point you want to do. There would be everything in it, would it. R- Like a monk going to his cave, you'd just stay in your egg. Yeah. Q; Will there be a blueprint for this? Nope, we blue and printed ourselves, last time we did, was very interesting with that blueprint. (2:04). Q; For those who have entered to the system will they be connected by experiencing what they had gone through? (repeat) I don't think so. Q: Do people have to sign the Peace Treaty before being processed? This is part of our contract with the people who purchase, yes. We already have in China. R- What about the actual patients? Yes with the patients. Q: how long a time would a person stay in the egg? Round about half and hour is the maximum. Two or three times a day. R- that may go on for days? Until the physician decides they have reached the point. Because you are reconstructing what has been done, you just don't put everything in, so you go through the reverse process. R- You need time for the balancing? Yes. (2:06).

(2:12). you can buy with Keshe Coin ...
(2:14). Today is a good day for us to introduce the new T in ?? way ... A ray of the sun becomes an apple for us to eat ...

(2:16). Rick reads "Universal Enhancement Spaceship Unit, ...

(2:20). ... KFGlobal.org ?? (2:22).

(2:24). Q: How many types of plasma does it have inside? Not just plasma is has whatever the man needs inside. It's one of the most complicated complete systems. If you remember we protested part of this system in the Chinese space reactors. ...
.. they don't follow the present law of physics, this T is unknown to man. (2:26). Pia says, congratulations and thank you for your achievements. ..
(2:28).
(2:30).

(2:34). new T for automotive industry ...

.. Q: You said before that the oil industry is prepared ??? (2:38).

(2:44). in the structure of the huge work of the ?? You'll see how I will change everything in the coming weeks and months. Let them create all the cash flows and everything else, we know where the flow sits. As I said, all the doctors who were in the conference all placed an order because they sat in the system and they know the difference, they what is coming. And now we'll see. If we sell 1,000 systems it's 150 million Euros, nearly 250 million dollars. That will allow us to build the factories. We haven't gone into the market to borrow. We came to the market to say we are here. We make the change, they can do whatever they like. Shares are irrelevant to me, it was to get to know. If you see this has been my patent. I took my patent to the European Patent and it became a free agent for me to tell everybody about my T. Most of you are here because of ... those patents we released. It's a repetition of the same. **I use and I let the people around me to think I don't understand, but I use the given structures in a larger scale to achieve the goal of the KF. I am not interested, we'll never sell a single share from Markray, we came to announce to the world, the shares are there, and now they see evolution T, but no shares coming into the market**. The shares of Markray will be in thousands of dollars but there are no more shares coming in. Those of you who hold it, hold it preciously because that's all it is. (2:46). When I sell to all the car companies, cars that don't charge for $1,000/car, you think I need to sell shares. Your shares. The KF own Markray, I am a caretaker. Now you understand how we play the game. Over 600,000 organizations, companies financiers, suddenly got to know about Markray, Keshe Foundation. Do you know how much advertising it would take to get these people to where we are. Our team ever week will put new inventions, new achievements. you understand where we are coming from. Any other question or shall we celebrate today, we are nearly 12 o'clock. Q: Whether the equipment will be promoted at international medical fairs or trade shows etc..? Interesting enough one of the diplomats has invited us to a very large conference in November. We the governments will take you, when they do they'll protect you. We don't need to go to medical fairs, doctors buy, (2:48).

.. As you know my children are all PhD's in pharmaceutical and this kind of industry and they say 3% of all the medicines coming for trials ever goes to be delivered, and even those delivered we don't tell people about 80% of the side effects because we can't loose ay more. (2:52). It's a straight forward natural process, if you find any chemical in it I

would like to know. Then we deliver, we bring the change. This is the beginning. Today is really a blueprint for the whole of pharmaceutical and medical. Then you'll see the next one, energy. I came to bring the change and I'll deliver it. No king, no president, no government can stand my ?? Q: Can we say it's the beginning of good morning? It's a very, very good morning. ... Q: In going beyond, in theory if a large unit could be formulated or perhaps used in satellites, could the same principle be used in elevating the soul of the planet? We are already working with Huawei on that level, that's why we chose Huawei, you are just about a few months behind. ... they Internet, mobile production system they are into mass business. (2:54). As you know China will launch some 100 of small satellites in the coming months for different application, we'll become part of that structure. 12

(2:58). Markray (means) we want to mark the ray, we bring the ray of the sun, of hope, the rays of the fields of the U back to man, and that is all we are here for. (3:00).

(3:03).
END

297th Knowledge Seekers Workshop October 10, 2019

(Continues with Spaceship Enhancement Unit to process diseases physically and emotionally, Arizona state government agrees to help establish Industrial Zone but not in writing, Price will rise to 1 million dollars, Contractual agreements with the Units 30% to KF, The self-charging car battery knowledge will be given to major car manufacturers around the world, Discusses how Knowledge Seekers can band together and buy a Unit for their city, This system set correctly can fly and produce materials and we'll show one integrated system in Theran, You have to drink water that you get the right amount of energy to keep the cells of the body in the right replication and motion, ,)

(:17).
... The Mexico KF has asked to delay Mexican conference until Feb when the new government of Mexico comes into power .. (:20).
.. Conference in Brazil 7 thru 9th Nov
(:22). ... Government of State of Arizona has accepted to help KF build industrial zone .. ... up to now neither side has refused cooperation ...

(:26).

(:30). Rick plays video of new systems.
.. office@at.kfm.global, for more info. . shown second time for government officials .. (:34). (:36). .. The first of January the price will rise to 500,000 Euros and for 3 months we'll hold this price .... The first of March to 1 million Euro per unit. This intro price will hold for 2 months. .. (:38). These units carry a contractual agreement ... KF will receive

30% from any processing paid by the patients. It's fully automatic, computerized and the doctors will control it remote and it is a CE standard of certification class 1. 40
... different diseases need different attachments .. (:40). In the very near future, 12 months we can tailor make the system to fit the disease and the man. ... It's both emotional and physical. .. Later on this month the power system for charging automotive will be released to major car manufacturers around the world, which mean branded names around the world will get the T at the same time. This is the way we operate. Many car manufacturers trying to go into electric cars will receive this knowledge under contractual agreement, demonstration of the work into the KF process. (:42). The generation of self-generating energy to run this unit, the health of the battery will be looked after by the new T. The Enhancement Spaceship Unit will have no power supply from outside. ...
(:44).
(talks about becoming an agent with the new systems ...)
(:50). You find a place, doctor and whatever to use the system to help your city ..
(:52).
(:54). ... For us it is how to quickly get the T into use and for us this is the only way it can be done. Once you set up a center it will be announced at the KF ..
(:56).

(1:00). This man came to us with Parkinson's for 10 years. R- play video. Day 1, this is how he came and used the system. (1:06).

(1:08). Both patients now are in the process of reduction by the supervision of the doctors, they have reached 25 % reduction next week and the other one the following week and within 2 to 4 months with supervision of the doctors, zero medications. It's not that the conditions come back because with this T the root of the problems are solved. The main emotional and physical. This system is not answerable and may not be the solution to all, at least not for the time being as the scientists gather more information and as we develop it for different application. **This system set in the correct condition can fly**. We'll show this as one system integrated in Theran. This system will **produce materials**, and will be able to deliver water and everything else the man needs. Do not forget in the term of man when you need water **you have to drink that you ??? to get the right amount of energy to keep the cells of the body in the right replication and motion**. This T delivers the component energy of the water to the body of the man and in the body it transforms into water, to what is needed. It's so advanced that very soon we'll see many world leaders trying it. as we know we see atrocities starting yesterday by the state of Turkey, (1:10). against people. But you'll see one of the first people in this machine will be the leaders of Turkey that have different failures and cancers. It'll stop a lot of problems and I hope giving extent of life to these people we bring peace to them not problems. We have seen, those who have been present in the Conference in Vienna have published across the Internet that this system will be offered to German Chancellor for what we have seen her shaking in public, part of the Parkinson's. ...
.. animals can use it ... (1:12). .. When the system doesn't work properly it means we haven't understood the body, we have to understand the work of the body of the man that

we can tune it to it so that the system can overcome the problem. I see this system being used for fractures and breaking of the bones. Repairing bones in hours. ...
(1:14).

Talking about the new system and results ...

(1:20).

(1:24). .. Collaborate with us we release more knowledge, try to obstruct us and we'll handle you with ruthless hand, don't forget I know how this T works. It has to become the tool of peace, that man gains confidence and elevates his soul and elevates himself to a new level of understanding and serving. In the coming time we'll create this environment that you can see the creatures of God in the U. This system is not made for man only. People who went through the simpler version of human dimension in Vienna are already sending us reports back, since going in that machine they came out a different man. happy people, it changed a lot of things in their life. People who had pain don't have it anymore. I can put a blind man in this machine and he'll come out seeing. (1:26).

... The time of teaching is over, I have taught you everything. Now you know when you are in the university, you go to the theoretical class in the morning and in the afternoon is the lab or practical. .. (1:28). .. Keshe Coins. ...

(1:30). ... Any Questions. Q: Miguel talks about Mexico (hard to understand) ...
(1:32). ... (1:34). He will meet with the Senate ...
(1:36). ... K- I have a lot of comments. You have taken charge for your nation and that's all we want to do. Q: I am a simple man and I don't have any position. I follow my heart and I want to serve you. K- You serve your nation, we are not making any prophets or leaders. This is how you take leadership. People like you ?? the T, (1:38). as a friend of mine says, who cares about FDA when I was told I couldn't walk and now I can walk.

(1:40).

(1:42).
(1:44).
... Q: I am going to go to the company that is using the MaGrav... K- Is it the one that is saving 40%? It's increasing, they are saving in the third month ....
(1:50). .. Q: Is this system good for mental illness, depression and anxiety? Yes. ... You go into this system and you come out the way you used to be, without any diseases. ..
(1:52). .. It takes time, the brain cells have to be set, the brain has to restructure itself that it can hold on it. We are not here to show, we are here to make the change. It does work for depression and the process is very easy, it doesn't need more then .. it's just that you have to put the emotion right to elevate the soul. ... (1:54). Q: Can you give us the dimensions of the system? We have made sure it's just under 5 meters, 745 that it can fit into a portable 20 foot container, the height is about 2 meters and width about 1.2 meters. It sits on a special plate that creates separation of the fields. So it's an independent unit. It

weighs about a ton and will come in a few pieces. It's all connected, but it doesn't have motors or that kind of thing. It's a copy of the work of the U. It has to be set up and it will come with a manual and somebody to come and teach 1 day. Q: What's the minimum age? There is no age limit. Animals and humans it's the same. Q: What can be done for people with implants in their body? There is a problem with the implants depending on what and how it is. (1:56). Stems for the heart, you can't use this system. We can isolate it if you have a cancer that it doesn't touch it, but it can be dangerous and it has to be under supervision of the doctors. Any other implant you have to see how it behaves in plasma. R- What about for example fillings and teeth? No problem. ??? You get a new radio station .. R- Outer space tunes of the century. What about people with titanium braces in their back and things like that? We do not allow it. The reason is we have seen this in operation, what happened when you have titanium that fuses 2 or 3 of your spine disks together, is because disks have been damaged and have been removed. The beauty with this T is if you don't have those titanium disks or can remove them, the disks will grow back, doesn't matter if it has been crushed out. In a few months the disks grows, and if they have pinned it, it starts fracturing where the pin is in the bone so you shatter the bone. R- that makes sense because I went through disks and a lot of pain in my early life but it did eventually repair itself through some intervention of my own. (1:58). .. I decided to heal myself and it worked. Q: What about pacemakers or electronic devices? The physicians have to decide .. whether we can switch it off and test it and allow it to grow. It can be done but physicians have to try. On the other hand because this is a field motion would the system absorb enough energy that it can damage the tissues of the ?? inside the body. These are the things as we go along, but we have developed a T that can isolate these parts that the field doesn't interfere. We can extract the fields from certain areas part of the body. If it's there to do a function how can we isolate it, this is the biggest problem. Q: Will people on electronic or artificial breathing systems be able to get into this new system without the fields effecting the machines? It can be organized we have to see how it is fitted, the way it does the operation. (2:00).

.. Q: You mentioned about targeted therapy, targeting certain organs and so on. I wanted to clarify for our audience, in spite of you being a nuclear engineer, (2:04). You didn't mean radiation therapy? No, no, it's just bringing the fields to the body. With this T there is no radiation. There is no need for it. When you have an active cell, which a neutron, which is too active and can't match with anything, it wants to release its fields to find itself, to change itself to an atom of H, which is an electron and a proton, so it radiates as much as it can at a time to be able to go back to stability and it produces what we call radiation. If you create an environment that everything is in peace then nothing is created as radiation. Q: ... Lorenz thought that this T might be partly based on the K converting to Ca, the K40 and emitting the gamma which is makes for transmutation inside of our bodies...? We already have taught this in the teachings, so he says that he understood, that's good. But in the medical teachings we always taught that the job of Thalamus and Thymus is synchronizing and changing matters to what is needed. (2:06). Mainly it's done by Ca K conversion because the man who lives in the North Pole, Eskimos, or people who live on a mono-food. Whatever they eat they digest, they absorb Ca. Whatever you eat, if you eat meat it has Ca in it, it has a center of Ca in it. Talking about the flesh, but it is the same with vegetation but it has a different composition. So the Ca

in your immune system has a Ca seed, your skin, every cell has a Ca seed, so the body, the connection fields which the Thalamus and Thymus organizes what the brain and body needs and then they convert the Ca into what additional energy to K which is K40, which is radioactive to break the cells off the meat which you actually eat, what you ate. We take B6, B12, B9 and many other B's, these are all radioactive material to do the function of what the Ca does in Converting to K40. Years ago when I said look at that Coke bottles I could produce grapheme because in my systems, into the NaOH I added additional K, (2:08). to create a condition of higher order fields conversion. Because K has that K factor to release heavy energies very rapidly in conversion to K40. R- when you are looking at the actual energy levels of the gamma rays they're at the high end of the so called electromagnetic spectrum way beyond radio, infrared and even all the ultraviolet. K- That's just the beginning of the rays when you go to the cosmos, that becomes like an Alpha ray what is Gamma ray to us here. R- So when you are talking about this unit there is no external radiation being directed, it will somehow effect those internal processes at the cellular level at the Ca K interaction? Of course if the body is made of it you have to interact with it. R- So does that get inspired by the interaction with our soul or is it something that is stimulated through the machinery the device itself? K- Are going to go back to teaching. R- I am trying to get some teachings here.
(Teaching)
(2:10). In the body you have the nerve system and then the blood. One carries the field strength of the emotion, the nerve carries the strength of the physical creation. And these two, you know you have the double glue system (epoxy) they don't work until you put them together. At a position, length and whatever of the body, these two at the right energy and right field strength, with the presence of lymph, convert lymph into matter state of itself. That is how it works. That is why when you have a problem with your mother and you don't want to breast feed, you change this (blood), so the solidification of the matter at that point changes and you get cancer. This is say, 2 Pico Amp, (2:12). now with a change of emotion at this point you make to 1.9 10 to the -5 mega Amp, then that creates a change of material, the salt in this environment now behaves in a different way, this solidifies. It's very much like if you have a steam in the room you don't see it until it touches the coldness of the window and then it manifests itself as water or moisture. Here the manifestation of the matter is salt, but in the current flow from the emotion and the brain. In any of these two (blood and never) balance of potential changes you get a different material. This is even how your ?? dares or different parts of your kidneys ?? ?? ?? salt solution, when salinity changes with potential difference between the two lines of 04

(2:18).
(2:20).

(2:26). .. I told you nobody has understood MaGrav and the Nano T that I brought in. You harness energy which is outside the N material. The N material is like a tube, we got used to having a tube to follow energies, like water or whatever through it, yeah? With the N material you do what's in the space, not what you want to push or absorb from it.

It's the field interaction, you create the channel, you create the pipe. It's 180 degrees opposite to what you are talking about. We absorb energy in it, but it doesn't do what you are saying as a function. That's why I told you that a lot of people have not understood the work of N materials, and the true work of N materials. We are not creating something to go inside, we are creating separation zone from outside on the M field level. You are looking at what's inside, I look at what I hold outside, by the fields that they created. This N layer creates a field with a channel that let's me put what I want through it, not what you think is going to be absorbed here. (2:28). This is so huge ( ) that like you said it needs a lot of energy, and to see what it emits, but if you know how to get it through, you never see the energy there. Q: I am talking about the layers on top of the materials, the radiation ?? the N layers once they start ?? emitting fields you have the fields which you are working with. K- No, .. yes, but it doesn't work that way. The fields are containers, they are not creators or releasers of energy, they are holders, this is the problem, when you use. they are not the source, those fields are not the gamma ray ... all the fields above a N layer are cosmic rays. Now you learned something new. All the fields ... you touch any N material, all that fields above it is cosmic ray. Above (the) cosmic ray we know. Q; You explained that the Deuterium is the converter of universal fields to what we consider the matter state, this is why we have been talking about these N layers so much in the Plasma Group, because you have been pointing us into the direction of ?? higher level lights. K- yeah, higher level lights, you just don't have a Deuterium on top of the Cu layer, when you have a N Cu. Do you understand? Deuterium, when we talked, Deuterium as an energy pack not D as a matter state. Q: yes the difference between C14 and C 12 as explained (2:30). in the June Plasma Times. K- Yeah, but the cosmic rays we talk about have nothing to do with other floaters of the packages on it. You can float a C14 in these field layers just above the N layers. It's the way your blood system works, that's why your blood doesn't stick to your veins. 36

(2:38). .. I want to open your horizons. ...

(2:42).

(2:46).
(2:48). ... Any other question. Q: Is this new system like ??? the dynamic system introduced by Dr. Klaus? Yes, in essence yes, but in origin everything is the same. The original dynamic systems were introduced years ago and Armand developed a version of it for the space. All these dynamic plastic balls that you see is the brain child of Armand. He produced it and taught it to Jan Yin, Armand has understood a lot but he can't put it together. I am the worse teacher, I watch, otherwise it becomes a copycat. (2:50). The process ... I could have shown this what you see now, 10 years ago. I used it 20 years ago, 2000, when I bought the first centrifuge in Manchester, to ..

(2:52). it was all beep, beep, Alpha and Beta ray, but we couldn't measure what position because we wanted the material, but we couldn't have it, so I created my own radioactive material. The same as now I can create cosmic radiation, above cosmic which man has no knowledge of. The inter-galaxy fields, or inter-universal fields are beyond all these

cosmic rays. You still have to learn that. Q: But you were saying that as long as we were working on frequencies we are still in the matter state, the field of the U is one field and it works instantaneously everywhere, so how, this is what you said we haven't understood is how to switch from the frequency mindset to the universal mindset, the one mindset in which the U is the common denominator? K- It's very easy to do it, we do it. The first time I showed it to somebody I think they were shocked, but if you understand the process you can get the cosmic and matter fields at the same time. Understanding the knowledge from the same fields we can get a AC and DC, from the same wire. If you get an AC in the matter state, you get DC from Nano layer, (2:54). but at the moment we don't produce, we don't have system so thin that it can go between the layers of N, that it can give us that current. 08

(3:00).

(3:04).

(3:08). Q: If the beautiful people were created in the womb of the mother with more then one soul and one physicality, and one had 9 souls, and you said the Enhancement Unit only 1 soul at a time.. would the beautiful people benefit from a future system ... ? K- How can you benefit a healthy man. It's us who is sick. I wrote this to the team of Chinese doctors whom I am advising. They were considering to accept a patient who was given 4 or 5 medicine for schizophrenia, and I explained, what is a schizophrenia. None of the doctors ever made a comment because now they had to accept a new level. Most probably they give these to their own patients, the brain and physiological doctors in this thing. Have they accepted it or do they have to say the book they read is not what it reads here. (3:10). Q: You have to put them into the machine for them to change their mind? K- Do you want me to bring 9 men out from 1 man. Q: No I am talking about the doctors. K- We have a lot to say about doctors.

(3:12).
.. As you know most of the world leaders are sick physical or psychological. ..
(3:14).
... our goal is make life for man a better day for the STM. (3:16). ... If you want to see the real magic go and get your visa's for Iran, we will show ??? that's my gift to my nation. Try to understand and if you can support the spread of this new system. Support and spread it. Either way it will come to help the others, and mankind accepts when it comes to health. We'll try to hold it in that level. .. Those who were looking for a guru at the KF, had to move on, as we all teach and learn at the same time. ?? see us at the same level of light, understanding and knowledge. We'll expand it. I think this new system will open all the doors and channels in the world for all of us. Not just the salvation of the physicality but the STM. I promise you we'll put a camera, we'll see at night when there is nobody in the hospital, the world leaders and presidents with their diseases and their families will go to where this thing is to get in to see if it works. I have a very bad news, if your fingerprint and iris doesn't match with our databank it will not switch on. (3:18).

Thank you very much for today. In Mexico and Brazil we dropped the registration fee to what is locally acceptable, it's $600 and not $1,500 as it was in Austria. We price according of the local environment we go to. Try to take this to the governments. .. Most probably see you in Brazil.
(3:20). plays video
END

298th Knowledge Seekers Workshop - Thursday, October 17, 2019

(Again Spaceship Enhancement Unit, Knowledge Seekers to buy collectively and then be a shareholder to create centers for KF, UFO will be shown in Theran and 2020 massive release of the technology, ,)

English Transcription:

(:07). What we showed last week has had a lot of responses ...
.. Iranians have become interested and will move some factories to Iran. ..
(:10). ... our proposal sits in the Whitheouse waiting for the final decision by Excellency President Trump to give the green light that both sides can start the shape of the space T together. I always work on the highest levels of the government ....
... in 2 weeks we are in Brazil. ..
(:12).

(:16).
.. Plays video of Universal Body Enhancement Spaceship Unit... (:20). then Parkinson's and Alzheimer's video. .. (:32). Mr. K talks about case .. (:34).
K Seekers can collectively buy a unit and then create a KF Center for others and you'll get revenue from it .. (:40). .. KF China to organize for trials with Units ....

.. We can meet up to 100 systems per month from January on. We can structure it that from March onwards more machines can be delivered. It has to be collective. If you are in a country that you don't have access (:46). or the finances .... We are One Nation .. These systems will become feeding stations, this is a space T and ?? limits where you can sit in the machine and receive the energies which you need for daily use, as food, as energy to live. These machines on delivery by the first Generation and maybe by the 2nd, will be self-powered, which means they do not need any power supply. we can drop it anywhere and it will supply itself. With this effect, KF makes the following announcement, the KF has brought the system of wireless T energy transfer into operation. I have received the clearance in the past few minutes to make the following announcement. KF will release self-charging systems in the coming days to company Huawei in China for their evaluation. This means we come to finishing the agreements with Huawei, mobile phones do not need charging. Charging phones has become something of the past history. (:48).

(:50).

(:54).
(:56).
... Those of you who have **dreamed to see UFO's in the hands of public, we'll show it to you in Theran**. The thing is how can we show something that flies if we can't show what is in it, that's why start releasing the T, as is tradition with the KF, back to front. These are the machines once we open the space T that you'll see. These are the machines which you'll be fed, you'll come over the plasma fields of the U which might touch you. ...
(:58). ... Industrial version for production of materials. ..
(1:00).
... allows release of MaGrav Unit...
Video of industrial Unit..
(1:02). The change is here. **2020 will be massive release of T**. .
(1:04). ... This T can change the DNA, reset the DNA for any defects ..
(1:06). ... These systems will have a heartbeat of a human being. Those of you who were in Vienna have seen it. .. (testimonials) I just sat in the machine for 30 minutes since then no more neck and shoulder pain .. positive change in emotions. ..
(1:08). .. The Germans have already offered this T to the Chancellor of Germany for help. .. In the coming weeks you'll see the addresses of where you can go in Europe. .. Those with pacemakers and .. (1:10). rings in the stomach can't use this machine, it can cause attachment of material to the flesh and can be dangerous. At this moment in time we have this limitation. ... At least 2 years away ..

(1:12). .. With this T there is no need for tools of war .. if we had access to 10% of the American military budget of 930 billion dollars, which would be 93 billion, every major city would have a factory and industrial zone which will have this T. We have chosen the path of killing rather then the path of living. .. Those who go into it will change the state of the emotion of man, to elevate it. As you know one of the most greedy man in the world, Edison tried to prove that one of the most beautiful scientist of our time, Tesla to be wrong, by developing the AC he created the electric chair to prove that this can kill. And he killed an elephant, he made a machine to kill. It's used for execution in the US.
(1:14). I am following the structure of Tesla by using the T for the benefit of mankind. We will not see prisoners. By use of this T we can elevate the soul understanding of the man that we do not need to imprison the man in a cage, in his brain, and in a room, but by putting him in this machine we elevate his soul that we don't need any more prisons. ...

(1:18). new batteries for cars..

(1:20). .. The Chinese K Seekers have asked to buy a system for their families. Understand that your family is the human race. You are not born on your own in that place and have that ??

(1:22). Invest in your society and your society will invest in your freedom. Any questions. Q: Damages done to DNA by GMO, or dioxins or nuclear radiation can they be reversed? Yes, these can be discussed and they all can be done. We consider the

radiation as part of the cosmic rays. (1:24) . .. Q: Japanese man detected 90 times higher radiation at one station in Tokyo ..

(1:26). .. ? We know in China the radiation has traveled the whole nation. You have to understand lot of people in Japan travel from high radiation areas, they live or work in areas, travel and carry things with themselves, unknowingly contaminated. The process is even if it produced by lasers or what they call photo energetic systems, these all can be changed, they can be absorbed and made harmless. The position with Japan is very critical because by not releasing the data and the facts Japanese government has managed to stop the talk about how further the contamination has moved around. What is local contamination in Fukoshima and the reactors they brought it under control, but you have to understand it blew up, it spread throughout the whole country. (1:28). .. The Fukoshima situation will not resolve for the next 200 years in Japan, because every gram of radioactive material blown up in the reactor is not accounted for, we don't even know where they are.
..
(1:30).
.. These were already in the patent ...

.. we brought it years ago, (1:36). now we have to show it to you that it is here. Try to understand the principle behind the creation then you'll unravel the mystery of my patents and my books. Try to look at the human eye and the knowledge of the present time everything impossible and magic. It's not my problem if you believed in Father Christmas for the past 200 years and used the earth ??? and everything else. This T is real and works in the space and as I have seen very recently Americans running away from it very fast in their boats. It pushes peace and to show there is no need to kill. We will install these machines in the prisons of today and in the 3 to 5 years many prisons will be shut down. KF will make gifts to prisons around the world, or you can do with the help, give it to the prisons and let them come out. No addiction for life, no criminality, secondly why should we lock a man when we can free his soul, elevate his soul to be free that they can use that elevation of the emotion to put their life, physical life in a good use. (1:38). If I tell you what you can do with this T, you lot will sell your homes, cars to make sure these systems are everywhere that man will not do, the damage and the crimes they commit and so proud. As I said**, my job is done, I just have to show a few more pieces, show you your flying machine next April in the beautiful city of Theran where I was born, and then my mission is over. Then you as the human race has to decide how and where and the way you want to set the path for the humanity in the space**. Any other question. Q: They're asking again, because the first machine shown in Austria was connected, will it be an independent power supply? (1:40). K- The first generation is already running in China and a couple places in Europe. The first generation has already opened up. The second generation or what is coming up as a total structure, which is totally different, we'll try not to use any power, but we can produce enough power to run it, that should not be a problem. You see none of you understood when I gave you the gift of the MaGrav.

(1:42).

... talks about products available in China and a new web store of plasma like Alibaba...
(1:48). .. Q: FDA in US ..
(1:50).

(1:54).

(2:00). ... Q: John from AZ. What is the VAT and Shipping? $5,000 VAT. ..
(2:04).
(2:06). .. No more then 30 minutes in the machine twice a day. This is not repairing the body, it puts everything right and the body repairs itself ..
(2:08).
.. Q: Has Trump been told and is he receptive? The American administration, as we speak are live on line with us. .
(2:10).
(2:12).

(2:16).

(2:20). (2:22). ..confusion Dan .. (2:24).
.. Q: If KF wants to spread this to the human race quickly then why do you increase the price from 150K to 1 million? If we give it to major health cooperation's they'll sell it to you for 3 to $5 million. ..

(2:26).
(2:30).
.. Q: Cerebral Palsy? It depends ...
(2:34).
.. In the US if you have a breast cancer, with insurance, it costs 2.5 million dollars for 5 to 7 year extension. ... Q: Is regeneration the same as reconstruction? K- No, regeneration is usually done in the brain cells, and reconnection and it's very effect and it works with these T.
(2:36). ... Q: What's the difference between a Gans and a photon? Big difference, it's an energy pack. Q: (unclear sound) .. Does the machine help with the focusing of the patient's intention? Yes, when you elevate the emotion and it finds peace with itself with its creator which is its soul, then yes the intention changes too. I have seen amazing strange things with patients...
(2:38). ... I set this system especially for handling the emotions in the first phase (of recovery) because the brain, now (says) I can walk, I can write, i can make a change in my life. ...
(2:40). .. We give the man his dignity back and allow him to choose for the separation of the physicality. And it's the same we provide the facilities, knowledge and T. You have to be able to understand the gravity of these things, little changes, a man can feed himself, you see him playing with a ball on the chair. ...
(2:42). .. We'll have huge opposition from pharmaceuticals ... In the space I can deliver you from your pain, your headache, like an aspirin as much as you like. If any of the pharmaceuticals can deliver cancer process on Mars in the coming time on demand, we

would like to go. Plus the new diseases. We have to develop a new way of thinking about ?? Pharma and how it suits all of us. (2:44). Q: john's friend with Cerebral Palsy ..? I am not a doctor you have get the doctors. ... In **the next few weeks, as I said we came from the teachings into the soul, now in the next few weeks, because we are having to bring this into public in the right way the new technologies that are going to be delivered and then we go back into new teachings for space, we'll start teaching a part of it we need to understand that this T has to come in that mankind reaches a new level of understanding of the strength of knowledge that he knows but is not aware of**, and that becomes the knowledge of space. We see for example, we can handle a lot of new things in the past centuries because we have the capability, it has been with us but we never tapped into it. Now once we put these machineries into operation you'll see, (2:46). a new cycle of school of thoughts. Elevated knowledge which 3 weeks ago was impossible because with the elevation of the T this way we tap into a higher level strength, knowledge which has been hidden from mankind. This is part of the process of introducing this T. They said we were not so intelligent so many thousands of years ago and we became more and more intelligent because we allowed more dimensions in different kinds of information, M field, Plasmatic field strength in our brain. This T now opens that door into what we call the knowledge of the U which opens to the understanding of the man. these kinds of knowledge will gradually open up. The T and the sciences which we never understood will open up. We open the eye of the man to a new level of information which has comprehended nor been available for him to understand. This is part of the use of this new T. As we can receive higher strength energy understanding, we will think a different way too. We understand what you call a level of intelligence. These all will become apparent to all of us. You'll see people who talk about things and then the others talk about the same and it wasn't there until now. A new generation of the words and the feelings will be generated in the vocabulary of the mankind. (2:48). feelings which we never knew, now it comes because we feel it, we can understand it, we comprehend it. It's understanding new emotions that allows us to interact with the U Community, it's very much like you have an eyesight then you can see. Now you have to create a new emotion to be able to feel a soul and that means the elevation of your own soul, or opening part of it that you can feel it. These machines once we install them in prisons will allow the prisoners to be freed. the same way when we pull mankind in these machines we take man out of the prison of this planet, out of the prison of your own physical life into understanding the freedom of the U. It's not just for the prisoners of the prisons but it's for the prison of the man created for himself within the dimension of his own physicality. You'll see and observe new lighting system and observe different kinds of understanding of the information and dimension. You'll understand and feel new technologies that will be delivered that has the feeling of the emotions direct, in translating the emotion. You'll see that these technologies will be delivered in such a vast and strong way that will effect all of us in every dimension. My work can't be stopped because too many of you have learned it, (2:50). and know what to do with it and at the same time you have to move on to the next step. With the delivery of this T and the way it will be structured you'll hear, see and feel new dimensions which were not available as we are separate ?? selves and blocked it to our own dimensions. The doctors have to learn new ways, new understanding the scientists need to develop new systems that works with the total intensity of emotion. I will show one of these very

soon. In Vienna people saw it, now we'll show it in public, how you can control, can feel an emotion or create an emotion in another entity. It's interesting that this machine is not just for what you thought, processing your conditions but it does a lot more. What I see in the near future there'll be 1 machine on every corner of every street and most probably everyone of you will have one at home. It will become more essential then a car in a garage. It feeds, elevates, it brings you away from everything else which mankind has suffered and at the same time allows you to understand (2:52). a new level of freedom for mankind.

(2:54).
(2:56). .. I am going to open something and send it to Rick...
(2:58). (2:59:40) Shows a graph of the number of pills, medication taken .. (3:00). .. 47 tablets per day to a 19 year boy with epilepsy. Do we treat our animals better then our children? Then there is the pain on top of all these tablets, disability, family wrecking, and everything else. This is under the supervision of doctors, we'll release this data you'll see. Who are we making rich, the society or a bunch of policies, pharmaceuticals. Until you don't see these figures you don't understand how bad the situation is. ... (3:02). (3:04). (3:06). .. in 3 weeks time 8.5 tablets less. in 3 weeks it will be 22 less. (3:08). .. The first 2 weeks we don't allow the doctors to reduce because the system has to build. Q: Would the Enhancement Unit ever get to the size of a pill, instead of taking all those pills? In the future yes. (3:10). Don't forget you digest your food and convert the energy. It can be embedded, but that is time away. It's like the new Chips will have embedded power supply. ...
This is the court case in Belgium, the lady was on 20 tablets we brought it down to zero. They didn't tell the court this. .
(3:12). The Pharmacy has built 2 villas from this ...
.. I am sure we'll see the family of Red Circle coming to these machines. the machine will not operate for them.
(3:14).
.. Now you understand why I taught you ethics and why it's part of the teachings. Because we are here to make the change, the difference. (3:16). As part of making the difference we need to create that condition of difference. 08

Nobody can do it for us..
(3:20).
(3:22). Pill reduction for man in video.
.. The interesting thing is this gentleman actually owns a hospital.
(3:24).
... I am going to tell you a secret, when I met Red Circle he had nothing, no food to eat. I had to bring him money so he could buy food. When he sold me out to the Belgium's they bought him the most expensive apartment in Antwerp. (3:26). Now you know why he works for them, from rags to riches by selling the man's ?? and from riches to rags ?? We will show the bills we have paid. A man so wealthy, I'll show you the hospitals, we have the video of it, with all the things he owns he couldn't buy his life back, and the man who was given his life went to the court and faked it. ... Belgium security is giving a lot of information. They won't loose a kingship for a king artist. (3:28). All the wealth in the

world will not bring the wheelchair off, and all the youth in the world would not have brought the boy back to his family. The T can. I have put my life and all my assets to be sure this system in 2020 will be in the reach of most of man on this planet. It leaves you to decide. Hits home ...
Thank you for today. I have given you everything for free but this time you have to pay to free the mankind. I hope you understand. thank you very much.
(3:30).
Video again
END

299th Knowledge Seekers Workshop - Thursday, October 24, 2019

(Shandor elevated to Universal Community, ,)

English Transcription:

(:00). Video: "Where Science Meets the Soul" soul teachings 177 KS workshop.
(:19).
(:20). ...
(:22). One of our members of the Core Team, Shandor, was elevated to the soul of the Universal Soul. We all know him he is still in the dimension of physicality with us, but he has taken a path to the elevation of his soul to a new dimension. It's not a path unknown to us, we all know this path, how we make our way to the U Community and the Universal Soul, as in the intro video we saw. We have to understand the essence in leaving a smaller piece in the dimension of physicality, we become a bigger part to create a new cycle of life to become part of the creation of the Creator. In the dimension of soul which lead to the creation of cells in the body of the man and once we depart we become the creator of a bigger structure, the U Soul, which allows us to be able to participate in the beauty of the Creator, to be manifested across this U, the spans of Unicose. A lot of us have very good memories of the physical time of Shandor, and he is with us, amongst our souls, and my thoughts goes with him and his family, we give from our soul to them to go through this time, to understand, (:24). the changes in condition and changes in the physical dimension of the man. In the future as man understands more about the process of the creation this point of separation from the physicality is a birth to a new dimension much bigger then man could ever imagine. In time when we reach that point, it's a joy and a time of rejoice and we keep pictures and memories and we carry on a lot of things to remember the time when we were in physical dimension. It's very much when we go to another country and we see our family, we rejoice being with them and then we go home. That trip of holidays is the trip of the life of the man and now we join what we call non-dimensional position of the STM in dimension of the creation of teh universal soul. Our friends have gathered pictures, some memories of his physical time with us. As you know he is a member of the Core Team and the soul of the members of the CT stays sacrosanct are forever. It is important for us to understand that we all leave the physical life. We all have a time. As I heard very recently they said, why couldn't, why shouldn't, why did we

not. As I explained ... we are not here to change the course of teh physicality just because we have the knowledge. Our knowledge has to be, (:26). that we satisfy the dimension of the STM, not our precious physical time that we have. Then if this is not the point that we don't understand then everybody becomes a member of the KF that through the knowledge of the KF they have a physical life forever and we become a another cult. In total understanding of the KF teaching, we have to understand that physical dimension has limitation, whereas teh soul has no limitation in dimension of ?? in the soul of the Creator, then if we don't understand this, then everybody becomes a member of teh KF that they can last forever in physical dimension and whenever they can't do that then there is something wrong with the structure of the teaching of the KF. This shows lack of understanding of the truth on behalf of those who have no understanding of teh creation. We all take this path, even my soul, my physicality and the rest of me. The reality is we are here to nurture and to understand the process of the creation that comes to us after the birth in the new dimension. We all take this path, some of us shorter and some of us longer. Some of us we leave it to the decision of the soul because the others are not aware of teh physical pain we carry. As you'll see in teh videos which were collected, Sandor was a master, of making everything the KF made. he was a teacher. He taught everything and he knew everything. (:28). The KF showed him the way for him to decide and the soul has decided, not the physicality. In so many ways, he was aware of the whole knowledge, he was given every support in the dimension of knowledge, as teh last man standing, and as a teacher, and as one of the main, what we call participant in teaching operation. He could decide his own destiny, and it was left on that, even though we gave him all the knowledge. In fact the same goes for me as much as every one of us. We have teh knowledge, we have to choose the time and the place through the dimension of the STM. As a K Seeker, a member of the CT, as a support member of the U Council, teacher and master of teh KF, Sandor knew everything. He taught many how to do and make things. He could explain the details and intricacy understanding of the T, but the salvation of his soul was his own choice. The last times we talked with him, and had a conversation on any other point he was always aware that it was not my decision, or anybody else's, he had to take the path. So many of us we choose it our way even though it might not look the right way in the dimension of the physicality. I give from my soul to a member of the C Team and knowing what I know, he is safe. (:30). We praise his time with us and we praise his soul that it still gives us to guide us through. What we need to learn now that he has become a universal teacher ...

Flint plays video. Kakasi Sandor: 09/17/1961 - 10/22/2019...
(:38).

(:42). ... Rick shares his experiences with Shandor. .. (:44). (:46). (:48). ..
Alzar talks about Shandor ...
(:50). R- He passed at 11:11 on 10/22/2019 (numbers add up). (:52). R- I bought 2 lottery tickets in memory of Shandor. $2 winner, it matched 222, 2nd ticket also came it matched $2 winner, ... he scratched an hour ago. again $2 and 2nd $2. It's a sign that strings are being pulled in this dimension. ... Carolina talks about him. (:56). We all met in Trany, Italy. ... (:58). .. He was cheeky, a walking library ...
(1:00). ...

(1:02). (1:04). Flint shares his experience. ... (1:06).
(1:08). .. His soul is more powerful to help from the soul level ...
(1:10). Jani speaks in Romanian ... (1:12).
(1:14). Sandor's Youtube teaching videos ...
(1:16). (1:18). The announcement from Putin is that this was an historic announcement they made towards peace in that area , .. Syria will be the end of all wars. It's interesting that, that occurred on the day that Shandor passed. A big part of Shandors work was towards world peace and the One Nation ... (1:20).
(1:22).
(1:28).

(1:34). Rumanian reads question in Rumanian. Q: For detachment of the soul is it about insolating the earth field and us? R- Is it necessary to detach an insulator between the earth's field and us similar to the Chinese system. (1:36). meaning a Nano insulating layer between the earth's field and us? ... Is the insulator needed or not? K- I don't understand exactly what the question is? (I am not sure either) R- Is it necessary to have a buffer between us and the earth's fields.? K- What does that mean? R- It's about detachment of the soul, ...(1:38). K- Let's see if they come back, maybe we can understand more. Ursula- ... (1:42). ...
(1:44). .. I love you Shandor.
